ROBERT ALEXANDER FALCONER

M.A., D. Litt., LL.D., D.D.

PRESIDENT OF THE
UNIVERSITY OF TORONTO

NE of the most pleasing and remarkable features of university life in the United States is the abiding loyalty of the graduates to their colleges. Nor is this confined to smaller institutions. In large universities with extensive professional schools the same spirit is found. This virtue is one which should thrive north of the border as well as on the other side, for our more rigorous climate does not chill our hearts. Therefore, with confidence we look to our graduates for steady support in whatever way from time to time the university or college or faculty may need their help. Perhaps the average graduate is not prone to enthusiasm. He may indeed be told that academic training represses enthusiasm. But I hope that you will enter upon your new duties in the larger world with some of the zest, though more disciplined, with which you came to the university. Do not be ashamed of enthusiasm for the right things. Like a strong breeze, it may sometimes carry you over the shallows on which you would otherwise be in danger of grounding. Life is not all plain sailing, but at the university you must have learned some few sailing directions, and we can but hope that you will soon become experienced mariners. May you be generous of heart as good sailors are, dauntless in storms and perils, and successful in the voyage of life.

R. A. FALCONER.

Historical Sketch of University of Toronto

THE germ of the University of Toronto may be found in the Royal Charter of 1798, which appropriated Crown lands for the support of a college or university. Nothing further was done until 1829, when Sir John Colborne, Governor of Upper Canada, founded King's College, but it was fifteen years before a College building was erected, facilities established and instruction of students commenced.

The early life of the College was disturbed by religious discussions to such an extent that in 1850 it was found necessary to alter its constitution. Divinity had formerly been one of the courses of study, but now, on account of the dissensions arising therefrom, it was eliminated from the curriculum and instruction was to be given only in Arts, Medicines and Law. At the same time, the name of the College was changed from King's College to the University of Toronto, and the Government of the new University was handed over to a Senate, part of whose members were elected by the Crown. The Anglican clergy were not satisfied with the secularization of the College, so Dr. Strachan founded Trinity College, hoping that by its connection with the Church it would keep alive in the colony the best traditions of the colleges of the parent country.

About this time an important change was made in the constitution of the University. The result of it was that the University of Toronto became merely a degree-conferring body and a new institution known as University College was created for the purpose of teaching. Thus there was a complete separation between the examining and teaching bodies—a condition of affairs which quite often led to serious difficulties. Even though this anomalous condition of affairs continued to exist, the University, under the guiding hand of Rev. John McCaul, prospered and succeeded in adapting itself to the conditions of that particular period. The need of a permanent home for the College was quite pressing at this time. Lectures were first delivered in a building upon the site of the present Parliament Buildings, but by an Act of the Legislature the Government secured this property and the College was obliged to secure other quarters. Realizing the need of the University for a permanent home, mainly due to the untiring efforts of Sir Edmund Head, an old Oxford professor, work was commenced in 1856 upon the present edifice of University College. It remains to-day in

the beauty of its architecture, and in the magnificence of its conception, as an enduring tribute to the exquisite taste and the unfaltering confidence in the future of the early University pioneers.

The next great epoch in the life of the University was the Federation Act of 1887, which abolished the above-mentioned unnatural divorce between the teaching and examining bodies and sought to effect the union of all the denominational colleges in Ontario with the Provincial University. The result of this Act has been highly satisfactory, as out of six formerly separate colleges only one remains out of the fold at present. With the increase in attendance caused by federation there also came a demand for new courses of study. In 1887 the Faculty of Medicine was restored, which had ceased to exist in 1853. In 1888, the Royal College of Dental Surgeons entered into affiliation with the University and the year following the School of Practical Science did likewise.

With the growth in size, the cost of maintenance went up by leaps and bounds so that application was made to the Government for increased financial aid. As a direct outcome of this, we have the third great epoch in the life of the University, when the Government in 1906 passed the University Act, which ensured a steady increase in revenue from the Provincial Government, commensurate with the cost of maintenance. By the same Act the government of the University is placed in the hands of a Board of Governors, consisting of the Chancellor and the President as ex-officio members, and a Council composed of eighteen members, appointed by the Lieutenant-Governor-in-Council. The effect of this legislation has been found beneficial in all departments. The University is now equipped with funds sufficient for it to fulfil the obligations which devolve upon it as the leading educational institution of Canada.

No historical sketch would be complete without mention of the "new regime" ushered in by President Falconer upon his installation as President in 1907. The progress of the University under his guiding hand, working in co-operation with the Provincial Government, has been truly phenomenal. As an indication of this, it is needless to remind one of the increased attendance, the enlarged staffs in the different colleges, the new courses, the new buildings and the general *esprit de corps*. In conclusion, let us hope that she may continue to prosper as she has done in the past, and that under the present efficient guidance she may fulfil the promise of the present era.

THE UNIVERSITY LIBRARY, WITH THE NEW WINGS.

B. A. BENSLEY, B.A., PH.D., *Associate Professor of Zoology.*

N. H. BEEMER, M.B., *Extra-Mural Professor of Mental Diseases.*

G. A. BINGHAM, M.B., M.D., C.M., *Associate Professor of Clinical Surgery and Clinical Anatomy.*

GEOFFREY BOYD, B.A., M.B., *Associate in Laryngology and Rhinology.*

T. G. BRODIE, M.D., F.R.S., *Professor of Physiology.*

H. A. BRUCE, M.D., F.R.C.S. (Eng.), *Associate Professor of Clinical Surgery.*

G. H. BURNHAM, M.D., F.R.C.S. (Edin.), *Professor of Ophthalmology and Otology.*

E. F. BURTON, B.A., *Demonstrator in Physics.*

I. H. CAMERON, M.B., F.R.C.S. (Eng.), *Professor of Surgery and Clinical Surgery.*

W. P. CAVEN, M.B., *Associate Professor of Clinical Medicine.*

GRAHAM CHAMBERS, B.A., M.B., *Associate Professor in Clinical Medicine.*

C. K. CLARKE, M.D., LL.D., *Professor of Psychiatry.*

R. J. DYWER, M.B., M.R.C.P. (Lond.), *Associate Professor of Clinical Medicine.*

J. H. ELLIOTT, *Associate in Medicine and Clinical Medicine.*

W. H. ELLIS, M.A., M.B., *Professor of Toxicology.*

FREDERICK FENTON, M.D., C.M., *Associate in Obstetrics.*

J. T. FOTHERINGHAM, B.A., M.D., C.M., *Associate Professor of Medicine and Clinical Medicine.*

A. H. GARRETT, M.D., C.M., *Demonstrator of Clinical Surgery.*

L. GILCHRIST, M.A., *Demonstrator in Physics.*

WILLIAM GOLDIE, M.B., *Associate in Clinical Medicine.*

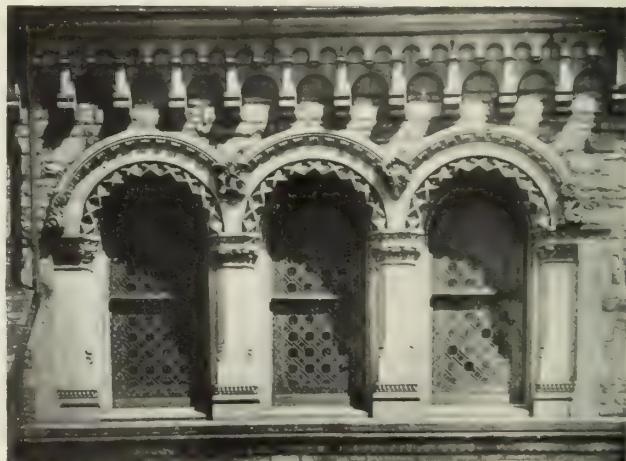

A. R. GORDON, M.B., *Associate Professor of Clinical Medicine.*

V. E. HENDERSON, M.A., M.B., *Associate Professor in Pharmacy and Pharmacology.*

W. R. LANG, D.Sc., F.I.C., *Professor of Chemistry.*

J. B. LEATHES, *Professor of Chemical Pathology.*

A. B. MACALLUM, PH.D., LL.D., F.R.S., *Professor of Bio-Chemistry.*

Faculty of Medicine—Continued

J. M. McCALLUM, B.A., M.D., Associate Professor of Ophthalmology.
W. J. McCOLLUM, Associate in Medicine and Clinical Medicine.
G. R. McDONAGH, M.D., Professor of Laryngology and Rhinology.
K. C. McILWRAITH, M.B., Associate Professor of Obstetrics.
J. J. MACKENZIE, B.A., M.B., Professor of Pathology and Bacteriology and Curator of the Museum and Laboratories.
P. W. H. McKEOWN, B.A., M.B., Associate Professor of Clinical Surgery.
J. C. McLENNAN, B.A., Ph.D., Professor of Physics and Director of the Physical Laboratory.
J. P. McMURRICH, Professor of Anatomy and Director of Anatomical Dept.
ALEXANDER MCPHEDRAN, M.B., Professor of Medicine and Clinical Medicine.
H. T. MACHELL, M.D., Associate Professor of Obstetrics and Pediatrics.
F. W. MARLOW, Associate in Gynaecology.
H. C. PARSONS, B.A., M.D., C.M., M.R.C.P. (Lond.), Associate in Clinical Medicine.
W. H. PIERSOL, B.A., M.B., Associate Professor of Histology and Embryology.
N. A. POWELL, M.D., C.M., M.D. (Bellevue, N.Y.), Professor of Medical Jurisprudence and Associate Professor of Clinical Surgery.
A. PRIMROSE, M.B., C.M. (Edin.), Associate Professor of Clinical Surgery.
R. A. REEVE, B.A., M.D., LL.D., Professor of Ophthalmology and Otology.
T. B. RICHARDSON, M.D., C.M., F.R.C.S. (Edin.), Demonstrator in Clinical Surgery.
J. F. W. ROSS, M.D., Professor of Gynaecology.
R. D. RUDOLF, M.R., C.M., M.R.C.P. (Lond.), Professor of Therapeutics.
G. S. RYERSON, M.D., C.M., Professor of Ophthalmology and Otology.
CHARLES SHEARD, M.D., C.M., Professor of Preventive Medicine.
C. B. SHUTTLEWORTH, M.D., C.M., F.R.C.S. (Eng.), Associate in Surgery and Clinical Surgery.
C. L. STARR, M.B., Associate Professor of Clinical Surgery in charge of Orthopedics.
F. N. G. STARR, M.B., Associate Professor of Clinical Surgery.
W. B. THISTLE, M.D., Associate Professor of Clinical Medicine.
CHARLES TROW, M.D., C.M., Associate Professor in Ophthalmology and Otology.
J. F. UREN, M.D., C.M., Associate in Surgery and Clinical Surgery.
D. J. G. WISHART, B.A., M.D., C.M. (McGill), Associate Professor in Laryngology and Rhinology.
A. H. WRIGHT, B.A., M.D., Professor of Obstetrics.
R. R. WRIGHT, M.A., B.Sc., LL.D., Professor of Biology.

SESSIONAL APPOINTMENTS.

A. H. ADAMS, Assistant in Clinical Medicine
T. D. ARCHIBALD, B.A., M.B., Demonstrator in Clinical Medicine.

D. H. BODDINGTON, Assistant in Clinical Laboratory.
E. C. BURSON, Demonstrator in Clinical Medicine.
M. H. V. CAMERON, M.B., Assistant in Clinical Surgery.
A. W. CANFIELD, M.B., Demonstrator in Anatomy and Clinical Assistant in Pediatrics.
H. CLARE, Demonstrator in Psychiatry.
F. A. CLARKSON, M.B., Demonstrator in Clinical Medicine.
F. A. CLELAND, Assistant Demonstrator in Gynaecology.
E. C. COLE, Demonstrator in Therapeutics.
C. J. COPP, M.D., C.M., Demonstrator in Anatomy.
M. M. CRAWFORD, M.B., Demonstrator in Obstetrics.
W. F. I. DEY, Class Assistant in Pharmacology.
A. W. M. ELLIS, Fellow in Chemical Pathology.
M. H. EMBREE, Assistant in Anatomy.
J. G. FITZGERALD, Lecturer in Bacteriology.
N. D'ARCY FRAWLEY, Demonstrator in Anatomy.
R. E. GABY, Assistant in Clinical Surgery.
W. E. GALLIE, M.B., Demonstrator in Pathology and Assistant Curator of Pathological Museum and Assistant Clinical Surgery.
J. A. GARDINER, B.A., Class Assistant in Physics.
J. S. GRAHAM, Assistant in Clinical Medicine.
F. C. HARRISON, Class Assistant in Pharmacology.
A. C. HENDRICK, M.A., M.B., Demonstrator in Gynaecology.
W. B. HENDRY, Demonstrator in Anatomy and Gynaecology.
R. E. HOOPER, B.A., M.B., Demonstrator of Anatomy.
G. W. HOWLAND, B.A., M.B., M.R.C.P. (Lond.), Demonstrator in Medicine and Clinical Medicine.
A. G. HUNTSMAN, B.A., Lecturer in Biology.
H. S. HUTCHISON, M.B., Demonstrator in Clinical Medicine.
S. JOHNSTON, Demonstrator in Anaesthesia.
ERNEST JONES, Demonstrator in Psychiatry.
W. W. JONES, Demonstrator in Anatomy and Clinical Surgery.
J. A. KINNEAR, Demonstrator of Obstetrics.
A. J. MACKENZIE, B.A., M.B., LL.B., Demonstrator of Pathology and Assistant in Clinical Medicine.
W. J. O. MALLOCH, B.A., M.B., F.R.C.S. (Eng.), Demonstrator of Clinical Surgery.
R. W. MANN, Assistant in Clinical Medicine.
MISS HELEN MACMURCHY, M.B., Demonstrator in Gynaecology.
J. H. MCPHEDRAN, M.D., Assistant in Clinical Medicine.
O. R. MABEE, Demonstrator in Pathology.

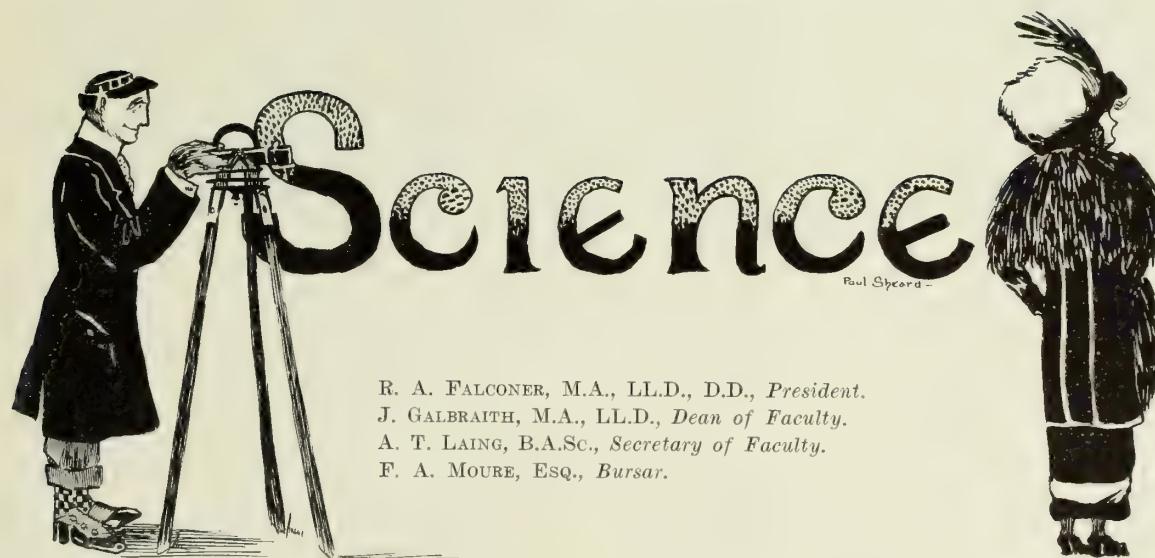

Faculty of Medicine—Continued

W. J. MABEE, Assistant Demonstrator in Obstetrics.
N. T. MACLAURIN, Assistant in Clinical Medicine and in Clinical Laboratory.
S. G. N. MAGWOOD, Assistant Demonstrator in Obstetrics.
DONALD MCGILLIVRAY, Demonstrator in Clinical Medicine.
O. A. McNICHOL, Demonstrator in Anatomy.
C. S. McVICAR, Assistant in Clinical Medicine.
P. K. MENZIES, Fellow in Pathology.
V. H. K. MOOREHOUSE, Class Assistant in Pharmacology.
BREFNEY O'REILLY, M.D., C.M., Demonstrator in Pathology and Clinical Medicine.
H. S. ROPER, Lecturer in Chemical Pathology.
J. A. ROBERTS, Demonstrator in Clinical Surgery.
W. H. PEPLER, M.D., C.M., Demonstrator in Clinical Medicine.
F. W. ROLPH, Assistant in Clinical Laboratory and in Clinical Medicine.
G. W. ROSS, Assistant in Clinical Medicine.
E. S. RYERSON, M.D., C.M., Demonstrator in Clinical Surgery.
W. A. SCOTT, B.A., M.B., F.R.C.S. (Eng.), Demonstrator of Anatomy and in Clinical Surgery.

N. C. SHARPE, Class Assistant in Pharmacology and Demonstrator in Anatomy.
N. S. SHENSTONE, Assistant in Clinical Surgery.
C. B. SHUTTLEWORTH, M.D., C.M., F.R.C.S. (Eng.), Demonstrator of Anatomy.
S. SILVERTHORN, M.B., Demonstrator in Clinical Surgery.
D. KING SMITH, Demonstrator in Clinical Medicine.
G. E. SMITH, B.A., M.B., Assistant in Clinical Medicine.
JOHN H. STEAD, Assistant in Clinical Medicine.
G. S. STRATHY, Demonstrator in Pathology and Assistant in Clinical Medicine.
C. J. WAGNER, M.B., Demonstrator in Clinical Medicine.
J. C. WATT, Assistant in Anatomy.
F. E. WATTS, Demonstrator in Pathology.
G. E. WILSON, Demonstrator in Anatomy and Assistant in Clinical Surgery.
A. B. WRIGHT, M.B., Assistant in Clinical Surgery.
W. W. WRIGHT, M.B., Demonstrator in Anatomy.
G. S. YOUNG, Assistant in Clinical Medicine.
W. D. YOUNG, Assistant in Clinical Medicine.

History of the Class of 1911

THE time has come for the class of nineteen hundred and eleven to make its last bow to the audience of the University world. It is "positively the last appearance" before the college doors swing to, leaving us outside—"graduates," whose day is past. We are no longer to be a vital part of the University, but it is our hope that we may leave behind us an influence which was worth while, as we take with us so much which our University life has given us.

With increasing age, they tell us, grows ever the habit of retrospection; and now that we are grown so old and wise in the things pertaining to the life of the University it well befits us to look back a little. It is not so very long, as time goes, since we first gathered from all parts of the Dominion to throng the corridors of the Main Building. It is sometimes difficult to believe now that the wise and dignified senior of to-day was then the innocent and unsophisticated freshman who vainly endeavored to locate such elusive places as the Chemistry Building or the "Biolog." Even then, however, there were not lacking indications of that spirit of good fellowship and zeal for studies and sport alike which has characterized the class ever since.

This class was not welcomed, as was then the custom, by the good old-fashioned "rush," though what the exact reasons for this omission were only the men of nineteen ten—with a little assistance from the faculty—could tell. It was for this class, however, to originate the plan of an athletic contest with the freshmen, to take the place of this time-honored—though otherwise much dishonored—custom; and this plan was so well received by the faculty and students alike that it is now an established factor in University life. It was in this year, also, that the idea of the social class class meeting was evolved to meet a long-felt want, though, to be sure, we did enter in the day of "Receptions" when everyone from the faculty down entertained the incoming year.

However, what need is there to dwell on all the glories and achievements of this class of "Onety-one"? Its praises have been sung, and its history written long 'ere now, and by many a worthier pen. No cold black words can truly express an influence, it must be felt, not spoken. As for the victories of the individual members of the year in the scholastic field, in oratory, debate, or athletics, the biographies which follow will give a much better idea of their magnitude than any words here could do. They form a much more complete history than any one person could write.

There have been many changes in the University since our advent in 1907. A new era was commencing when we entered, for with us came President Falconer. He was a freshman here with us, but, fortunately for the University, our graduating year does not see him, like us, leave the college halls for other far different places. In our first year Convocation Hall and the Physics Building were the new buildings, but now they seem almost like a tale of the past. Since then have grown up the Men's Residences, the Thermodynamics and Hydraulics Building, the new wing to the Library, and lately there have grown down—not up—those huge ditches, which, they tell us, are for the new heating system. We have been at the University during a period of great growth and expansion in every way, and we are leaving it at an even more hopeful time.

There now remain but a few more months till all the horrors of May are past, till June is past, too, which shall see all of us, we hope, kneel to have the much-coveted hood put over our heads, listen to the few murmured words which mean so much, and rise to go forth into that outer world which awaits each one. What the future history of our class is to be no one can foretell, but we do know that if it fulfills the promise of its undergraduate days many beside its own members will want to "cheer for the best year yet" and join in the "One, two, three and a tiger for Onety-One," which we hear so enthusiastically given now.

THE MOCK PARLIAMENT

THE Lit can never be persuaded to take itself seriously, chiefly on account of the frivolous nature of its Constitution and the epigrammatic tendencies of the Rules of Order. At any rate, it devolves on the Mock Parliament to dispose in one forced and stormy session of the more urgent matters so habitually disregarded by the members of the Lit. Fortunately, the high political ideals, and the superfine sense of honor of the latter body allow no crying evil to pass unnoticed.

For the session of 1910 earth had donned her ermine mantle, the Premier had had his teeth cleaned, and the Leader of the Opposition had had his twenty digits manicured. The other members were in quite as excellent fighting trim. Speaker Glory Alleluiah MacDonald took possession of the throne, and declared the fight on. Premier Gas Engine Edmonds, who originated somewhere below the Mason and Dixon line, rose in his seat and roundly abused the Opposition, defying them meanwhile to point even the little finger of scorn at the array of virtue which adorned the Government benches. Thereupon, Opposition Leader, Mr. Joy-juice Easy-Money Christie, was moved to violent insurgency, and denounced the Premier and his followers in a denunciation possessing much of the vim and freshness of a Western blizzard. The Premier had scarcely recovered from his indignation at such an unmerited attack, when he was threatened with annihilation by another colored gentleman. When this catastrophe was averted, the vast volume of business rolled on.

Mr. Duffé du Bois engaged in a violent altercation with Mr.

Joshem Along Devaney from a safe distance. Mr. Juicy Zoology Gillies gave a very able disquisition on the habits, good and otherwise, of certain members of the animal kingdom. Teddy Roosevelt, lately returned from Africa, in the incarnation of Mr. Water Proof MacKay, told of thrilling experiences in the Hamiltonian jungle, and during the recital the Tiger was seen to shed a furtive tear for its vanished glory. The ladies, as usual, were represented, but no active demonstrations were tolerated. Dainty Freshette Pepler, however, had some difficulty in repelling the demonstrative advances of Mr. Laughing Water Wood, who has since advocated Woman Suffrage.

While the Poet Laureate was giving the product of a year's sleepless vigils and feverish days, the Tiger plucked up spirit enough to come behind him and vent his disgust in his old-time roar. This was the chance of the spirit of the irrepressible Teddy, and he seized it at once. Stalking the miserable beast, he shot it in an awkward place. It is thought that the poor animal died of fright from the shock of hearing the report of the gun. All evening it had given evidences of a shattered nervous system. After Teddy had had his photo taken in the proper pose, the corpse was carried off, and eaten at the Dining Hall next day.

The "Evening Blast," edited by Murray Wrong and Harold Wrong, contains further particulars and much scandal. It makes delightful reading for the Sabbath at home, and was sold for five cents a copy, to the despair of all freshmen who had determined to economize.

MOCK PARLIAMENT.

E. G. Dixon P. Park W. J. Boyd C. G. Warner R. C. Geddes J. M. Wood H. Holmes O. Irwin R. W. Phillips
S. M. Scott J. E. Campbell L. W. Wood T. S. Gordon J. G. Bole H. E. Cutcheon C. S. L. Beck O. E. Carr
D. F. Pepler A. M. Boyle J. Z. Gillies G. E. Edmonds J. E. Christie T. H. B. McCullough W. P. MacKay J. A. Devaney

Mock Parliament—Continued

The Members of the House are as follows:—

GOVERNMENT.

The Right Honorable Gas Engine Edmonds—Prime Minister.

Another Baden-Powell Park—Minister of War and Worn-out Soocks.

Wilhelmnspa Jamas Boyd—Minister of Wieners de Milo.

Home-Sweet Holmes—Minister of Domestic Employment Bureau.

Jealously Evangelical Campbell—Minister of the Infernal Regions.

Josh-'em Along Devaney—Minister of Hat and German Bands.

Rhyming Couplet Geddes—Poet Laureate.

To Helland Back McCullough—Minister of Just Ice, Gin and Lemon.

Jolly Gink Bole—Minister of Kitchen Mechanics and Utensils.

A Mutt Doyle—Minister of Hose Reels and Real Hose.

Animal Manipulator Miller—Minister of Oatmeal and Haggis.

Reno Slugee MacBurney—Minister of Knockouts and Upper Cuts.

Cheese Sandwich and Lager Beck—Minister of Inside Information.

OPPOSITION.

Joy-juice Easy Money Christie—H.O.P.S. (Milwaukee).

Water Proof MacKay—T.E.D. (Mombassa).

Laughing Water Wood—S.O.U.S.E. (Minnehaha).

Woe Begone Coatsworth—S.A.D. (Hamilton).

Racy Women Phillips—P.A.D.S. R.A.T.S. (Hairpin, hook and hobble-skirt; delegate from Reno Suffragette League) (Holloway Gaol).

Terribly Somnambulistic Gordon—Pol. Sc. (Siberia).

Ozone Sipper Irwin—F.R.E.S.H. (Lot 12, Con. 6, Saugeen).

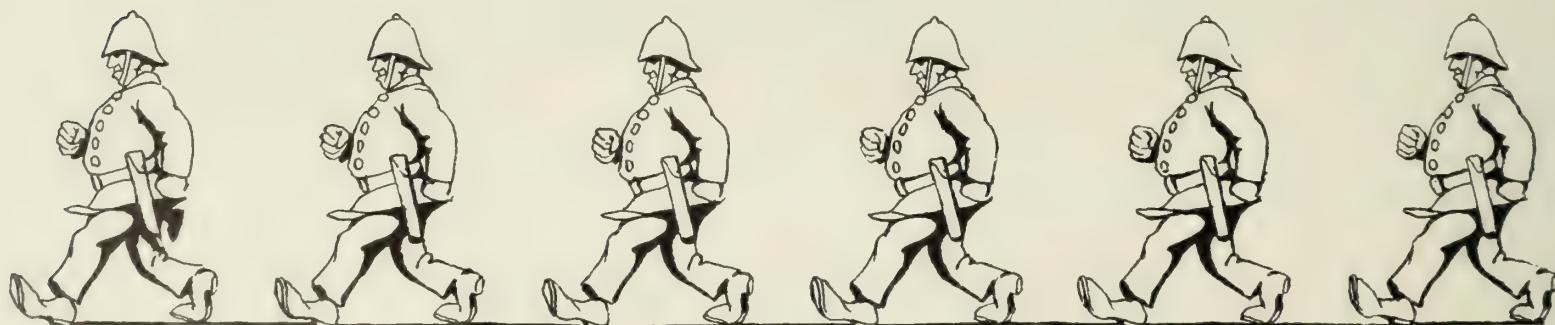

Juicy Zoology Gillies—B.U.G.S. (St. Petersbug).

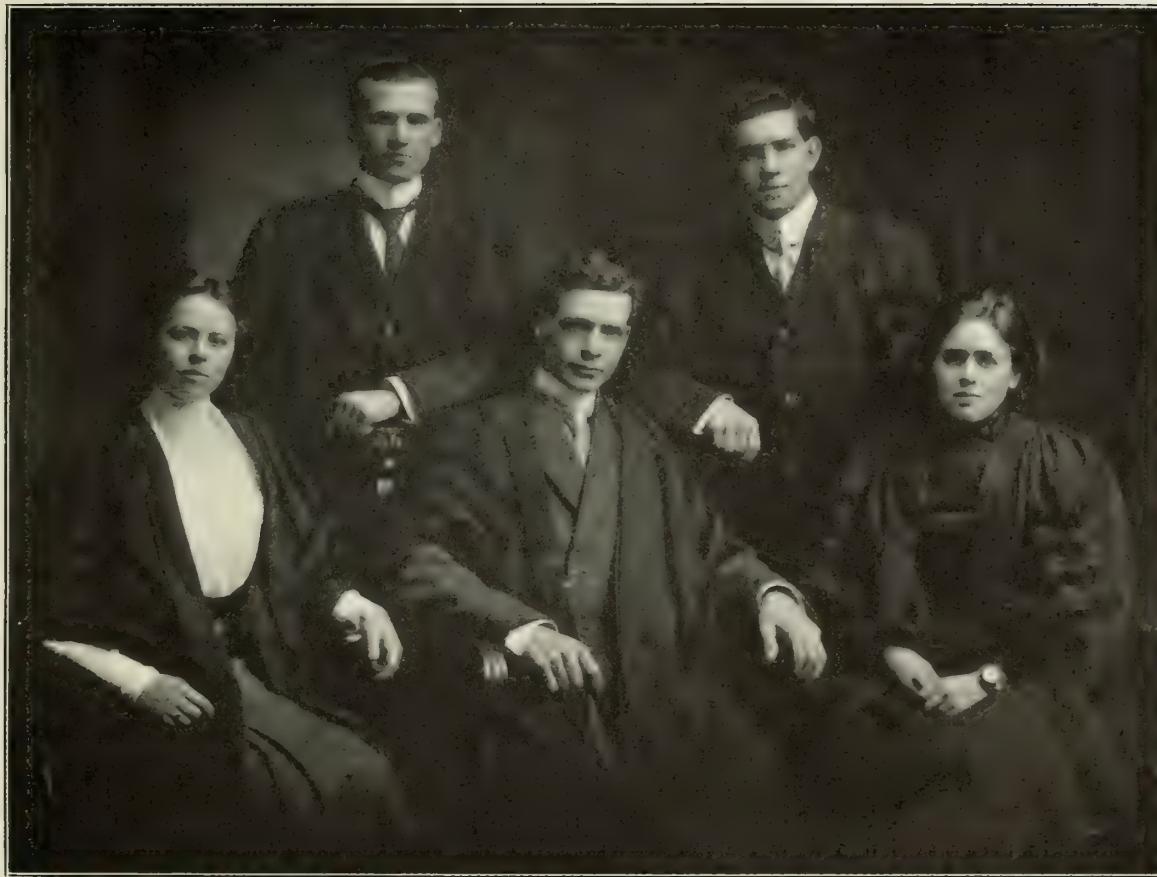

Jug Manipulator Wood—(Duffé du Bois), (Woodbridge).

Hits Everything McCutcheon—B.I.G. S.M.O.K.E. (Battle Creek).

Everlastingly Goldarned Dixon—D.E.A.D. (Aroarer).

Dainty Freshette Pepler—S.H.A.P.E. (Queen's Hall).

PERMANENT YEAR EXECUTIVE, 1911.

D. G. MacLean

S. A. Kennedy,
Secretary-Treasurer

Miss A. McLean,
Vice-President

A. S. Sibbald,
President

Miss J. M. Starr

History of the Class of '12

"**L**IFE is a process with ever new and unexpected developments, and satisfaction comes, not in resting and reviewing, but in the unceasing effort towards something higher."—President Falconer.

The re-opening of 'Varsity on September 27th formally marked the return of the Class of '12 to assume the responsibilities, and, at the same time, the glory of their position as juniors. Confidently did we tread once more the halls of our Alma Mater, proudly conscious that as sophomores and freshies, we had already scattered our fame abroad, and that, as juniors, we were prepared to meet and triumph over any difficulties that might cross our path.

The words of our honored President seem to express in a fitting manner the sentiment of the Class of '12. Two years of our University course have already flown away, and the junior year brings the silent, but impressive message that the end is near. In the course of our attendance at 'Varsity our attitude towards life has undergone a great change. The effervescent energy of the freshman stage, displaying itself in oft-repeated yells, the complacent look of the Sophomore Year, of which the owl is so fitting an emblem, have given away considerably. We look back with a smile upon the petty follies of the two preceding years, which, according to the law of causation, account in large measure for some of the heavenly luminaries of human creation. But now we realize that mere knowledge should not be our goal, and that we should strive to assimilate this knowledge to ourselves, as a means towards the great end of self-development.

Though we acknowledge that our reach must inevitably exceed our grasp, and that we must ever press forward, yet we can find

"moments to cast a look behind," and profit by considering what our Class has already accomplished.

It is certainly not too much to say that our Year numbers many students of very strong character, who are making themselves felt as agents for good among their associates at 'Varsity. One has only to consider the members of '12 who are identified in various ways with the clubs and societies connected with the University, to realize that '12 is a powerful factor in the life of our College. In the Literary and Scientific Society, members of '12 play a leading part, especially in the realm of oratory and debate, in which one of our members has helped to score a notable victory for Toronto University at Ottawa. In athletics, both men and ladies of '12 have won distinction, and now that the Dominion championship has crowned the efforts of the Senior Rugby team, in which our Year is well represented, we may turn from the men's sports to the girls', and watch closely for the result of the Ladies' Swimming Tournament, in which the girls of '12 are bound to distinguish themselves. Our Class Reception was a decided success, and, once more, was the spirit of good-will and comradeship of the members of the Class towards one another evinced. In fact, we have reason to think that many of the friendships formed will have a very important effect upon the lives of the students concerned.

It is most encouraging and gratifying to consider the progress of '12 at 'Varsity, and, with our high hopes and aims, we may surely expect to produce graduates who shall reflect credit upon their College and bear witness to the fact that "Onety-two, 'Varsity, is always best."

EXECUTIVE OF CLASS 1912, UNIVERSITY COLLEGE.

J. M. Pritchard, <i>Treasurer</i>	I. Knox	E. A. Bott	Miss Carrie	W. Fingland
F. C. Jeanneret, <i>Secretary</i>	M. Thompson, <i>Vice-President</i>	H. Patton, <i>President</i>	Miss Carter	W. Bastedo

History of Class '13

NETY-THREE is now in full enjoyment of its powers as a Sophomore Year. It was a delightful novelty to return in September to the Gray Walls, and to feel that one *knew* things. To guide the freshies, and explain the College customs held a peculiar attraction; and an expression of bewilderment from one of them made our heart warm towards him—in compassion, from the heights of our superior knowledge! Were we once like that? Ah, well, we have progressed; and what is our record?

After all, it is not a very long life we have had, however brilliant it may have been. There is still more ahead of us than we have left behind. We were a large class, and most have returned. Besides, we are glad to welcome to our midst a few new voyageurs.

Initiations present an ever-interesting field, and '13 has shown itself a worthy body, in helping to raise them to a higher standard.

Our annual Reception was a success. Many commendations we have heard, but no complaints. It was regulated according to a new plan, and began at 3.30 p.m., instead of the customary 4 o'clock. The refreshment numbers were so arranged that the usual confusion was

avoided, and everyone we questioned seemed satisfied. When all was over, the members of the Executive might easily have been recognized in that they appeared, perhaps, the most triumphant, and certainly the most tired, of us all.

In the realm of sport, the Class of 1913 has made a splendid record, and in the future is bound to add to its already long list of victories. Space does not allow us to enumerate the honors won, but, in passing, it might be noticed that such important events as the mile run; the half-mile, and the high jump were captured by men of this Year. The Class was also honorably represented on the stalwart wing line to which such a large share of the Tigers' downfall must be credited. The girls have won the title of the "Faithful Onety-three," due to the enthusiastic part they take in Y.W., Lit., and athletics. They have distinguished themselves in tennis, paperchases, hockey, and basketball. The captain of the basketball team was chosen from our Year.

"Although for years Thirteen has been a name of ill-repute,
We'll save it now from that stain, and honor it, to boot.
In future it will only bring a famous Class to mind,
Who left all other records of their College far behind."

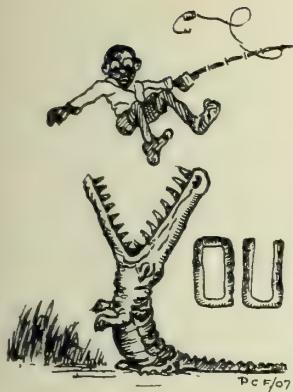

EXECUTIVE OF CLASS 1913, UNIVERSITY COLLEGE.

"It was a Roman Punch that knocked out Caesar!"

The Graduating Dinner

men of Onety-One may well look back on the Graduating Dinner as at least one bright spot in the growing dusk of your declining days. In spite of the hideous menace of the exams., which were ever drawing closer, some hundred men hied themselves to the St. Charles on the night of February 26th, there to make merry, and to spend their numbered hours with laughter and wassail.

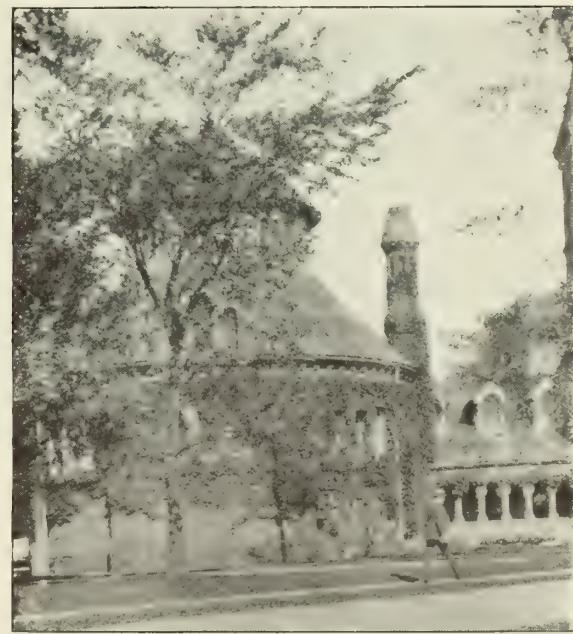

It is ill laughing on an empty stomach, however, and to provide against such a contingency divers oysters, clammy sacrifices, were offered up on the half-shell. A goodly number of chickens, also, have passed into the Great Beyond, a silent but effective tribute to the discriminating taste of the men of the ever-illustrious Class of 1911. After all this, and much more, had been dispatched, and after the succulent but treacherous Cuban weed had made the rounds, the toasts took the attention of the company.

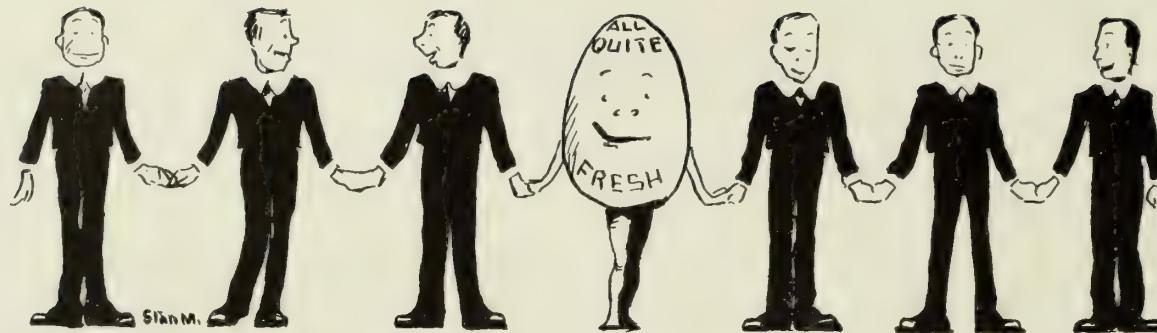

The Class was greatly honored by the presence of Mr. Lemieux, the Postmaster-General, who had kindly consented to spend the greater part of the evening with us. In answering the toast to the Empire, he gave some of his observations concerning the Japanese nation, which he had recently visited. He especially emphasized the fact that Canadian students could learn much from the example of the Japanese students, especially those in law. Principal Hutton answered the toast to the University. He was intensely serious as he urged on the near-graduates the duty that evolved on them to use the advantages which they had obtained in the strengthening of Imperial ties. To them and to other educated men was committed the task of moulding the opinion of Canada, and they must shoulder some of the responsibility for Canada's destiny. Grave or gay, Principal Hutton is always listened to with attention and respect, and never did a message get a better hearing than on that occasion. Professor Wrong, who responded to the toast to the Faculty, succeeded in lifting to some extent the veil of mystery which enshrouds the lives of these beings. Such peeps are always interesting to the student, whether from the scarcity of occasions, or the essentially human attributes which are often revealed in unsuspected quarters. His disclosures were hailed with delight by the

long rows of intelligent-looking students. Professor A. B. Macallum, he of the many degrees, spoke next. What he said has escaped my memory, and the situation is not made better by the fact that it was good enough to have remained. But it has not, and the reader of this must share the loss with me.

When the professorial speeches were finished, the Class of 1911 was left to its own devices. Immediately the scene became animated. Little attention was paid to further oratory. No one referred to our glorious past and tremendous destiny for fear of being mobbed. Many a grave Senior, moved by the spirit within him, danced gracefully among the palms. Some sang snatches of apparently unpopular songs. Everywhere was youth and hope, everywhere was gaiety and the forgetfulness of a dark-brown to-morrow.

Finally, about twelve o'clock the dinner was brought to an end. The Class of 1911 had practically eaten itself out of existence.

The History of Class '14

NOW everything has ceased to be new and strange to the eyes of the freshman. He no longer button-holes every kind-faced passerby to inquire where lies such and such a building, or to ask by what system the rooms of University College are numbered. Nor does he timidously make his appearance in a Fourth Year lecture, only to make a hasty and embarrassed exit amid the stamping of feet. We feel that this stage of our University existence has been left behind, and that we are now qualified to guide and direct a new race of freshmen in the way they should go. We even enter a lecture five or ten minutes late with perfect *sang-froid*, and take our seats, with a devil-may-care expression on our faces. In fact, so much at home are we that the attendance at most First Year lectures has dwindled down to a very comfortable figure. Many of our classmates seem, quite wisely, to have determined that the present is the time for pleasure before the final examinations have driven away all the joys of life.

Early in the year we received (or rather some of our number received), what little initiation was to fall to our lot. The Second Year invited us to spend an evening with them in the gymnasium. There several athletic contests took place between the rival Years, and then the proceedings were ended by a semi-rush. Needless to say we emerged triumphant and unscathed from the encounter, and to show that no ill-feeling existed on either side, both parties issued forth to serenade in promising quarters.

As is fitting, Arts '14 has taken a leading part in every branch of sport. Our President himself was a spare for the Rugby team,

champions of Canada, and we were well represented on the Second, Third and Junior Arts teams. Several of our men are striving for places on the 'Varsity and Junior Arts basketball teams. In hockey, too, we are doing well, as we shall probably chiefly compose the teams which will represent 'Varsity in the O.H.A. And, finally, it is rumored that the University College Freshette's hockey team this year will be an exceptionally *fast* and brainy organization.

Although the Class Executive remained unorganized until late in November, since that time they have accomplished a great deal. A very successful Class meeting was held during the first week in December, committees were appointed to make arrangements for the Class Reception in January, and the members of the Executive began to collect fees. If only the Class shows as enthusiastic a spirit in financial as in other matters, a successful reception is assured, and both dinners and dances *may* follow. However, historians must anchor themselves firmly to facts, and let such problems take care of themselves.

The history of our first year at the University is brief and uneventful, yet if we pass onward with that same spirit of optimism and enthusiasm which has pervaded all our actions, nought but success can attend our efforts in future years. The past has been, indeed, bright for us, but the future is still brighter. However, the poor mind of the historian is unable to conceive the magnitude of the reforms which we shall make, and the worth of the deeds we shall do in our succeeding years at Toronto. To the prophetess alone is it given to foreshadow and announce to the world these events, so full of moment for future generations.

In Memoriam

Wilson Hamilton Tackaberry, M.A.

[Obit MCMX.]

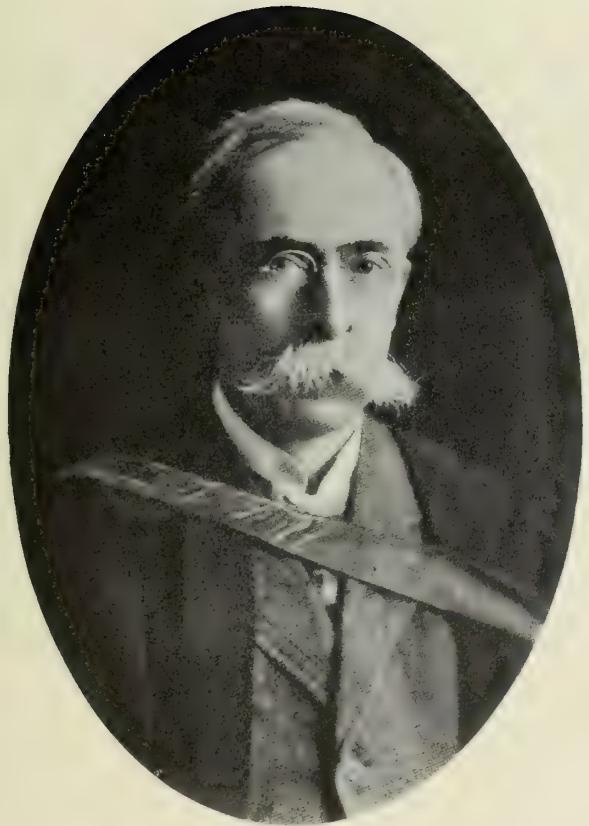

Wilson Hamilton Tackaberry was born near Kemptville on Dec. 5th, 1876. Graduating from High School at seventeen years of age, he taught public school until in 1900 he entered University College in Honor Classics. In 1904 he graduated with the McCaul Medal in Classics, and was appointed Instructor in Greek in the Classics Department. In 1909 he received the position of Lecturer in Greek. At the time of his death he had just completed his thesis for the degree of Doctor of Philosophy from the University of Chicago. In 1906 he married Miss Bertha Agnew, of Kemptville. Mr. Tackaberry was an excellent and able classical scholar. He was also a young man of the highest Christian ideals, loving and beloved. The influence of his life for good will long remain with the students of the University, and especially with the students of University College.

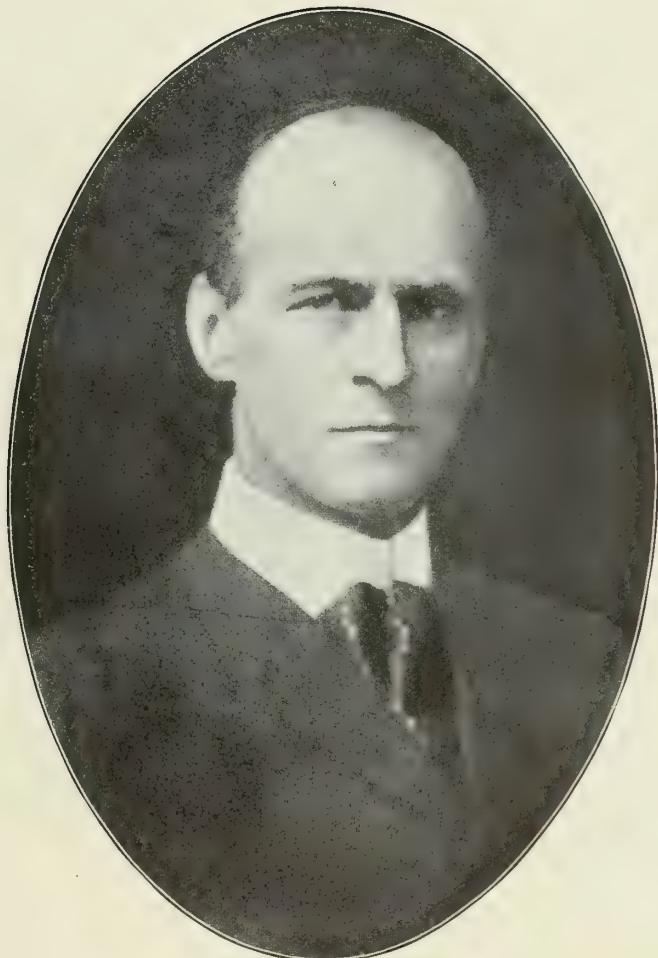

CONVOCATION HALL.

THE ARTS DANCE COMMITTEE.

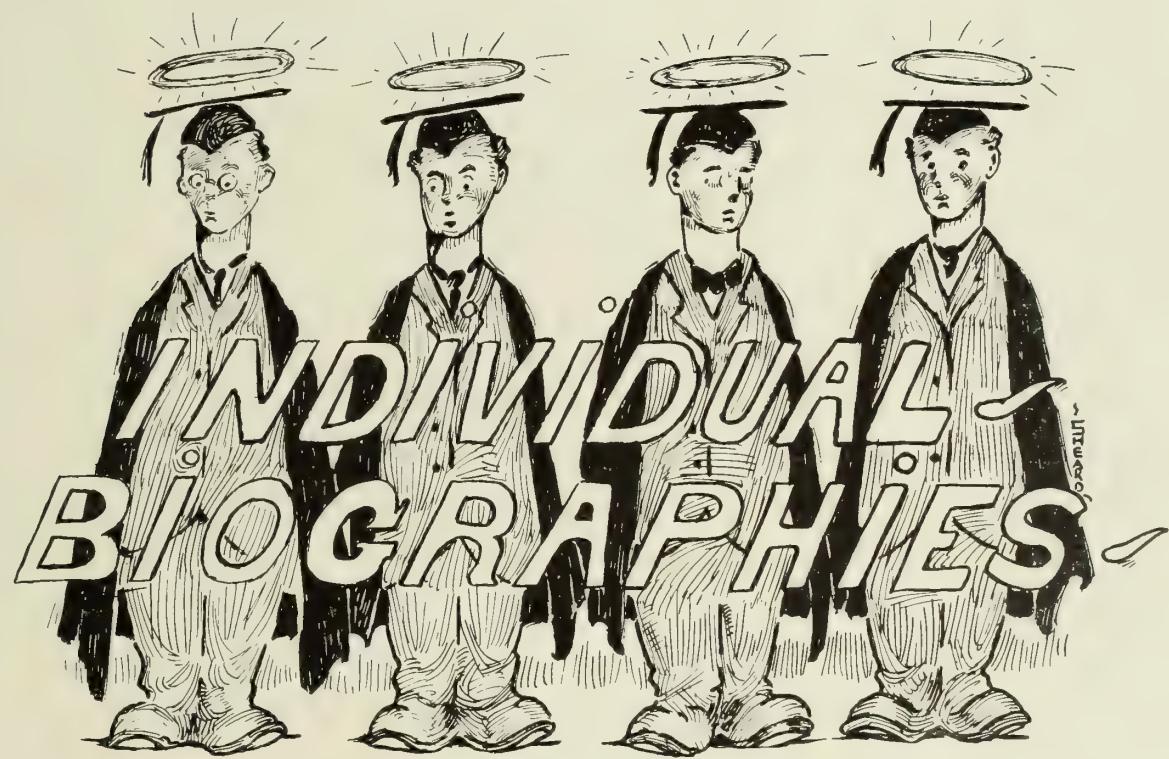

PROF. ALEXANDER.

PROF. WALLACE.

WYCLIFFE COLLEGE.

ADAMS, FLORENCE JEAN.

*"And she—as fairest is her form,
She has the truest, kindest heart."*

Florence was born in Plymouth, Michigan, but at an early age transferred her patriotism to Canada. She received her public and High School education in Essex, where she took her Senior Leaving in 1907. Having gained honors at home, Florence started at once to gain letters abroad. She entered Varsity in Mathematics and Physics, in which course she has taken very high standing with comparative ease. Her interest and spirit have been evident in all college circles. Her deep moral earnestness, wholesome philosophy of life and conduct cannot have failed to make their influence felt.

ADAMS, GLADYS.

"A life that leads melodious days."

Gladys Adams was born in Paris, and received her primary education in Brantford, her present home. In October, 1907, she registered at the University of Toronto, and has been a member of the General Course. She has held office on the Class Executive. Miss Adams is a member of the Alpha Phi sorority.

ARGO, WILLIAM LIND.

"Where there's a will there's a way—or a lawsuit."

From his name you might think him an abbreviated oarsman, but he isn't. He is merely a six-foot chip from an "Auld Kirk" minister block. His natal day was April 19th, 1890. His fatal day unknown. He is alive yet. He did not mind carrying the name William Lind, but we did, so we dubbed him plain "Bill." He worried, the teachers in the Dutton, Wingham and Parkdale Collegiate Institutes till he got the first E. B. Science Scholarship (1907). Sometimes he calls himself a chemist, other times not quite such a nice name. However, he is the biggest man in the C. & M. physically and mentally, and we take off our hats to him with a real smile.

ARMSTRONG, CHARLES HAROLD.

Entered in "Mathematics and Physics," and was transferred to "General"; since then has struggled with Political Science. Has been on a Mulock and Jennings Cup team, which didn't win. Managed Senior Arts Jennings Cup team in 1911. A member of the XIII Club. Prospective destination: Osgoode Hall.

ALLAN, JAMES STEWART.

*"For he's a jolly good fellow
Which nobody can deny."*

Through no fault of his own, Jimmie hails from Guelph. In the great autumn of '06, however, he made ample amends by taking the train for Toronto and introducing himself to the august professoriate of University College. His good nature and geniality at once made for friends, and he became an invaluable patron of all college games and functions. He has been a member of the Arts Dance Committee, Sporting Editor of Varsity, a member of the Executive of the U. C. A. A., one of the founders of the Prodigal Son's Club, and a member of the XIII. Club. He has also found time for lectures, and the net result is that he is now James Stewart Allan, B.A.

BAILLIE, WILLIAM TREVORROW HAROLD.

*"And Nature compromised betwixt
Good fellow and recluse."*

Born in Toronto, August 11th, 1888. He received his primary education in the Eglinton public school. Later he attended Jarvis Street Collegiate Institute, from where he graduated in 1906. Entering the B. & P. course, he proceeded to make a record for himself, which culminated in his final year, when he held the Daniel Coulson Scholarship. A more thorough and painstaking student would be hard to find, and when he is separated from his studies, he proves to be a capital fellow.

BAIN, MARY.

During her first quinquennium of care-free girlhood, an ardent lisper of original Canadian fairy stories; during her second, an active friend of dumb creatures, an ever welcome playmate, a reliable helper in domestic affairs, and a diligent pupil of Borden Street Public School, Toronto; during her course at Harbord Collegiate Institute an obliging companion, frank, sympathetic and steadfast, and an assiduous scholar, excelling in modern languages—her amiability and scholarship winning for her the coveted honor of valedictorian; during her four years at University College an apt student of modern languages, and a genial lady, unwearied in courtesies that abate misery and improve happiness—these are biographical details of Miss Mary Bain, who is—

*"Not too bright or good
For human nature's daily food."*

BAKER, MARGUERITE.

*"Those about her
From her shall read the perfect ways of honor."*

Marguerite Baker played the first acts of her life in the pretty town of Picton. Thence, bearing a high testimonial in the form of the McCabe Bequest, she came to Toronto to enter University College, where, in the Modern Language course, she has shown her ability to mingle wisely pleasure and work. During her college life, Marguerite has been for many of us the type of punctuality, cool-headedness and steadfastness. Our best wishes go with you, Marguerite, throughout your life!

BALL, ALICE I. N.

*"Resolutely and faithfully what she was, and humbly
what she aspired to be."*

Alice Ball was born in Woodstock, Ont., where she received her preparatory education. She entered the University of Toronto in 1907, with the first Edward Blake Scholarship in Mathematics, and in her second and third years stood head of the class in Mathematics and Physics. Miss Ball has been twice on the Cabinet of the Y.W.C.A., and was sent as a delegate to the Student Volunteer Convention at Rochester. She has also served for two years on the Executive of the Women's Literary Society, and in her senior year on the Class Executive.

BARR, A. ESTELLA.

*"How doth the little busy bee,
Improve each shining hour!"*

Bright and active, Annie Estella Barr has flitted from North Bay schools to Harbord Collegiate Institute, and thence to University College. Her industry and true desire for knowledge have always placed her high in all her class lists. Entering college with very high honors in general proficiency, she has kept her first class in every year of her Modern Language course. "Dottie," for thus her school friends will always call her, has not devoted her energies to academic work alone, but has performed faithful work on the Executive of the Modern Language Club, and has displayed her histrionic ability in an Italian play. Truly, Dottie holds the key to success in life.

BARRY, MINNIE LOUISE.

*"Blest with a temper, whose unclouded ray
Can make to-morrow cheerful as to-day."*

Minnie Barry was born in Guelph, but after receiving her early education there, changed her abode to Toronto, where she matriculated from Jarvis Street Collegiate Institute in 1907. On entering the University, she specialized in Moderns. At the same time she displayed a keen interest in all college pursuits, particularly in athletics, in every branch of which she has been an active worker. From her first year she has been a member of the championship hockey team, and in her third year was Curator of hockey, while, as a senior, she has held the office of Vice-President of the Athletic Association, as well as of the Anglican Women's Club. She is a member of Ontario Alpha Chapter of Pi Beta Phi fraternity.

BEATTY, PERCY WOOD.

*"Keeps his counsel, doth his duty,
Cleaves to friends, and loveth beauty."*

Percy was educated at Upper Canada College, in which institution he won many laurels, as the Herbert Mason medal indicated. He entered University College in the Classics course, but changed into Political Science in his second year. P. W. was always very prominent in all University circles, being on the Executive in his first year, and was well to the fore in the Lit. elections. He was also a member of the XIII Club. His unbounded spirits won him a host of friends, whose good wishes follow him to Osgoode Hall, where he intends to specialize for that most intellectual of professions, namely, law.

THE ARTS DINNER COMMITTEE.

BEATTY, JAMES STANLEY.

The subject of this panegyric was born in Toronto in 1890. He received his early education at the Model School and Upper Canada College, and came to Varsity in 1907. "Stan" has always taken an active interest in athletics at the University. He has played on the third hockey and rugby teams, captaining the latter in his last year, and has figured on the rugby, hockey and baseball teams of his year. He is also on the cricket eleven. Fraternity: Kappa Alpha.

BEEMAN, HARRY HENAUT.

"Here's to all of us!
For there's so much good in the worst of us,
And so much bad in the best of us,
That it hardly behooves any of us,
To talk about the rest of us."

"Doc," we are told, first hit this sphere some score years ago in the historic old town of Newburgh. For a few years the famous Newburgh Academy provided a field of activities, but being yet too young and green even for a Freshman, fond parents were instrumental in placing him in Napanee Collegiate for a couple of years. Here, in 1907, through some miscarriage of justice, our hero received his Honor Matriculation, which secured for him a place, as a Fresh Soph. in good standing, with the only and illustrious Onety-Naught. Political Science was the region of his activities, and his standing was somehow always creditable. All went well until November, 1909, when, on earnest recommendation, the University authorities decided that he merited a year's furlough. Hence, we find 1911 with one more illustrious name in its graduating class. "Doc" was a hard worker at times, a true friend, and a credit to anything with which he was connected. He is headed for law, where he is certain of a brilliant and successful career.

BELCHER, NORAH TRESILIAN.

"Pretty to walk with, witty to talk with, and pleasant, too, to think on."

Unlike the famous writer who had "little Latin and less Greek," Miss Belcher had a fair stock of both, acquired in the West Toronto Collegiate Institute, when she entered the class of '11. Throughout her course in Classics, she has combined work and play in admirable proportions. Deservedly popular, she has held offices in various departments of student activity. The good wishes of her classmates follow her as she graduates.

BELDEN, CLAIRE PEEL.

"Who mixed reason with pleasure and wisdom with mirth."

Claire Peel Belden came to Varsity in 1907, having received her early education in the United States, and matriculated from Guelph Collegiate Institute, entering the General course with the year of '11. She has, during her four years at the University, taken a great interest in all sides of college life, holding the office of Councillor on the Class Executive in her last year, as well as being President of the Women's Dramatic Club.

BELDEN, MILDRED ELIZABETH.

"A countenance in which did meet
Sweet records, promises as sweet."

Mildred was born in Toronto, and spent her younger days in travelling, having attended school in Boston and Pittsburg. She passed her matriculation from Guelph Collegiate Institute, and finally took up her residence in Toronto, becoming a member of the class of '11 in University College. She has always ranked well in the class lists, and has taken a keen interest in all the college activities, having been on the Class Executive in her Junior year, as well as an enthusiastic member of the Women's Dramatic Club.

BELL, HELEN YOUNG.

"Nature made her what she is."

London is the birthplace of Helen Y. Bell, and there her home has been ever since. Her preparatory education was received in the public schools and Collegiate of her native city. She entered the University of Toronto in 1907, registering in Natural and Physical Science, later choosing to specialize in Physics. Here she has shown marked ability, having obtained the A. A. A. S. Scholarship in her third year.

BELL, JAMES STARK.

Jimmy Bell was born in Chesley, and attended school there and also at Upper Canada College. He has liked Varsity so well that he has spent five years—in its precincts. He has been the champion centre scrum man on the Varsity Football Team for three years, and to see Jimmy come through the line is a revelation. Needless to say he has drunk deeply of the gore of the Tigers and Rough Riders. He intends to study law.

BELL, JAMES STEWART.

"His ways are ways of pleasantness."

Ailsa Craig claims Stewart Bell as one of her sons. He attributes his early education to the public school of that place and to the High School at Lucan. From the latter institution he won his Senior Leaving in 1902. For a time the teaching profession claimed his energies, but Varsity was his goal, and he joined the class of '09. Whether impelled by humanitarian motives or not, he answered the call of Ontario's youth for teachers, and left the class at the end of his freshman year. Streetsville H. S. and the Owen Sound C. I. held him for two years, and then Varsity knew him once again. He graduated in M. & P. in Onety-One. An assured popularity and success lies before him.

BEST, CECIL HAROLD.

*"And cloudy the day, or stormy the night,
The sky of his heart was always bright."*

"Pat" was born in 1886 at Mount Pleasant. He matriculated from Omemee High School, after which he spent two years teaching. But, conscious of wider fields of labor in store for him, he finally found his way to Knox College. "Pat" is an eminently sociable being. Any man who happened to be "in" at Knox expected at least one call from him each morning, afternoon and evening, often later. He chose Philosophy, and showed his Irish by taking keen delight in any thing destructive therein. Pat has a nature so full of fun, so generous, and of such open sincerity, that friends grow naturally around him. These qualities, coupled with a lively intelligence and a goodly gift of speech, lead his friends to predict for him a fruitful career in the ministry.

BIRNBAUM, SAMUEL JOSEPH.

"Sweet records, promises as sweet."

Joe is an Austrian born, a Torontonian bred. He took up his abode in Toronto in 1899 and entered upon his studious career. He attended and disgraced Jarvis Street C. I. during his High School days. Having obtained the fourth Edward Blake in General Proficiency, in 1907, he entered the B. and P. course. The first two years, owing to ill-health, he was unable to do himself justice, but in his third year he surprised the stalwarts of his class, ranking first. Three years' sojourn with the B. and P. proved enough, so in the following year he started with the Political Science Class of 1911—a decision reflecting credit on his discretion. Throughout his whole course has was a valuable asset to the Literary Society. In politics he was a staunch Unionist, and did yeoman service for that party.

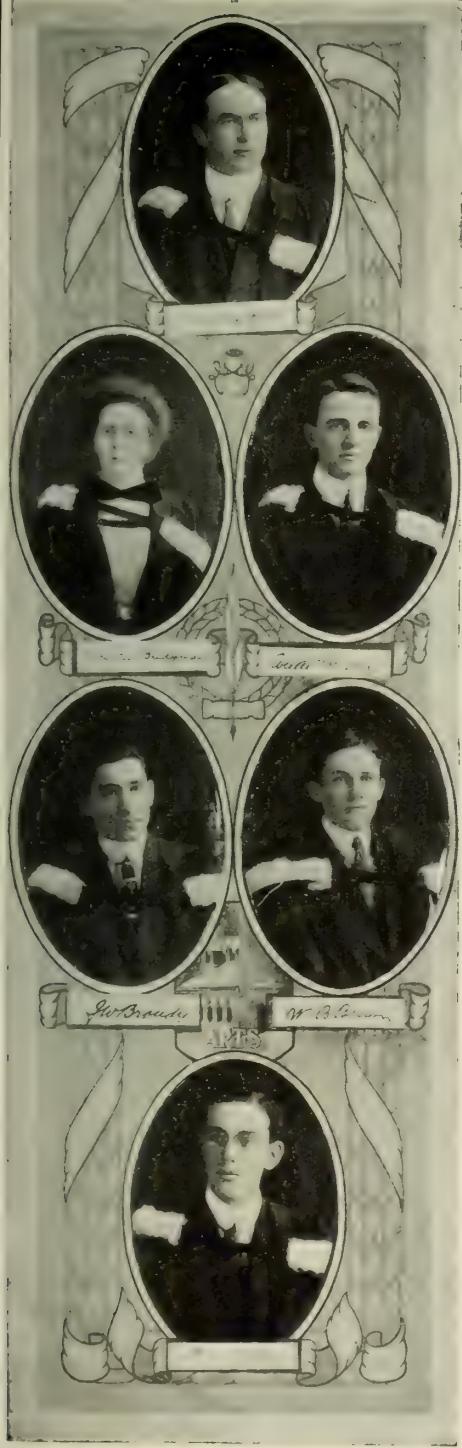

BLACKSTOCK, GIBBS.

Gibbs came down to Varsity in the fall of 1906, after having spent seven years at St Andrew's College, and entered the M. and P. course, where he remained for one year. Finding this field too cramped for one of his talents, he registered in C. and M., and for the past four years has spent some of his time in the Chemical Labs. He has played for two years on the cricket team, and in his final year is a member of the XIII Club.

BLAIN, MARY WILLIS.

*"Faithfully and resolutely what she was,
And humbly what she aspired to be."*

Was born in Toronto. She received her preparatory education at the Provincial Model School. Later she attended Branksome Hall, from which she matriculated in 1907, and registered in the General Course, helping to swell the ranks and fame of Onety-One. At Varsity she has given evidence of unusual ability—a friend, and not a slave, of books—. "Mary" is modest, sincere and destitute of envy.

BRACKEN, GEORGE ROBERT.

"A merrier man, within the limit of becoming mirth, I never spent an hour's talk withal."

Bracken emulated the example of other great men by choosing to be born in Dufferin County. He received his secondary education in Orangeville Collegiate Institute, and after presiding three years in "The Little Red Schoolhouse," headed for Varsity, looking for other worlds to conquer. He found them, and if you ask around Wycliffe, where Bracken has been in residence, they will tell you he conquered too. He is a good football sport, has been prominent in the Literary and Missionary Societies of Wycliffe, and a representative on the Undergraduate Union Executive. He is a whole-souled, witty and companionable chap, whose future work in the ministry should count for much.

BRIDGMAN, MAY LOUISE.

*"For she is wise, if I can judge of her,
And fair she is, if that mine eyes be true."*

May Louise Bridgman is a native of Welland County. She received her early education in the public schools there, then graduated from the Welland High School, and thereupon decided to cast in her lot with the Pedagogues. After having taught for a short time, she enrolled at Toronto University with the Class of '09. Her course was interrupted, and on her return to College she joined the ranks of the Onety-Ones. She has taken an active interest in the work and social life of the University, while her unselfish disposition, sympathetic nature and quiet humor have won for her many warm friends in College circles.

BRISTOL, EVERETT.

Born in Hamilton, and educated at Highfield School and the Royal Military College, where he graduated with the Governor-General's Silver Medal. Everett entered Varsity in 1908. His good debating qualities earned him a place on the Literary Society Executive, and he has been a constant source of strength to the "Old Lit." party. Everett played for Senior Arts Rugby team, and is Secretary of the University College Athletic Association. He has also served on the Arts Dinner Committee. He is a member of the Historical and XIII Clubs, and belongs to the Zeta Psi Fraternity. Everett has the brains and the energy that make for success, and we expect a brilliant career for him in law and politics.

BROUDY, JACK WILLIAM.

"We are the same as our fathers have been before us."

The stork brought Jack to the Queen City in December, 1889. Jack's thirst for knowledge showed itself in the first few minutes of his existence. With equal aptitude he quickly passed through public school and then through a rather stormy course at Jarvis Collegiate. From here he matriculated in 1907. About this time it was whispered by the world at large that Jack intended to take up law, which report he verified, to the great sorrow of the other professions, by signing up with Political Science, Class '11. Clever, bright, and of a genial disposition, it is not hard for his friends to predict for him a successful career.

BROWN, WILLIAM BERTRAM.

*"It is not growing like a tree
In bulk, doth make man better be."*

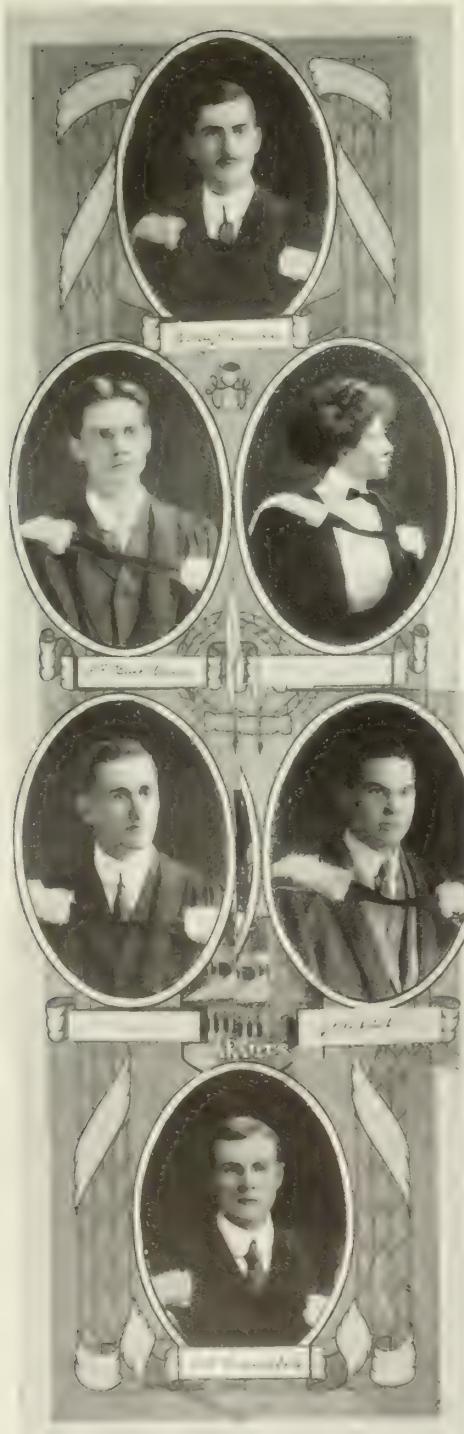

Bert is a product of Lambton County. Born at Point Edward, he rec'd both sides of t' years at Sarnia, Toronto with the Class of 'Onety-One, and English and History, and has gone well. Everyon' wishes will fo' sm.

BRYCE, HENRY.

*"A soul as full of pride,
Which nothing seeks to show, or needs to hide."*

Heine is an old Harbord Collegiate boy, from which he matriculated with a Scholarship. He entered the B. & P. Course with the Class of '11, and has always been very popular among his classmates. As well as being a brilliant student, he has always taken a great interest in athletics, being one of the "stalwarts" of the Senior Arts Rugby team. In politics he was a staunch Old Lit. supporter, and made an especially good canvasser among the freshettes. In his final year, he was elected Second Vice-President of the year by acclamation. He was also on the Executive of the Undergraduates' Union. We extend our best wishes to Heinie in his chosen profession, in which he is assured much success.

BURNHAM, SIDNEY SMITH.

*"His life was gentle, and the elements so mixed in him
That nature might stand up
And say to all the world this was a man."*

He received his primary education at the Provincial Model School, and at Upper Canada College. At the latter institution he always took a high standing and carried off several prizes. During the years he has spent at 'Varsity he has taken a lively interest in all the student activities, and was on the Executive of the Glee Club in 1909. His election to the XIII Club merely displayed the high esteem in which he was held by all with whom he came in contact. He intends to study law, and will spend the next three years at Osgoode Hall, where the best wishes of all his friends will follow him.

BURT-GERRANS, J. TRESAWNNA.

"What's in a name?"

"Burtie's" five feet five are a terrible warning against long "tags." He got tagged with it one freezing January day in 1879, down in Kent, the tobacco county. Evidently the nicotinic air doped him, for his old grandmother used to murmur to herself, "Is he all there?" But he "came back" for good when his baby eyes first peeped out of the car at Peterborough. Public and High Schools couldn't teach him half enough, so he tackled Pharmacy, and got a Phm.B. added to his awful load. That was the last straw. History shows he grew no more. When breadpill making palled on him, 'Varsity tried her hand. Here's to Burtie, one of our very best experimenters in Chemistry, and withal, a right good man and true.

CALDWELL, KATHLEEN M.

Miss Caldwell was born and educated in Toronto. During her course at Varsity she has managed to stay with the year and have a good time outside of it. She is well liked by all her acquaintances, and carries the best wishes of all after graduation.

CAMERON, WILLIAM JOHN.

"A time like this demands

Strong minds, great hearts, true faith, and ready hands."

"Bill" was born at Cranbrook, January 27th, 1889. His Collegiate training he received at Seaforth, where incidentally he was introduced to a real live football and "fell in love at first sight." The Hough Cup, however, could not hold him, so to Varsity he came. Here he has been a member of the Senior Varsity team for three years and is Captain in his final year. In every department of College life "Bill" has taken a healthy interest, and Varsity is surely the better for his having spent four years within her walls. In the M. & P. course he has taken a high stand throughout. An able student, a manly sport, and a Christian gentleman, we wish him every success.

CAMPBELL, WALTER R.

*"My midnight lamp is weary, as my soul,
And, being unimmortal, has gone out."*

The hereinabove-displayed portrait is that of Walter R. Campbell, worthy wight and willing worker, in the manifold branches of scientific study embraced by the P. & B. Course. Born in Port Robinson, 1891, he shortly after migrated to Los Angeles, California. In 1906, in obedience to some hitherto undemonstrable chemiotactic attraction, he gravitated to Canada. After a year at St. Kitt's Collegiate, he joined the Class of 1911. To attempt description of a character presenting phases as numerous as the facets of the insect eye, would be futile. Suffice it, that his College career has been marked by consistent industry and hearty participation in the social features of University life.

CAMPBELL, JOHN ESSON.

*"Since we deserved the name of friends,
And thine effect so lives in me,
A part of mine may live in thee,
And move thee on to noble ends."*

Born near the Village of Belwood, Jack received his early training in the Wellington public schools and Fergus High School, after which he graduated from the Ontario Normal College, at an age too young to mention. He spent the following three years instilling some of his own enthusiasm and energy into the children of Paisley Block and Everton. In University, he not only excelled as a Mathematician, in spite of serious handicaps, but represented his year successfully—in interyear debates—as sophomore orator—and twice on the Mock Parliament. Jack was indeed a University man.

CARR, OSBORNE ELLIOTT.

"There's not a breathing of the common wind that will forget thee."

Carr was born in 1886 at Woodford, Ont. Being descended from Irish parents he possesses the true and kindly heart of his forefathers. He received his early training in Woodford public school and Owen Sound Collegiate Institute, graduating '04. For three years he successfully ruled the youth of Walter's Falls. In '07 he joined the Class of '11 B. & P., but afterwards transferred to P. & B. While at University he has distinguished himself on the Senior Arts Association Football team. He has taken an active part in the Literary Society and held an office on the Class Executive in his final year. We wish him success in his medical course.

CARRIE, CYRIL RICHARD.

*"A capacious soul,
Placed on this earth to love and understand."*

It was in Irish Dungannon that Cyril first opened his eyes on the world. At an early age he removed to Goderich where he attended public school and collegiate, played hockey and other youthful pranks like most good fellows. In '07 he entered 'Varsity and took up residence at Wycliffe. During his University career Cyril has been honored with several important offices: convenor of the Y.M.C.A. Bible Study, Vice-President of the Wycliffe Lit., President of Wycliffe's Athletic Association, Secretary of the Mock Parliament Committee and a member of the Undergraduates' Parliament Executive. His manly, upright bearing and cheerful smile bespeak for Cyril a useful and worthy life in the Anglican Ministry.

CARRUTHERS, CHARLES WATTIE.

Charlie Carruthers was born in 1886 at a spot called Avening, Ont., which he assures us is on the map. At an early age an accident deprived him of his sight. Twelve years at the Brantford Institute, with finishing touches at Pickering and Woodstock Colleges, brought him to Varsity where he has throughout taken a high stand. Charlie never allows anything to depress his spirits—he plays the piano exceptionally well, is an enthusiastic rugby "fan," and takes keen enjoyment in smoking a sociable pipe and swapping a yarn. Charlie is one of the most admired men in his year, possessed of indomitable determination and perseverance and withal one of the best fellows going. We expect great things of him in the legal profession.

CHRISTIE, JAMES EDGAR.

"He who laughs last, laughs best."

James Edgar Christie was born January 28th, 1883. This catastrophe happened on a farm near the village of Southampton, Ontario, a district noted for the production of bone at the expense of brain ("J. E." is no exception). He passed through childhood, measles, mumps, school, and school-teaching without mishap. For four years he has been exposed to education at Varsity. Will he catch it? We really wouldn't bet on it. He once wrote a college play. In regard to it, he says he got the credit but not the cash. Five years on the prairie has made him an ardent Westerner. He is Arts representative in the Western Club. Outside of all this, he is a genial and companionable cuss. Here's to you J. E.!

CLARK, NORAH.

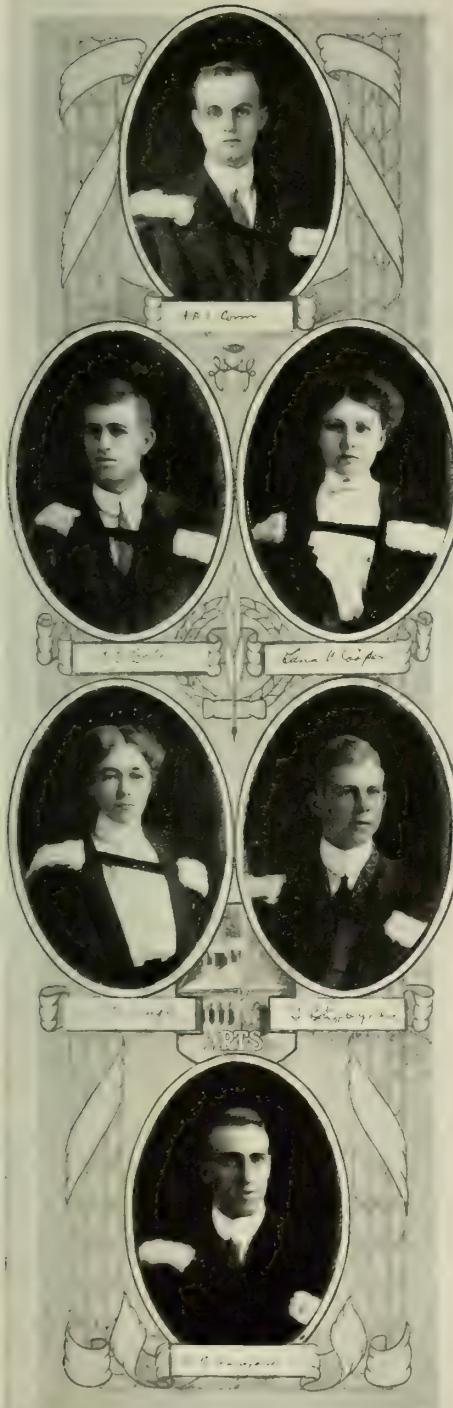

*"A smooth and steadfast mind,
Gentle thoughts and calm desires."*

Norah Clark was born in Hamilton. Thence, she moved to the little German town, Elmira, where sauerkraut and German gutturals so overpowered her that she was glad to take refuge in Toronto. Here she attended the Harbord Collegiate Institute, graduating with high honors, and entered University College. The Modern Language course has been her field of action here, and in it, she has always done excellent work. Norah's sweet, pleasant nature has won for her the friendship of many, and she will carry the best wishes of us all throughout her career.

COCHRANE, CHARLES NORRIS.

"Buono grammatico, meglino rettorico, autousta buono."

Charles N. Cochrane, for some unaccountable reason, boasts that the place of his nativity is the Irish settlement of Omemee. With greater justice the town is proud of its fairest product. After two years' light exercise in Lindsay, he showed the quality of his convolutions by heading two courses—Classics and English and History. The position of senior member of the Students' Parliament and secretary of its Executive, considered with his intense and disinterested love of Rugby, and his well-known propensity for the tenderer sex, more than compensate for the disgrace of his Academic achievements. Nay, more, the dust of the Classics has not choked that native fountain of wit which owes its origin to the Irish influences surrounding his tender years. Quid multa! Success to him!

CONN, HOWARD ALFRED LORNE.

Howard Conn was born in Ashton, Ont., in 1888. At a very early age "Connick" moved to Ottawa where he received his preparatory school training at the Ottawa Collegiate Institute. After matriculating he joined the home-seekers' rush to the West and tried ranching, but not getting action enough there he entered Arts, where he surely found his proper sphere. In football he played on the Junior Inter-Collegiate Champions for two years, was a member of the Junior Arts Mulock Cup team, '08-'09, and the Senior Arts Mulock Cup team, '09-'10. In '07-'08 he was a member of the Basket Ball Executive. In Track Athletics he always took a prominent part, being secretary-treasurer '08-'09, and manager '09-'10, in both of which years Toronto won the Inter-Collegiate Championship. Notwithstanding these varied interests, "Connick," as a student, was a gem of the first water and we prophesy a bright future for him at Osgoode Hall.

COOKE, KENNETH EDGAR.

*"A man he was to all the country dear
And passing rich with forty pounds a year."*

He of the sweet bass voice and the engaging smile entered Varsity in 1905. After his freshman year the call of the West held him for two years, but returning to college he entered the Honor Science course as a Sophomore of Class 1911. Here his genial manner and fair-mindedness has won him a host of friends. He has shown himself to be a persevering student of no mean ability and has held office in his Class Executive. In the field of sport he has proved an adept, being a member of the Interfaculty Association Champions of 1908, and has further distinguished himself in hockey. He pur- poses entering upon a Medical career and his pleasant ways and attractive features will bespeak for him great success in his chosen life work.

COOPER, EDNA VENA.

"The angels smiled when she was born."

Edna's face must have caught the reflection of their smiles, for it is her bright happy smile that has helped win for her many friends. She received her early education in Clinton, obtaining her Honor Matric. from Clinton Collegiate in 1906. The following year found her at Varsity, in English and History. But the lure of Mathematics was too great for Edna and in a month she was launched in the surging billows of Math. and Physics. Throughout her College Course, she has, by her truly unselfish, sympathetic nature, and her keen sense of humor, won a place in the hearts of all who know her.

CORDINGLEY, MARGARET LOUISE.

"Fashioned for friendship."

Margaret Cordingley matriculated from Oakville High School in 1906, and the following autumn she enrolled in Victoria College. She was compelled to give up her work in the middle of the session through ill-health. Returning in 1907, she joined the Class of Oney-One and repeated her year. At the beginning of her second year, she transferred to University College. Margaret has proven a worthy member of her class. She is a good student, and possesses a natural sweetness of disposition which has made her universally beloved.

COYNE, GORDON BOWES.

"Not to enjoy oneself in one's youth—"

Gordon Bowes Coyne was born in St. Thomas. He obtained his preparatory education at the Collegiate Institute in that city. In his first year at Varsity he obtained the Banker's Scholarship, but this was his only academic offence. During his course he has served on the Arts Dance and Theatre Night Committees. He was secretary-treasurer of the Tennis Association for the year 1910, and was a member of the Varsity team which took second place in the Intercollegiate tennis tournament at Kingston. Gordon is a member of the XIII Club and of the Historical Club. He expects to take up the study of law after graduation.

CRAWFORD, HORACE CREASOR.

H. C. Crawford received his preparatory education at the Winnipeg Collegiate Institute. After taking his University of Manitoba Matriculation he spent one year at St. Andrew's College. In '07 he came to Varsity and enrolled in the Course of Political Science with Class '11. While he could never be called a "plug" he had the happy faculty of fooling his professors by writing much and saying little on his examinations, consequently his name always appeared in the June results. Creasor's mind at present turns to legal channels, so that next year, in all probability, he will be found in a Winnipeg law office.

CRILLEY, ALICE.

*"Honor to those whose words and deeds
Thus help us in our daily needs—
And by their overthrow
Raise us from what is low."*

St. Stephen, New Brunswick, claims Alice Crilley as one of its citizens. After preliminary training in the schools there, she came to Toronto in the fall of 1907 to join the Class of Onety-One at University College. Since then she has been an earnest student in all the subjects which the general course affords. During her college career she has formed many lasting friendships. As she goes back to her maritime home she will leave in the minds of her classmates, pleasant memories of the days spent with her around the old gray tower.

DAY, ARTHUR MELVILLE.

*"Worth, courage, honor these indeed,
Your sustenance and birthright are."*

Day was born in 1886 at Leith, Ont., and received his early education at Woodford public school and Owen Sound Collegiate Institute. In '04 he attended the Owen Sound Model School, and spent the three following years in teaching. In '07 he entered University, registering in the B. & P. course, but afterwards transferred to the P. & B. While at University he took an active part in the Literary Society and in his second year was a member of its executive. In athletics, also, he showed a keen interest and was a member of the Senior Arts Association Football team. We look for Day among the successful medical men.

DEADMAN, WILLIAM JAMES LEVINAS.

"A youth to fortune and to fame unknown."

This gentleman was born in 1885 at Beeton, Ont. He attended public school near there and later took up High School work at Beeton public school. He attended High School at Bradford, Ont., and in the fall of 1902, went to the Bradford Model School. The next four years he spent as a teacher in the public schools of North Grey, and, in 1907, he entered the Faculty of Arts in the University. Since then he has managed to pass his examinations from year to year. In January, 1909, he transferred from the course in Biological and Physical Sciences to that of Physiological and Biochemical Sciences. He aims to enter the medical profession.

DEAN, THOMAS NORMAN.

Matriculated in 1904 from Sault Ste. Marie, Ont., entered Varsity in 1906 with the Class of '10. Through illness was forced to leave Varsity in his third year. Entered the Class of 1911 in the spring term of 1910. A hard worker and a lover of outdoor sports.

DEVANEY, JOHN ALBERT.

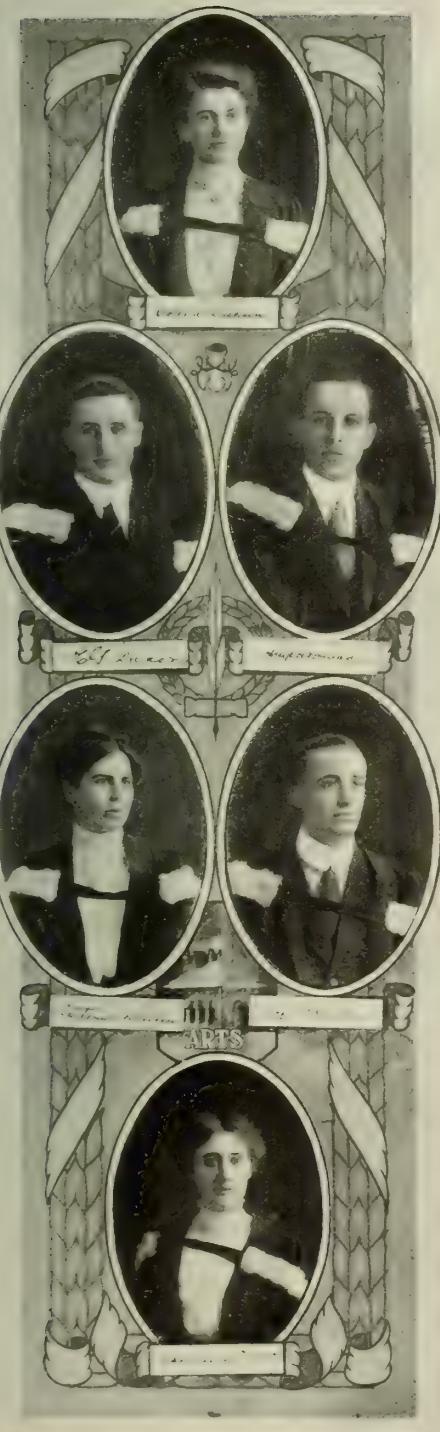

"Donec tibi gratus eram vigni clarior rege Persarum."

Bert was born in Toronto in 1886. Having passed through the Toronto public schools and Harbord Collegiate Institute, he entered 'Varsity where he has successfully grappled with many of the profound problems of Political Science. His enthusiasm and executive ability have been demonstrated in his connection with College organizations. He has been a member of the Mock Parliament and Arts Representative and President of the University Glee Club. During his undergraduate days Bert's manly qualities have won for him many friends, all of whom predict for him a bright future in the legal profession.

DEYELL, JOHN WESLEY.

"What man could esteem, or what woman could love——"

John W. Deyell had the good fortune to be born within sight of the spires of Lindsay, Ont. In 1905 he graduated from the Collegiate of that town with Senior Leaving. He attributes his success in life to the influence of his school days at Lindsay. In Varsity he has made himself indispensable as organizer for the Old Lit. party. His powers of conducting a meeting are the amazement of all. He explains everything by the fact that in Lindsay he was President of the Lit. In Lindsay, too, "Jack" imbibed his instinct for curling and is a pillar of the 'Varsity Curling Club. In his spare time he drinks in the principles of economics at the feet of Prof. Mavor.

DICKSON, VIOLET WANLESS.

*"I know and esteem you and feel
That your nature is noble—
Lifting up mine to a higher
And more ethereal level."*

The subject of this sketch has Montreal as her birth-place. After beginning her education in a private school there she moved to Toronto where she has since lived. From Harbord Collegiate she came to University College and entered the course in English and History. Outside of her academic studies, she has been interested in Y. W. C. A. work. During her college days, her classmates have recognized in her the sterling qualities of a noble type of Scottish womanhood.

DIXON, EWART GLADSTONE.

"Oh, sleep! it is a gentle thing."

The stork dropped the subject of this sketch in Hamilton on March 5th, 1890. At the Hamilton Collegiate he obtained Honor Matriculation in 1907 and entered Varsity with Onety-One that same fall. At the Collegiate, among other accomplishments, "Reddy" became proficient as a gridiron-artist. In 1908 he was chosen full-back of the senior fourteen, which position he held for three years. To be a member of the team which won the Intercollegiate honors thrice in succession, and which, after being runners-up for Canadian honors in 1908, won that title the following two years, is a unique distinction. In his third year he was captain of the basketball team and in the same year he was a member of the Class Executive. He will attend Osgoode Hall.

DONALD, HUGH HARVIE.

*"Life is a jest, and all things show it,
I thought so once but now I know it."*

Hugh H. Donald was born in Toronto in 1891 and was prepared for the University at St. Andrew's College. Taking his Junior Matriculation in 1906, he decided to remain there another year before entering 'Varsity. In the fall of 1907 he enrolled in the Political Science Course. Without any apparent effort on his part he has succeeded in satisfying his examiners, and we find him graduating with the Class of '11. Although he has not taken any active interest in University Athletics he has devoted most of his spare time to golf, in which he has attained great success, winning the championship of one of the Toronto clubs two years in succession.

DUNN, CATHERINE.

*"A smooth and steadfast mind,
Gentle thoughts, and calm demeanor."*

Miss Catherine Dunn received her preliminary education in Toronto. Although she did not enter College, as a regular student, until her final year, her good qualities have been none the less appreciated. In spite of many outside demands on her time and sympathy, she has done admirable work in her chosen course—English and History. Her thoughtful consideration for all but herself has won her many friends. Those who know her best predict for her a bright and successful future.

EDMONDS, GEORGE EDWARD.

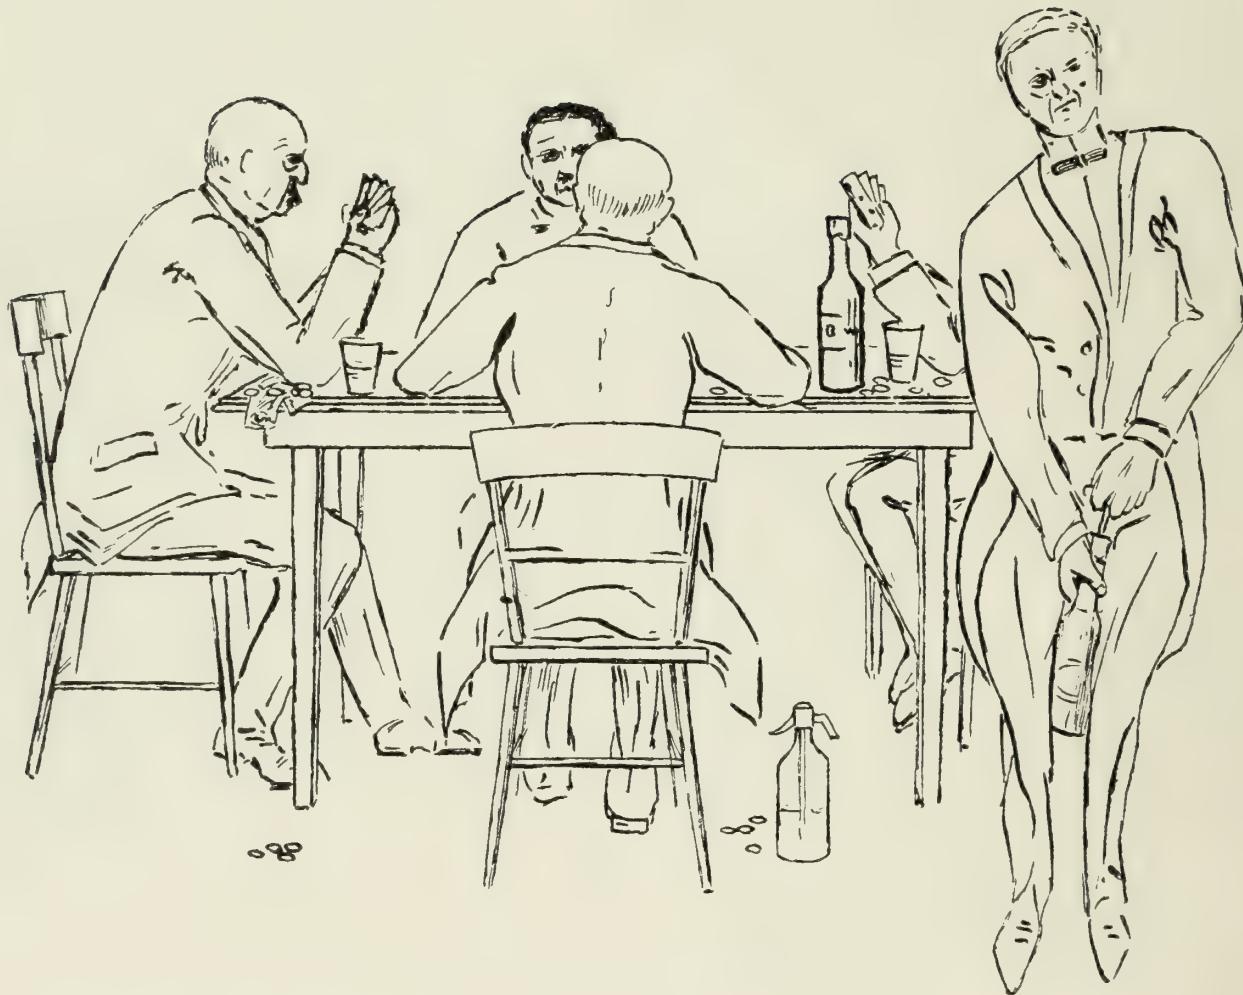

*"Keeps his counsel, does his duty,
Cleaves to friends and loveth beauty."*

Among those who set out from Jarvis Street Collegiate in '07 in search of higher education was George Edmonds. Born in Toronto in 1890, he received all his primary education in that city. As a member of the Political Science Course, his four years will have not been spent without most gratifying results. But George's time was well distributed. His unparalleled representation of the "colored member" in the Mock Parliament, and his leadership of the Government of that organization in his fourth year have made him well-known throughout the University. He has decision and firmness in expressing his views, and these qualities will no doubt bring him success in either commercial or professional life when he finally makes his final choice.

ELLIOT, ADRIENNE S.

*"'Tis well to be merry and wise,
'Tis well to be honest and true."*

Adrienne S. Elliot was born at Niagara Falls, where she received part of her early education, completing it at Beamsville, where she attended the High School. She entered the University of Toronto with the Class of 1911, having previously attended the Normal School at London. She registered in Natural and Physical Science and, realizing her preference for Physical research, has specialized in Physics. In her junior year she served on her Class Executive, holding the office of Vice-President.

OLD BOYS.

W. Stanley Hammill
'12

ELLIS, MATTHEW LANGDON.

"A very witty fellow, I assure you."

Toronto is again responsible for one of her University's prodigies. Lang. was born in this fair city on July 23rd, 1891. After graduating from the nursery he spent five years at the Provincial Model School, and from there he went to Upper Canada College, matriculating with much fuss and many honors from the "Little Red School-house on the hill." Langdon entered the University in 1907. Here his energies have been divided into many channels, but his "spare" time has mostly been given to Political Science, throughout which course he has made splendid progress, with various honors. He is a member of the Historical Club, and has held offices on Class Executives, etc.

ELLIS, HAROLD HODGSON.

"Virtus est medium vitiorum et atrinque reductum."

Harold Hodgson Ellis was born in Toronto in 1888, and received his early education at the Church School and Upper Canada College. He entered the University in 1907, taking Classics; in his second year he transferred to English and History, Classical Option. Next year he intends to study law. He is a member of the Letters Club, and is in the Queen's Own Rifles.

FAIR, LORETTA CECILIA.

"Fair by name and nature."

Loretto was born in Toronto and received her early training at Jarvis Street Collegiate. She entered University College with the year of Oney-One, registering in Mathematics and Physics, and has distinguished herself with honors each year. Furthermore she has always taken a keen interest in all college activities, having served on the year Executive of 1910-11 as Musical Directress, and twice on the Executive of the Catholic Women's Club of Toronto University. By her kind, true disposition, Loretto has made many college friends, whose best wishes follow her through life.

FARRINGTON, MABEL CLAIRE.

"Strong in will and rich in wisdom."

Received her preparatory education at Woodstock Collegiate Institute, from which she matriculated with honors in 1906. In the following autumn she entered University College. Her second year was broken by illness, but she returned in the fall of 1908 to complete her course. She has always shown unusual ability; her work has been most creditable. In her third year she obtained first place in General Proficiency. Mabel possesses every quality of genius except envy. Her sincerity, integrity and ready wit have gained her many friends.

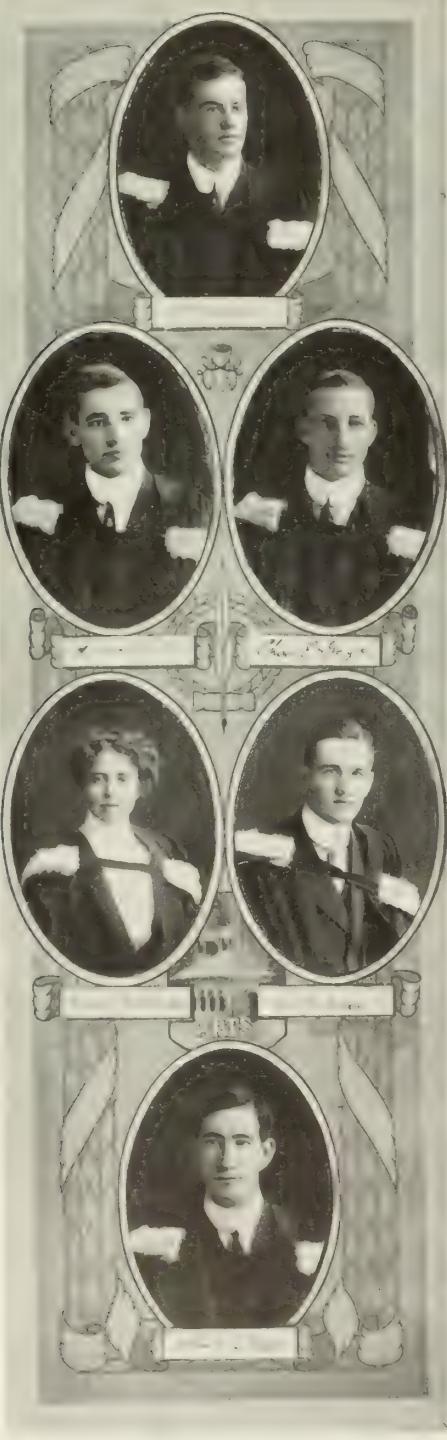

FERGUSSON, EDITH.

Miss Fergusson was born in Toronto and received her early education there. Coming to Varsity in 1907 she joined the Class of 1911 and has been a welcome addition to its ranks.

FERGUSSON, ARCHIBALD MACKENZIE.

"O wonderful son, that can so astonish a mother."

Fergie was born at Tilbury in 1891 and received his public school education there. He later attended Ridgeway Collegiate Institute, where he matriculated in 1907. After a short experience as a bank clerk his soul became attuned to higher flights, and to accommodate its aspirations he entered '11 in 1907. He chose the General Course as affording the best field for his abilities and has since proved a worthy member. His genial and sympathetic disposition has won him many friends about the College, while, as a dramatic critic, his reputation is second to none. On graduation, he will probably enter Osgoode Hall.

FLETCHER, KENNETH GRANT.

Kenneth Grant Fletcher entered 'Varsity from Upper Canada College in the fall of '04, taking the Department of Mathematics and Physics. In his fourth year, in the fall of '07, his studies were rudely interrupted by a severe attack of pleuro-pneumonia, which put him "hors de combat" for two years. He resumed his work in the Mathematical Course in the fall of '10 and hopes to graduate with the Class of '11.

FORBES, HARRY STEWART.

On August 6th, 1886, our Secretary came to brighten a Scotch home in the County of Kent. A rural school and the Catechism prepared him for five years at Chatham Collegiate. The drill he received there was applied for the next two years in the successful practice of agriculture. When that noble science was mastered, he turned his feet into learning's ways and devoted his energies to studies, wise and otherwise. Result,—he is becoming prematurely grey. Despite the warning he still finds time in addition to imbibing the broad culture of the General Course, for an effective support of many College Organizations, especially the "Y." and the Student Volunteer Band.

GAGE, CHARLES EDWIN.

"*Fortissimus omnium Gallorum est.*"

Charles Gage was born in Deloraine, Manitoba. The Hamilton Collegiate gave him his preparatory education, both academic and athletic. "Charlie's" natural bent has been rather toward the latter phase of University activities and his efforts in that line have been unusually successful. He has been a member of the 'Varsity Basketball Team since his first year, and in Rugby he has played on the Championship Fourteens of 1909 and 1910. In wrestling, "Charlie" can hold his own, and in boxing he took the City Heavyweight Championship in 1909. Charlie's intentions for the future are more or less nebulous, but in whatever line he decides to operate, the qualities which have carried him so far in Athletics, will be an invaluable asset.

GALLAHER, HELEN IRENE.

"*One with her are
Mirth and Duty.*"

Helen Irene Gallaher received her preparatory education at Moose Jaw High School, from which she matriculated in 1905, and in the fall of 1907 registered in the General Course at University College. During her four years' course she has always taken an interest in the affairs of College, and it is to her happy disposition and many other attractive qualities that she owes her popularity at 'Varsity. She is a member of the Sigma Beta Pi Fraternity.

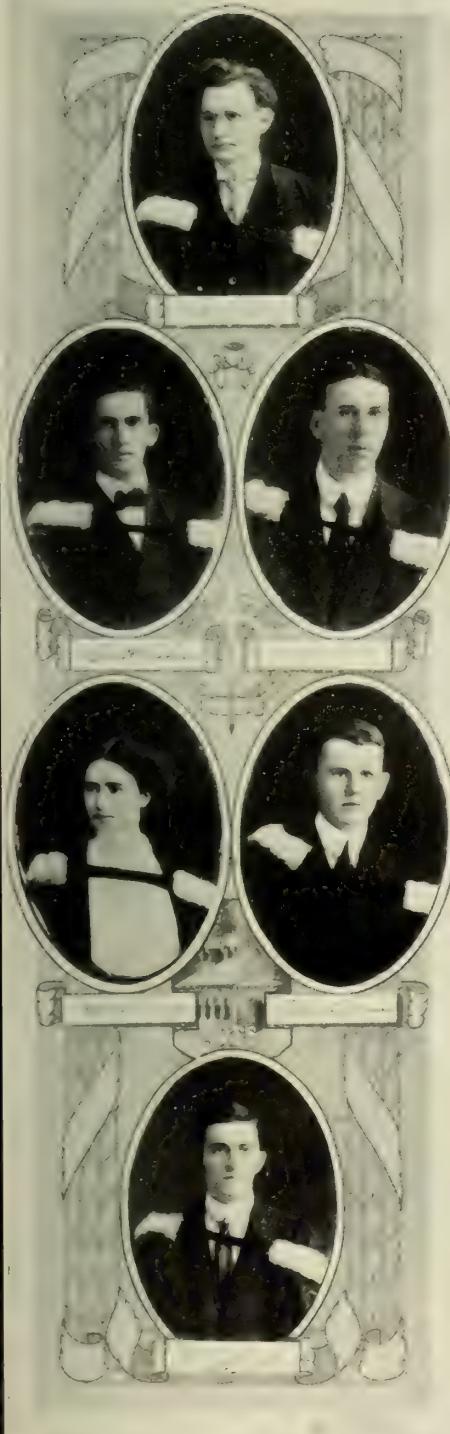

GEDDES, RALPH CHARLES.

This denizen of the North was born in Port Elgin and for seventeen years he was one of the most lively things in the burg. Then, coming to 'Varsity, he plunged into the dissipations of the Political Science Course, where he has wallowed for four years with occasional lapses into first-class honors. His chief recommendation, however, is that he has as yet ruined neither his character nor his eyesight. Though fond of athletics, he prefers to see some other man get his face scraped off. He has a slight sense of humour, and an implicit trust in the goodness of Providence. He needs them both, for he is Editor of this year's *Torontonensis*. The Mock Parliament, the Class Executive, the Undergrad's Union Executive, and the Unionist Party have claimed his services. He is a member of the Historical Club. After graduation he will sandbag a politician, and then study law.

GILLIES, JOHN ZACHARIAH.

"*The less said, the better.*"

On December 25th, 1887, at Essex Centre, Ontario, a remarkable Christmas gift was presented to the parents of the budding youth whose photograph (from the original) appears above. Several years later, his parents accompanied the precocious J. Zachariah to Detroit, where he sojourned while receiving a preparatory course in academic studies, "fussing," and basketball. As no University in the "States" offered the required inducements, he wandered back to Toronto and entered the '11 Class in Biology and Physics, later transferring into Physiology and Biochemistry. From the way in which Jack has entered into his studies and general University activities, we expect that after his course in Medicine he will be very successful in the practice of his profession.

GORING, RALPH BYRON.

*"Tutor'd in the rudiments
Of many desperate studies.."*

Ralph first made his presence known in the world back in the middle eighties, in the German section of the famous Scotch settlement of Zorra, Oxford County. Tavistock and Woodstock are his educational sponsors. While calculating the amount of knowledge in the head of the ordinary student of a country school, there came the call to higher mathematics; and he was harvested in the freshman crop of '11. The promises of youth have been fulfilled. He has successfully steered a tortuous way through the higher Mathematical regions; until now, as he graduates, he has a weird collection of fact in the rare actuarial regions. A quiet, persistent, industrious student, he has the respect and the esteem of his class.

GRAHAM, GEORGE HAROLD.

*"How could such sweet and wholesome hours
Be reckon'd, but with music and with flowers."*

George was born in 1890 at Richmond Hill, Ont. Coming to Toronto he received his education at the Provincial Model School and at Jarvis Street Collegiate. Always having manifested a deep interest in the study of Nature, he entered the department of Biology and has proved himself a devoted student of taxonomic botany. Very considerable invasions upon his time, however, have been made owing to his duties at the Elm Street Methodist Church, where he is distinguished as a most efficient organist and choirmaster. We expect to see him soon as a candidate for "Mus. Bac." and wish him every success in his aesthetic sphere of usefulness.

GRAHAM, NELSON W. G.

*"Who comprehends his trust, and to the same
Keeps faithful, with a singleness of aim."*

Nelson came to the University from the Lindsay Collegiate Institute, and has distinguished himself by his excellent standing throughout his course. He has enjoyed a varied experience in the mountains and prairies of the West; and, although he holds a prize and two scholarships from Westminster Hall, Vancouver, he has never allowed study to interfere with his education. His energy has carried him into every sphere of University life, where his ready wit and kindly sympathy have made him a general favorite. His many friends predict for him a brilliant future in his chosen profession, the Presbyterian ministry.

GRAYDON, BESSIE IRENE.

"There's little of the melancholy element in her."

Bessie Irene Graydon matriculated from Glen Mawr in 1906, but did not enter University until 1907, having spent the intervening year at Havergal College. Throughout her four years' course she has taken a sincere interest in all College activities. She has proved herself a good student when occasion required and, also, a merry companion when time permitted.

GREENE, ALAN DALLAS.

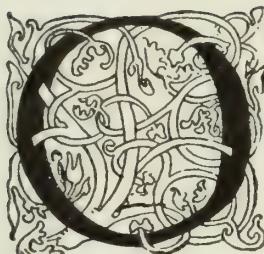

Rumor hath it that in 1889 the fabled stork left in Orillia a small parcel. The infant grew and doubtless cried for the moon. The boy attended school and perhaps thirsted for knowledge. Like Achilles, Falstaff and Job he passed out of boyhood and short trousers. He entered the University and plunged into its varied life. He was elevated to the Year Executive and twice to that of other societies; honors eclipsed, however, by the position of Fire Chief of Wycliffe—an office which displayed his peculiar penchant for aquatics. But while successful in his work and among his fellows, it is as a friend that he has stood pre-eminent. Here his worth, his warm heart and his well-balanced judgment have best been seen. And it is by those who thus know him that a friendship most highly prized is the friendship of Alan Greene.

GUILFOYLE, JOHN VINCENT.

"Supreme in judgment as in wit."

The town of Collingwood, Ont., claims Jack as one of her sons. After completing his public and High School education in that town he came to St. Michael's College in 1907, and in the following year registered in University College with the Class of '11. During his undergraduate days John has succeeded in obtaining a high standing in his academic work in Political Science, and by his genial disposition and unassuming manner has won for himself the esteem of his fellow-students. He has taken a keen interest in all 'Varsity sports, and was one of the "nine reasons" of Onety-One's success in the University College Baseball League of 1910. Jack intends to continue his studies in the Canadian West, where his future will be recorded in the annals of law.

How They Welcomed the Maiden Trouthe

N the morning of the fourth day, being desirous of knowledge, I did enter the grounds of the University, which, as many people of the city told me, was the greatest in all the domain of the noble King George, and there I came unto the building of Arts. It was the fifth hour, and the hum of learning rose unto the roof and beyond it, even into the blue vault of heaven. But I walked in the passage alone, and there was none with me. Yet on either hand were doors, and from behind these there came great murmur, even as when many women are gathered together, and all are spinning and not a few talking. Behold, behind these doors were being spun garments of knowledge wherewith the youths and maidens should clothe their naked minds.

Even as I thus meditated and was happy in the thought, I came to a staircase, on the right side of which was carved a griffin dire, and the stairs were worn with much learning. On the bottom step sat a maiden, clad in white and veiled as is the custom in the land of

Paynim. Behold, I have been in the country of the Paynim and have seen what I speak, nor is there any falsehood in me. The maiden sat on the bottom step, and wept, and even while I watched she began anew her lamentation.

Then I drew near, and being mindful of the true law of knights, and not forgetting the teaching of Sir Bordamon, he who had shown me the paths of honour and of virtue, I spake these words: "Whence comes this great sorrow, O maiden, and in what wise can it be relieved?" Then she looked up and I saw her eyes shining through the veil. And she said: "What canst thou do, O stranger? Lo, I have long tried to enter this University, but none will receive me."

Then I looked more closely and perceived, and suffered no deception, but knew that this was the maiden Trouthe, she of whom the worshipful Master Geoffrey Chaucer writ in verse. So I spake humbly to her, and shewed to her that I knew her, who she was,

Sir Bordamon, he who had shown me the paths of honour and of virtue, I spake these words: "Whence comes this great sorrow, O maiden, and in what wise can it be relieved?" Then she looked up and I saw her eyes shining through the veil. And she said: "What canst thou do, O stranger? Lo, I have long tried to enter this University, but none will receive me."

Then I looked more closely and perceived, and suffered no deception, but knew that this was the maiden Trouthe, she of whom the worshipful Master Geoffrey Chaucer writ in verse. So I spake humbly to her, and shewed to her that I knew her, who she was,

and asked her tale. And she, nothing loath, told it me forthwith.

"Lo, I have at last come unto this University, having heard afar that here was great need of me, and that not even an inch of my veil was to be seen within these walls. So I came, thinking to be greeted with great honour and put in authority throughout the place. Blithely I came to the door of a professor, a man very learned in the tongues of modern peoples. At his bidding I entered and looked to be received with ceremony. Lo, he arranged his machine, and of me (not stripping off my veil) he made a tin-type, and even while I looked, he knelt down and worshipped the tin-type, not giving heed to me, who was present, albeit veiled. Great were his devotions and long the adoration he gave to the tin-type, but there I left him, and, not yet despairing, sought out the rooms of the philosoph-

ers. By them, it seemed to me, should I be acclaimed queen, there shall I be greeted with honour, for have not the learned men of philosophy spent their lives in pursuit of my shadow? Now, in sooth, they will welcome me royally. But when I had come thither, for a long time none gave me heed, but at last one, and he only what they call a lecturer, perceiveth me and took me to his room, where he cut an inch from my veil, and that not from before my face, so that he could see me as I am, but from the back part of the veil, near the foot. And with this he left me, and went away, and showed the piece of veil to the professors, and they all with one accord kissed it and worshipped.

I, what should I do? Mewthought me, history is but myself well proven in deeds, not words. So sought I the men of history, and thus was I greeted: "Lo," said one, "here be Truth; what of her? Is she wise in epigram; in pithy saying?" But I was not. "Lo," said another, "she

How They Welcomed the Maiden Trouthe—Continued

be too learned; I can use her not.'’ So they drove me forth, but one cut from me a lock of hair, which now he wears by his heart, yet in secret, for he is ashamed. Thence I went with ignominy to the men wise in Economy, for they surely would receive me. And without a word they flung me forth, first making enquiry to see if I had any money with me, but I had none will receive me.’’

Then was I much perplexed, and was fain to comfort the maiden, but she would none of it, unless I should take her home and worship her, and how could I do so, who had never seen her before? For I feared my wife—aye, and ill repute, should I dwell of a sudden with such a maiden. While I pondered and was troubled, a bell rang, and in all the rooms the hum ceased, and from the doors came many maidens and many youths, but none gave heed to her by my side, Mistress Trouthe. Last of all came past a professor, bearing under his arm books of the ancients, Greek and Latin, which when the maiden saw she was pleased and cried: “Surely he will receive me!” She accosted him, but he gave no heed, despising her, and turning again to a scroll wherein was writ the rusted words of some dead philosopher, who had in vain sought this

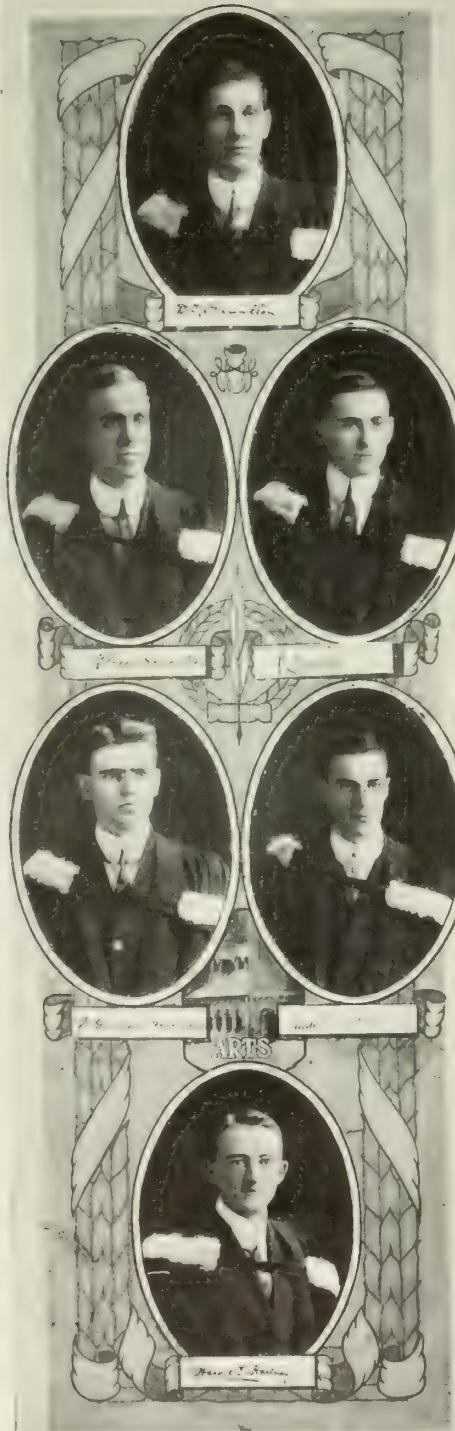

very maiden. Even while I watched, the professor spurned her, and would not see her, but passed on and locked his door lest she enter. Lo, I bethought me, “What shall the maiden do? Surely the men of Mathematics will not receive her, for they love her not, having already their own god—he yclept Reason.” And it was so, for I took her to them, but they were surly.

Then said I, “One thing is left, Maiden. There are men versed in all sciences, who seek thee truly, and to them shall we go.” But when we had come to their abode, where was much harsh clatter of tongues, and when we had gazed in and seen them busied with many small matters and ignorant of things great, the maiden cried aloud with terror: “Surely they

will make an operation upon me, and cut me into small pieces. Lo, I have knowledge of such men.” So she fled, and I with her. But one man saw us and pursued, grasping a forceps and crying: “Let me grasp the eye of this maiden.” But we escaped. Then said I, “Maiden, here is no place for thee; thou hadst better return to the stars.” It seemed good to her and she did so, and I was left alone by the great tower, gazing after the trailing of her robe.

HAMILTON, DOUGLAS EWART.

"Eruditissimus omnium Romanorum."

Douglas Ewart Hamilton was born under the shadow of the mountain which bears his name. His early years were passed in the pursuit of knowledge and other things in the schools of the Ambitious City. Though he won a scholarship in Queen's, he showed his good sense by coming to Varsity, whither he was attracted by the reputed wit and beauty of the co-eds. He won an array of scholarships at Matriculation, and his record at 'Varsity has been fully up to the standard then set. His energies are consumed by delving into the dust of Classics and shooting pool. Sanskrit is the object of his tenderest affection. For purposes of relaxation, he has specialized in Modern Languages.

HAMILTON, JAMES GREY.

Born in Smith's Falls, public schooled in Kingston and Hamilton, Grey entered Hamilton Collegiate at eleven; but soon removed to Toronto. Harbord being crowded, he was refused admission and lost a year. Entering Jameson on the following year he used his spiked shoes on more than the 220 sprint, and at the completion of the Third Form, Mr. Hamilton was awarded an honorary diploma. Owing to delay in receiving scholarship to Fourth Form, Grey bottled up the customary two years for post-Arts work and entered 'Varsity. He has succeeded so far in assimilating the matter of the two divisions of honor Moderns as presented by his professors. When he has used the "bottled" years Grey will be "of age" to lay further plans.

HAMLYN, RUPERT GLADSTONE.

*"I've got the hires, and a new degree,
And I'm going to see what the world has for me."*

Lochinvar Hamlyn, upon his arrival in College halls some four years ago, decided that then and there he first beheld the shining light of day. Born in Bowmanville some eighteen years odd previously, his ambitions rose with the toll of the curfew toward the best the land could give. His research in the realms of cat-life, and his profound knowledge of the ways and means of mischief making, convinced the village forefathers that the greenest fields awaited him elsewhere. Whereupon they furnished the sad goodbyes that wafted our hero into Mathematics and Physics. Be it said that since his entrance through the front door of learning, a wild endeavor has been on foot and in the air to prepare a professional field broad enough to find limits for "Badger's" combination of ability and technical training.

HANNA, WILLIAM GEORGE.

*"Forward and frolic glee was there,
The will to do, the soul to dare."*

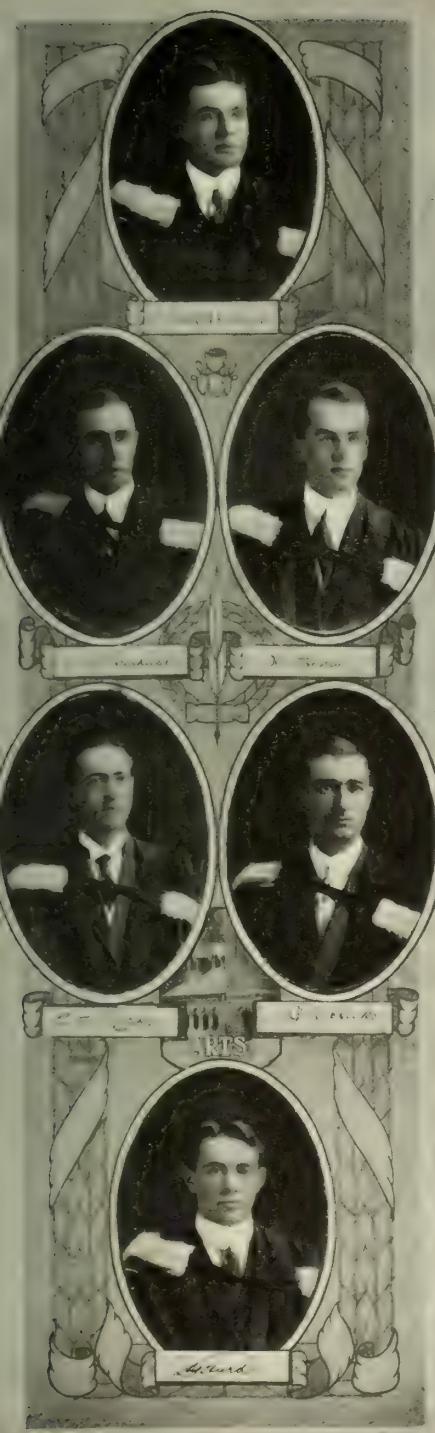

The first two years of his life George spent at Tara Manse, in the county of Bruce. In 1889, he emigrated to Uxbridge and took the family with him. Eight years later, he went to Mount Forest and attended the High School until the attractions of Harbord Collegiate allured him to Toronto, where he has since dwelt in peace and tranquility. At 'Varsity, English and History, Classical Option, looked good to him and it still looks the best ever. Throughout, he has taken an active interest in the Lit. and many a Freshman has his persuasive tongue and weighty arguments saved from the dangers of the Unionist ranks.

HART, MELVILLE M.

A long, lanky individual, who, though he has never been out of first-class honors, is yet accounted a very pleasant acquaintance. He registered in Classics, but in his second year transferred to Political Science, where he took the Second Alexander Mackenzie Scholarship in his second and third years. His modesty prevents his giving further details, but they must be interesting to imagine.

HARTNEY, HAROLD EVANS.

Harold was born in Pakenham, Ontario, spent the first thirteen years of his life in Souris, Manitoba, then moved to Toronto and matriculated from Harbord Collegiate Institute in 1906. Spent a year in a law office in Brandon, Manitoba, then entered University College with Onety-One, as a faithful member of the General Course, in which department he always ranked well. He was an active member of the Literary Society, cornet-soloist in the University Orchestra, Secretary of Arts Dance Committee in fourth year, Vice-president in sophomore year, and has exhibited his prowess in track athletics. Rifle-shooting was his hobby; at Harbord he was crack shot of the Champion Canadian Cadet Team, and at the University always had a big score to his credit. Wherever he goes, success will always keep bumping up against him.

HENDERSON, CHARLES BROOKFIELD.

*"Men may come and men may go
But I go on forever."*

It happened in Parkdale away back in the eighties, and the occurrence was philosophically accepted by the neighbors. As time went on, the infant prodigy developed, and when Brook arrived at 'Varsity in the fall of '06 with the gold medal for the Junior Provincial Sprinting Championship adorning his watch fob and a real capacity for making friends, it was generally acknowledged that he had begun to justify his existence. As a specialist in football, good-fellowship and ladies he has shown himself to be a pronounced success. He has captained the 'Varsity Second Football Team and has figured in about all the Executive group photos taken during his course. He is a member of the XIII Club and the Prodigal Sons, and is headed for law.

HENDERSON, WILLIAM BRUCE.

"Men, like bullets, go farthest when they are smoothest."

"Bill" was born at Kingston in 1891, but shortly afterwards moved to London, where he received his preparatory education. In 1907 he entered the Faculty of Arts of Western University, but, realizing that the institution was hardly cosmopolitan enough to suit his peculiar tastes, he enrolled the following year in the Political Science department with the Class of 1911. "Bill" has taken a keen interest in everything around the University, except the lectures. Notwithstanding this, he has maintained a steady course through the University. His present intention is to enter the Law School and from present indications we have every reason to expect to see him "blossom" out as one of the shining lights of the Division Courts in the course of a decade or so.

HENRY, WILLIAM OLIVER.

"The mind maketh the body rich."

Born in 1886, in the vicinity of Auburn, Ont., and received his early education in the concession school house, where he first developed a taste for the unknown. After graduating from the Clinton Collegiate and Model School he spent three years swinging the birch in West Huron. At an early age, having developed a respect for medicine, he now began his studies in the B. & P. class of Onety-One, 'Varsity. His life was simple, but the elements are so mixed in him that the result is pure manhood.

HICKS, CEDRIC OLIVER.

"He gave his honors to the world again."

Leaving Centralia, Cedric entered London Collegiate Institute, and, eventually, in 1904, having to his credit the Edward Blake Scholarship in Science, he pursued the study of Mathematics and Physics in the University. He played in the Inter-Year Champion Football Team, being also a member of the Executive. Feeling that a change would be beneficial, he taught school near Edmonton for a year, and, receiving an appointment in Edmonton Collegiate Institute, remained two years longer. Returning to 'Varsity, he has chosen Astrophysics as the option of his final year and has taken additional lectures in Mineralogy and Geology, hoping in these pursuits to find diversion from the arduous duties of the teaching profession.

HICKS, WILLIAM JOSEPH.

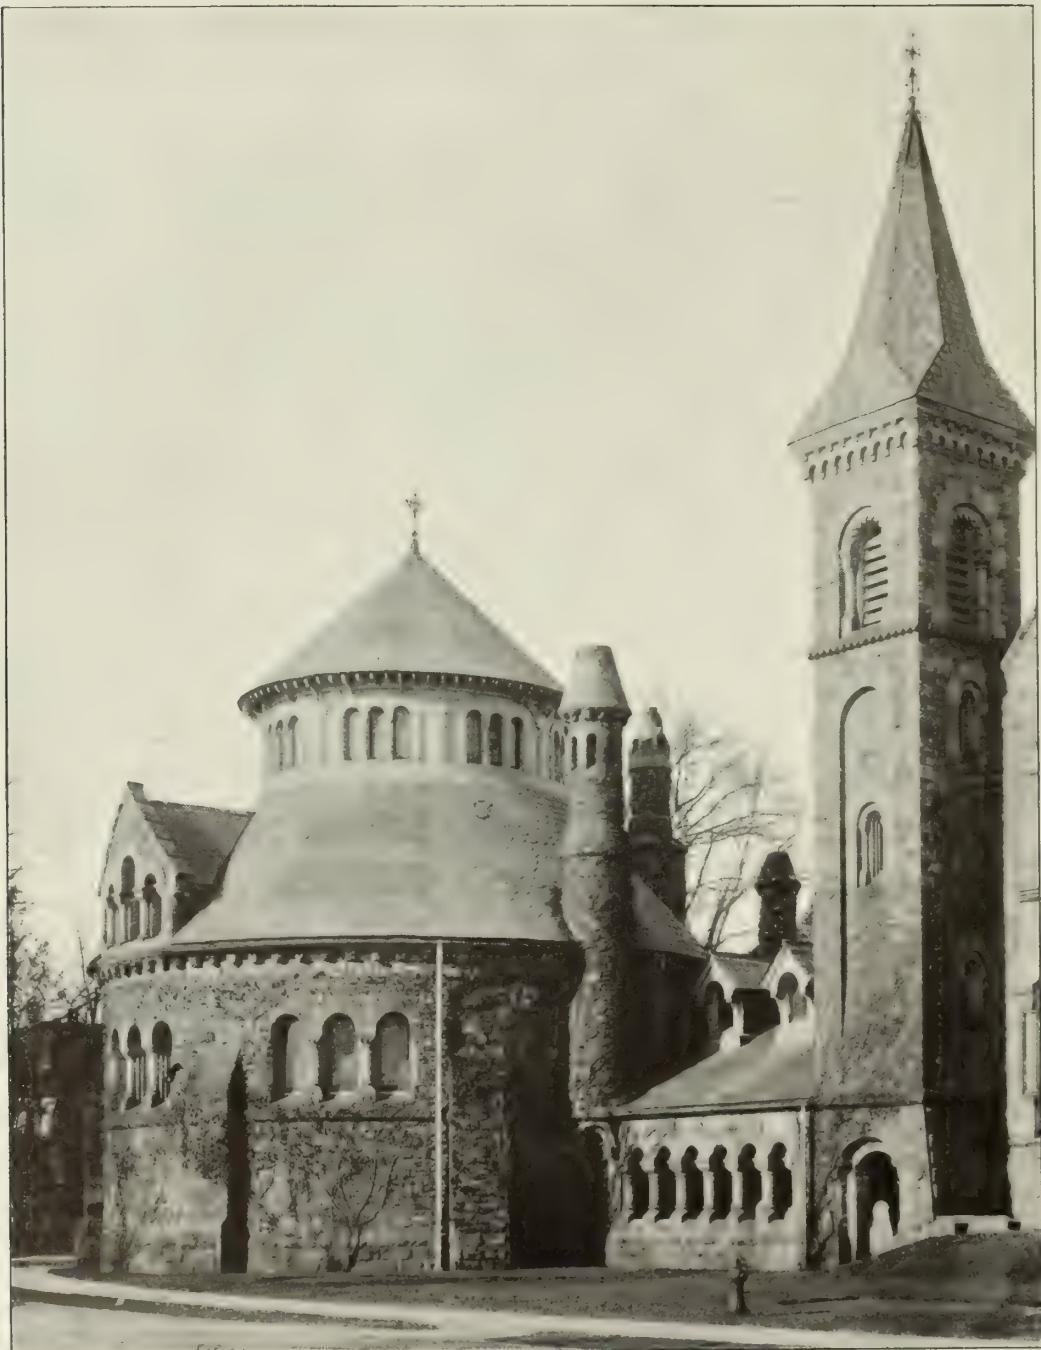

*"The reason firm, the temperate will,
Endurance, foresight, kindness, skill."*

Bill's advent to 'Varsity cannot be considered an intrusion, for his Freshman year was not characterized by any manifestation of pathological intelligence or abnormal academical diligence. However, by careful treatment this situation has been overcome, but not until certain chronic symptoms obviously occasioned by social propensities have been rendered ineffective. Even now the malady persists in his participation in musical events and a corresponding indulgence in musical friends, among whom he always finds an appreciative welcome. The relationship between the above-mentioned facts and his academical requisites remains yet to be established as one of cause and effect. Suffice to say that in his attendance of lectures he will ever be remembered as "the late Mr. Hicks."

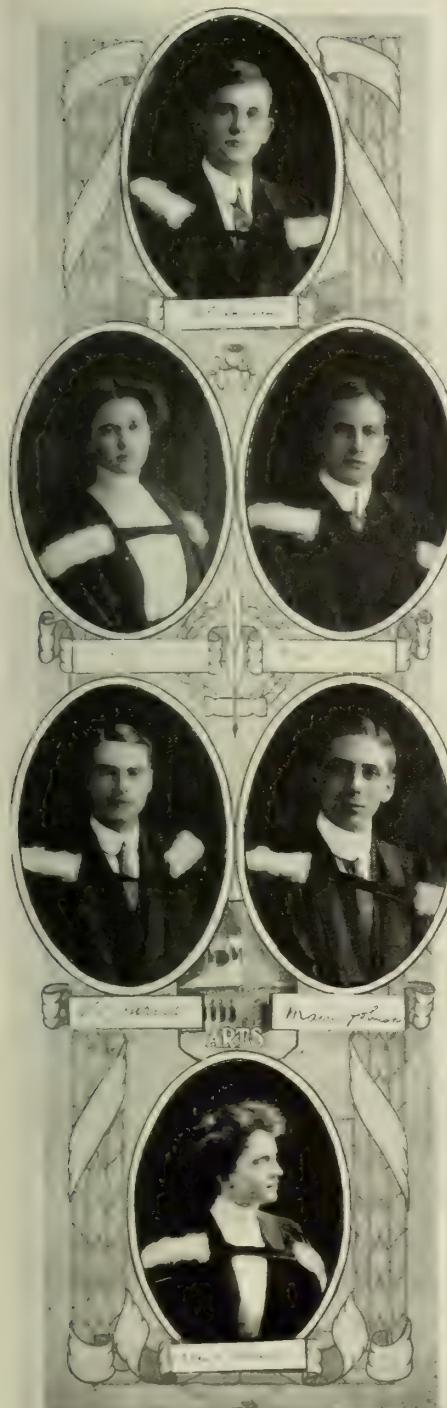

HURD, H. GORDON.

*"He's very well acquainted with matters mathematical,
He understands equations, both the simple and quadratical."*

Gordon's earliest years were spent in Brockville—the "Thousand Island City." After removal to Toronto he attended Harbord Collegiate Institute, where he obtained Junior Matriculation in 1905 and Senior Teachers' in the following year. At the Honor Matriculation of 1907, he was awarded the Second Edward Blake Scholarship in General Proficiency. A genial disposition has won for Gordon a place in the friendships of the Onety-One Class; and an inherent propensity for asking questions has established his right to membership in "Mathematics and Physics."

THE OLD PHYSICS LABORATORY.

INGHAM, BRUCE EVERETT.

*"But so many books thou readest,
That thy poor head almost turns."*

The motto applies to all "les miserables" who attempt the combined courses of Moderns and English and History, as the subject of this biography discovered soon after coming up from Peterborough Collegiate in 1907. As for the biographical material:

"By a single man in a single book is his one achievement told;

(The one-copy edition of that rare work has not yet all been sold):

"E'en that achievement was not so great," his enemies still aver,

"Which is told in the tome of the township-clerk, his sole biographer."

The event so pompously suggested in the verse occurred in this instance April 5th, 1890, in the village of Roseneath, Northumberland County.

IRVING, JESSIE CUNNINGHAM.

"Life is a see-saw of ups and downs."

Jessie C. Irving, whose home is in Sudbury, received her preparatory education at Gore Bay Training School and entered the University of Toronto in October, 1907. She registered in Mathematics and Physics, specializing in Mathematics in her fourth year. She held the position of Vice-president of the Women's Literary Society during her Senior Year.

IRWIN, FRED H. MERCER.

The subject of this biography is assured that Toronto had the honor of being his birthplace, though, owing to a removal to Weston very shortly thereafter, he personally cannot substantiate this account. But of the institutions he attended in pursuit of knowledge he retains lively recollections, and with some pride names Weston public school, Toronto Junction (now Riverdale) Collegiate Institute, St. Andrew's College, and 'Varsity as those to which he is most deeply indebted. Of his achievements we shall not speak, though he himself authorizes the statement that it would strain neither our space nor his modesty: of his plans as we cannot speak of, for they are too vague to be reduced to black and white. So we can only wish him success and—Au revoir.

JARVIS, VICTOR RALSTON.

Mr. Victor Jarvis was drawn from the staff of the Dominion Bank to take up Theology at Wycliffe College. His early life, prior to the banking era, was the usual one of tedious school-work. At the University he has shown his ability in Classics, possessing a ready receptivity for anything pertaining to Latin and Greek. He discontinued his 'Varsity course for six months, being, for the time, a master at Ridley College. Mr. Jarvis promises to be a good man for the Church and one who will not spare himself in the furtherance of its work.

JOHNSON, WILLIAM MAIN.

Matriculating from Hamilton Collegiate Institute with the First Edward Blake Scholarship in Classics and Moderns, and the McCaul in Classics, William Main Johnson (born in Hamilton, 1887) came to 'Varsity with the Class of '09. He discontinued his course to go West, but re-entered College with the Class of 1911, in English and History (Classical Option). From the first he has been one of its most active members, serving both in the business and editorial departments of "The Varsity"; on the Executive of the Lit., of which he has always been a leading member; on the Undergraduates' Parliament; on the Arts Dinner Committee; as Treasurer of the Classical Association; and on the winning team of Inter-Year debaters in his second year. Besides this, and his membership in the Historical Club, outside journalistic and business connections have claimed some of his time. Ability of a high order, an energetic temperament, and a personality calculated to win respect and esteem, insure for him a brilliant future.

JOHNSTON, KATIE B.

"An open-hearted maiden, pure and true."

Cato may have learned Greek at eighty, but that achievement pales before the daring feat performed by K. B. Johnston. After a preparatory education in Kemptville, Ont., she entered College with the Class of '11. Though she did not even know a Greek Alpha from Omega, in October, 1907, she has creditably completed a course in English and History, with the Classical Option. Her unfailing sympathy and tact, and the unselfishness, which is her chief characteristic, have endeared her to her classmates. She graduates, bearing the impress of womanhood, worthy of her Alma Mater.

A MEMORY OF 1907.

PROMENADE
15.

"CHERCHEZ LA FEMME!"

KELLY, ANNA GERTRUDE.

*"She comes, by grace of her address,
By the sweet music of her voice,
By her low tones of tenderness,
To soothe or serve a friend."*

Anna Gertrude Kelly was born in Toronto and, after attending its separate schools, entered the Matriculation Grade at Harbord Collegiate Institute. Later she came to University College with the Class of Onety-One, taking the Course in Modern Languages. She has always taken a keen interest in class affairs and joined in those pleasures of social life which bring the charms of womanhood most effectively into play. There is a popularity which is born of the worship of noble deeds—it shall be hers.

KENNEDY, SAMUEL ARTHUR.

*"The kindest man,
The best-conditioned and unwearyed spirit
In doing courtesies."*

—Shakespeare.

Sam comes from Scarborough. Obtaining the Senior Teacher's certificate from Markham in 1907, he entered Mathematics and Physics. Following his work with an open mind, he has developed that valuable asset of honest inquiry which furnishes a basis for future progress. Finding pleasant diversion in Music he has been an active member of the Glee Club and has liberally contributed towards the success of class organizations and the encouragement of esprit-de-corps. Realizing its importance Sam has given his unqualified support to the Y.M.C.A., endeavoring to make this Association an influential factor in student life, and he has the best wishes of his many friends in entering Knox as a Student Volunteer.

KENTNER, MARY.

"Sweet worth and lovely excellence."

Mary Anna Kentner matriculated from Parkdale Collegiate Institute in 1907 and the same year registered at University College, entering with the Class of 1911. Throughout her course she has always taken a great interest in all College affairs. In her second year she held an office on the Class Executive and was also, in her fourth year, representative to Evangelia Settlement.

KERR, STANLEY CHANDOS STAVELEY.

"Charge, Chester, charge! On, Stanley, on!"

Stan. was born and bred in Toronto, and came down to 'Varsity from Upper Canada College in 1906 with high honors. The "Senator" had a family predilection for politics and has been a prominent "Old Lit" member of the Literary Society, on whose Executive he served. Stan. has creditably filled numerous positions at 'Varsity, having managed the Champion 'Varsity Third Rugby team of 1908, served on the Track and Hockey Executives, and is now on the Arts Dinner Committee, President of the XIII Club, member of the Historical Club, President of the Graduating Year, and Manager of the 'Varsity Hockey Team. He belongs to the Zeta Psi Fraternity. We predict a brilliant future for Stavely in the law.

KNOWLES, KATE M.

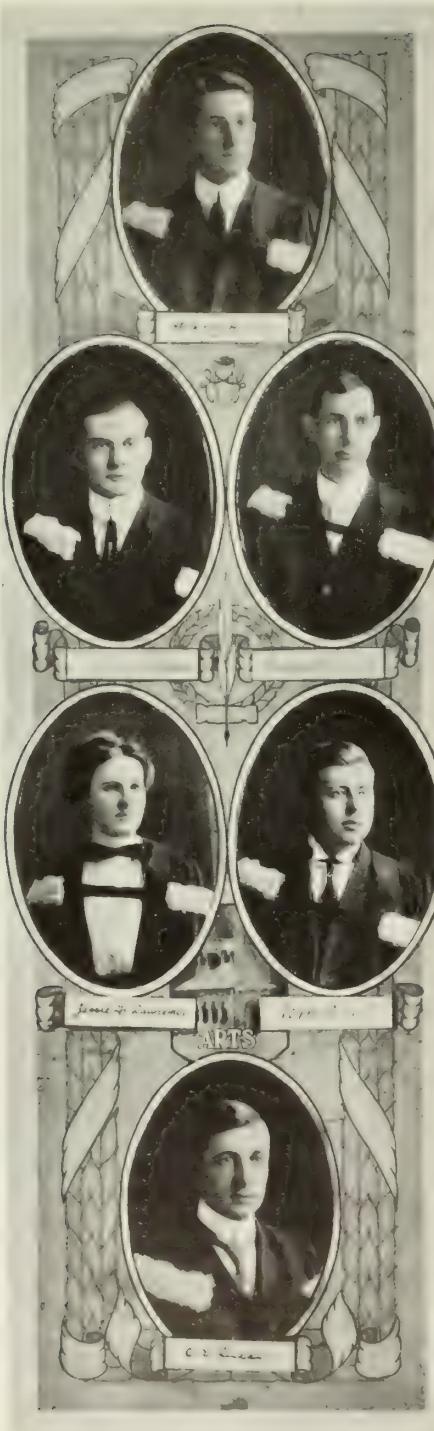

*"Great thoughts, great feelings come to her
Like instincts, unawares."*

Though descended from a Toronto family, well-known in literary circles, Kate Knowles was born in the County of Lanark. She received her early education in Pembroke public and High Schools and in Glen Mawr, Toronto. Though she took the first three years of her course (English and History) without attendance at regular lectures, her work has given ample proof of brilliant scholarship. Her happy wit, her bright originality, "her infinite variety" attract many to her. Of these her genuine sterling qualities soon make staunch friends. Whether Miss Knowles chooses a literary future or not, the keenness of her intellect and the sweetness of her nature insure for her a happy and useful future.

LANG, JEAN K.

"A good companion and as firm a friend."

Jean K. Lang was born in Toronto, where she has spent all of her life, receiving her preparatory education at Parkdale Collegiate, graduating with the Third Edward Blake Scholarship in Classics and Moderns. Registering in University College as student in Modern Languages, Jean has always maintained a high standard in her course, despite numerous obligations entailed by active interest in College organizations. Her enthusiasm and popularity are manifest by the many offices held, on Class Executive in her freshmen year, and on Athletic as Curator of Physical Culture, Secretary-Treasurer, and now President, besides representing it on four tennis teams, two of which were champions. Jean's unvaried congeniality will always make her a centre of warm friends.

LANGMUIR, ARCHIBALD WOODBURN.

Mr. Langmuir, prior to coming to the University of Toronto, spent four years at Trinity College School. During his four years at University College he has conscientiously endeavored to reap as much as possible from the General Course. He has been unceasingly enthusiastic about his work, spending most of his time among his books and ever plodding on. One might take notice of the fact that he never let pleasure interfere with duty, always being present at lectures, unless confined to the house by some unfortunate illness.

LATIMER, WILLIAM HENRY.

*"His years but young, but his experience old,
His head unmellowed, but his judgment ripe."*

Born under the Stars and Stripes in St. Paul, Minn., in 1892, of the paradoxical rich, but honest parents, Harry early acquired that American instinct to go ahead which later brought him to Canada to imbibe the knowledge of our University. Although of a retiring disposition, Harry was well known for his congeniality and ability by the men of his year and the promise of a great future in American politics lies before him. In July, Harry expects to enter the lucrative field of Californian gold-mining, and knowing him as we do, we can feel sure that he will not mine in vain. Harry, here's luck in plenty.

LATIMER, GOLDSMITH WILFRED.

"Lean enough to be thought a good student."

"Slivers" was born in Leeds County during the eighties, dubbed Goldsmith Wilfred and, in spite of this titular handicap, grew and passed through the usual rigors of school life with considerable distinction. He entered 'Varsity with the "first of the Oneties,"' to the guidance of whose sophomore affairs he gave his counsel under the Lucas administration. Ill-health enforced withdrawal from College for a year, but in 1909 he was restored to Wycliffe, Arts and Old Litdom, identifying himself with the Class of '11. First to breakfast, last to chapel, first in the hearts of his "country" women, Wilfred is cautiously wending his way through the intricacies of Divine Philosophy toward the stole and cassock of the Anglican ministry.

LAWRENCE, JESSIE FAIRLY.

*"Knowing that Nature never did betray
The heart that loved her."*

Jessie F. Lawrence was born at Thamesford, Ont., a pretty village, which probably contributed in giving her that appreciation of nature, now the basis for much of her pleasure. After attending Woodstock Collegiate Institute she taught for a few years, and then entered University College in the English and History Course, to which her taste for the best in literature had pointed the way. In her third year, she served her class as Prophetess and in her fourth she was President of the Grace Hall Library, Bible Study Convener of the Y.W.C.A., and a member of the Torontonensis Board. Throughout her College life Jessie's time and attention has been given to all worthy causes.

LEE, WALTER MANUEL.

*"Plumpness comes not from roast beef,
But from a good heart and a cheerful disposition."*

With a merry laugh "Wallie" first showed his smiling face to this cold world one December day, to the great delight, be it said, of a rural home near Bracebridge. He was, indeed, a youth of much promise in the land and, soon after leaving the three "r's" he was wielding the birch rod with splendid effect. One day, as the children wept, he dreamed "Arise, get thee up to 'Varsity.'" He returned to High School and anon came rolling in to join 1911. Everywhere he is well known by many friends as one "imitated yet unequalled." Successful and popular here, he will surely succeed in Knox and later amongst men.

LUCE, CHARLES ETIENNE.

*"A man among the strong and brave,
A man with purpose high and grave,
Still fronting duty without fear."*

Charles Etienne Luce was born in the historic old city of Gloucester, England. His early education was obtained at Dean Close School, Cheltenham. After leaving that famous place of learning, he engaged in business for six years. Then his eyes were directed to Canada, whither so many of England's sons have come. Two years of business life followed in this city, after which he commenced to study for Orders in the Anglican Church. In preparation for his future life work he entered 'Varsity with the Class of '10. His work was interrupted by a year's absence at a Boys' School, after which he came back to the Class of '11, and the Course in Classics. His earnestness and uprightness of character will doubtless be displayed in as marked a degree in his future work as during his college days.

MACALLUM, ERNEST NEIL.

"Some are born great, some achieve greatness, and some have greatness thrust upon them."—Shakespeare.

Claiming Toronto as his birthplace, Neil was prepared in Jameson Avenue and Jarvis Street Collegiate Institutes, to enter the honor course in Physics in October, 1907. His aptitude for scientific work and keen desire for research investigation have characterized all his efforts. To promote college spirit, Neil has identified himself with Athletics as Secretary of the Swimming Club, and has taken a lively interest in the social life of the University. He intends specializing in Industrial Chemistry in the Faculty of Applied Science, for which course he has admirably qualified himself. Neil takes with him the best wishes of his classmates, among whom he has many friends.

MACDONALD, FREDERICK JAMES.

*"Keeps his counsel, does his duty,
Clings to friends and loveth beauty."*

Fred's debut was made in Holiday, Oxford County, but Glencoe and London share in his education. After teaching a few years he entered the Mathematics and Physics Course in Arts, joining the '11 Class. There he proceeded to distinguish himself in and out of school. While standing well up in his class he found time for athletics. He played goal for the Arts Soccer Team for the first three years, and helped them win the Inter-Faculty Championship in the fall of '08. Fred's genial and pleasant manner ensures him success both in the business and social world.

MACDONALD, JOHN WELSFORD.

John Welsford Macdonald was born in Pictou, Nova Scotia, on July 23rd, 1890. Before entering 'Varsity he spent three years at Pictou Academy, one of the most famous schools in the Maritime Provinces. John Welsford, commonly known as "Mac," possesses that excellent spirit of "camaraderie" which has won for him a host of friends. He was universally recognized as a good fellow and his sporting tendencies never failed to assert themselves when occasion demanded. At no time was "Mac" more in his element than on election night. A born politician, he was always in the heat of conflict, where his ready jest and earnest exhortation never failed to win votes for his candidates. "In pace requiescat."

MACKAY, WILLIAM PERRY.

"A man of infinite jests . . ."

'Twas in Wallace, N.S., 1890, that he first saw the light. With earnest endeavor to get a good education, Perry attended school in Halifax, Montreal, Ottawa and other places, finally taking his Junior Matriculation at Simeco High School. After completing Honor Matriculation at St. Andrews, Perry arrived at 'Varsity just in time to join Onety-One, and has since proved himself a worthy member. A Unionist in politics, he has also served on the Arts Dinner Committee and in the Mock Parliament, and in his final year, played ball with the Senior Arts Rugby Team. He is a first-class man in his academic course, Political Science, and will likely enter the legal profession, in which we predict for him a brilliant career.

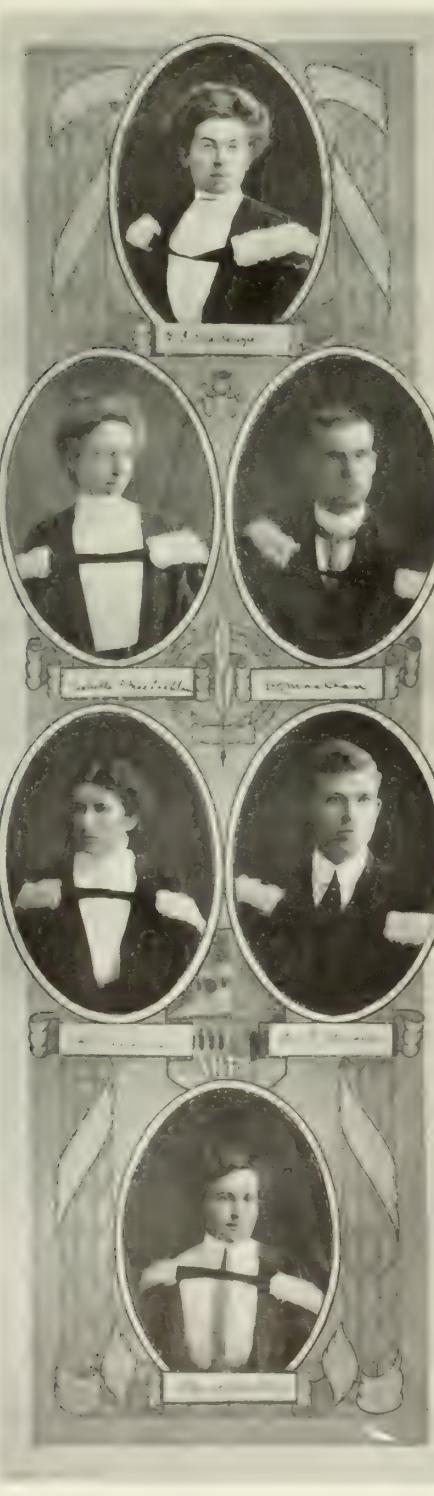

MACKAY, JESSIE THORNE.

*"You are an elegant scholar,
Having the graces of speech and skill in the turning of
phrases."*

Jessie Thorne MacKay was born and reared in the famous Township of Zorra, in Oxford County. After having obtained the basis of her education in the village school at Embro, she matriculated from Woodstock Collegiate at an early age. A little later she became engaged in literary work in Toronto. Her interest in literature made her desire to pursue her studies further, and in 1907 she enrolled at University College in the English and History Course. During her academic career she has shown herself "skilled in the turning of phrases" and her classmates expect great things from her in this respect in the future.

MACKENZIE, BESSIE JACKSON.

Bessie J. Mackenzie received her public and High School education in her native town, Lucknow. In January, 1908, she entered University College and registered in the first year General Course. During her fourth year she was associate editor of "Varsity."

MACKENZIE, GRACE INNES.

"True of heart, of spirit gay."

Grace MacKenzie is a Toronto girl by birth and education. She matriculated from Harbord Collegiate Institute in 1907 and in the following autumn entered 'Varsity. She has taken a creditable place in the General Course, and has at the same time been an all-round college woman. As a loyal member of her class, as Vice-president and then Membership Convener of the Y.W.C.A., and as Critic of the Women's Literary Society, Grace has well served her college generation. By her wholesome zest alike for work and fun, and by her spirit of comradeship, she has made her classmates confident of happy days in store for her.

MACLACHLAN, ISABELLE PARIS.

"She is so free, so kind, so apt, so blessed a disposition."

Miss Isabelle P. MacLachlan (English and History—Moderns) was born in Renfrew County. She graduated from Harbord Collegiate. Some years later she entered University College, where, like her sisters before her, she has taken a high standing throughout her course. All who know Miss MacLachlan are impressed with the quiet geniality of her manner—the true expression of her innate kindness and sincerity of heart. Apart from her University studies she is an extensive reader, and has for years made a study of the History of Art. No one leaves College more fully equipped for a useful career.

MACLEAN, DONALD GEORGE.

*"You saw your nobler, better self,
When he became your friend."*

It was at Blyth, Ontario, that Donald first saw the light. Graduating from the Clinton Collegiate Institute, he taught school for two years. In 1908 'Varsity claimed him as a "fresh-Soph" in Political Science. He has maintained a creditable standing throughout his course, and has taken a keen interest in every branch of student activity. He was a well-known member of the Boxing Club, an enthusiastic "Old Lit." and a member of the Graduating Class Executive. Although of rather a distant disposition "Mac" is generous and warm-hearted to those who have the privilege of being his friends. He has won and kept the confidence of his classmates. Next year will probably find Don. at Osgoode.

MACLENNAN, MARY FLORENCE.

*"A glance like water brimming with the sky,
Or hyacinth-light where forest shadows fall."*

Miss MacLennan claims Thessalon, Ont., as her birthplace, but received her High School education in Bruce Mines. The allurements of the University of Toronto attracted her to that institution, where, with other well-thinking students, she registered in the General Course. Florence was always ready to help untangle knotty problems for her classmates and enlivened many a lecture by her proficiency in art. In spite of many outside interests, she maintained a place among the foremost of the Class of '11, and by her kindly humor and thoughtfulness made lasting friendships.

MCCLENAHAN, CLAUDE ANDREW.

"Life is just one damn thing after another."

Mae, born at Appleby, educated at Hamilton, from which he emerged very much alive, entered 'Varsity with a great fund of learning in one hand, and a love of sport in the other. He became the white-haired boy of the B. & P., which noted course does not allow much time for sport, yet Mac found time to become a member of the Champion Senior Arts Football Team of 1908, as well as of the Varsity II Soccer and Basketball teams. His efficiency in sports has not caused him to lose sight of such things as tryptophane and amino propionic acid, with which he is on quite familiar terms. His ability is such that we expect he will remove many appendices before many years have passed.

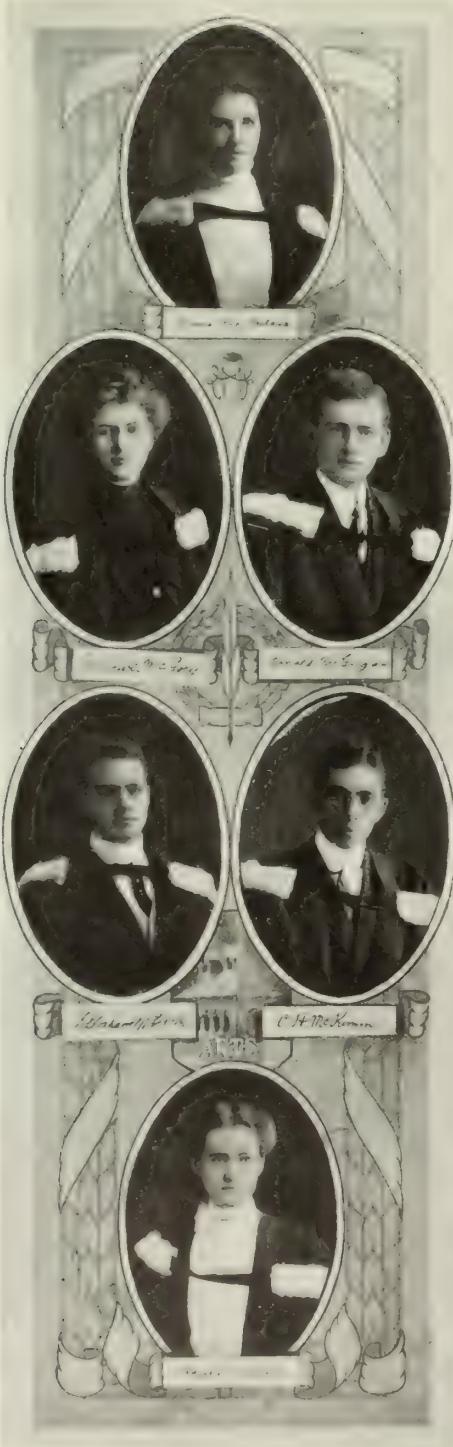

MCCOLL, DOROTHY MIRIAM.

*"A mien that neither seeks nor shuns
The human scattered in her way."*

Dorothy Miriam McColl received her preparatory education at the Convent of the Sacred Heart in Montreal and at Glen Mawr in Toronto, from which she matriculated in 1906. The broad culture of the General Course appealed to her and claimed her as one of its votaries in the Class of 1911. Her charming personality and good comradeship have won for her many friends during her college life. She is a member of Sigma Beta Pi Fraternity.

ROOMS IN MEN'S RESIDENCES.

McFARLANE, JENNIE.

*"She doeth the little kindnesses
That others leave undone."*

Jennie McFarlane was born in Altona, Ontario; but, prior to College days, her education was obtained in West Toronto. In 1905, she passed the Junior Leaving examination with honors; and, when she joined the Class of Onety-One, it was with a scholarship in Science and Mathematics. Throughout her course in the H. Sc. department so far Jennie has taken first place in first-class honors; and, since she has been thoroughly interested in the practical, as well as the scientific side of her studies, we shall expect her to do much valuable work in the field of Household Science. Jennie's gentleness, kindness and untiring sympathy have won for her many college friends.

MCGOEY, GENEVIEVE.

*"Her ways are ways of pleasantness
And all her paths are peace."*

Genevieve was born in Tottenham, Ontario. There and in Toronto, with a term spent in Chatham, she received her preparatory education, matriculating from her home town with first-class honors and carrying off the gold medal in Mathematics from St. Joseph's Academy in the city. She entered College with Onety-One, and decided to make the most of her College course by taking English and History, in which she is an ardent advocate. She is the Secretary of the Catholic Women's Club. She is an all-round girl, and does not allow her studies to interfere with her College course. Quiet and unassuming, she is respected and admired by all with whom she comes in contact.

MCGUGAN, DONALD.

"Frivolous enough to have comrades, credulous enough to have friends."

In the famous county of Middlesex our comrade and friend Donald McGugan experienced the sorrows, endured the troubles, and survived the struggles of infancy. There, too, he obtained his primary education. Subsequently, he attended Strathroy Collegiate Institute, where he received his Junior Matriculation. In the following year he obtained his Senior Matriculation, and in 1907 entered the Class of Onety-One with his fellows of mathematical inclination. Eulogy will be quite unnecessary to those who know Donald, and altogether inadequate to those who have not formed his acquaintance. After we have enjoyed the companionship of his jolly disposition and shared the welcome of his genial hospitality we begin to appreciate Donald McGugan.

MCINTOSH, DAVID GRAHAM.

"Quo me rapis, Bacche?"

This virtuous youth entered University College in 1907, fresh from the halls of learning at St. Andrew's College. His sunny, ardent nature has installed him firm in all hearts, and prompted the highest hopes for his future, in whatever field he may be. Graham's talents are various, but it is probable that Osgoode Hall will claim him for a brief interval, and although the prosaic routine of law must seem a prison for his soaring spirit, we trust he will make it go. As Graham is leaving us this year it is to be expected that a considerable falling off in co-ed. attendance at lectures will result.

MCKIMM, CHARLES HARWOOD.

"Deep, sir, deep, and devilish sly."

Charles Harwood McKimm was born in Smith's Falls, Ont., February 24th, 1890. There he received his primary and High School education. Having shown considerable aptitude for the acquirement of intelligence, his fond parents felt justified in launching him on more strenuous academic seas. Exit Harwood for the provincial seat of learning, Toronto, to enrol with Class '11, U. C., and he has remained with Class '11 to the end, although such subjects as theatres, social stunts, etc., taken extramurally, formed part of his course. He has decorated the following positions: Second Year, hockey team; third year—councillor; fourth year, Arts Dance Committee. The "staid" senior gives way to the finished arts man, socially and intellectually a good mixer, and with a wide circle of friends. Let us drain the flowing bowl to his success in his chosen profession, law.

MC LACHLAN, JEANIE SHIRAS.

"That's nothing to what I could say if I chose."

Jeanie McLachlan was born in Montreal, but at an early age she removed to Guelph, where she received her primary education. She passed the Senior Leaving examinations in 1907, and in the same year entering University College, registered in the English and History Course. In her fourth year she was a member of the Cabinet of the Y.W.C.A., and of the Class Executive.

McLAY, JAMES FRANKLIN.

*"The man worth while is the man with a smile
When everything goes dead wrong."*

"Doe" is a Woodstock and Woodstock College boy. He first thought of "punching pills" for a livelihood, and graduated highly from O.C.P. An afterthought induced him to enter University College with '10 in B. & P. After a year's vacation he entered with '11. He has always fooled successfully examiners and goalkeepers alike, as he played Junior O. H. A. hockey, and soccer with Pharmacy and Arts. They say he is a good one at it. As first year representative to the Lit., and a staunch Old Lit. supporter (on election nights); chess-fieid, and chess executive man; and on the Class Executive, he has proved to be a capable executive man. A man who has done all Doc. has done is sure to make a good "immigration official."

MCLEAN, GORDON DAVIS.

"A lawyer art thou? Draw not nigh!"

Gordon Davis McLean was born in 1889 in the little village of Ayton, Ontario. He attended the Collegiates of Guelph and Ottawa and before leaving the latter school for University College, he was an ornament in an Ottawa bank for one year. It was here that he acquired the sound business principles which have made the financial end of the "Arbor" a success. Academically he has an exceptionally fine record, holding the Alexander Mackenzie Scholarship in Political Science in his junior year. He was a valued member of the Old Lit. Government of the Lit. '10, is a member of the Historical Club, and is known to his friends as a lover of books. He will study law.

MCLELLAN, JAMES CAMPBELL.

*"In spite of all the clamor of the age,
He still remained the same unfailing friend."*

"Mac" received his public and High School education at Streetsville, Ont., and after showing ability as a teacher, joined the illustrious Class of '11, in the autumn of 1907. The "powers that be" in the political world were for a while held in suspense, until he finally cast his lot with the "Old Lit." party, and has since been one of its most enthusiastic supporters. Of a cheerful, generous and social disposition, J. C. has shown his mental ability, by taking a creditable standing throughout his entire course. After graduation he will attend the Faculty of Education, which, with his numerous and useful qualifications, will no doubt ensure for "Mac" a bright and successful future.

MCNALLY, WILLIAM H.

"A rosy man, right plump to see."

Bill is a bright boy. He has sustained the record he made at Galt Collegiate by taking a high stand every year in Political Science, and has been honored with almost every office around the old pile, winding up with those of Business Manager of "The Arbor," and Secretary of the Lit. He takes a keen interest in athletics—that is, he keeps a fencing foil in his room and upon occasion sprints for a street car. Bill is the idol of many a maiden's heart, and among the men the glad hand and joyous smile greet him everywhere. When he gets into the legal profession things will begin to move.

MCLEAN, ALICE.

"Is she not pure gold?"

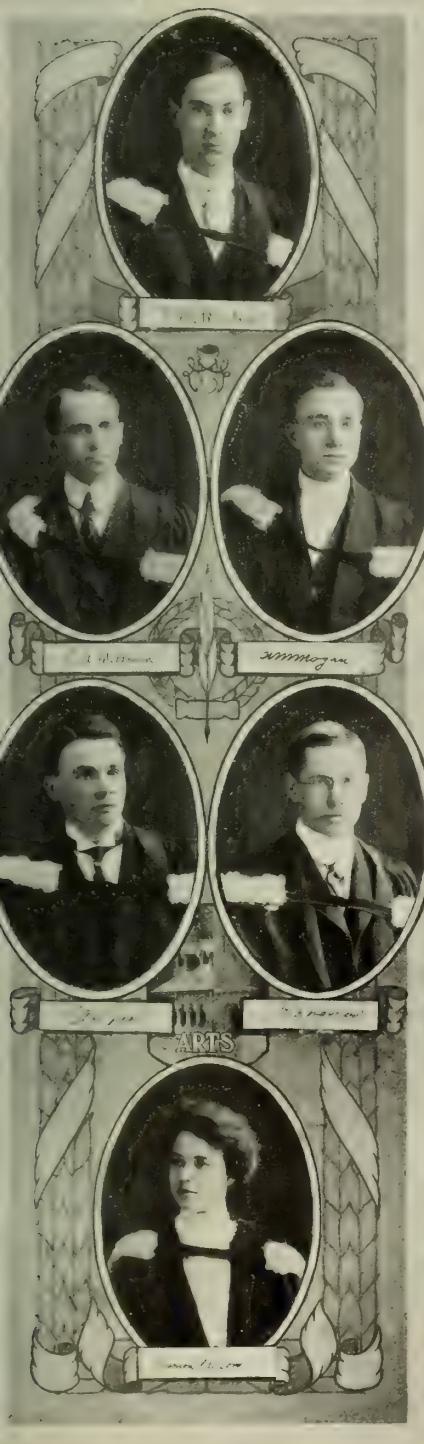

Alice McLean matriculated from the Ottawa Collegiate Institute, '07. Throughout her course she has worked gaily and enthusiastically in the College societies. Besides a great deal of committee work she has held the following offices: Prophetess on the Class Executive, Corresponding Secretary of the Literary Society; Y. W. C. A. delegate to the Elgin House Conference, representative to Evangelia Settlement, Secretary of the Federal Executive of the Y. W. C. A., member of the Arts Dance Committee (twice), Curator of Basketball, Athletic Executive, President of the Women's Literary Society. She is a member of the Toronto chapter of Alpha Phi. Perhaps of these various interests "The Lit." and "Evangelia" are the two in whose behalf she has expended most earnest effort.

MCAUGHT, WILLIAM CARLTON.

William Carlton McNaught (born in Toronto, 1888), entered the Political Science Course, after his preparatory training in Jarvis Street Collegiate. He was editor-in-chief of "Varsity" (with which he was connected for three years), President of the class in his first year, Secretary-Treasurer of the Historical Club, and Convenor for University College of the Y.M.C.A. Bible Study. He won the Alumnae Prize for English Essays in the second year, was on the winning team of Inter-year debaters, and helped to inaugurate "Freshman Night" as a substitute for the "hustle." It is easy to see from this list of activities that W. C. McNaught is highly competent. He is also of a most pleasing disposition. A noteworthy future is assured for him.

MAY I HAVE THE PLEASURE
OF THE NEXT HOBBLE?"

MARTER, FREDERICK McGREGOR.

"By nature honest, by experience wise."

Fred was first heard from in Gravenhurst, Ont., 1886. At an early age he was transported to Toronto where he received his preliminary education. He then spent three years in business, but the little stone school house in Queen's Park had always excited his curiosity, and for four years he has proceeded to learn and investigate its secrets. As an undergraduate he has always showed a keen interest in the many and varied activities of College life, at the same time proving himself a diligent and appreciative student. His future is enshrouded in mystery, but his sterling qualities inevitably point to success.

MILBURN, CLEMENT A.

*"Da steh' ich nun, ich armer Tor!
Und bin so klug als wie zuvor."*

Clem, spent his boyhood in Desboro, a small village with few other recommendations, and later attended the Owen Sound Collegiate Institute. The duties of the principalship of Highgate School engrossed his attention for four years prior to his work in Toronto; without being a hard student he has maintained a high position in the class lists in his chosen course, M. & P. He was a member of the Rifle Team in his final year; with a classmate he went to England as one of the Queen's Own. He has a vein of droll humor and a rich mine of genuineness, and those who go prospecting in his friendship are made rich by new discoveries of natural wealth. We predict a brilliant career for Clem. in his subsequent life.

MOGAN, WALTER MICHAEL.

"A man is but what he knoweth."

Walter was born and raised in the old University City of Toronto. After spending four years in the De La Salle Institute he matriculated partly in 1906 and partly in 1907. He then entered Toronto University, selecting Political Science as the best course to develop his incipient legal ideas. Although a severe attack of pneumonia necessitated his retirement for many important weeks in his second year, by hard work and diligent application he was successful in his examinations. His many friends wish him great success in his chosen profession.

MOLE, WILLIAM HERMANN.

"If you wish success in life, make perseverance your bosom friend, experience your wise counsellor, caution your elder brother, and hope your guardian genius."—Addison.

Our friend, Hermann, was born in Newcastle-on-Tyne, England, in the year 1883. At the age of four, with his parents, he came to Canada and finally settled in Toronto. His public school education was received in Bathurst and Givens Street Schools; his High School education at Toronto Junction Collegiate Institute, where his straightforward, manly character and general thoroughness made for him many friends. Hermann inherits much of his strong, forceful character from his Huguenot ancestors, who left their homes for conscience sake. In whatever sphere he may in the future direct his energies we feel sure that he will be successful and that those who experience his friendship will be the better for it.

MOWAT, ARTHUR MACLAREN.

*"In arguing, too, the Doctor owned his skill,
For e'en though vanquished he could argue still."*

He received his primary education at Upper Canada College where he always took a high place in his classes. On leaving U.C.C. he won the Leonard MacLaughlin Scholarship and entered Trinity College where he passed in his second year at the head of his course. Here he showed great interest in all the college activities taking an active part in the Literary Society, and playing on the first football team. In 1909 he entered the third year of Political Science at 'Varsity. After three years at Osgoode he purposes pursuing his career in the West, where he will take with him the best wishes of all who know him.

NEILSON, MARION.

*"Her eyes as stars of twilight fair;
Like twilight, too, her dusky hair;
But all things else about her drawn
From May-time and the cheerful dawn."*

"May" (kindly note the appropriate abbreviation with its cheerful suggestions) was born in Proton, County of Grey. After matriculating at the Owen Sound Collegiate Institute she eventually entered upon her University course with the Class of Oney-One. In her case coming exams. never "cast their shadows before;" her vivacious spirit discovered many interests outside those of college life, but she always found time to attend the "finals" and obtain General Proficiency standing. We know that her animation, fine sense of humor and ingenuousness will lead to her continued success and be an inspiration to her associates of the future.

NEWTON, WILBERT LAWRENCE.

*"The best that time has in its store,
Be yours to-day and evermore."*

Born at Tara, in far-famed Bruce County, 1886, Lawrence early came to Toronto, where he attended Dewson Street School, later preparing for matriculation at Toronto Junction High School. Manly and frank, Lawrence has won to himself, both at High School and University, many warm friends who heartily entertain sincere good wishes for his future success.

O'NEIL, IRENE GATISS.

"Strong of will, to strive, to seek, to find and not to yield."

Irene G. O'Neil was born at Exeter and received her primary education there. Later she removed to Toronto and, after two years at Branksome Hall, she entered the University of Toronto, registering in the General Course. During her four years in the University she has taken a keen interest in every branch of student activity, having held office on the Class Executive and in the Women's Literary Society. In her third and fourth years she was President of the Anglican Women's Club.

OUTERBRIDGE, LEONARD CECIL.

"Still achieving, still pursuing."

"Out" came to us from a far land, namely Newfoundland. He was educated at Marlborough College, England, and on coming to Toronto, registered in Trinity College where he spent two years, being very prominent in athletic and literary circles. He was on the Trinity football and cricket teams and was Secretary of the Trinity College Literary Institute. He entered University College in 1909 from which he graduated. Len. played on the Mulock Cup team, which, unluckily, did not do all that was expected. The best wishes of his many friends follow him to Osgoode Hall, where he intends to pursue the (un)even tenor of his way.

PARSONS, VERA L.

"An ability to discern the infinite suggestiveness of common things."

Vera Parsons matriculated from the Jarvis Street Collegiate Institute in '05. She registered in English and History, taking the first year work extramurally. In her third year she was representative upon the Executive of the Literary Society and was sent as delegate to the Y.W.C.A. Conference in Muskoka. She is a member of the Toronto Chapter of Alpha Phi.

PATTINSON, RUTH E.

"Here is a friend for earnest and for sport."

Ruth E. Pattinson was born in Preston, Ont. She received her early education in Galt, and later came to Toronto where she attended Glen Mawr Ladies' College, from which she matriculated in 1907. At College she has taken a very high standing in the general course each year. She was one of the Class Executive in her third year, and throughout her College course has been a faithful supporter of the different College societies.

PEPLER, ERIC.

*"Good sense, which only is the gift of heaven,
And though no science, fairly worth the seven."*

The fifth day of January, 1890, is known in Barrie—at least to the careful student of the Parish Register—as the birthday of Eric Pepler. When he arrived at the threshold of the second stage of life he honored with his presence the local public school; but not finding there sufficient scope for the exercise of his powers he transferred his allegiance to Upper Canada College. A successful matriculation in 1907 induced him to probe the mysteries of Political Science by a four-years' course in University College, whence he now steps forth with a broadened outlook which will carry him far in his chosen career.

PHILLIPS, ROBERT WESLEY.

This serio-comic chap was born in Toronto, in 1889, and received his preparatory education at Harbord. From early childhood Bob was determined to be a Med., and wisely chose the B. & P. course on entering the University in 1907. He was always there with the information at exam. time, even if he was the possessor of certain fussing attributes. He was a very efficient member of the Senior Class Executive, a member of the Glee Club, and on the Mock Parliament. He was also a runner-up in the tennis tournaments. He has an arm like his character—as steady as a rock, and will, we are sure, wield the knife when he becomes a surgeon, as he has always done his words, with strength and precision, the keys of success.

PUE, JAMES ARCHIE HUME.

*"Hang up Philosophy,
Unless Philosophy can make a Juliet."*

Archie was born in the country, but at a very early age he transferred his residence to the town of Barrie, where he early learned the rudiments of education and "fussing." He entered into the Class of 1911, spending his Freshman year in M. & P., but later transferring into Philosophy. Archie prefers a scrap to a lecture, and sports to exams. Being a football enthusiast he was able to secure a place on the Varsity I Soccer team this year, where he won his colors. Nevertheless, he is a good student of Philosophy and of Human Nature. He intends to study for the Presbyterian ministry in Knox.

ROBB, WALTER TYRIE.

*"The kirk and state may gae to hell,
And I'll gae to my Bess."*

Oh happy day for Dunnville when W. Tyrie first sat up to take nourishment. And ever since then he has never missed a meal. Walt. matriculated with honors from the Dunnville High School in 1908, and the same year began his preparations in University College for future housekeeping. We hope he may take as keen an interest in this line as he does in sport and music. For at present he is Secretary of our Glee Club, and the "main push" with a slide trombone in the Dunnville Silver Cornet Band. He also kept Dunnville on the map by his successful management of their baseball team in 1909 and 1910. He is a member of the Arts Faculty baseball team.

ROBINSON, LUCY W.

"Simplicity, sincerity, service."

Lucy W. Robinson was born in Tokio, Japan. She began her Canadian education at Havergal College, and matriculated from Ottawa Collegiate in 1907. On coming to College she entered English and History, and in her first year won the Cox Scholarship for Old Testament Literature. In her second year she was one of the Executive of the Women's Literary Society; then she was Third Year representative on Varsity Board, and in her fourth year became one of the leaders of the women students as President of Y.W.C.A. Lucy is a Student Volunteer, and is looking forward to returning to Japan, where she will be followed by the hearty wishes of her classmates for a successful career.

ROGERS, SAMUEL.

*"A man he seems of cheerful yesterdays
And confident to-morrows."*

Samuel Rogers is a Toronto boy. He received his earlier education in the Model School and Jarvis Street Collegiate. Graduating from the latter institution with senior matriculation standing, he entered the Political Science course of Class 1911. Although a brilliant scholar, Sam has by no means neglected the social, political, and athletic side of his College life. He has not shunned office, and his executive ability has caused him to take a prominent part on executives and committees, including the position of Chairman of Arts Dance in his fourth year. In politics, as a Unionist "heeler" he has been a great asset to his party. Conditions, indeed, seem to point to a future brilliant success in his chosen profession of Law.

SCOTT, STANLEY MEREDITH.

"Nequid nimis."

Stanley was born at Kincardine in 1888. After a public school education at Kincardine, he attended the High School at Walkerton, where he took his Honor Matriculation in 1906. After enjoying a year's mental relaxation he came to Toronto and entered the Class in 1907. He chose Classics as a fit field for his labors, and has been most successful therein. His Parliamentary career includes two terms in the Undergraduates' Parliament and the stormy session of the Mock Parliament in 1910. In his third year he also gained distinction as the able Secretary of his Class. Stanley is an enthusiastic "Old Lit" in politics. On graduation he expects to teach for a time and then to take up the legal profession, in which he should become a brilliant luminary.

SHEARD, JOSEPH LOUIS.

*"Shakes his ambrosial curls, and gives the nod;
The stamp of fate, and sanction of the god."*

Joe has the distinction of being one of the youngest members of the Graduating Class. Do not imagine for a moment, however, that he is a "plug." Far be it from such. As all his friends can swear he has always been followed by a liberal supply of horseshoes, which, added to what might be called natural intelligence, has pulled our Joe through exams. Before he graced the halls and pillars of University College with his artistic presence, he attended Upper Canada College, where he acquired a rudimentary knowledge of all that's classical. What he intends to turn his hand to after he quits his Alma Mater is yet unknown, but we are safe to say that it will be a success.

SHEPPARD, ROSS STANLEY.

"A man not of words but of action."

Having Belhaven as his birthplace, it was there that Shep's cranium received its first development for the great things it was afterwards to hold. After passing through the schools at Belhaven, Newmarket, and Orillia, he enrolled in Honor Mathematics at University College 1907, in which class he has always been amongst the leaders. During his first two years he was prominent in football, but since then he has devoted his athletic talents to track events, in which he not only obtained his colors but leaves the College the holder of two records. Shep's ability to unite in the correct proportion, athletics, social functions, and College work, guarantees him success in whatever vocation he follows.

SHUTT, HERBERT MCKENZIE.

*"'Tis said that duty followed freedom
In its wing."*

Herbert McKenzie Shutt was born on July 23, 1889, at Parkdale, Toronto. He received his primary education at Queen Victoria public school and Parkdale Collegiate. At the latter, study had a small "s" and Rugby, baseball, lacrosse, all the sports, loomed large. After he had obtained the Junior Matriculation standing, his parents changed their residence to Eglinton, and from there Herbert entered the Biological and Physical Sciences with the Year of '11. Throughout his course, although urged by love of sport and the success of former companions, he found first-class honors and Rugby not congenial. The Arts course completed, he—but that's another story.

SIBBALD, ANDREW SCOTT.

"To strive, to seek, to find, and not to yield."

Choosing the same day of the year as that on which Darwin and Lincoln first saw light, Andrew was born in Owen Sound on February 12, 1888. His early education was gained at Annan public school and Owen Sound Collegiate Institute. He graduated from the latter as a Gold Medallist in Oratory and in General Proficiency, and entered the Political Science course in Varsity as a fresh Sophomore. The "Lit." claiming his active interest, he became its oratory medallist, and, finally, Vice-President. A Unionist in politics, he was organizer of that party in his third year, and largely responsible for its victory in 1910. Next year will find him studying Law in Western Canada.

SINCLAIR, THOMAS ALEXANDER.

"It is not wealth or ancestry, but honorable conduct and a noble disposition, that make men great."

Thomas Alexander Sinclair was born at Paisley, Ontario, and received his preparatory education at the Walkerton High School. Upon entering the University he was somewhat undecided in his choice of a course, but he finally entered the Department of Biology. Of Highland Scotch descent, he possessed qualities of thoroughness and determination, which, combined with an enquiring mind, well fitted him for the pursuit of scientific knowledge and made him a diligent and successful student of the mysteries of life. Tom was not unmindful of other phases of life, however, and he found much pleasure in music, and he was able to dispel many a gloomy moment at the piano.

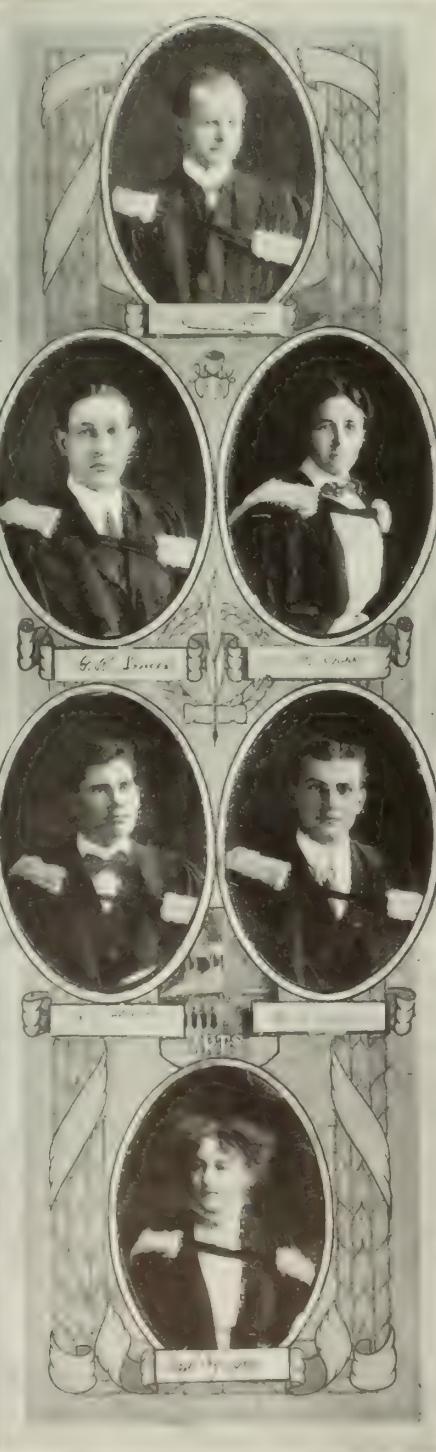

SMILLIE, BENJAMIN STEWART.

*"Spontaneous wisdom breathed by health,
Truth breathed by cheerfulness."*

On a bright Good Friday morning, near the picturesque village of Hensall, Ont., Ben delighted all beneath the parental roof by his first vocal solo. After a few years spent close to nature's heart and at Seaford Collegiate Institute, where he received his preliminary intellectual stimuli, the beckoning hand of ambition led him to a higher institution of learning, and he joined the Class of 1911 in Philosophy. During his College course his persistent optimism, cheerful disposition, and continuous thoughtfulness have won him hosts of friends, while his sterling qualities and determination of purpose ensure for him success in his chosen profession.

It is certainly true that a proper college education broadens a man.

SMITH, REX.

*"Of manners gentle, of affections mild,
In wit a man,
A safe companion, and an easy friend."*

Rex was launched upon the sea of this life in the quiet little village of Thedford, a son of the Manse. He received public school education in Niagara-on-the-Lake; and later, having moved to Toronto, he matriculated from Jarvis Collegiate. After that he spent two years in business. A preference for student life, and its opportunities, however, led him to Varsity. Rex is not great in stature, but his smallness is no indication of his worth in character, or his vigor. He takes keen delight in sports; and all student functions have had his hearty support. After completing his course in Philosophy, in which he is an enthusiastic student, he will enter Knox College as a Theological Student.

SMITH, G. RICHARD.

"Non modo in rebus gestis sed etiam in fictis."

Smith was born near Bothwell, Ont., but received his High School education in Dutton. After graduating with Senior Leaving he attended Normal College at Hamilton, and afterwards undertook the work of teaching in Southwestern Ontario. After four years at this he decided to prepare for more advanced work and entered the M. & P. Class of '11, confining his attention in his final year to Physics. Whether he goes back to teaching or applies himself to getting experimental evidence to strengthen some of the newer theories in Physics, we all expect to hear of his being very successful, as he has a reputation for steady conscientious work.

STARR, JESSIE M.

"A happy man or woman is a better thing to find than a five pound note, . . . their entrance into a room is as though another candle had been lighted."

Jessie M. Starr matriculated from Jarvis Street Collegiate and entered University College with the Class of 1911, registering in Moderns. She has put much of her enthusiasm into the various phases of College life. On the Class Executive in her Freshman year, as Mistress of the Chase in her Junior year, and as Treasurer of the Athletic Association and Fourth Year Representative on the "Lit" in her Senior year, she has proved her executive ability. In class-room, on tennis court, in Literary Society or at class reception she has been known and will always be remembered by her unselfish, happy disposition. She is a member of Ontario Alpha Chapter of Pi Beta Phi.

STRACHAN, JOHN TAYLOR.

*"A worthy friend, a noble foe—
A Christian gentleman."*

Born in the County of Huron, at Brussels, educated at Wingham Collegiate Institute, "Jack" appeared at Varsity in the autumn of 1908. The frank countenance and gentlemanly bearing ensured his popularity amongst his classmates. An ardent Unionist, he very soon gained a widespread reputation as a keen, intense, and convincing speaker and debater. A member of the University Glee Club, he represented his year at the oratorical contest in 1909, and was unanimously appointed orator of the graduating year of '11. His brilliant qualifications as a public speaker, combined with deep insight into human nature, and high moral ideals, insure for "Jack" a leading place in the future public life of his native land.

STAPLES, MELVILLE HOWDEN.

*"Oh, it's great to be out where the fight is strong,
To be where the heaviest troops belong,
And to fight for man and God."*

From the first "Mel" gave promise of being a very "staple article." On the rugged slopes of Cavan he received a thorough course of training on the farm, from which upon graduation he entered Port Hope Collegiate. Like other ambitious men of his class, he decided to enter '11 as a full-fledged Sophomore in the fall of '08. At Varsity he has "made good" in every department of College life. The various positions he has held on our College societies show him to be a student of real ability, of keen executive power, and of strong personality. In his final year he holds the Y.M.C.A. Presidency. "A man among men," Mel stands shoulder to shoulder with his fellows, ever ready to answer at the roll-call of duty.

SYKES, HAZEL IVY.

"She prefers to work on quietly and at peace. . . . The name is nothing, the real result all."

Was born in Toronto. She received her preparatory education at a private school in Buffalo. Later she attended Parkdale Collegiate (Toronto), from which matriculating in 1907 she registered in the General Course, University College, thus becoming an honored member of '11. Her College career has been marked by faithful work. Hazel is admired and esteemed by all her classmates. In her Senior year she held the time-honored office of Poetess, a token of the personal esteem of her fellow students. She possesses as distinguishing characteristics—amiability, sincerity, and modesty.

SYMMES, BERTIE HENRY LUTHER.

"Speak softly, the Count approaches."

"Count" Symmes was born in Sherbrooke, P.Q., but early wended his way westward to a little place called Niagara Falls, where he gathered sufficient knowledge to land him in Varsity in 1906. Since then Bert has been mixed up in a lot of things, including a General Course. He seems to lean towards things managerial, for we find him exercising a motherly care over the Third football team in 1909, and the Second in 1910. The Third won the championship once, the Second lost only after an awful struggle with R.M.C.—which speaks well for Bert. Bert has many admirable qualities—but as he is going to read this over we know that he won't let us mention them. Anyway, if you know him that's enough. He is a Prodigal Son.

TANTON, T. L.

*"King, Queen, Bishop,
Knight, Rook, Pawn,
Sh! Sh!"*

T. L. made his first move in London, Ontario, and in his four years at the Collegiate Institute there acquired a liking for Chess and Science. In our University he has been prominent amongst its chess players, and in his fourth year was elected President of the University Chess Club. Politically, he was loyal in his support of the Unionist party. In his spare time he trifled with Geology and Mineralogy, obtaining scholarships in both his Second and Third years. T. L. will not be a pawn among Canadian geologists.

TENNENT, GORDON H.

Gordon received his early education in the public schools and the Collegiate Institute of the Forest City, his native town. After matriculating he entered the Western University, where he acquitted himself with credit in his academic pursuits, and through his musical ability and his active participation in the various student activities occupied a prominent place in University life. In his Third year he transferred to Toronto, where he has well maintained his previous reputation. In the near future we feel assured that Gordon will be an ornament to the legal profession.

THOMPSON, CHARLES STANLEY.

*"Wit,—Work,—Wisdom;—
Always on the tear."*

Charles Stanley Thompson, born in Toronto, 1889—Heaven knows why! for the young beggar wearied his mother, a maid, two sisters and a bulldog, tore all the sod off a fifteen-acre lot, and then tore through the schools of Scarboro and East Toronto. At High School he tore away for gains in oratory, debate, sport and first-class honors in the Senior Matriculation Exam. of 1908. That fall found him a Varsity Sophomore in General Arts. As was his wont he tore a little hole in General Proficiency, and at the same time one in the religious atmosphere of East Toronto. His many friends already see how Stanley's genial aggressiveness will tear up the steeps of a successful career.

THOMSON, EDWARD MURRAY.

Murray hails from Moosejaw, and therefore certain very witty friends have dubbed him "Moose." 'Tis said he developed his athletic tendencies in early youth by sprinting after the elusive coyote in a vain endeavor to sprinkle sodium chloride on its caudal appendage. At Varsity he showed his matured prowess, first in Association football, and then, having sniffed human gore, he transferred his energies to Rugby. He was the star outside wing of the two championship teams and carries a piece of the scalp of both Rough Riders and Tigers. In lacrosse, he played on the team of 1910, and is this year's Captain. Also he has played on both Mulock and Jennings Cup teams. Besides this, he was President of his Junior year, and is Business Manager of "Torontoensis." Other activities and the General Course have made him one of the busiest men around Varsity. The future glistens for him and the West awaits his return with intense expectancy.

TRACY, FREDERICK FLEMMING.

"Friend to truth; in soul sincere."

Fred dropped in quite unexpectedly one night in 1886 on the little village of Minesing, Ontario. He stayed there. In due time he sat at the knee of the rural dominie—and sometimes over—taking a keen interest in study and sport. At fourteen he passed the Entrance, and with one year in Barrie Collegiate Institute gained Part I Junior Leaving at sixteen. After five years of varied toil, his ambition still unsatisfied, he joined the famous Onety-One Class in General Arts. With such slender preparation, he has stood well in his classes. With his high ideals, and keen observation of human nature, Fred is assured a successful future and perhaps a co-ed.

ST. MICHAEL'S COLLEGE.

UNDERHILL, FRANK HAWKINS.

*"Concluding all were desperate sots and fools
That durst depart from Aristotle's rules."*

Stouffville was the scene of Frank's birth and early education, but higher aspirations soon led him from his native village to Markham High School. There he spent six years, graduating with the Prince of Wales Scholarship in 1907. The fall of the same year saw him enrolled with the Onety-Ones, and since then he has devoted himself chiefly to Classics and English and History. Frank has served in several capacities on the Y Executive, and is also a member of the Historical and of the Letters Clubs. In this, his final year, he is undertaking the arduous task of keeping the Classical Association alive.

URQUHART, EDITH LILIAN.

"A merry heart goes all the way."

Edith Lilian Urquhart was born in Toronto and received her primary education there, matriculating in 1906 from Harbord Collegiate Institute. She entered College with the year of '10 in the Department of Modern Languages, but in her Sophomore year joined the ranks of '11. As a member of the Class Executive in her third year, she filled the office of Historian. She also found time to take part in the athletic life of the College, winning a place on the Hockey as well as on the Tennis team.

VARCOE, FREDERICK PERCY.

"A good piece of work, and a merry."

Frederick Percy Varcoe has lived in Toronto for twenty-one years. Before coming to University College he gained distinction at Harbord Street Collegiate; four more years at Varsity have added further lustre. In athletics he has played on Jennings and Mulock Cup teams, finally captaining Senior Arts in his last year. Moreover, as Sporting Editor of the Varsity, he has passed on his appreciation of sport to the student public. As leader of the Opposition in the Literary Society in the stormy year of 1910-11, he gave the Unionists many a warm debate. Withal he has found time to take a high stand in the Class lists and to indulge in other less strenuous forms of recreation. He intends to study Law at Osgoode Hall.

WALES, LOTTIE SUMNER.

*"The light of love, the purity of grace,
The mind, the music breathing from her face."*

Although she spent her early childhood in Jamaica, "Lottie" is a Canadian, and has received all her education in Toronto. Having matriculated from Jarvis Collegiate, she registered in University College in the course of English and History. As a student she has given evidence of unusual ability in both her honor and pass subjects. She has shown class spirit and a fondness for social intercourse by her attendance at all the functions given by her year. "Lottie" has always taken an interest in the Literary Society and the Modern Language Club, and in her Senior year was a member of the St. Hilda's Historical Association.

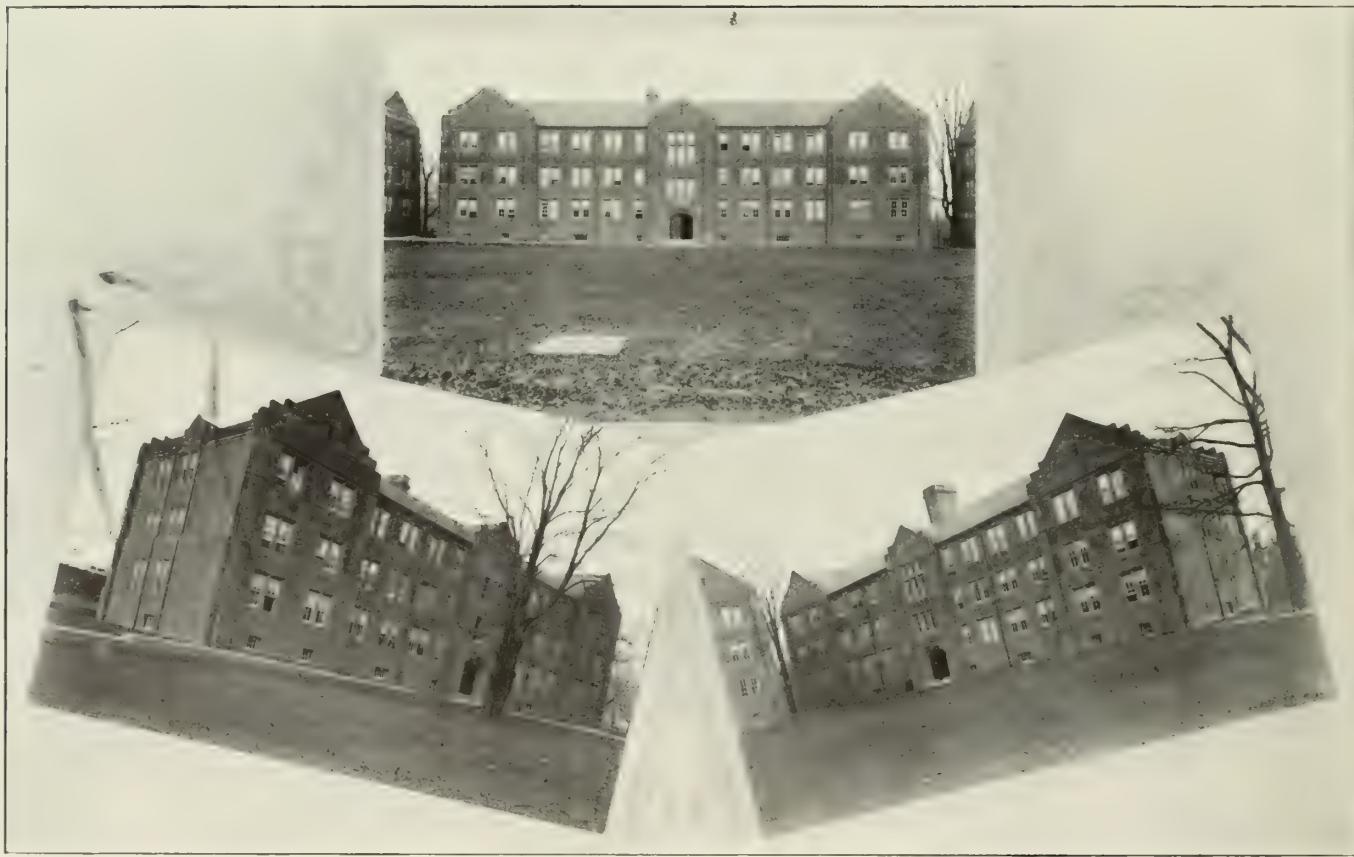

WATERS, MURRAY LORNE.

I was born in Middlesex County, Ont., November 24, 1889. My early life was spent in the country. I began to attend public school when I was six years old. A few months later my father died. I entered the London Collegiate Institute in September, 1902. I passed Junior Matriculation in 1904, and won the Alan Gibbons Memorial Medal. I passed the Senior Teachers' Exam. in 1905 and Honor Matriculation in 1907. On this occasion I was awarded the Gibson General Proficiency Scholarship. I entered the University of Toronto in October, 1907.

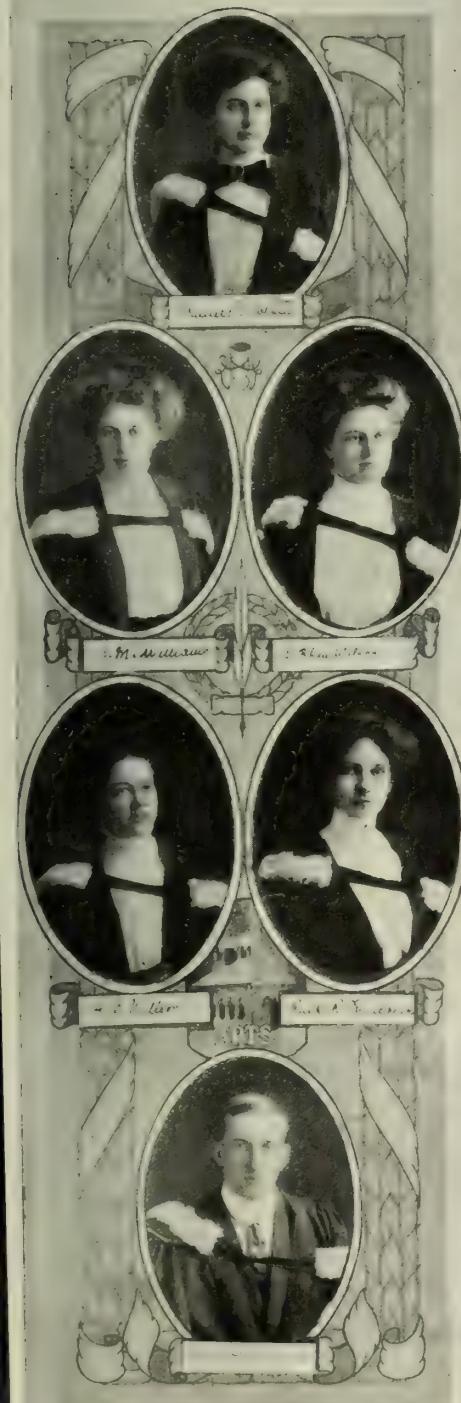

WEIR, ROBERT.

*"Men may rise on stepping stones of their dead selves
to higher things."*

Bob, like many other great men, was born in Huron County. He attended the Wingham public school, the Clinton Collegiate, and afterwards the London Normal School. He taught in East Huron three years and afterwards became Principal of the Marmora public school, in which capacity he was eminently successful. On entering Varsity he chose the M. & P. Course, in which he has made good. He has always taken an active interest in sports, football being his favorite. He figured on the Senior Arts team for several years. After graduating he will enter Academic or Actuarial work.

UNIVERSITY OF TORONTO, MEN'S RESIDENCES.

WEBSTER, FRANCES G.

Frances Webster was born in Toronto, and after gaining her preparatory training and sufficient knowledge, she entered Varsity in 1907 with Onety-One. Her presence and interest in College affairs have been appreciated by all.

WILLIAMS, JANIE MORRIS.

Miss Janie Williams was born in Toronto. A graduate of Branksome Hall, she entered Varsity as a Freshette in 1906, and has since taken her part in College life. She has shared in its gaieties and will probably have happy recollections of many Varsity dances and proms. after her graduation. She has gained all the advantages of a higher education and will leave the University a very learned person. With her College companions she has always been popular and has won many friends by her ever bright and vivacious manner.

WILSON, ETHEL RHEA.

*"Give me of thy merriment,
Of thy sparkling light content."*

After her course in Modern Languages at University College, Ethel Rhea Wilson may well go forth with a sense of duty done. Her quiet support of College societies, her cheerful aid and ready sympathy for any one in distress, her zealous pursuit of knowledge, her genial spirit entering into all activities and pleasures have helped to mould her into an "all-round" girl. After moving from Kingston, the home of her birth, Rhea attended Harbord Collegiate Institute, where she distinguished herself by gaining a scholarship. Just as her pleasant nature won for her then a place in the hearts of all, so it will continue to add, throughout her life, to her circle of friends.

WILLSON, H. BLANCHE.

*"The gods approve the depth
And not the tumult of the soul."*

Blanche Willson was born in Welland County and received her preparatory education at the Welland High School. She came to the University of Toronto in 1907, having previously attended the Normal College in Hamilton. She entered the Class of Mathematics and Physics and in her fourth year chose to specialize in Mathematics. In her third year Miss Willson served on her Class Executive.

WINCHESTER, RUTH RUSSELL.

Ruth was born in Toronto. She began her education in Victoria, B.C. Later, returning to her native city, she attended the Model School and matriculated from Branksome Hall in 1906. She entered Varsity with the Class of 1911, registering in the General Course, in which she has always succeeded in obtaining high honors. With her splendid business ability an enviable future is predicted for her.

WOOD, LOWELL WALLACE.

"Much study is a weariness of the flesh."

Right as always, Wallace, but do stop short of exhaustion. He has studied a little, played some, and loafed much. He was for two years on the University Lacrosse team, and has the coveted "T." Far greater, however, was his performance in scoring a touchdown for Senior Arts when they put the only blot on the record of the Mulock Cup holders of 1910. Withal he is a wag who can outdo "Life" and the "Pink 'Un" combined. We would have wished him an honest livelihood, but he has decided to be a Lawyer.

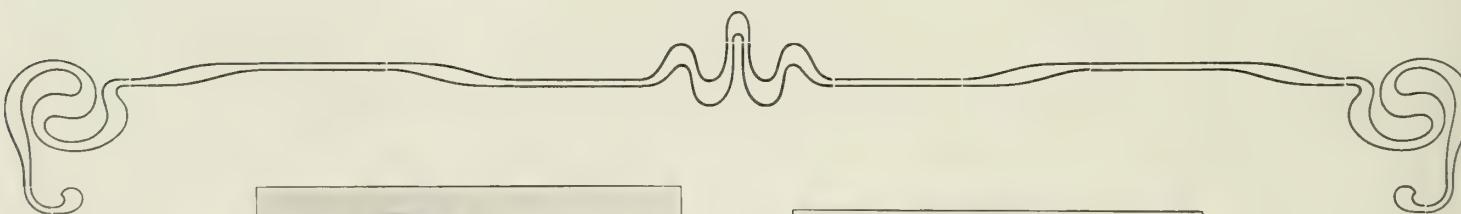

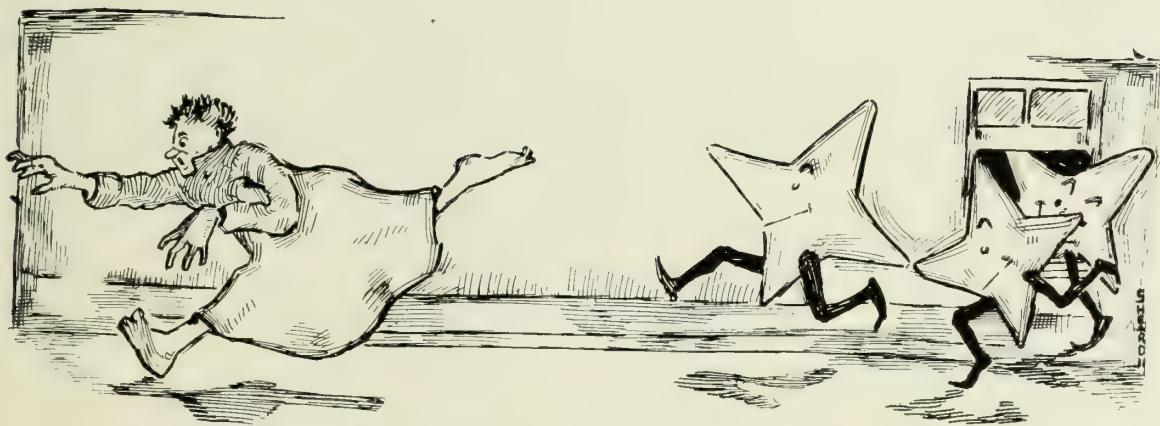

WRONG, EDWARD MURRAY.

Edward Murray Wrong was born in Toronto in 1889. He was prepared for matriculation at the Model School, Ridley College, and St. Andrew's College. He entered the University in 1907, and has taken English and History with the Classical option throughout. In his

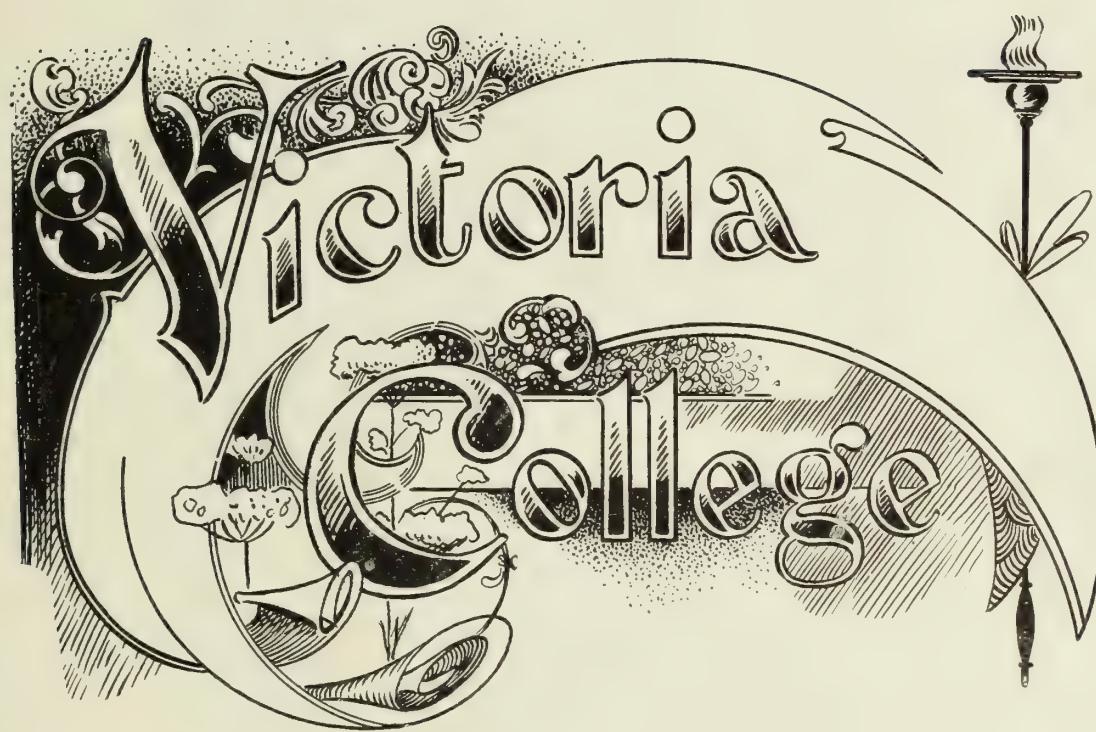

third year he won the Novice event in the Tennis tournament, and the Frederick Wyld prize. He is Vice-President of the Historical Club, an Associate Editor of "The Varsity," was Editor of "The Evening Blast" in 1910, and is a member of the Letters Club. Next year he hopes to be studying History at Balliol College, Oxford.

THE FRESHMAN'S NIGHTMARE

Victoria College

E are a University of Colleges—patterned after Oxford and Cambridge. If a college tends to lose its individuality in the Union, Victoria is the exception. Victoria is as much Victoria to-day as at any time in her history and at no time has her outlook been more glorious.

In immediate prospect we have the Residence, which will be all that money, experience and architecture can make it, and each day is prolific in whisperings of additional merits. Our two ladies' residences have proved most timely and successful. Our main building, commodious and excellent as it has been, does not now suffice for the demands made upon it. Moreover, our staff, second to none in erudition and culture, helps largely to make our college life compact and progressive.

Our environment and our history account for the glowing and wholesome college spirit which already has a name. Student institutions are nowhere more thriving. We have long had the most complete periodical published in the University; two literary societies, one for men and the other for women, fully accomplish all that they stand for. Along with these we are the proud possessors of a refined and pleasant social life. The conversazione, the annual function given by the College as a whole, is indicative of our perfect harmony and

unity. A thousand people is no unusual attendance. "The Bob" is a most original and happy device carried forward and staged by the sophomores each year, to take off the freshmen and faculty and their idiosyncrasies. A farewell dinner to seniors and numerous receptions also figure prominently in the social life.

As might be expected, Victoria is no parvenu in University life. Back of her there is a history rivalling that of the University itself. Many of the men who have walked her halls here and in Cobourg are national characters. In this connection one cannot forbear mention of the name of Chancellor Burwash. Honor, eternal honor, to his name! indelibly associated with both our faculties.

An unfortunate custom has arisen of calling University College the Arts faculty. This is a crude mistake; it is no disrespect to the theologs to say the Arts represents by far the greater number registered in Victoria. Theology plays a minor role, although the College was initiated by a church denomination and is still backed and upheld by it. And it is truth to say that this element in our college life is the radiating centre of much that makes for good in our University.

Some small mind might ask if this is most conducive to University spirit. An answer is superfluous. One does not ask a child who says it loves its mother, if it loves its father too. We do bear the warmest relation to the University; every year it is warmer. But Victoria is our first love and the object of our tenderest affections.

H. Burroughs

History of Class '11—Victoria

HERE are very few classes which have entered Victoria under more favorable auspices and, possibly, fewer still have maintained throughout such excellent standing in every respect as the Class of 1911. Outwardly the autumn of 1907 appeared much the same around old Vic. as in other years. The October sunlight played much the same upon her ivy-mantled walls, and flooded the lecture rooms with its same mellow light. Possibly the crimson of her leafy covering may have had a slightly warmer hue as it circled lovingly around the south entrance which as proudly as ever

lifted its motto of Freedom giving Truth to all the world. Perhaps it was some subtle suggestion from that motto that added brightness to the eye and lightness to the step of those students who that year entered Victoria for the first time and felt something of her traditional sacredness stealing over their youthful spirits. Into her sacred halls they came—the dainty freshette, with her happy, tremulous smile that set the hearts of old B.D.'s palpitating most wildly; the smart collegiate man, with his confident air; the country freshman, painfully conscious of his hands and feet; with occasionally a solemn-looking theologue bearing upon his shoulders the burden of the world's iniquity—all happy, yet fearful of the first few college days.

That was the Class as we knew it four years ago. These four years have made changes. Though something of that first few moments still lingers with its members, some beneficent spirit has been silently brooding over this darkness and intellectual chaos, and out of it brought life and light and order. The light in the eye may not be so expectantly joyous now, but it is deeper and fuller with meaning; the step may be less elastic, but it is surer, and once again they go into the world, carrying a moral and intellectual virility that will shape the destinies of nations and men.

But this is a history—not a prophecy. The first few days at College revealed to the already wary members of 1911 the necessity of organization against their traditional foes, the Sophomores. These were still the days of the Inquisition, and before their eyes loomed large and terrible the "excruciating yet delightful agonies" of the "Bob." The usual Anti-Bob Committee was at once appointed to prepare the Freshman's part of the programme for the occasion. Stealthily they gathered from every corner of the city, to an old hall on the corner of Bloor and Bathurst, and soon music from "vocal instruments of unremembered (let us hope) form gave to the soft winds a voice." Who can ever forget, also, that yell, so religiously practiced and so soon just as religiously abandoned, or the schemes concocted against the Sophomores, and the swiftness with which they were never executed. Suffice to say, however, the whole class conducted themselves splendidly.

and won the admiration of the College for their creditable performance.

Barring the painful necessity of administering due chastisement to the Sophs., for a slight misdemeanor on the occasion of the Freshmen's Receptions, affairs proceeded quietly enough until the Annual "Bob" Elections in the ensuing spring term. Then came war, indeed. The Sophomores, still cherishing in their hearts resentment for those whose real, if not normal, seniority they could not question, proceeded to interfere once again. The interference, be it said, was so successful that some more than usually drastic measures were felt necessary by the Freshmen to wipe out the stain. Modesty forbids your historian to enter into details, but after this "water-loo" never again was the supremacy of '11 questioned by this or any subsequent Class.

The Sophomore Year of '11 came back strong and hearty, invigorated by new blood, which has made itself felt to no small degree in the subsequent history of the Class. The "Bob" given that year was conceded to easily surpass anything given for several years previous. The Freshmen of '12, a more than usually strenuous bunch of youngsters, were kindly but firmly treated, which treatment, combined with the searching but suggestive criticisms of the "Bob," has served to produce what is to-day a very superior junior class indeed.

During the spring term of the third year the Class indulged in a very pleasant outing in the form of a sleighing party. Two vans loads of about 70 members drove out to Eglinton and gave a very successful concert under the auspices of the Methodist Church there. The drive out and the generous entertainment of the Eglinton friends was much appreciated by all.

It was, however, during the same term and the following summer that the Class sustained heavy losses in the deaths of two of its brightest members. Early in February Albert J. Wallace, an honor student in Orientals, contracted blood poisoning and succumbed after a few days' illness. Then, in August, Arthur W. Burt, whose standing in Mathematics and Physics had been more than usually brilliant, was drowned while swimming in the Humber. The loss of these two men has been keenly felt by the entire Class, who recognized in their marked ability and splendid worth promise of great things to come.

In a concluding retrospect, one may view with considerable satisfaction the general academic standing of the Class, its members having stood well to the front in every course, and in some leading the University. The collection of scholarships with which the Class started has not only been retained but materially added to from year to year. In athletics also our men have always occupied a most enviable position, the Mulock Cup winners of last year, and the almost successful defenders of this year, being composed for the most part of the men of '11. It might also be mentioned that for the past couple of years a couple of most prominent members have accompanied the University Lacrosse Team on its tour among the colleges of the Eastern States, and by their clever stick-handling did much to uphold Canadian supremacy in Canada's national game.

1911 CLASS EXECUTIVE, VICTORIA COLLEGE.

VICTORIA COLLEGE.

PATENTS ABOUT PEOPLE

ANDERSON, ETHEL AGNES.

"Actions speak louder than words."

Born near Watford, Ontario, she spent her early years in pursuit of mischief and knowledge, acquiring a considerable amount of the latter at public school, and later at High School, in Watford. Now she is in pursuit of a B.A. which she hopes to win next spring. She took her first year's college work extramurally and has entered late each year since, owing to the fact that her vacations have been spent in trying to raise the educational standard of Saskatchewan. It is greatly to her credit, that, despite this handicap, she has carried her course through successfully, and we are sure we can say of her future in the words of our motto: *"Abenunt studia in mores."*

ASBURY, FRANK CLARKE.

*"He was a scholar, and a ripe and good one,
Exceeding wise, fairspoken and pervading."*

Mathematics were always easy for Frank, for it is said that when he passed his Entrance at eleven years of age he had already mastered the binomial theorem and the differential calculus. Winner of second place in general proficiency for the Province at matriculation, his University course has been one of wonderful success. Though invariably among the leaders in his class, Frank has found time nevertheless for public speaking and singing. The result has been the presidency of the Mathematical and Physical Society and a place in the Victoria College quartet. Mindful ever of his fellows Frank has won for himself a host of friends who wish him the highest success in his chosen vocation of teaching.

BARTLETT, ETHEL BLANCHE.

"Her life had many a hope and aim."

Ethel took her first two years at Mount Allison University, winning the General Proficiency Scholarship in her first year. In her third year, she migrated to Toronto, there to enrich the class of 1911 with the versatility of her talents, not only in the class-room but in every phase of college life. She has been especially interested in the success of the Y.W.C.A.; and if, in future, she should go to the foreign field, we are sure that similar success will attend her efforts there.

BECKETT, GEORGE GORDON.

Gordon began talking in 1890, at Scarboro' Junction, Ontario, a burg which he cheerfully explains is within easy walking distance of the Half-Way House. At the local public school and at the High Schools in Markham and East Toronto our subject began his education, and won much glory as an orator. Entering Vic. a Fresh Soph. in 1908, as '11 rounded the first turn Gordon soon became prominent as a debater, student and conversationalist of distinction. Although he has been a General Course man our hero proceeds to the conquest of Blackstone. Through his perseverance and ability he will soon be heard from in the profession where meat and drink are earned by the sweat of the jaw.

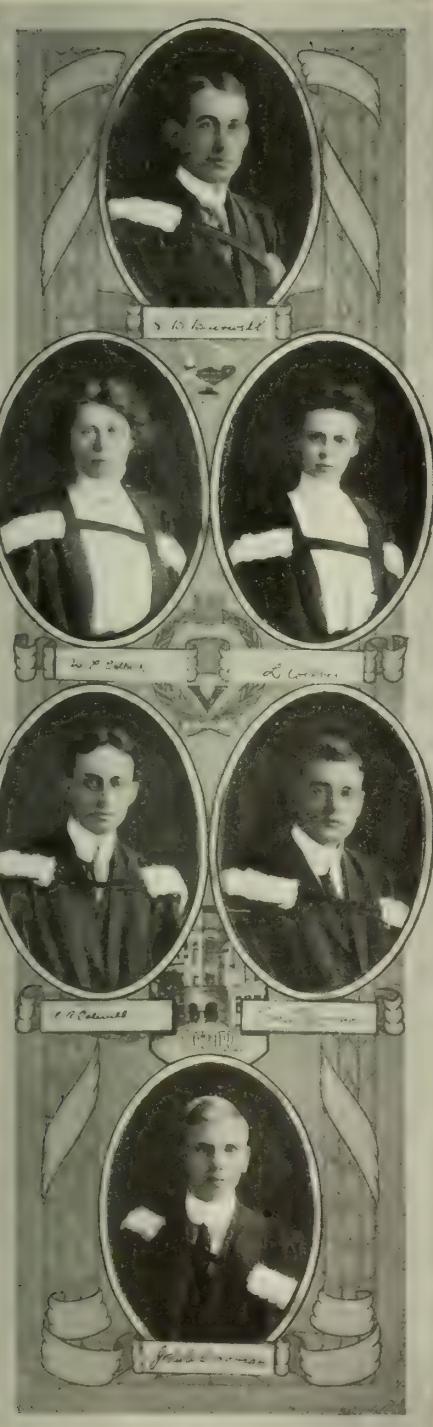

BIRNIE, JOHN F. P.

Johnny was born and educated in the little town of Collingwood. After matriculating in the year 1907 he entered Victoria College, taking the strenuous Political Science course. During his college career Jack has taken an active part in all the various functions and social gatherings, but his one great "side-line" has been athletics. He has held many prominent positions: as captain of Mulock Cup champions, captain of hockey team, besides the different offices in the Athletic Union Executive. Jack expects to enter the legal profession and we are sure that, on account of his genial disposition and modest character, he will make a great success as a lawyer, and a graduate of Toronto University.

BEST, ALBERT EDWARD.

"That almost joyous cheerfulness and amiability of spirit drew even strangers to him, and made him loved wherever he went."

Albert Edward Best was born at Madoc, Ontario, January 6th, 1888. His parents moved West, and he learned the three R's at a nearby public school, receiving his second-class certificate at Grenfell, Saskatchewan. His insatiable intellectual curiosity and capacity led him to "Vic.," where he registered B. and P. He has worked in the Medical Student Volunteer Band most enthusiastically, and led Mission Study and Bible Study classes. His liking and facility for music have made his services as pianist frequently in demand. When "Ed." is through, he intends practising in China as a medical missionary. His energy, determination and strong personality ensure his success in life.

BURWELL, HERCULES BEVERLEY.

*"Let Hercules himself do what he may,
The cat will mew and dog will have his day."*

Hercules was not born in Greece, but in Shedden, Elgin County. After attending Dutton High School, he practised the school teacher's art for three years. In 1907 he entered Victoria College and plunged into the deep mysteries of Philosophy, dodging through the brushwood of orthodox snares, which impeded him. The cold chills of his studies never checked the boyish spontaneity which made him widely popular. His attempt to quench his unselfish impulses was as unsuccessful as his efforts to look solemn. It is hoped that Herc. will not shock the sober, oblique eyed, little fellows when he goes to China to shake Theology into them.

COLBECK, WILHELMINA LOUISE.

*"And her modest answer and graceful air,
Show her wise and good as she is fair."*

Willa Colbeck was born in Peterboro, but received her early training at the West Toronto Collegiate Institute. Graduating from the Collegiate with a scholarship in Modern Languages she united with the Class of 1911 at Victoria College. She has proved herself a clever student in her studies, attaining each year a high standing. With true-hearted enthusiasm she entered the many phases of College activities and especially in the Literary Society has she shown a never-failing interest. Her keen mind, her winning smile, and ready help have combined to show a uniqueness of character which throughout all her College course has won for her many loyal friends.

COLLVER, LULU.

*"'Tis strange with what a sharp, incisive grace she
matches the true likeness of the matter."*

After matriculating from the Hamilton Collegiate Institute, Lulu Collver entered Victoria College in 1907. Here she chose the somewhat original study of Philosophy, which course she has since pursued with pleasure and success. It has not, however, taken up all her thought and time; she has given much of both to almost all the branches of College activity. In inter-year and inter-college debates she has helped to win the championship for her Class and her College. Her charming manner, coupled with sincere interest and genuine help, officially and otherwise, have contributed much to the success of class functions, the Y.W.C.A., and the U.L.S., and have won her many lasting friendships.

COLWELL, EDWARD RUSSEL.

The "indifferentiated sensory continuum" period of Edward Russel Colwell was spent near the town of Exeter, Ontario. After a certain period of more than usual "flux" within his "unity of experience" we find certain factors taking more definite "space relations," until Victoria College came to occupy the "focal point of consciousness," with white-steepled churches, country villages and farmhouses shading gradually off toward the "periphery." As a college man Russ was most genuinely respected by those who best knew him. He was a more than ordinarily painstaking student, a lover of knowledge for its own sake, a philosopher indeed. Of kindly disposition, of broad human sympathy, coupled with unwavering loyalty to truth, Mr. Colwell may be spoken of as, in every sense, a Christian gentleman.

CONNOR, CARL YODER.

At Aylmer, Ontario, in 1891, the subject of this biography was born. His regular course of public school education was interrupted by a trip across the Atlantic in 1901. The summer of that year was passed in Scotland and the following winter in London, where he attended school. After some time spent in Paris and Hastings, he returned home to enter the Aylmer Collegiate Institute, matriculating in 1906. Since coming to Victoria he has displayed that all-round development which marks a well-educated man. While taking a keen and enthusiastic interest in both music and tennis, he has also been successful in academic work, capturing the Regents' English Essay Prize in his second year, and ranking second in General Proficiency in 1910.

CORCORAN, JOHN EDWARD.

A nation's history is the combined biographies of its great personages—so one chapter of Canadian history is already partly written. Jack found himself on his first day in this cold world in the parsonage in the town of Arthur, a suburb of the city of Mount Forest. He received his early education in Teviotdale, Cayuga and Port Robinson, and his High School training at Welland. After spending some little time in drugs, he came to Victoria College as a fresh-soph. in the fall of '08, and specialized in Political Science, in which course his legal mind has shown itself clearly. As a speaker and debater on the floor of the house, Jack has made a name for himself, and he has made many strong friends in the three years he has spent at College. After graduation he goes into law, in which calling we can clearly predict a brilliant and useful career.

VICTORIA COLLEGE CONVERSAT. COMMITTEE.

L. Macaulay

A. C. Binley

N. L. Murch

W. C. Graham

H. W. Manning

J. R. Rumball,

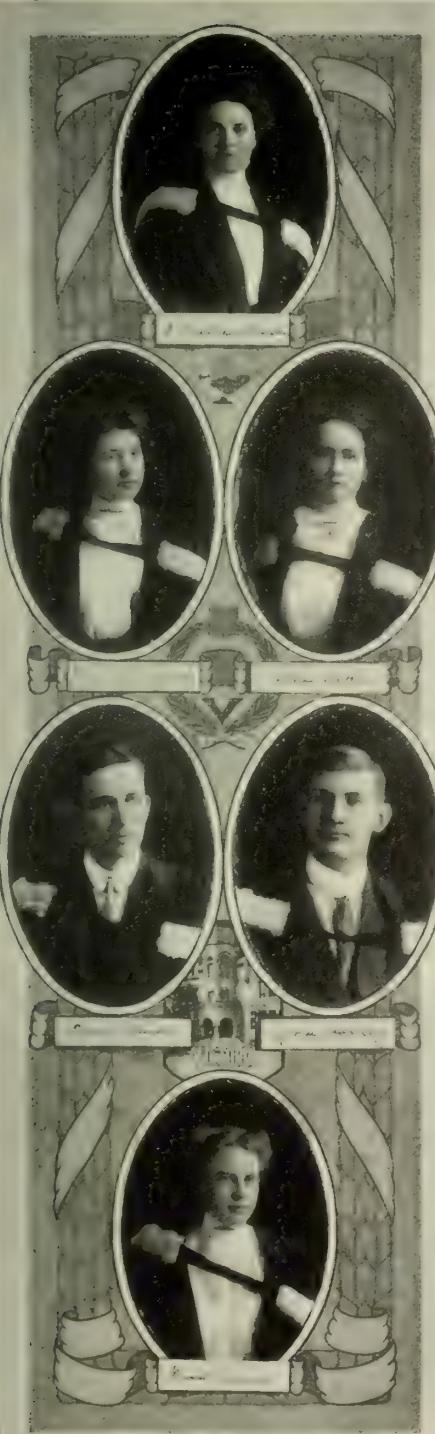

Secretary

H. W. Curson, M.A.

President

F. E. Hetherington,

Treasurer

COWAN, IDA KATHLEEN.

*"Possessed an air and grace by no means common,
Her stature tall,—I hate a dumpy woman."*

Kathleen Cowan is a graduate of Napanee Collegiate Institute and entered College on the Third Edward Blake Scholarship in General Proficiency, the high rank of which alone prevented her carrying off several other scholarships to which she was entitled. The course ambition led her to adopt was Honor Classics, and her subsequent success has well proved the wisdom of her choice. But "Kitty," in other lines than scholarship, displayed the spirit of the true college girl. In the Y.W.C.A. her enthusiasm has had full scope, while her general popularity as a social success was finally attested by her election to carry the Senior Stick in her Fourth Year.

CRAWFORD, MARY ROBERTA YEOMAN.

"What is she? Her human self, no lower word will serve."

Brampton will ever be noted in history as the birthplace of Miss Mary Crawford. There her early years were spent, until in 1907 she joined the glorious Year of Onety-One. Not only in her College course has she proved successful, but in all departments of College life she has taken an active part and endeared herself to all her friends by her domestic virtues. Mary has served on her Class Executive, on the Senior Dinner Committee and on the Cabinets of the Y.W.C.A. In her fourth year she was elected President of this society.

DAFOE, HELEN ISABEL.

"What! my dear lady Disdain."

Helen Isabel Dafoe worked out her own salvation at Madoc High School before following sister Norma's footsteps into Honor Moderns. Since coming to College her course has been unusually distinguished along both academic and literary lines. In her second and third years she won the Moderns Scholarships and the genius in her mother tongue, attested by the award of the Second Year English Prize and Oration Contest Prize, was further signalized by her appointment as Literary Editor of *Acta Victoriana*. Possessed of an elusive charm in her personality and an imperious little dignity all her own, she has a something which makes one willing "to follow to heaven the tilt of that nose."

DANIHER, ERNEST LEROY.

Ernest L. Daniher matriculated from Essex High School, spent two years teaching, then entered "Vic" in the fall of '08. As a student of Honor Philosophy "Dany" has exhibited more than usual ability, taking a splendid standing in each year. While not identifying himself exclusively with any one phase of College life, his services have always been as freely given as they have been gratefully accepted. His kindness of spirit and evident sincerity have won for him very many friends in other years, as well as in his own. The Methodist ministry will find in him a useful and worthy representative.

DARBY, GEORGE ELIAS.

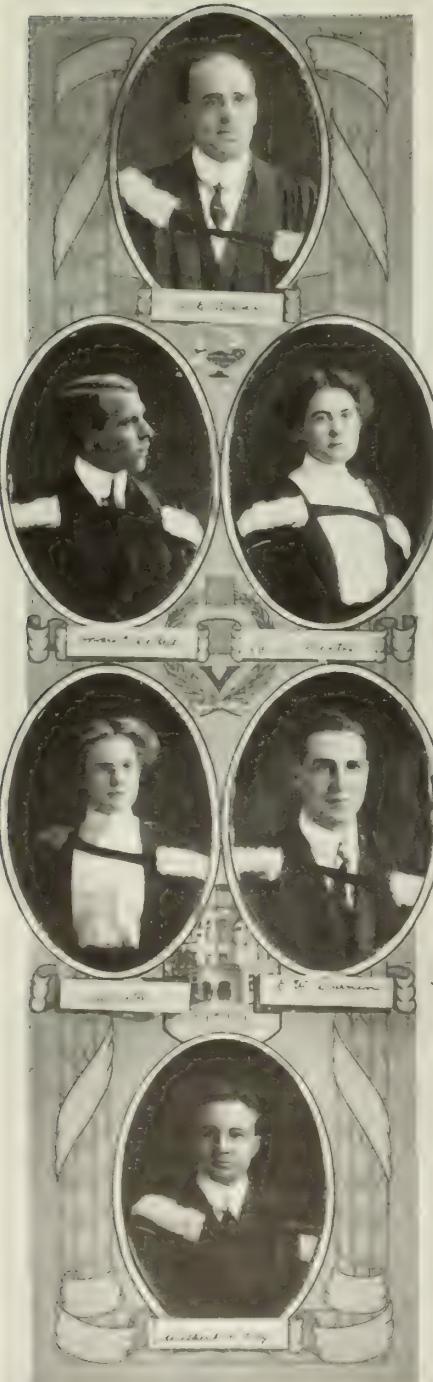

*"Words are like leaves, and where they most abound,
Much fruit of sense beneath is rarely found."*

The youth who is so aptly described in the above quotation was born in Nassagawaya, Ont., on October 17th, 1889. The first great event in "Judge's" life was when, at the age of two years, he was taken to Fort Plains, New York, by his misguided parents. When he was old enough he vindicated himself by returning to Canada and joining the celebrated Class of Onety-One. He has been one of the most popular and likeable men in the Class, but in this last year his great intellect has shown signs of collapse as evinced by his registering in Victoria College.

DAWSON, MURIEL SARAH ELIZABETH.

*"She is wise, if I can judge of her:
And fair she is if that mine eyes be true,
And true she is, as she hath proved herself."*

The town of Maple Creek, Saskatchewan, is the home of Miss Muriel Dawson, who, throughout her University life, has displayed that stirring vigor and activity characteristic of the Western breezes. Her preparatory training was obtained in Albert College, Belleville, from which she graduated in 1907, receiving the Governor-General's Medal for General Proficiency in Senior Matriculation. Her academic work at the University in English and History has been creditable and her literary ability has been shown by the fact that on two debates, one inter-year and one inter-college, she has been on the winning side. In her fourth year Muriel has had the honor of being Madam President of the Women's Literary Society, on which she served the preceding year as Secretary. She is also much interested in athletics, having played twice on the inter-college tennis team.

DEAN, DAVID EDGAR.

Born in the picturesque district of Shelburne, Ont., Dave received his early instruction at Terra Nova, from whence his ambition led him to Collingwood C. I., where he secured a teacher's certificate. For some years following he successfully taught at Collingwood, at the "Soo" and in Saskatchewan. Not yet satisfied with his educational attainments, Dave came to Varsity, registering at Victoria with the Class of 1911. As his philosophical tendencies predominated, he chose a course in Honor Philosophy, in which he has been a student keen and assiduous, though not a slave to mere bookish knowledge. Aside from his studies he has taken an active interest in the "Lit.," being a valued member of the executive. Dave is a college man with a college spirit, true to his principles and his friends, practical and sincere, and of an agreeable personality. We predict for Dave the greatest success.

DeBECK, HOWARD C.

"A gentleman that is so indeed."

Some twenty years ago Howard C. DeBeek was born in New Westminster, B.C. In the public schools of that city he received his early education. From there he attended Columbian College. After a most successful period spent therein, he turned eastward to enrol as a sophomore in the University's course in Political Science, in which he has always taken an excellent standing. Nor have his interests been wholly academic. His proficiency as an organist is very notable. He has also figured prominently in tennis tournaments. In his chosen vocation of law his natural abilities will insure success, while his cultured personality will ever stamp him a true gentleman.

DENTON LAURA.

"Why should life all labor be?"

At Harbord Collegiate and Havergal College, Miss Laura Denton received her education prior to her entrance into Victoria College in the Class of 1911. She chose Moderns as her course, and has skimmed through it throughout. Her proficiency in athletics was soon exhibited by her excellent work on the Hockey and Tennis teams, in her Third Year being Tennis Champion. She has held several offices on the Executive of the Athletic Club, in her Fourth Year holding the honorable position of President. Her sense of humor has helped her over many an unpleasant spot, and her wicked little smile has proved an attraction to many.

DENTON, LILY.

"A woman of independent mind."

Lily Denton succeeded in grasping sufficient ideas at Harbord Collegiate and Havergal College to ensure her entrance into Victoria College with the Class of 1911. She selected the Modern Course, but at the end of the first year decided that a broad education was more to be desired than lingual proficiency, so joined the General Course, in which she has taken most of her work "extramerrily." She holds offices on the Executives of the Y.W.C.A. and the Athletic Society, and takes an active interest in all College affairs.

DURNIN, EDWARD W.

"May bad luck follow you all the days of your life, but never overtake you."

In 1888 a strapping infant, which was destined to be labelled Edward Durnin, arrived in Dungannon. Fanned by Huron's bracing breezes, that infant increased in stature until it formed the 6-feet-3 of good-natured humanity, which his classmates have known for four years. After leaving Dungannon public school "Ed" attended Goderich Collegiate Institute, where he won a scholarship in Mathematics, which probably helped him to discover where his inclinations lay. Entering Varsity, he enrolled in the M. & P. Course, and, after struggling with the problems of Mathematics, is about to enter the ranks of the pedagogues. He carries with him an unbounded store of cheerfulness, and is accompanied by the good wishes of many friends.

EBY, WILBERT HAROLD.

"If he had any faults he has left us in doubt."

"Bert" was ushered into this active world and into the village of Markham, Ont., one December morning. He soon graduated from Cookstown public school, and later matriculated from Barrie Collegiate Institute. After a successful career as a pedagogue, he registered at Victoria College in October, 1907, in the B. and P. Course. While not neglecting his academic work, as an Arts student he has taken an active interest in student affairs. He was Secretary of his Year, Treasurer of the Glee Club, Treasurer of the Union Literary Society, and in his Senior Year Scientific Editor of "Acta Victoriana." He played middle wing on the Rugby team, winners of the Mulock Cup, 1909.

FENNELL, ELENA MYRTLE.

"'Tis pleasure, sure, to see one's name in print."

On a pleasant farm near Kars, Ontario, Elena enjoyed the advantages of the country. But her ambition called her from her rural haunts and, after passing through High School and Model, she began her battle with life in a country school. Still yearning for knowledge she entered Victoria with the Class of 1911. Lured by the call of the West she spent her first vacation in a pioneer school in Saskatchewan. Once there she never wanted to be elsewhere and has spent all her vacations in the same parts, usually returning to us for Xmas. She has ever maintained a creditable academic standing and we are sure a bright future lies before her. "Pax vobisum."

FOWLER, MAUDE FLORENCE.

"Merit wins the soul."

Maude is a Torontonian by birth. She received her High School education at Jarvis Collegiate Institute and from there entered University College in 1907 to drink more deeply from the Peirean spring. In her sophomore year she transferred to Victoria College. "Oriental Languages" and the General Course were successfully carried by her through the first two years, when she decided to centre her energy upon the latter. From the first Maude has been an all-round college girl, having taken an active part in almost every department of College life, especially in the Y.W.C.A. Her attainments as a student, her popularity among her fellows, her sterling worth promise a successful career in the mission field of her choice.

FREEMAN, ANNA GRACE.

"Volens et Potens."

For some years Grace Freeman formed a part of the country school at Freeman, and later of Hamilton Collegiate. She entered Victoria College with the Class of Onety-One, choosing Household Science as her course. The esteem in which her fellow-students hold her is shown by the insistence with which she has been forced into offices of honor and responsibility. Each year has found her interested in the execution of residence affairs, serving on committees, and taking an active part in the study classes of Y.W.C.A. By her efforts, also, Victoria College succeeded in carrying off the Inter-Collegiate Debate Trophy for 1910. She has endeared herself to many by those little acts of kindness which too many persons usually neglect.

GIBSON, EDITH GERTRUDE.

"She is an enchanting study."

Edith Gertrude Gibson has spent her four years in College trying to reconcile the "horrid grind" of a Classics Course with her motto, "carpe diem." She graduated from Napanee Collegiate with an Edward Blake Scholarship in Classics and Moderns, and a high academic standing has dogged her footsteps ever since. Her outside interests have been chiefly social and musical, but she has taken her part in all College activities. In her third year she was hockey captain for her Class, and as a Senior was the popular critic of the Literary Society. Edith's nimble wit and keen sense of humor make her a welcome companion, her ready sympathy and appreciation show her a true friend.

GREEN, WILLIAM R.

"When shall we see his like again?"

"Bill" first opened his eyes and looked about him in Moose Jaw, Saskatchewan, and has continued just as circumspectly ever since. He received his early education at Boharm in the same Province, and his High School training at Moose Jaw. He made his advent in Toronto in the fall of '07, and began his distinguished career in Victoria College. Since that time "Bill" has grown steadily in the estimation of his fellows, which has again and again proven itself by his being honored with many elective officers—holding in the fourth year the honored position of President of the Union Literary Society. He is a man sufficient unto himself with opinions and convictions he is not ashamed to express, and when they are expressed they are worth it.

GUNDY, JOHN REGINALD.

Reg. was born in a Methodist parsonage, and, consequently, received his preliminary education in different schools. He entered Victoria in the year 1906, and, since then, had been a very faithful student, taking an active part in all the various phases of College life. Athletics have been his hobby, he having held many prominent positions in his College career, as captain and manager of different "Vic" teams; President of the Athletic Union and manager of Varsity Lacrosse Team. High principled, standing always for clean sport, Reg. has endeared himself deeply within the affections of his chums. He is doomed to enter business, and we are sure that success will follow him wherever he goes, and that he will always be the same, old "Gun."

Annesley Hall

EARLY fourteen years have elapsed since the late Hart A. Massey bequeathed to the Board of Regents of Victoria University the handsome sum of \$50,000 to erect a residence for the women attending Victoria College. Further subscriptions were obtained and when the land in Queen's Park, behind Victoria College, became available it was selected and bought as the most suitable place for the intended building. The gift first bequeathed has been generously supplemented by the executors of the Massey Estate, and many other liberal friends have contributed to the furnishings. On October 1st, 1903, the Hall was completed and was opened to receive its students.

The cost of the building was approximately \$70,000 and the expense of furnishing was undertaken by the Victoria Women's Residence and Educational Association under the leadership of the late Mrs. Geo. A. Cox. The matter was laid before the Methodist churches of the Dominion, from which many sympathetic responses were received. The Association, however, will always be especially indebted to friends in Toronto, who furnished all the rooms on the

ground floor. The officers are appointed by the Board of Regents of Victoria College.

Special attention is paid to physical training, for which fine provision has been made. There is a well equipped, spacious gymnasium, where the best of instruction is given. Every student is examined each year by a physician and is assigned the kind of exercise she needs. In case of illness, students are removed to a bright infirmary ward, where there is found complete isolation.

Annesley Hall accommodates fifty-eight students. With the increasing number of women students at Victoria, the applications for residence so far exceeded its capacity that a second house, now called South Hall, was opened in September, 1906. It had formerly been a private residence situated on the southwest corner of Victoria College grounds. This year every room is occupied and thus Victoria College is enabled to offer the privilege of residence to eighty students, sixty-four of whom are full undergraduates of the College.

Annesley Hall is a well-ordered institution, where the needs and rights of the whole household must be considered and respected by each individual. During the last seven years, two hundred and fifty-eight women students have made it their home.

ANNESLEY HALL.

HETHERINGTON, FRED EASTON.

"He was nothing if not critical."

"Fritz" hails from St. Catharines, whence he came to Victoria with scholarships in Classics and Moderns. For two years he successfully carried the two honor courses, and then, confining his academic energy to Classics, by a judicious use of his spare time kept his name among the leaders of the Class list. He has taken a prominent part in College life, having been a member of the "Bob," "Conversat," and many other committees, as well as President of his Year. He is an enthusiastic tennis player and won his "T" on the University Lacrosse Team. His other activities include assiduous attendance at receptions and the rink, and iconoclastic effusions at the "Lit." By his sincerity and good comradeship, Fritz has won many friends who prophesy the highest success for him in whatever vocation he chooses.

HEWITT, RUBY CATHARINE.

"Who can say more than this rich praise, that you alone are you?"

A victim of the itinerant system, Ruby Hewitt received her early education in various places of learning, finally graduating from Owen Sound Collegiate. Victoria claimed her in 1907, and for the past four years she has entered heartily into every phase of College life, in each doing credit to her Alma Mater and to herself. Always popular among her classmates, in her first year she was Vice-President and in her fourth, Class Prophetess. She has been especially interested in the Literary Society, serving on the Executive in her Senior Year. Ruby has proved that athletics and social life, combined with Moderns, constitute an ideal College course.

HORNING, ELSA LILLIAN.

"Der juncuroen lugende zierten anderu wip."

Miss Elsa Horning received her preparatory education at Cobourg Collegiate and Port Perry High School, before she entered Victoria College with the Class of '11. Although she has always stood well in the Class lists of the Modern Language Course, she did not devote all her time to her studies, knowing it to be unwise to follow the example of the immortal and imprudent Jack. The Athletic Society, therefore, has benefitted by her assistance throughout her course. Particularly was she interested in tennis, playing on the Inter-collegiate Team for three years, and being runner-up for the College Championship in her third year. Such offices as pianist of the Literary Society and Representative on the Senior Dinner Committee prove her interest in all College affairs.

HUNTER, ERNEST CROSSLEY.

*"The all-seeing sun
Ne'er saw his match since first
The world began."*

Ernie made his débüt on life's stage in the city of St. Thomas, where he received his early education "disciplina et arte." When seventeen years of age he came to Toronto and, matriculating at Harbord Street Collegiate, entered Vic with the Class of '11. His academic course has been eminently successful, which is only a mark of his excellent mental ability. Ernest is an ardent supporter of all sports. Prominent on the athletic field and on the tennis court, rink and campus, he plays the game with a skilled hand. With his genial disposition, his smile and perpetual good humor, we anticipate for him success in his chosen vocation—the ministry.

HUNTER, JOHN BRUCE.

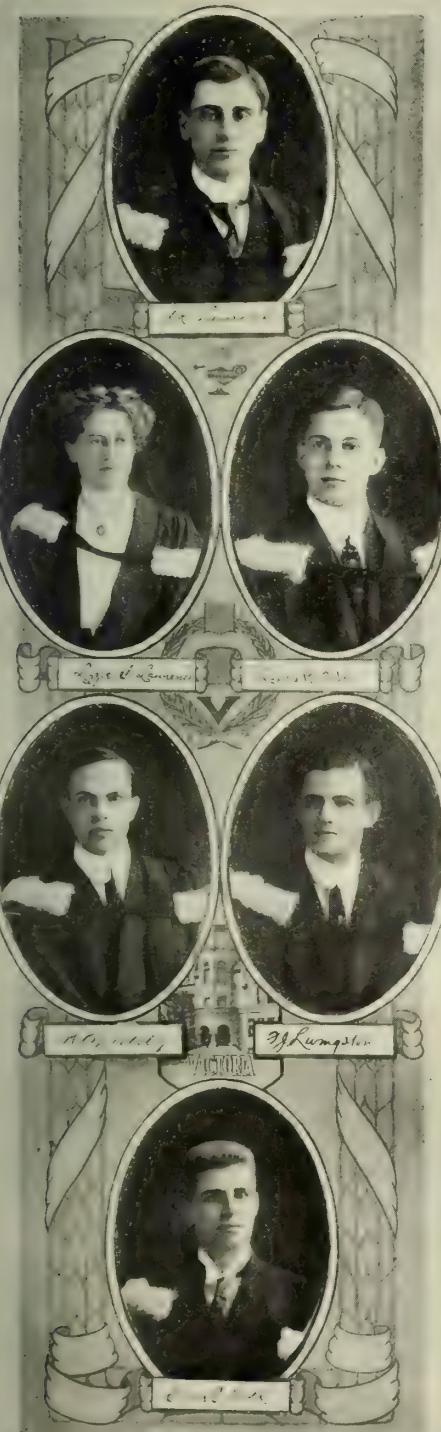

"A man he is of honesty and trust."—Shakespeare.

Few men, in College life, have had the popularity which Bruce has enjoyed. His whole-heartedness and his genuine sincerity have combined to make him a man worth knowing. Whether at Hamilton, his birthplace, or at Albert College, Belleville, where he matriculated, or on circuit work, or at College, he has always shown the same sterling character. He has been a member of the Glee Club, President of his Class, and is now leading the Y. M. C. A. through what promises to be one of its most successful years. The earnestness which he has exhibited in his studies, and the social qualities which are his, ensure his success in the Methodist ministry where he has decided to serve his fellowmen.

JACKSON, PEARL BEATRICE.

*"I would more natures were like thine:
So innocently wild and free."*

Pearl Beatrice Jackson comes to us from the Forest City, where she received her early education. She graduated from the Collegiate with the gold medal, and entered Victoria in her second year. Pearl has ever displayed a fine enthusiasm in all College activities, and her name has unfailingly appeared in the First-class Honor List. She has also distinguished herself in debate. In addition to her natural powers of intellect, she is gifted with a fund of breezy optimism which has gained for her many friends, and gives promise of a brilliant future.

LAYCOCK, SAMUEL RALPH.

Sam first saw the light of day in Hastings County near the village of Deloro. In that same locality he became acquainted with the Ontario public school system, but went to Madoc for his matriculation. Beholding visions of glory afar, he followed a year of Senior Matriculation work at Albert College, Belleville, by presiding for one year over a backwoods academy. Thence he hied away to "Old Vic." in the fall of '08, and as Fresh-Soph. entered the General Course, in which he has proved himself second to none. As a Councillor of the Lit. he was ever a pillar of strength to the Government. Sam's many friends predict for him a brilliant career in his chosen life-work in the ministry.

LAWRENCE, LIZZIE SCOTT.

"Formed for deeds of high resolve."

Lizzie Lawrence was born in Seaforth, Ont., where she received her primary and High School training. After some experience in teaching, she entered the Faculty of Education, 1907, to learn how to impart the store of knowledge which she was to imbibe at Victoria. That College welcomed her in the Sophomore year and has since been proud to claim her, awarding her in 1909 the Second Prize of the Massey Bursaries in English Bible. She has ably served the Y.W.C.A. and has taken an active interest in all other departments of College life. Lizzie's warm generous nature and happy humor have won many friends, and her strong true character presages for her a life of usefulness.

LEITCH, DOUGLAS BURROWS.

"A prince, brown-eyed and fair in face."

"Doug" was born in Eldorado in a Methodist parsonage. Accompanying his father on his itinerary, he made the best of his interrupted public school education. He attended Picton High School and, later, Albert College, where he qualified for the Physiological and Biochemical Science Course. He is an enthusiastic supporter of all honorable sport and is well known on the campus, rink and in the gym. His musical tendencies are shown by his being a member of the University Glee Club. He is a member of the Alpha Kappa Kappa Medical Fraternity. During his four years among us, "Doug" has become deservedly popular and being a successful student one and all prophesy a brilliant future for him in his chosen profession.

LIDDY, ROY BALMER.

"Friend of truth, in soul sincere."

October, 1908, found Roy leaving his position with the Dominion Bank after five useful years in their service, to enter "Vic." as a sophomore. His career from the time he left his birthplace, Bradford, taking Honor Matriculation at Oshawa High School and, later, graduating from the Mount Forest Model School, has been successful to an eminent degree. Roy's remarkable record in Honor Philosophy is but a mark of his keenness of intellect, his diligence and application. He will always be remembered by the deep interest he took in College functions, being officially connected with the Glee Club, Class Executive and the Y.M.C.A. By his kindly disposition and unselfishness he has become a general favorite among all who recognize and do honor to his fine qualities.

LIVINGSTON, FREDERICK JOHNSON.

"A man he was to all the college dear."

Twenty-one years ago, Livy first howled in the Methodist parsonage at Stevensville, Ont. At Hamilton Collegiate he learned to be a good sport as well as an excellent student. In 1907 he obtained his Senior Matriculation and that fall his father led a pretty scared looking youngster up to "Vic" to show Fred how to register. He entered the B. and P. Course, taking athletics option. He has been continually in the limelight decorating the alley board, tapping freshmen and playing football. He was one of the stars on the Champion Soccer and Mulock Cup teams and, finally, capped his career in his Senior Year by holding the Athletic Stick and captaining the Rugby team. But he devoted himself to his studies just as conscientiously as to Athletics and, as a result, Dr. Livingston is acknowledged as an "all-round man."

LOCKE, CLARK E.

"A pronounced habit of boring into books, augurs well for the press of the future."

"An infant crying in the night, and with no language but a cry," the tale of his early life is thus briefly told. The "mewling" period well past, appeared Shakespeare's schoolboy "with his (sometimes) shining morning face creeping unwillingly to school." Passing from the public schools of Chatham, he ushered himself into the higher educational life of Ontario, better known, perhaps, for his Irish combative propensities and his love of the aesthetic, than for the latent philosophical tendencies, since developed. Clark fain would wield the quill and sway the nation. That his morning of life gives promise of a bright day is the firm belief of his many friends.

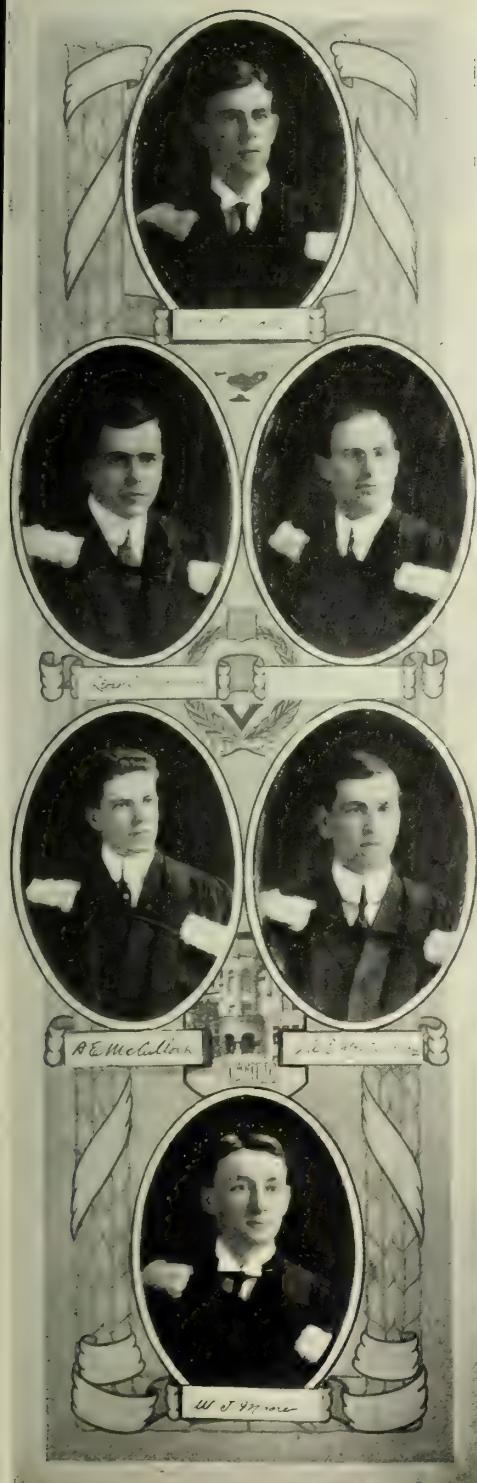

In Memoriam

Arthur W. Burt

Born 1890

Died July 4, 1910

"Whom the gods love die young, and many deaths escape by this"

LOCKE, RUSSELL PIERCE.

*"I take possession of man's lands and deeds,
I care not what the sects may brawl."*

'Twas in the border town of Sarnia that "Russ." first hailed the joyous morn with lusty voice. Here, too, he spent the years of infancy, but as the desire for learning manifested itself, he evidently decided to enliven prosaic methods by combining a tour to different founts of knowledge. His nomadic educational career began in Chatham, included Leamington, Kincardine and Sarnia High Schools and bids fair with Political Science to find completion here. "Russ" is a good fellow, with, perhaps, a partiality for social life. A term of Theory at Osgoode Hall he hopes will fit him for a life of practice.

MACAULAY, LEOPOLD.

*"His strength was as the strength of ten,
Because his heart was pure."*

This man, whom to know is to honor, wept, laughed and looked about him first in Peterborough. When still a child he made his way to Lindsay, where he received his public school training. On passing the Entrance he came to Harbord Street Collegiate in Toronto, where he made a name for himself in academic work, which name he has more than sustained since his entrance to Toronto University at Victoria College in the fall of '07. "Mac" is a good man, sympathetic and broad—a man of a clear, active mind. His scholarships in his course and his pure worth have made him a popular man, a popularity which has voiced itself in the elective offices he has held in Class and College at large. On graduation he goes to Osgoode Hall, and we predict for him a brilliant, influential and successful career.

MacNIVEN, WILLIAM EDGAR.

"None but himself can be his parallel."

Mac's first experiences of the world were gained in Mount Forest, where he received the educational training necessary to enter Victoria College with the Class of 1910. After a year's absence through illness he joined One-Ty-One as a junior and became an honored member of that Class. His attention has been generously accorded to all the organizations of the College, and in these his ability has been recognized by the various honors conferred upon him in Class and College at large. As Editor-in-chief of *Acta*, his marked literary genius and his active interest in College affairs have been quite evident. His course has been Political Science, which will eminently qualify him for the work he intends to undertake. Success, Mac.

MCCULLOCH, ALBERT ERNEST.

*"Hail to thee, blithe spirit,
Sport thou ever wert."*

"Cully," reported by the girls to be a "sure cure for the blues," has itinerated with his father through Hastings and Ontario Counties since his arrival in Hampton twenty-one years ago. He received his primary education in divers public schools and three Collegiates, and registered in Victoria in the B. and P. Course. He was a prominent factor in both the Rugby and Soccer teams of the College, and his consistent work in goal helped to secure the Jennings Cup for Victoria last year. "Cully" has been running mate with "Livy" and has had a finger in every College pie and a hand in every prank. Following in fraternal succession he expects to become a medico. We wish Dr. McCulloch III. every success.

MONTGOMERY, JOHN ALBERT ERNEST.

*"His voice rang true; his eye was steady;
To help another his hand was ready."*

In the middle eighties the little village of Berkeley in Grey County, Ontario, acquired a distinction by the advent of John A. E. Montgomery. After a rural school training, he entered Owen Sound Collegiate Institute. Later he attended the Model School, Durham, after which he gave practical and forcible expression to his pedagogical views in a public school near Markdale. Still aspiring, he entered Victoria with the Class of '11, where he has won the popularity of all his classmates by his honest, open heart, and genial good-natured disposition. To know "Jack" is to like him. A truer friend never lived. His creditable standing in Philosophy predicts a successful life.

MOORE, WALTER J.

Being a child of the parsonage and hence having here no "continuing city," we find Walter T. Moore, after occasional digressions into business life in Northern Ontario, matriculating from Weston High School in 1906. That autumn he entered Victoria with '10, of which Class he continued for three years a useful and popular member. The "lure of the wild" then called Walter back to the North for one year. Since he joined '11 he has in a very short time, won the esteem and good will of all. Mr. Moore is a good college man, always ready to serve his Alma Mater in every way possible, but chiefly confining his attention to the Union Literary Society. After graduating, Walter purposed taking a course at Osgoode.

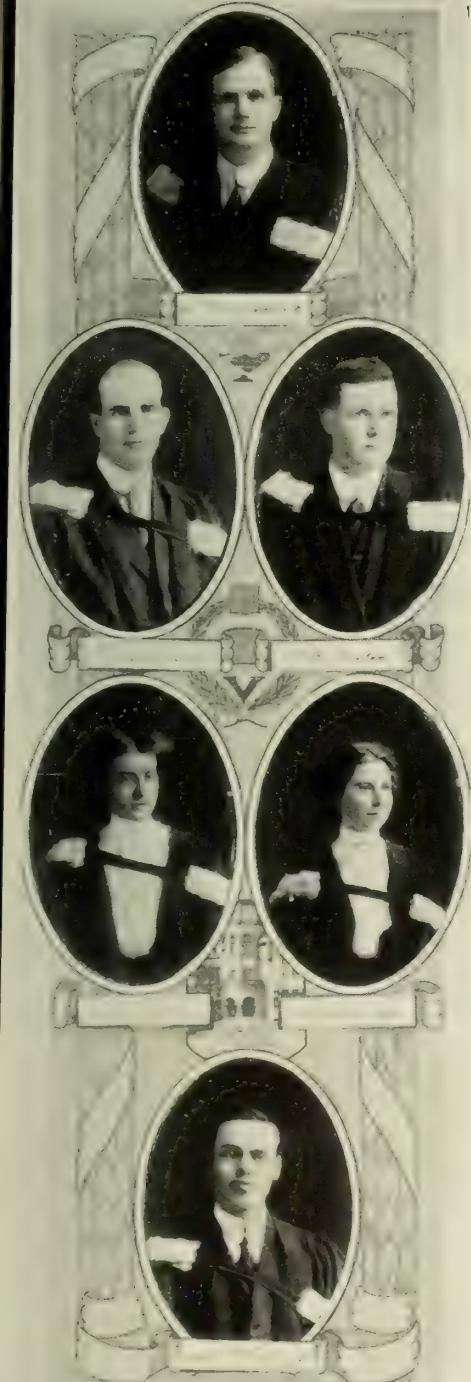

In Memoriam

A. J. Wallace

Born April 28, 1888

Died February 25, 1910

MOOREHOUSE, WALTER.

"Dulce est desipere in loco."

At Cairo began a career which, carefully fostered by High School training at Glencoe and then matured by a course in Normal and by teaching public school work, was thus eminently prepared to join fast company in the Class of 1911. The numerous honors conferred upon him, culminating in the Business Managership of Acta and in the holding of the Senior Stick prove the esteem in which he is held by the College and by his Year. His smiling countenance and genial disposition have earned for him the title of "Sunny Jim." Walter's academic cause has been Classics, but even this could not command all the attention of a lover of sport and a kodak fiend. A host of friends wish Walter success in his work of future years.

MORRISON, WILLIAM JOHN.

"He is a very proper man."

"Bill" honored Beeton, Ont., by making it his birthplace. He received his public school training at Painswick and later attended Barrie and Orillia Collegiates. After teaching school for some time, he entered University, registering in Arts at Victoria College. He has been a shining light in the C. and M. Course. Morrison has taken a great interest in other student activities. In 1909 he was a member of the Conversazione Committee, and after holding offices in the Union Literary Society in 1908 and 1909, he was elected Leader of the Government in his Senior Year. In athletics he has taken a prominent part, being a member of the Rugby team which won the Mulock Cup in 1909.

NEWTON, RICHARD HARRIS.

"Newt." took his first bumps on the good old farm in Oxford. After attending Salford public school and Ingersoll Collegiate, he entered Albert College, Belleville. Here he wrote his Senior Matric., joining Class '11 at Victoria in the fall of '08. He has always taken a keen interest in athletics, helping Albert College to win the City Basketball Shield, and Pentathlon Cup, and "Vic." in Rugby to gain the Mulock Cup. Newt. is a fellow of genuine worth and his friends predict for him a brilliant career as a missionary in Szechwan.

OCKLEY, LAURA LAVINIA.

*"And wrought all kinds of service with a noble ease
That graced the lowliest act in doing it."*

Laura Lavinia Ockley was born in Port Perry. A daughter of the parsonage, she spent fifteen years of her life in Toronto, where she received her public and High School education, matriculating from Jarvis Street Collegiate. Though in the Household Science Course, and at the same time assuming many home and church duties, Miss Ockley has always taken a hearty interest in the various College societies and devoted as much time as possible to them. Among her classmates she has been noted for her genuineness and sincerity, and this, added to a rare unselfishness and exceptional loyalty in her friendship, has gained her the love and respect of all who know her.

PENNINGTON, CLARA ALICE.

"To strive, to seek, to find, and not to yield."

Clara Alice Pennington spent her early childhood in Hamilton, but received her public and High School education in Dundas. She matriculated in 1905, and entered Victoria with the Class of 1911. She chose the Household Science Course and during her four years has always been willing to put into practice her scientific knowledge in connection with the social life of her College. That she has taken an interest in all phases of College activity has been shown by the offices of trust she has held on Y. W. and Class Executives, and in representing her Class in inter-year debate.

POUND, A. N. C.

"He was a gentleman on whom I built an absolute trust."

Although the above was a native of the plains, yet he laid the foundations of his career in the Okanagan Valley. He gathered up a few threads of an education at the Vernon High School, and following these he completed his first year in Arts at Columbian College, New Westminster. The realization of a steadfast purpose found him registered at Victoria for his sophomore year. This philosophic son of Adam was not deficient in athletic and social pursuits, but his keener interest as a Bible study leader and in various phases of mission work indicate his future sphere of service. That pleasant smile and kindly disposition will make Allan everywhere welcome.

PRATT, EDWIN J.

*"So rich his wit; his heart, how tender;
His mind profound; his body slender."*

Ed. was born in Newfoundland within sight and sound of the ocean. He received his early education in the public schools, where stick and strap were used as practical aids to Theory. After matriculation he came to Toronto and entered the Class of '11. During his course he has won many academic distinctions, amongst which were the John Macdonald Scholarship in Philosophy, a prize in English Essay, and the Union Literary Prize for Oratory. He has been Local and Literary Editor of "Acta." He revels in story-telling, and one of his greatest joys is, surrounded by a group of chums, to thrill them with imaginary hair-splitting adventures. His friends are legion.

PRICE, PERCY GARDINER.

Percy Gardiner Price was born at Manitowaning, Manitoulin Island. After completing his High School training at Gore Bay, and teaching school for two years, he journeyed to Osgoode Hall. In 1905, he graduated with honors and a scholarship to his credit. After practicing law for three years in Toronto in the firm of Corley & Price, he decided to live a lawless life and entered Victoria University, 1908. While maintaining first-class honors in Philosophy, he was President of Toronto Epworth League Union for two years and was Secretary of Students' Social and Evangelistic Department of City Missions. He is chairman of the Board of Management of the educational night classes held at Victoria College, and is mainly responsible for their organization.

REAMAN, GEORGE ELMORE.

*"Far from the madding crowd's ignoble strife
Their sober wishes never learned to stray."*

Born on the 22nd July, 1889, Mr. Reaman springs from good old Dutch and English stock and has been springing upwards ever since. Being scientific, he absorbed the science of husbandry, in co-operation with his early education at Concord, and being clever, he obtained his Senior Teacher's Examination at Richmond Hill High School, when sixteen. One year later, in 1906, he resumed his studies at Victoria. Endowed by nature with a temperament full of music, supplemented by an equally fervent spirit for "Germanics," mention Richmond Hill, and his success is certain.

REED, JOHN FRANKLIN.

*"—One, in sun and shade the same,
In weal and woe my steady friend."*

J. Frank Reed began life near Mount Charles, Ont. At Palestine, Ont., he began what has proved to be a very successful school life. In the Brampton High School he took a First-class Teachers' Certificate, and, after attending Model in the same town, taught for several years. He entered "Vic." with the Class of '11 in the second year, and has proved himself a thorough student and a true friend during his three years with our Class.

RICE, LEWIS MELVILLE.

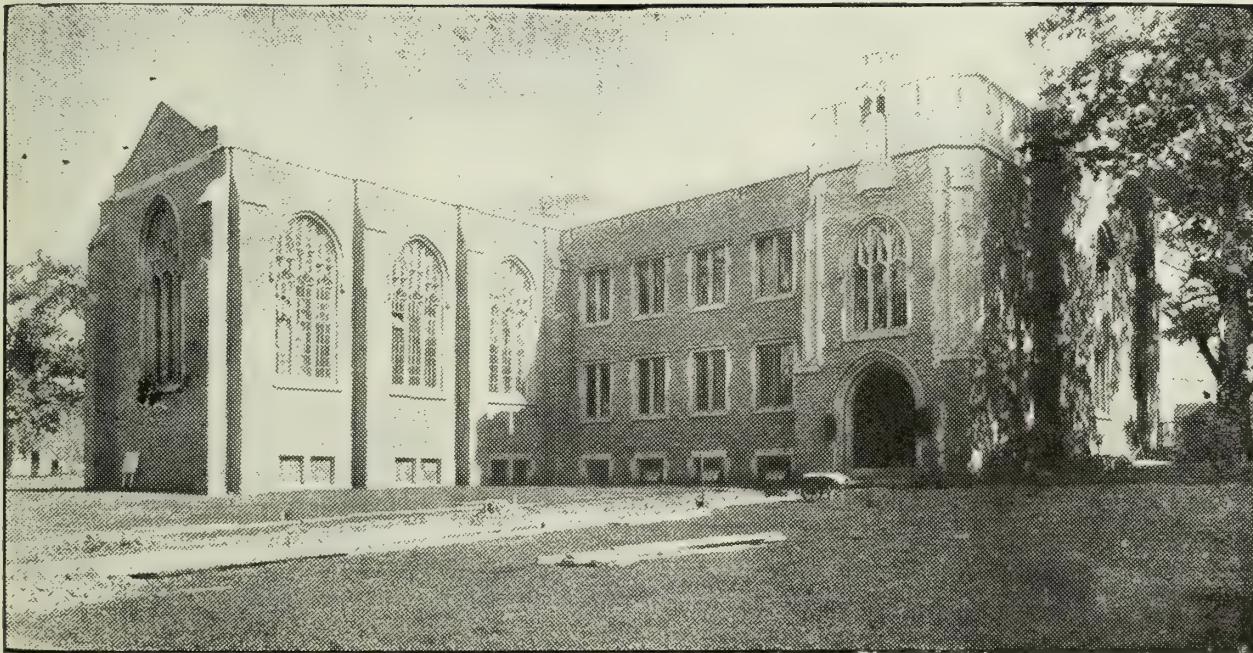

"He bears himself like a portly gentleman."

Was born in the "Forest City." After the usual public school education, he began his High School career at Blenheim, Ont., and later continued it at Harbord Collegiate Institute, Toronto. Finding the city too restricted a sphere, he went West and "made good" as a farmer and rancher. Seeking new fields to conquer he attended Red Deer High School, and from there went to Normal in Calgary, spending the following year teaching. Entering "Vic." in his eighteenth year, he registered in the Biology and Physics Course. "Mel's" ability and popularity are shown by his being President of his Class this year. Watch for him among the coming men of the medical profession.

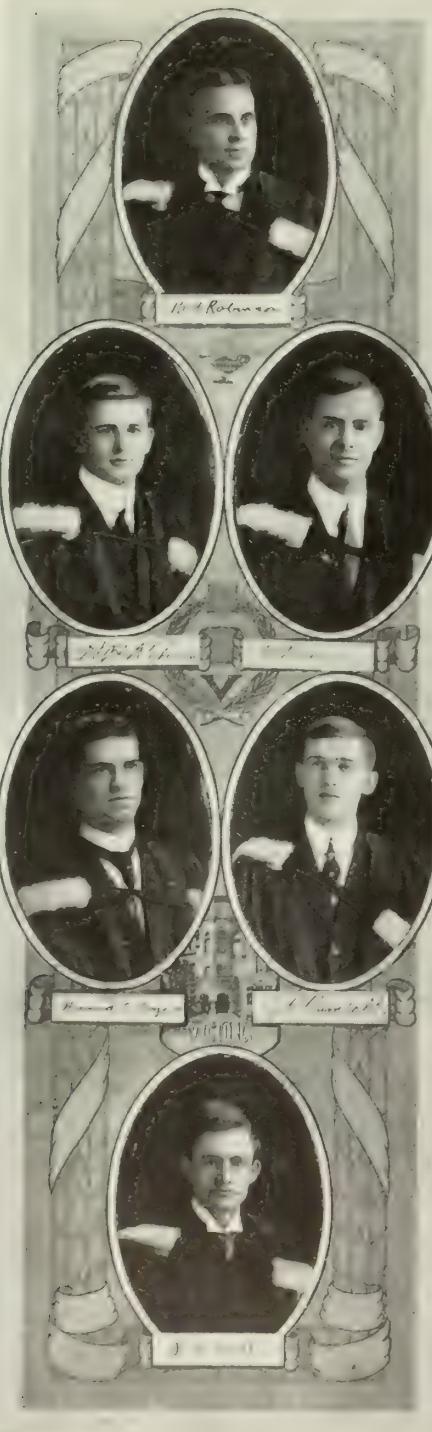

RICHARDSON, LORNE MELVILLE.

"Ah! why should life all labor be?"

Lorne hails from Barrie, Ont. His education began in a little school amid the charms of Edenvale. From the High School of his native town he matriculated in 1906. At Varsity he has specialized in Philosophy with the Class of 1911. As a student Lorne has been apt and alert, but has not been a slave to books. His chief interest aside from his studies has been in athletics and in the Literary Society. His eye for a line is almost as keen as his mind for metaphysical subtleties. Lorne rings true. He cares more for the practical than the theoretical. He at once applied his best ethics to life. His conversation is elevating; his friendship abiding. No one doubts but that Lorne will win the truest success.

THE BEAUTIFUL NEW LIBRARY OF VICTORIA COLLEGE.

ROBINSON, BURTON HALLIDAY.

*" . . . Nature might stand up,
And say to all the world,—This was a man."*
—Shakespeare.

It was the peaceful little village of West Lorne that Burt chose as his birthplace. After completing his matriculation and modelling at St. Thomas, he spent the next eighteen months teaching school. In '07 he entered Vic., in Honor Philosophy, to wrestle with the problems of the true, the beautiful and the good. He has taken a great interest in the course of study which he has followed so successfully, and has always been keenly interested in functions of both Class and College. His executive ability and his characteristic energy have been splendidly exhibited as Secretary of the "Bob" Committee, as President of his Class and as Associate with the Y.M.C.A.

ROBINSON, HOWARD PARKER.

*"Mark you this youth,
We shall hear of him anon."*

Howard Parker Robinson was born at Kleinburg, Ontario, in 1892. After spending two years in St. Catharines Collegiate Institute, he matriculated into Toronto University in 1907, and joined the Class of 1911, Victoria, the same fall. The son of a physician he elected to follow in his father's footsteps, and so entered the P. and B. Course as the best preparation for scientific medicine. During his undergraduate days he has been well-liked by all who knew him, has taken a very creditable stand in the Class lists of his course, and his friends will not be astonished to find, in due time, his name writ high among the disciples of Æsculapius.

ROGERS, SAMUEL OLIVER.

"And certainly he was a good fellow."

"Oliver" was born in Cedarville, Ont., but later he removed to Mount Forest, where he acquired the knowledge that, in October, 1905, admitted him to "Vic." Here he enrolled in the General Course, but in October, 1906, he turned his energies to the "B. and P.," continuing with the Class of '10 until the end of this third year. At this point, Oliver proceeded to broaden his education by a year's study in Western business methods. Now he is dispensing his good cheer to the members of the "P. and B." Class of '11. They, as well as his numerous other friends, wish Oliver the success, which, they feel sure, will be won him by his energy, practical ability and geniality.

ROGERS, HOWARD ORVAN.

"But in his duty prompt at every call."

Howard, being the son of a Methodist minister, blends in one mould the varied impress of many, to him, familiar examples of nature's exquisite handiwork. He was born in the township of Mariposa, received the first rudiments of his education at Pickering and completed his public school work at Fonthill. His High School course, begun at Newmarket, was ended at Woodstock. By birthright, and by inclination, an itinerant, he followed in his father's footsteps, bearing the responsibilities of the ministry at Lion's Head, Colopy's Bay and Varney. In 1908 he came to Victoria and joined the Class of '11. An earnest searcher after truth and zealous friend of all in darkness, he looks with sympathetic interest upon the mission field, and may, in future years, bring light into the deep obscurity of the world's Neglected Continent.

RUMBALL, JOHN RUDD.

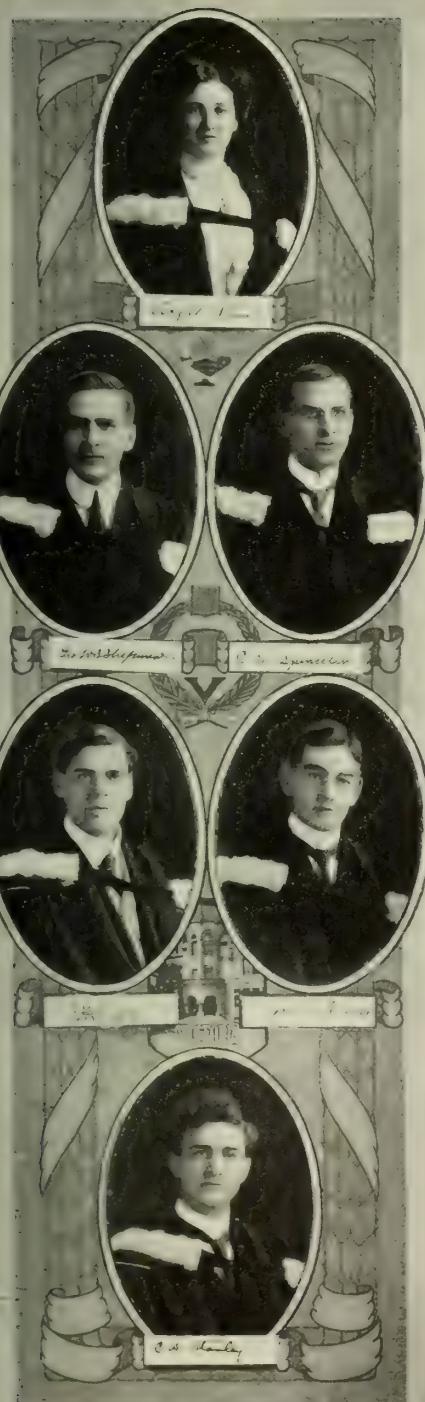

"I dare do all that doth become a man."

Jack's earliest years were spent at Clinton, a fact which does not distinguish J. R. as much as it does that "hamlet." There he attended Public and High School, until these institutions, having done their best, foisted him upon the Class of '11. There's a native robust force in Jack and growth has been continuous and in the best direction. In Classics he has been consistently successful and that, too, when his time has so often been given to numerous official duties. His ability in Soccer and Hockey helped us to three championships. And now he breaks into Rugby in his final year like a veteran of the gridiron. Jack's friends are legion; they can't help but wish him highest success.

SCOTT, ROBERT CLYDE.

"Even his failings leaned to virtue's side."

"Bob," first opened his eyes and wondered what it was all about in Paisley. He learned the rudiments in the public school, and graduated from the Collegiate there. He began a career as salesman, but "the lure of little voices" calling him he "hit the trail" for Alberta and went railroading. Later he responded to a far greater call, and for three years on the Red Deer district churches were built and congregations organized under his leadership as "Sky Pilot." Entering "Vic." in 1907, he achieved honorable distinction in study, Y.M.C.A., the Glee Club, as second tenor of the College Quartette, and choir leader in Elm Street Methodist Church. On graduation he will go nation-building in the last great West.

SHAW, ORY ALELA.

*"She has two eyes so soft and brown,
Take care!"*

Miss Ory Alela Shaw began her career in Foxboro, and after passing through the preliminary courses of study in that place, she entered Albert College, where she later brought great credit to herself and her friends by winning the Flavelle Scholarship. Since coming to Victoria College, she has been an enthusiastic student in the General Course, and in her second year distinguished herself in the Oration Contest by her clear and forceful oratorical style. Her many friends unite in wishing Ory a happy and successful future.

SHIPMAN, GEORGE WILLIAM STEPHEN.

"Frater, ave atque vale."

Born in 1888 he gleaned the first rudiments of knowledge in early life by regular and punctual attendance at the old Bathurst Street School, Toronto. Increasing in wisdom sufficiently he spent three years of hard and zealous study within Harbord Street Collegiate. On matriculation therefrom he enrolled at Victoria with all the yearning after truth which had ever marked him as an incipient great man. He has ever exhibited the higher qualities of manhood, calling forth the approval and admiration of friends and acquaintances, always upright, always zealous, always aspiring.

SPENCELEY, GEORGE W.

Through many vicissitudes retains undiminished affection for his native town, Oshawa. To her schools he owes his early training, except for two years spent at Harbord Street Collegiate, Toronto. After teaching for three years he entered Victoria College in Mathematics and Physics, with the Class of '11. Since then he has become strongly imbued with the spirit of science and has enthusiastic confidence in the imminent discovery of the ultimate constitution of matter. It is darkly hinted that he has become a confirmed "higher critic," and frequently forgets to say his prayers. However, "Uncle Remus" and "Punch" have been discovered, covertly placed among the sombre tomes of science. The Fates inform us that George anticipates unfolding the mysteries of the atom to our Canadian youth.

SOPER, SAMUEL HENRY.

*"Strong in will
To strive, to seek, to find, and not to yield."*

Samuel H. Soper was born at St. John's Nfld., in the early eighties, and throughout his teens was an ardent devotee of football, cricket and hockey. After matriculation, he exercised a mild autoocracy in a public school for two years, and then preached for the following three. Growing restless under the insular fetters of his native land, he sought Canada and Victoria College. Ambition was still wider than a continent, and China finally satisfied the demands of his spirit. Has been active in Boys' Clubs, and in League work at Elm Street Methodist Church. He is President of Victoria Missionary Society, and in two years with an unfaltering devotion to the cause he has chosen he will wend his way to the "Heart of Ly Chuaan."

SMITH, MALCOLM PERCIVAL.

"Very amiable, indeed."

Was born at Hickson, Ont., in 1888. His public school career finished in 1900, he attended, for a few months, the Woodstock Collegiate Institute. In 1905 he entered Albert College, Belleville, where in 1907 he captured the "Senate Scholarship" for general proficiency in Junior Matriculation work. The next year the Senior Matriculation was completed and in October, 1908, he entered Vic. as a fresh-sophomore in Honor Philosophy. Mack, has interested himself in every phase of College life. He is a missionary enthusiast and aims at putting his Christian manhood into an attempt to elevate the life of West China.

STANLEY, CARLETON W.

"Wisdom is justified of her children."

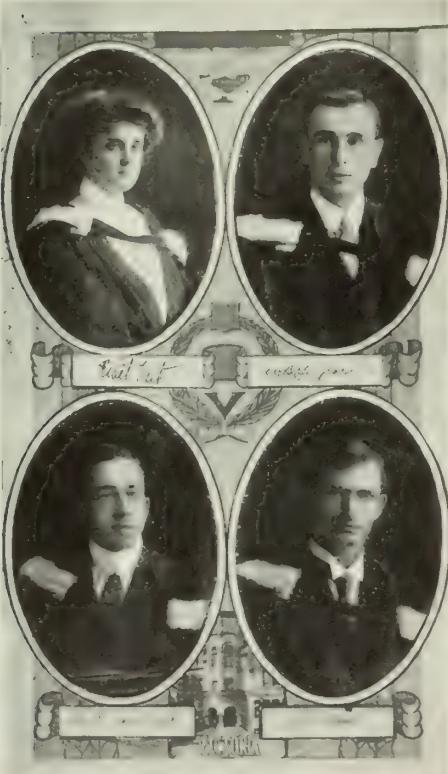

Providence has smiled upon Carl since the beginning of his career. Born at Providence, R.I., in 1886, he early forsook that city for a Canadian home in Toronto, where he received his public school education and first began to show his great power of mind. At the High School of West Toronto he continued his studies and graduated first in the Province in Classics and in Classics and Mathematics. Carl entered the University in 1905, but deserted it in 1907. Providence, however, again displayed her maternal leading strings and he came back in 1909, subsequently winning high honors in his academical work. In the Historical Club and in the Letters Club he has shown again his high scholarly attainments. Carl's quiet, genial manner in study and in student activities have secured him many warm friends.

TAIT, ETHEL MARGARET.

"A heart to resolve, a head to contrive, and a hand to execute."

Ethel Margaret Tait received her early education in her native city, St. Thomas, and, having creditably completed her High School course in Ottawa, came to "Vic." in 1907. Her marked ability as a leader soon made her a power in College circles, where she has served on class and Y.W.C.A. Executives, and along the line of her chosen course, Household Science. In her fourth year she has ably performed the arduous duties of Student Head of Annesley Hall. Both in Residence and in the wider circles of College life her friendships have been many and to each she gives the loyalty of a heart that is pure gold.

TAYLOR, WILLIAM BRICKENDEN.

*"A pedagogue of classic lore,
Just Greek and Latin, nothing more."*

William Brickenden Taylor was born in Blyth, Huron county, in the year 1889. He attended public school in Clinton and later the Clinton Collegiate Institute, where he won the Bishop Strachan Scholarship in Classics. The first two years of his College life were spent at Trinity; he then cast in his fortunes with Victoria. His vacations have been spent in instructing the young in the West. "Bill" has always been a brilliant student, and we expect great things from him in his chosen profession of teacher of Classics.

VAN WYCK, HERMON BROOKFIELD.

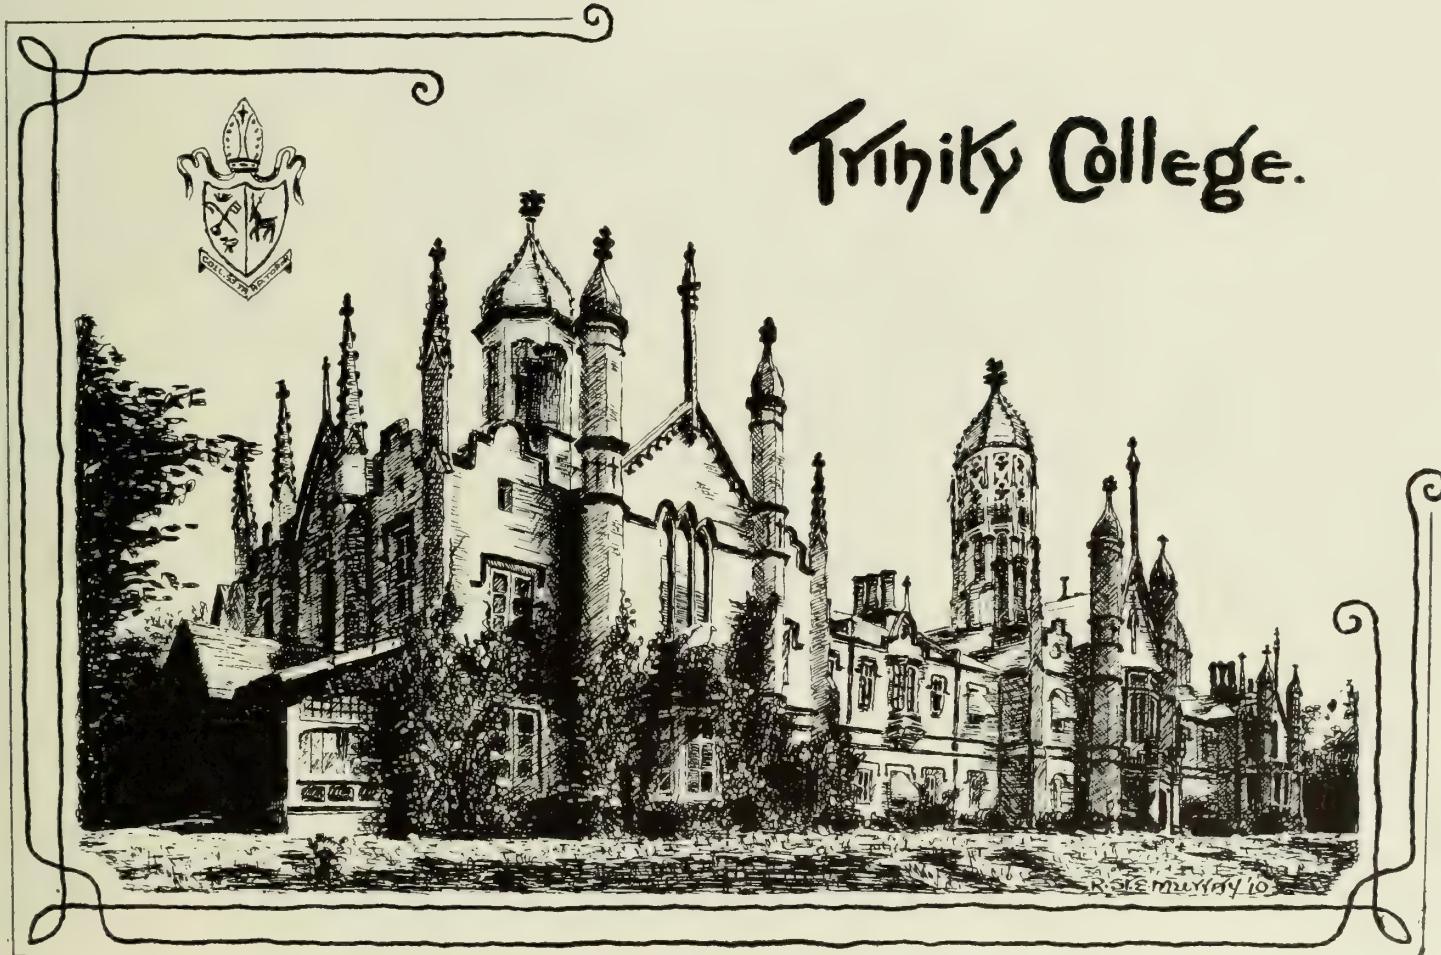

"He will be found most like himself."

"Van" entered this life at St. Catharines, Ont., spent a few years under the shadow of Hamilton's mountain, until Toronto became his home. He matriculated from Harbord C. I. in 1907 with a scholarship or two and entered Victoria. In College life he has taken a prominent part, on the "Bob," "Conversat" and "Senior Dinner" Committee; in the "Lit." "Glee Club," and Class Executive. His musical abilities have been a source of pleasure to his friends, and made him a member of the Mendelssohn Choir. He plays tennis and hockey, and held down left scrimmage on the College Rugby team. Yet amid all these varied activities "Van," has never quite lost sight of his "Classics" Course. His good qualities of mind and heart will ensure him a successful future.

WHITE, JOSEPH THOMAS.

"It matters not how long you live, but how well."

Joseph Thomas White was born near Birr, in Middlesex county, and first came under the rule of the birch at Birr public school. Like the average Ontario farmer lad, for some years he had his attention divided between the school and the farm, but, finally, yielding to the thirst for knowledge, entered Lucan High School. From there he made his way to Toronto University, enrolling in Philosophy at Victoria College. Tom has won the confidence and esteem of his fellow-students, and has ably filled the office of Treasurer of the "Lit." He has a warm place in the hearts of those who know him best, and we predict for him a useful career in the wider activities of life.

THOMAS CLARK STREET MACKLEM, M.A., D.D., D.C.L., LL.D.
Provost of Trinity College.

TRINITY COLLEGE.

Trinity College

THE advantages of student organization are becoming more and more evident every year. In a score of different ways and directions this idea of fraternal life has taken its hold upon the vast University of Toronto, and has been manifested in the increasing number of associations and clubs, the attendance *en masse* at the great rugby matches and the multiplication of what one might call corporate social functions.

But nowhere so much as in University Residence has this idea appeared to realize its purpose. In the moderately large number of residential colleges and fraternity houses we see student life at its best, for under such conditions the mere academic labours of the brain cannot be considered the sum total of existence, and a thousand

influences are at work to shape the student of the present into the citizen of the future.

Such a residential college is Trinity, with institutions modelled on those of Cambridge, and traditions that make the latest freshman tremble with cold dread.

Within the pages of this section and *passim* throughout the volume, you will find Trinity names and Trinity faces; it is our heartfelt wish that they do no discredit to their Alma Mater.

At last it has been decided to move Trinity up to Queen's Park. To many of us the change will be hard to realize and Trinity will always be to us the old building on Queen Street West. However, the traditions which cluster around Trinity as a College can and will be preserved in the new building, and none of us can blind ourselves to the advantages of greater proximity to the centre of the University.

History of Class 'II

HE Year of 1911 at Trinity is unique; there has never been anything just like it before, nor is such another to be anticipated in the future.

Our predecessors boasted of being the largest year that ever graduated from Trinity; we, perhaps, can claim to be the smallest since federation, and, like the little maid, cay say, "We are seven," for that is the grand aggregate left to us out of a number close on to thirty. The rest, from a variety of causes, have fallen by the way; some grew tired, others tried hard but couldn't, while several others, with the Church in view, finished "their" Arts courses at the end of two years. Then, too, the glamour of an emancipated life for those long chapel-fettered conspired to pluck from our midst two of the fairest flowers, who now decorate a "frat" at Varsity.

As a Year we lay no claim to brilliance, indeed we can show but three honour men in our number, while the stars that fell to our lot in the two first years would make quite a splendid constellation. But what is, perhaps, our most distinctive feature is the splendid lack of year spirit we display; even the seven of us form several distinct communities, and our teams have had to be recruited from the Divinity class from sheer lack of numbers. In one thing only did we shine and that was running, for the Year 1911 has been the backbone of the Trinity Harriers Club, and some of its members have even been successful in our Field Day.

To descend to personalities: H. E. Ross, our Head of Year, is an Honour Classics man whose retiring disposition, for which he blames his work, seems to keep out of the spotlight, though he is Trinity councillor this year on the Board of Torontonensis. O. F. W. Ellis, in Honour Moderns, is a man of diverse interests. He, too, is on the Torontonensis board and figures large this year as Scribe of the venerable Father Episcopon. He has shown his ability in the literary field on the College Song Committee and will long be famous for that chant—ask not about it! Then there is A. B. Mortimer, in Modern

History, and we are constrained to ask: "What will the College do next year without him?" As a member of entertainment committees at College functions he has been invaluable, not to mention his position as Second Vice-President of the Literary Institute, Treasurer of the French Club and Publicity Agent at Trinity of the now famous "Arbor." T. L. Bruce follows, a versatile Hotspur, he that polishes me off a few hundred lines each of Greek, Latin and Hebrew, writes an essay or two, then boxes for an hour and says: Fie upon this idle life; I want work." In addition to the by-no-means light work of the General course, he has coupled up in his last two years with Divinity. Then comes Nash, otherwise H. N. Farmer, a seeker after truth. He seeks it everywhere and retails it and, as has been remarked by members of the Third Year: "He will be missed." Farmer is a most conscientious worker, always weeks beforehand with his work. C. R. Widdifield, the next, is brother to the Head of College, and thus shines by a reflected light, but represents our Year in sports. The seventh-um—well, we'll leave him out with the mention that before he came to College he was fond of Astronomy and for the first two years showed an inveterate desire for stars—he got them!

But to turn from this interesting category: A feeling of awe, as in the presence of superior beings, comes over me as I think of the women students of the Year. They are many, and oh! so clever. It is commonly reported that each Honour student in the Year at St. Hilda's takes three courses besides occasional extras. They are also famous in debate and some in sports, notably Miss Hately in tennis and Miss Denne in hockey.

Coming is as we did in 1907, we were fortunate enough to experience the remnant of the old order. Ours was the last Freshmen's supper and we were hazed. To our lot fell also, in our Freshman Year, the Jubilee of Episcopon and, incidentally, its zenith, and we had the distinction of receiving the last half-year of lectures delivered by Trinity's honoured Professor Emeritus, Dr. Clark. Thus, we had greatness thrust upon us, though we were small, and "only seven."

St. Hilda's

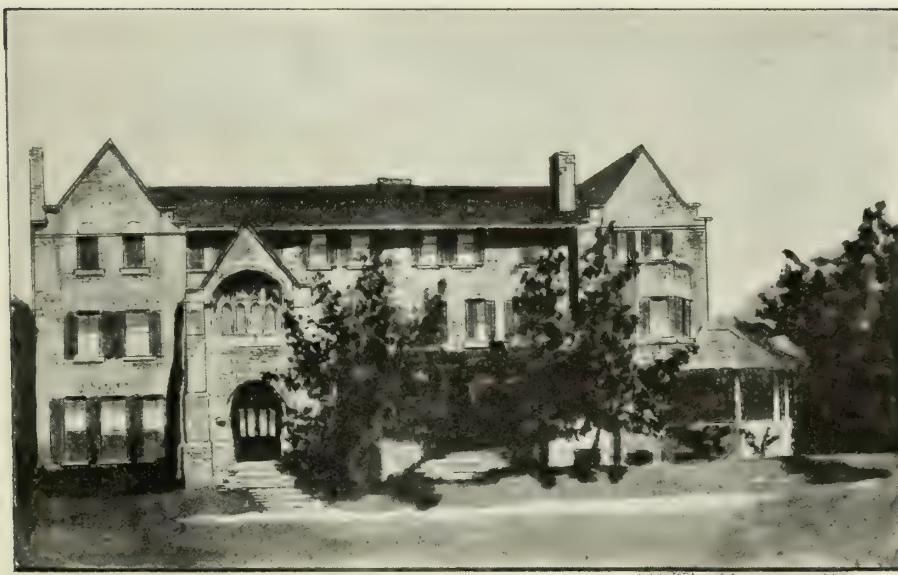

T. HILDA'S enjoys the distinction of having been the pioneer residence in Canada for women students. Soon after the opening of Toronto University lectures and degrees to women, when the first woman applicant presented herself to Trinity, the Provost, Dr. Body, with his customary wise foresight, at once organized a small residence, which was opened in 1888 with two students. The organization was at first collegiate, separate lectures being given at St. Hilda's by members of the Trinity College staff, but subsequently the work was arranged on an entirely co-educational basis. Though St. Hilda's thus abandoned her teaching functions, the effort has always been made to preserve her collegiate character, and this has been done with a fair degree of success, through the system of government, through the various societies, and through the "Chronicle," a quarterly magazine, edited and financed by the students.

There are about fifty students in residence, and a high standard of work and general efficiency has been attained. Academically, last midsummer gave firsts in Classics and Mathematics, in English and History, and in both parts of Modern Languages. Athletically, paper chases and tennis in the autumn, and hockey and basketball in the winter have claimed considerable attention. The trophies won in the inter-collegiate series of matches have been earned by hard work on the part of the several teams. The meetings of the Literary Society have been marked by great interest and variety, and very good work has been done in debating. St. Hilda's winning the first round in the inter-college series. The autumn sale was well supported, and the sum of \$130 donated to missionary work abroad. Representatives attended the Student Volunteer Conference at Guelph, and the Missionary Society has been engaged in the study of "The Desire of India." We have had the privilege of welcoming several missionaries to the College, the latest being Miss Lillingston, of the English Church

Mission to Korea, and Miss Spencer, '05, of Shinshu, Japan. The work at Evangelia Settlement is well supported, a number of the students giving weekly afternoons to help. Mention should be made of the appointment of Miss Winifred Wade, '05, as Head Mistress of the Montreal Diocesan School at Dunham, P.Q., and also of the notable extension of the library, which through the energetic work of the students has been enriched by many valuable books of reference. Indeed, the present may be called the "banner" year, and for this the credit is largely due to the high standard of conscientious work and duty set by the members of the Graduating Class.

St Hilda's

Father Episcopon to his Children

"What Ho?"

A pleasant voice, and low, toned through the dim
And murky gloaming of the College Hall,
Where, to the flick'nings of a single glim,
The Students waited for the Master's call.

DE SINGULIS MEMORABILIA.

RSEM:IO.

VIVE, VALE. Siquid novisli tecius istis
Candidus impetili; si non his uere mecum.
HOR. BK.I. EP.6..

ALCOMBRACK, EDNA.

"Du bist wie eine Blume."

Miss Alcombrack came from Eastern Ontario, where she obtained her earlier education in Kingston, and showed signs of the intellectual ability which has ripened during her College course. Later, she passed Senior Matriculation, Part I., from the High School at Richmond Hill, and from there entered Trinity as a non-resident student. She has been a worker in the General Course, and hopes to continue in the Faculty of Education next season. The distance of her home from Trinity has precluded her taking much part in the distinctive life of St. Hilda's, and great credit is due for the perseverance with which she has continued her work in spite of many difficulties.

BRUCE, THOMAS LANGLOIS.

*"For always roaming with a hungry heart,
Much have I seen and known."*

After travelling around the world T. L. Bruce decided that Trinity should have the honor of giving him the final preparation for his life's work, the Church. He entered College in 1907 and has throughout his course maintained a creditable standing in the General Course, taking Divinity as well in his third and fourth years. He is a member of the French and German Clubs and has taken an interest in sports, particularly in boxing and running. He takes part in all College affairs and has won respect and good wishes from all.

BURNETT, MARGUERITE.

*"She hath a wit so general,
So whole enclin'd to alle goode,
That all her thoughte was sette, ly the roode,
Without malys, upon gladnesse."*

Miss Burnett entered from the Peterborough Collegiate. She has been on the Athletic Executive; has represented St. Hilda's on the Athletic League; has three times played for the College in the tennis tournament, helping to win the Challenge Cup in her fourth year. She is head of the choir, and her musical skill has been a source of great pleasure, while her unusual executive abilities have found scope as Advertising Manager of the "Chronicle," as Head Librarian, and as Convener of the Sale Committee. She is scribe for Episcopon, 1911. She has been an earnest student and her initiative and resource have been constantly helpful to the College.

DENNE, MARION.

*"She was active, stirring, all fire;
Could not rest, could not tire,
To a stone she might have given life."*

Marion Denne first opened her eyes upon this bright world in Peterboro in 1891. The schools of her home town furnished her preparatory education, enabling her to enter St. Hilda's with the Class of 1911. Her work in the General Course has made us all proud. Academic work has, however, never lessened her enthusiasm for or success in sports. In her second year she filled the office of Mistress of the Chase most successfully and she has been hockey captain, having been on the team since her first year. Marion's executive ability, frequently proved on College Committees, added to her many other abilities, will, undoubtedly, assure her the success we wish her in the outside world.

ELLIS, OSCAR FREDERICK WILLIAM.

"For lucky rhymes to him were scribe and share."

Ellis was born in Parry Sound, where he also matriculated. After spending three years in business, he came to Trinity in 1907. While unable to engage in sport owing to ill-health, he has taken an active interest in other branches of College life. He is a member of the German Club, the Glee Club and the Choir, and has assisted in the production of the new College songbook. He has contributed to the "Review," and his work as a maker of verse has been of great service at Convocation and on other occasions. This qualification gained him the coveted post of Scribe to Episcopon. That Ellis has also found time for study his standing in examinations proves.

FARMER, HAROLD NASH.

*"A good man through obscurest aspirations
Has still the instinct of the one true way."*

A score of years ago, more or less, citizens of Hamilton were celebrating the nativity of Harold Nash Farmer. The child grew and thrived, and, in the course of time, was sent to Highfield school, from which he matriculated in 1906. In 1907 he entered Trinity College. Here he soon became distinguished by his painstaking assiduity, which, however, has not prevented him from partaking of the social advantages of residential life to a considerable extent. Although he has not yet chosen his vocation, his friends need have no fear for his future, if singleness of purpose and extraordinary powers of perseverance are qualities which contribute to success.

HARVEY, WINIFRED.

*"The toppling crags of duty sealed
Are close upon the shining table-lands
To which our God Himself is moon and sun."*

Miss Harvey came from the Ottawa Collegiate with scholarships in Science and Modern Languages, and the Seventh General Proficiency. She took Mathematics, transferring to English and History (Mod. Op.), in which she won the Burnside at the end of her third year. She has been Business Manager of the "Chronicle"; represented the Year at Evangelia House; has been Secretary of the Missionary Society, and has been chiefly instrumental in the enlargement of the library by the addition of many valuable books of reference. She debated for St. Hilda's in 1910, and every department owes much to her enthusiastic and unselfish support.

HATELY, MARY ENID.

*"Humblesse hath slain in hir al tiranye:
She is the Mirour of alle courteise."*

Miss Hately entered from Brantford Collegiate at the head of her year, with the Wellington, Dickson and First Edward Blake Scholarships in Mathematics and Modern Languages. She has proceeded in Modern Languages, English and History. She has represented St. Hilda's on the Debating and Athletic Leagues, being President of the latter; and has three times debated for St. Hilda's. In tennis she has held the Frances Endacott Trophy, and has four times played for the College, being one of the victorious six in her final year. She is President of the Literary Society and Head of College, and in both capacities "sweetly and strongly doth she order all things."

HORNIBROOK, S. W. H.

"To raise the thought and touch the heart be thine."

January of 1881 was a bright month in the history of Dunnville: Brook was born. He matriculated from the High School in 1901, and for three years taught to the youth of Beamsville the rudiments. In 1905 he entered Trinity in the Honor Philosophy Course, but illness necessitated a change in his plans, and he graduated in Theology in 1909. He is now finishing his Arts Course. In College activities the range of his interest has been wide. He is the possessor of First Football colors, as well as being President of the Glee Club, in which he was the moving spirit. At Advent, 1910, Brook became the Rev. S. W. H. Hornibrook and in this sphere his many friends wish him the success which is undoubtedly assured him.

KELLEY, ALICE LOUISE.

"Of cheerful yesterdays and confident to-morrows."

Miss Kelley began her career in Mathematics, but eventually transferred to the General Course. She has held a number of offices; has been Curator of the Athletic Society and Head of Basketball; Treasurer and, subsequently, Secretary of the Literary Society, and Advertising Manager of the "Chronicle." She has been a representative for St. Hilda's on the Inter-College Debating Union, and President of the same. She is a good speaker and has debated for St. Hilda's in the Inter-College contests, while her unfailing good spirits have made her a favorite with her fellow-students.

KELLEY, JOHN DOUGLAS.

"Nihil, tetigit quod non ornaverit."

Kelley is a native of Toronto. Having matriculated from Parkdale Collegiate, he spent several years in business very successfully. At Trinity he has shown a keen interest in every branch of College life. In the Department of Athletics his activity has chiefly taken the form of running, and his connection with the Harriers' Club has afforded him many opportunities for this kind of exercise. His services in the compiling of the new song-book and his zeal for the traditions of the College have raised him high in the esteem of all. He is a member of the Glee Club, the German Club and the "Review" Board, and has been chosen to represent Trinity in the Undergraduates' Parliament.

LOWE, EMILY MARGARET.

*"She welcomes and makes hers
Whate'er of good, though small, the present brings,
Kind greetings, sunshine, songs of birds and flowers."*

Miss Lowe came from Bishop Strachan School, and is a member of a family already distinguished in the annals of Trinity. She obtained the Dickson Scholarship for Modern Languages at the end of her first year, and was ranked equal for that in English and History. In her third year she gained the University Italian prize, and won first place in the University for Teutonics. She has been Secretary and Vice-President of the Literary Society and has been an interested member of the Missionary Society, while her musical abilities have always been at the disposal of the College.

McGREGOR, EVA LEONE.

*"Ne sachant pas de mal, elle faisait le bien;
Des richesses du coeur elle nous fit l'aumône."*

Miss McGregor entered Trinity from St. Margaret's College, where she won the Creelman Gold Medal for General Proficiency and Headship. She has pursued the General Course, and her executive powers and versatility have found scope in the varied interests represented at St. Hilda's, where also her hospitable instincts have shown the tendency of human nature, according to the gentle Elia, "to expand over a muffin." She has been a worker at Evangelia House, and a member of the choir; was a delegate to the Student Volunteer Conference at Rochester, and is President of the Missionary Society, in which capacity she is doing excellent work.

MORTIMER, ARTHUR BERESFORD.

*"But I will find him where he lies asleep and in his ear
I'll hallo 'Mortimer!'"*

Arthur Beresford Mortimer was born in California in 1889. He spent five years at Trinity College School, Port Hope, and entered Trinity in 1907, enrolling in the Modern History Course. He is a member of the Letters Club of the University, Secretary of the College French Club; is 2nd Vice-President of the Trinity Literary Institute, and was Secretary of the Autumn Dance Committee in 1910. He is also a harrier; one of the main-stays of the Weekly Hare-and-Hounds. He has designs, remote or immediate, upon Osgoode and the law.

NEWTON, ELIZABETH HUGHES.

*"The honor of a loyal boy,
The courage of a Paladin,
With maiden's mirth, the soul of joy,—
These dwelt her happy breast within."*

Miss Newton entered from the Hamilton Collegiate with the Second Edward Blake Scholarship in Mathematics and Modern Languages, and has done admirable work throughout her course. The Athletic Society and the "Chronicle" have received the chief part of her attention; she has been Sub-Editor and is now Editor-in-Chief of the "Chronicle," a position which gives scope to her originality. She is President of the Causerie Française, and has been the principal organizer of Basketball. She has been a worker at Evangelia House, and there are few institutions which have not been helped and stimulated by her bright energy.

OLDFIELD, INEZ MARIE.

*"Se tu segui tua stella,
Non puoi fallire al glorioso porto."*

Miss Oldfield matriculated from Dutton High School, and has made good progress with her studies in the Modern Language Course. She is an interested member of the Causerie Française, and has been one of the organists for the services in chapel. She has done excellent work as Assistant Librarian, especially in connection with the classification and cataloguing of the large number of books added during the year.

REHDER, MACIE D.

*"The inner side of every cloud is bright and shining;
I therefore turn my clouds about,
And always wear them inside out,
To shew the lining."*

Miss Rehder matriculated from Bowmanville, and entered on the Modern Language Course. She has been a most energetic member of the Year, and a valiant supporter of the several institutions, the Athletic Society being her special interest. She has been its Treasurer, Secretary, and, finally, its President, in which capacity she has had the pleasure of receiving the Tennis Challenge Cup on behalf of the College, and of presenting badges to the members of the winning team. She has played hockey for the College, has been a member of the choir, and President of the Deutsches Klatsch Club.

ROSS, HAROLD EDWARD.

"A man of compliments."

At Iroquois, in March, 1889, Ross was born, and from its High School he matriculated in 1904. In 1907 he entered Trinity with the Wellington Scholarship in Classics, the Mary Mulock Scholarship in Classics, and the Burnside Scholarship in Mathematics. Enrolling himself in Honor Classics, he maintained the standard throughout his four years, which gave him the headship of his class. Throughout his course he has taken a great interest in all College affairs, and has well earned the respect of all his fellows, which he will carry with him in whatever profession he may select for himself after graduation.

THE COLLEGE PROFESSOR

AS THE PUBLIC
IMAGINES HIM

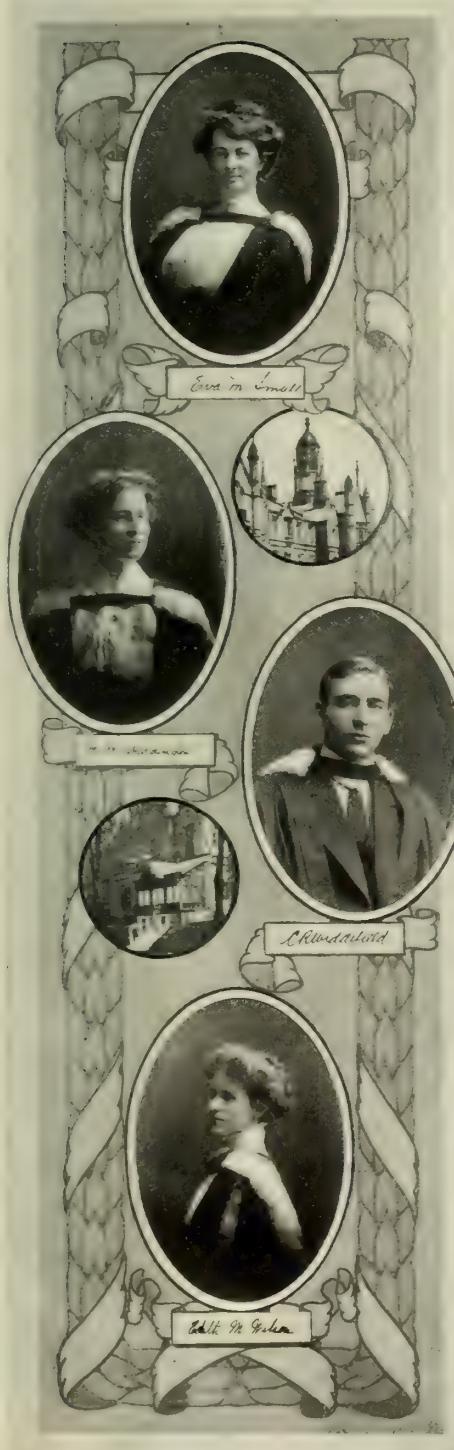

AS THE STUDENT
SEES HIM

AS HE REALLY IS.

TRINITY COLLEGE, CLASS 1912.

SMALL, EVA.

"Gladly wolde she lerne and gladly teche."

Miss Small entered Trinity from Shelburne, Ont., and has studied in the General Course, the varied sides of which appeal to her tastes and interests. Although, as a student out of residence, she has not been able to enter into everything, yet she has been keenly interested in the Literary and Missionary Societies, and has taken part in their proceedings on various occasions. During the long vacation of 1909, she took charge of a school in Saskatchewan, where she had many interesting experiences. She has the instinct of a true teacher, and will no doubt have good success in her chosen work.

WADDINGTON, MOSSIE MAY.

*"In books and gardens thou hast placed aright,
—Things that thou well dost understand,—
Thy noble, innocent delight."*

Miss Waddington entered from St. Clement's, Eglinton, winning at matriculation the Second Edward Blake Scholarship in Classics and Mathematics, and the Burnside in English and History. The latter she has held throughout her course (Class. Op.). Work has been first with her, yet she has always found time to help in other forms of activity. She represented her Year in residence at Evangelia House; has been Second, and, finally, First Sub-Editor of the "Chronicle," also Vice-President of the Missionary Society, in the work of which she takes a keen interest. In her final year she was an able representative of St. Hilda's in the Inter-College debate.

WIDDIFIELD, CHARLES RUSSELL.

*"Sigh no more, ladies, sigh no more;
Men were deceivers ever."*

C. R. Widdifield was born in Picton in 1889, where he received his early education. In 1905, removing to Owen Sound, he completed his High School education, and matriculated in 1907, coming to Trinity to enter the General Course. While there he always took a keen interest in many branches of sport, being on the hockey team for two years, Soccer captain for one year, and winning a place in the Steeplechase three years. He has also twice been on the Athletic Committee. He intends to go on to Osgoode.

WILSON, EDITH MARY.

"Life is neither a pain nor a pleasure, but a solemn business to be performed with honor."

Miss Wilson received her preliminary training at Glen Mawr, Toronto, and at Bishop Bethune College, Oshawa, matriculating from the latter institution to Trinity. She entered in the General Course, which she is following with success. She has interested herself in the several College institutions, and has served on various of the committees, round which so much of the life in St. Hilda's revolves.

TRINITY COLLEGE, CLASS 1914.

St. Michael's College

EXT September the corner-stone of St. Michael's College will have seen the sixtieth celebration of its patron's feast. During these six decades that have been chronicled in the archives of Time, success has generally smiled upon the efforts of the Basilian Fathers in charge, till at last they witnessed the happy day when St. Michael's College became federated with the Cathedral of Canadian education.

At present the College continues to progress both in intellectual, moral and physical lines. Though her graduating classes have been comparatively small, there is reason, however, to say that they have borne themselves very creditably at the University final examinations.

In athletics St. Michael's have become synonymous with true, manly sport. Her students prize this token of respect more than the bulk of their coveted trophies, which represent supremacy in the sphere of amateur hockey and junior Canadian rugby.

At handball St. Michael's always proved herself a little superior to her competing colleges, for the Intercollegiate Handball Cup has but once seen St. Michael's vanquished in that branch of sport.

However, with our success in examinations and our achievements in sports, there is another element that makes college life more wholesome and convivial; 'tis the spirit that mutually exists among the students—a spirit whereby all act in harmony, be it on the campus or in the class-room, and it is due to this pervading influence that we have met with so much success.

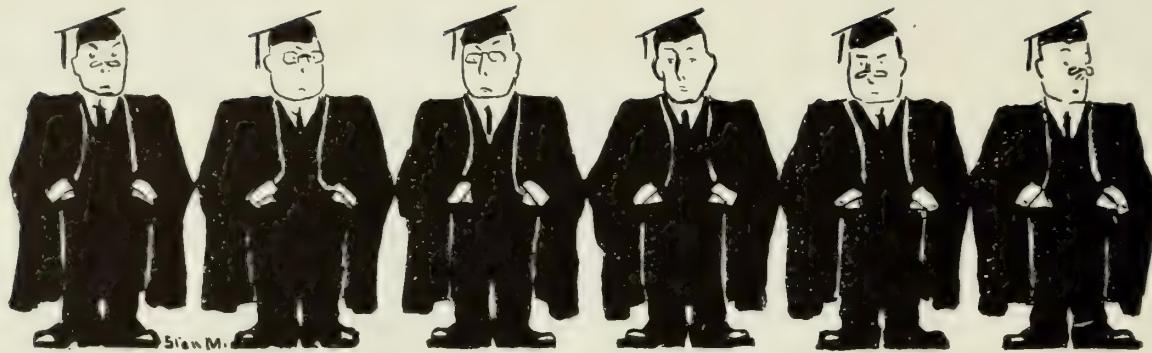

Many long winter evenings are pleasantly interrupted with enjoyable social meetings. The Aquinas Academy affords the "sublimely-profound" philosophers an opportunity to have their heretical views aired and corrected; the St. Michael's Literary Society, Choral Circle and Debating Club unite their forces in educating and entertaining the Arts students. Needless to say, these societies are well patronized, both on account of their educational aspect and, again, since they are the source of exhilarating merriment.

As the leaves in the book of Time are fingered over one by one, let us hope that some pages will tell forth the prosperity of St. Michael's College, and that both her students and the University of Toronto can join in an anthem singing.

"*Macula non est in te.*"

PRESIDENT POWELL,
St. Michael's College.

History of Class 'II

FOUR years have elapsed since our advent as freshmen, and we have now reached the parting of the ways. Into our chosen fields of labor we pass, like so many of our predecessors, unheralded by portent, but with spoils of a struggle that oblivion ne'er can claim. A retrospective glance brings back many a scene that "lives again in memory" as one of the happiest of our lives. We recall our freshmen year with its traditional experiences so vivid that they seem to have transpired but yesterday. Our joys and sorrows of that year were shared by many who have since sought other courses, and by some who, responding to destiny's call, have dutifully entered other fields of labor. Indeed, it was with greatly reduced numbers that we returned as sophomores to begin our Philosophy course proper. At this critical period four new members joined our ranks, and gave the class a new lease of life and vigor that never waned.

In the realms of abstract thought we have sojourned with a fair measure of success. Our chief innovation has been the organization of the Aquinas Academy to promote philosophical controversy. It

has already won the confidence of the undergraduates, and its future promises to be bright. We likewise point with a certain measure of pride to our achievements in athletics. Mulligan, Coughlin, McCorkell and Bellisle are honor graduates of the gridiron, and the latter has likewise an enviable name in hockey.

But it is not a fitting time to sound our praises or rehearse our triumphs. The immortal line of some sacred bard may not be the means of snatching them from oblivion—we are quite unworthy of so great an honor—but the unfolding of the future will surely coax forth into bloom a few of the seeds that have fallen from our hands.

And now, with all the world before us, we separate. Devoted each to a special pursuit, we shall henceforth stand in a great measure divided and shall possess little in common save that spirit which the associations of the past four years has inculcated in us. It is our earnest wish that this spirit may continue to assert itself and bind us together with sympathetic ties, and form a connecting link between us and our Alma Mater throughout future years.

BELLISLE, HARRY STANISLAUS.

Harry was born at Georgetown, November 12th, 1891. His preparatory education was received in St. Helen's separate school, Toronto, and in '04 he entered St. Michael's. He matriculated in '07, and the appetite for knowledge already acquired, led him into the unexplored depths of Philosophy, where as a disciple of St. Thomas, he was a leading member of the class. His career in football and hockey stamps him as one of St. Michael's best all-round athletes, and his rare ability as a general has won for him the captaincy of nearly every team with which he has played. His literary talent has been recognized from the fact that he is business manager of the College Year Book. A combination of such talents assures him success.

COUGHLIN, CHARLES EDWARD.

"Mens sana in corpore sano."

In 1891 Charlie first smiled upon Hamilton, "The Ambitious City." There he received his preparatory education and, entering St. Michael's, matriculated in '07. Throwing in his lot with the Class of Onety-One, he began to grapple with the philosophic problems of Ancient Greece. True to his motto, he apportioned time to both work and play. During his sojourn in the College he always took an active part in the Literary and Dramatic Societies, and the season's sports. He has the unique distinction of being a member of three championship teams, viz.: The Handball team, Junior City Rugby Champions, and the Junior Canadian Champions. Whatever be his vocation, if his past be any criterion, his future is assured.

DIGNAN, RALPH HUBERT.

Hubert was born in London, December 9th, 1890. The same place provided his preliminary education in its separate schools and Collegiate Institute, from the latter of which he matriculated with honors in '08. The following term found him with the Class of '11, and he still upholds the enviable reputation made as a High School student. Hubert held nearly all the important offices in the various College societies—ample proof of his executive ability and popularity. He has controlled the finances in the various departments of athletics, and no one could extort "the almighty dollar" more easily or make it go farther than he. We can safely predict that his efforts in the future will be crowned with the greatest success.

FITZPATRICK, BERNARD PATRICK.

*"For the journey is done and the summit attained,
And the barriers fall,
Though a battle's to fight ere the guerdon be gained,
The reward of it all."*

"Fitz." commenced his career in Brockville, May 18th, 1892. After a brilliant course at the separate school and Collegiate Institute of his native city, he decided to cast his fortunes with the Class of '11 at St. Michael's. Though Bernard is young in years, still, what he lacks in age, is amply offset by ability. "Fitz." has always shown great admiration for athletics and is especially interested in the endeavors of his Alma Mater along this line. He combines all those qualities which go to make a good fellow and a gentleman. We trust that success will attend him in whatever walk of life he shall embrace.

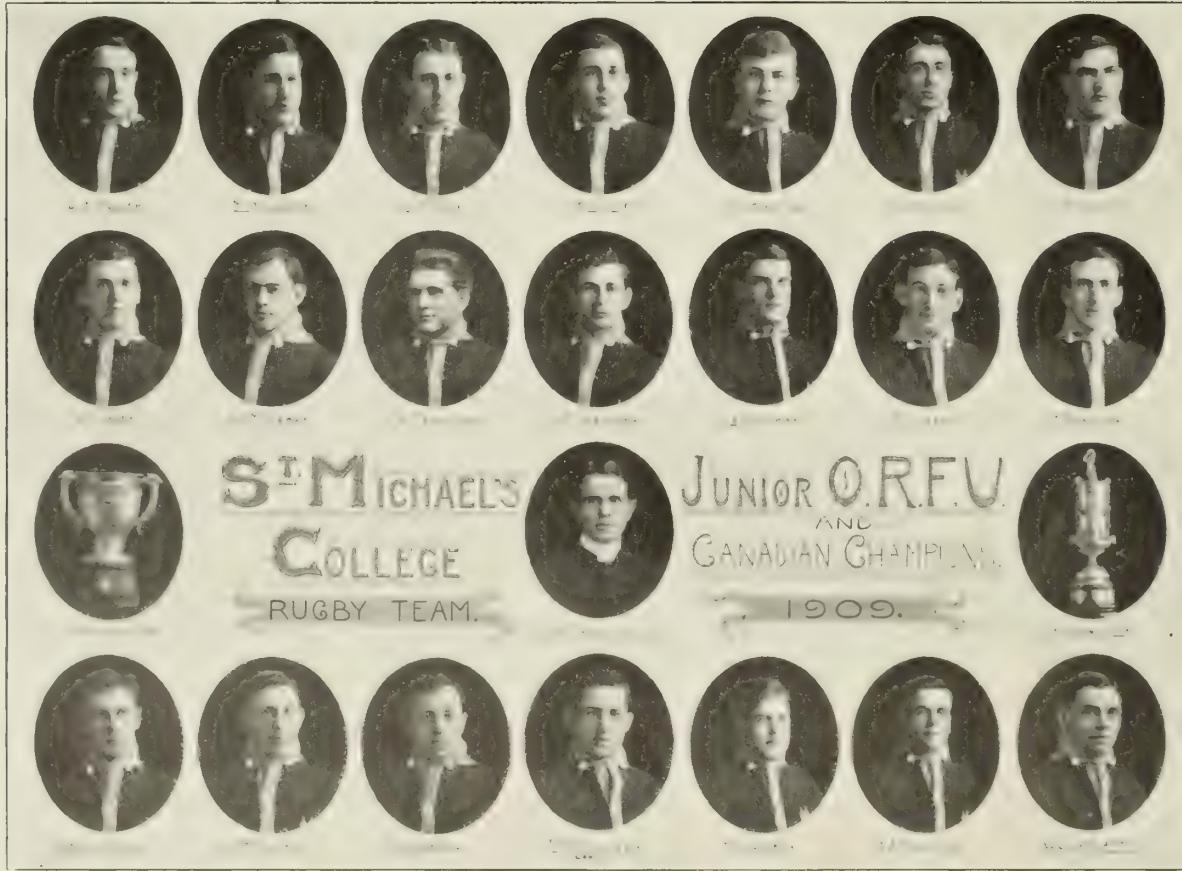

McCORKELL, EDMUND JOSEPH.

In Brechin, in 1891, was born the victim of this biography. Here he obtained his primary education. He entered the Collegiate in Orillia, and obtained his senior leaving. His thirst for learning aroused, he came to Toronto and entered the Faculty of Education. Graduating, he came to St. Michael's and joined the Class of Onety-One. His philosophical mind fairly revels in metaphysical potentialities and psychological certitudes. In Athletics, "Mac" has the unique distinction of being one of the Junior Dominion Champions, his line plunging being a big factor in the winning of many a game. The Class of Onety-One join one and all in wishing him continued success in whatever branch of life he may choose.

MULLIGAN, THOMAS MURRAY.

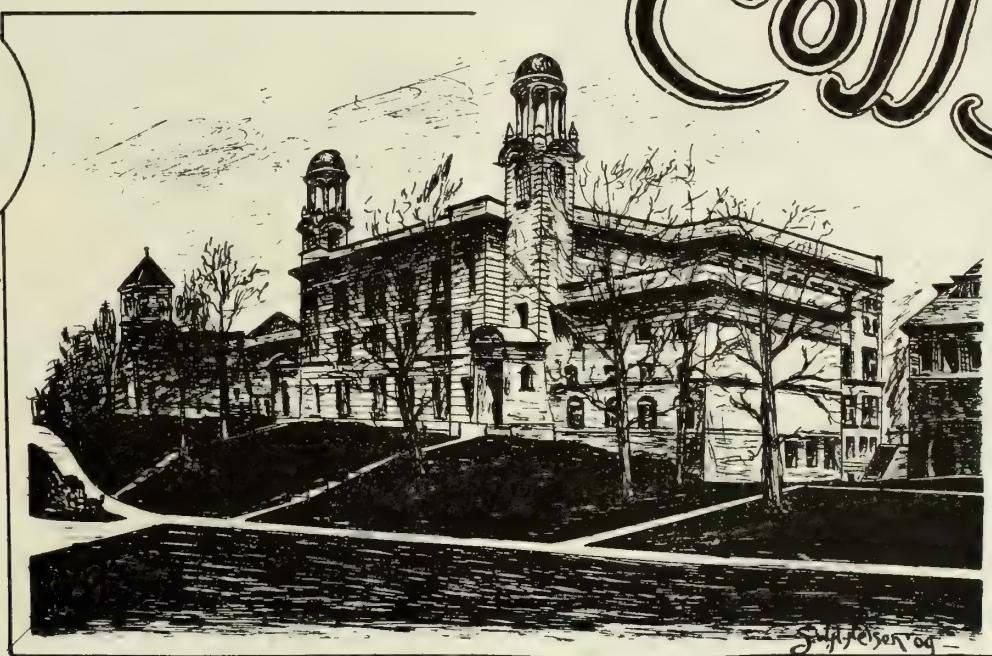

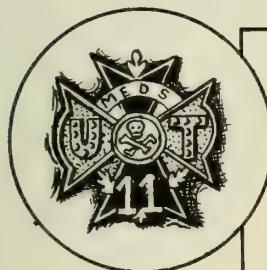

*"Man is his own star,
And that soul that can be honest
Is the only perfect man."*

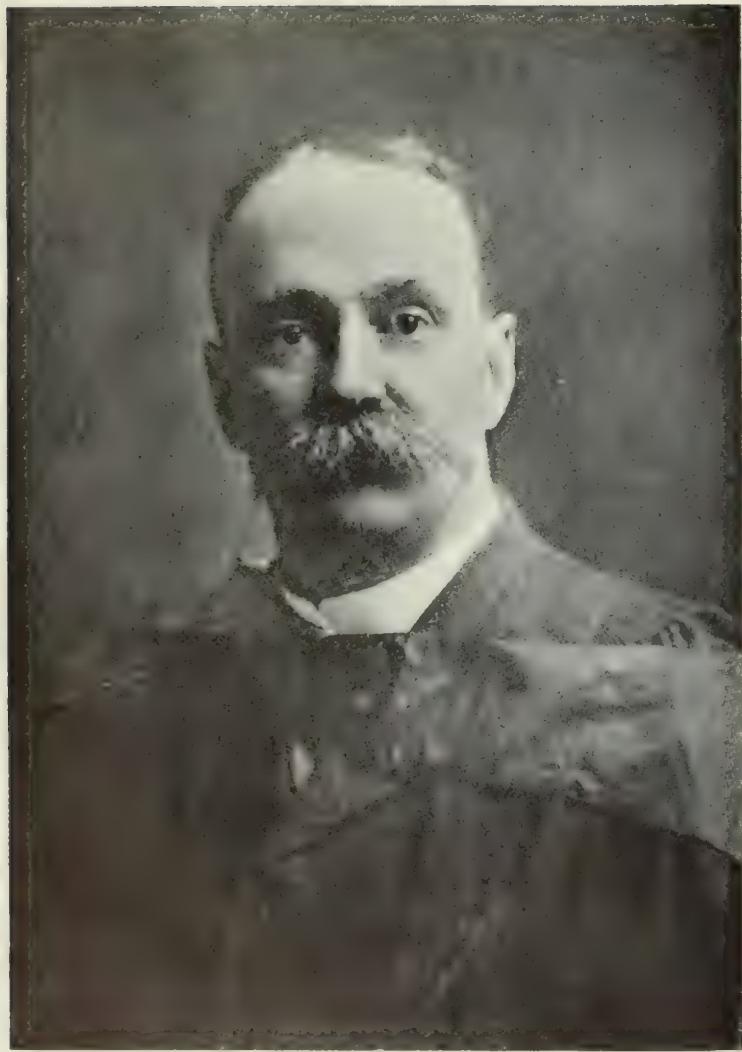

The potentiality of the above concreted entity was actualized in Toronto in the year 1888. To Kentucky was entrusted the rocking of his pedagogic cradle. It was, however, at St. Michael's that Murray learned to lisp "mensa—mensae," and afterwards to cerebrate scholastically regarding such trifles as syllogisms and Aristotelian categories, while wondering whether a student possessed free-will when the "Prof." was determined. Murray has always held prominence both metaphysically and physically. His present graduation testifies to the former, while the fact that he captained last year's Junior Dominion Champion punters gives evidence of the latter. His classmates unanimously wish their dear friend success in the legal profession in which he is about to enter.

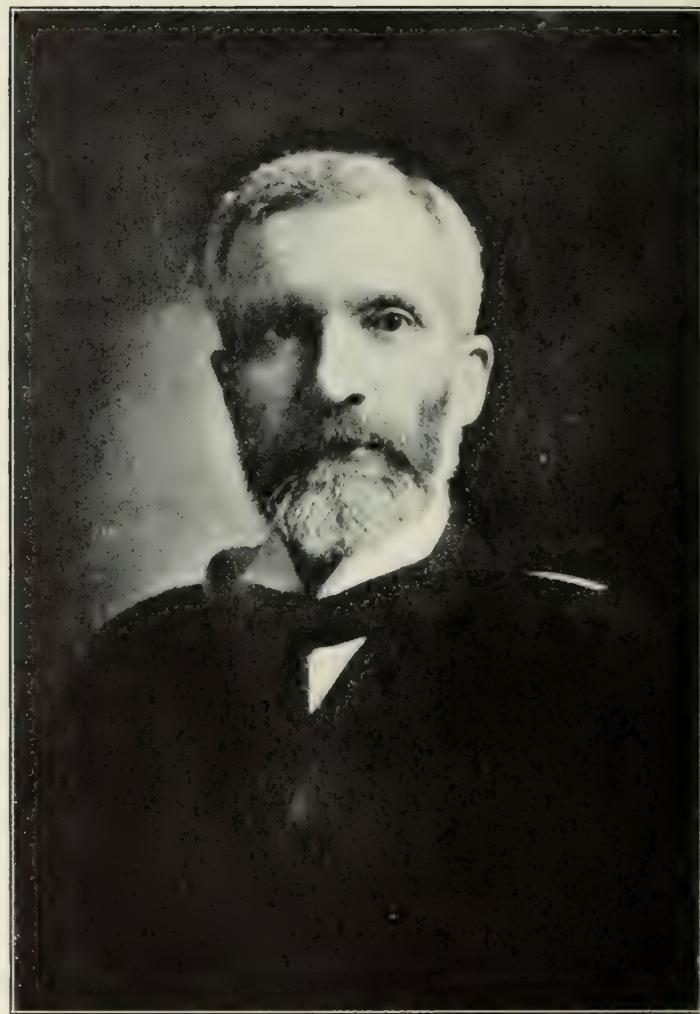

St. Michael's College Football Team.

Medical College

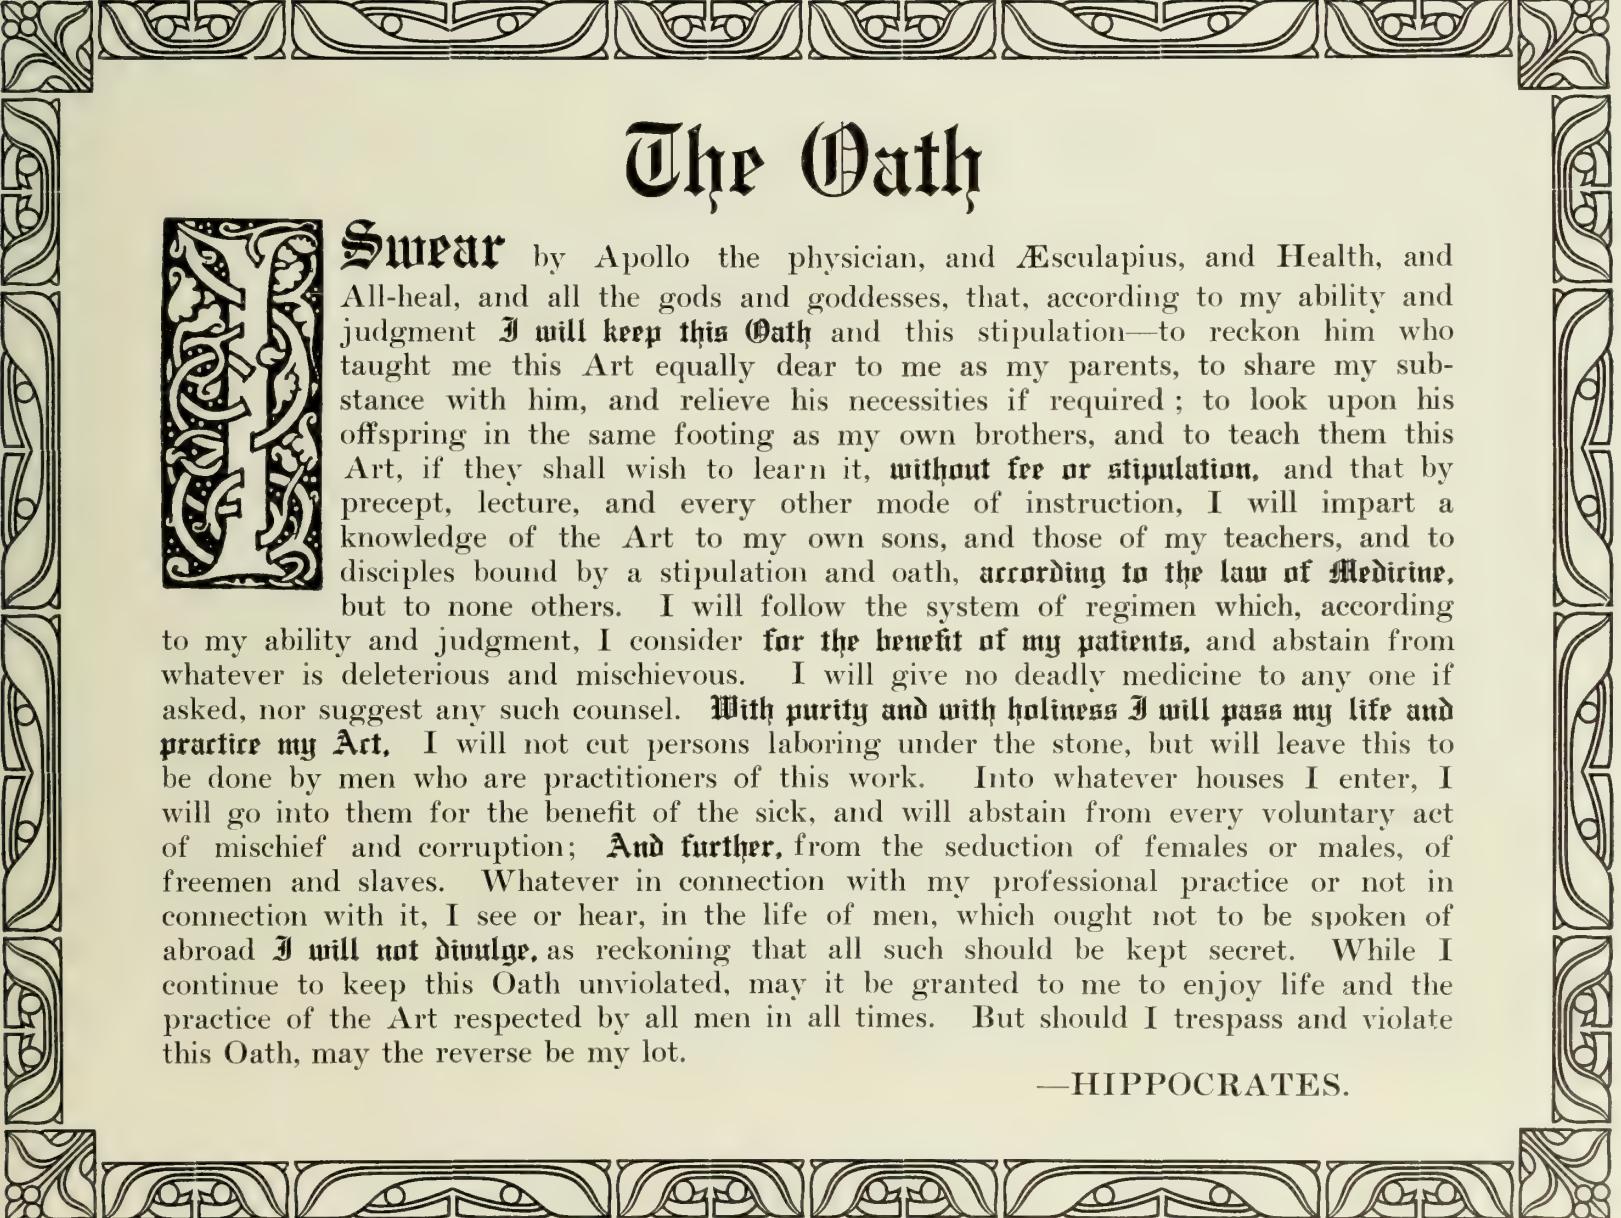

DEAN CLARKE.

PROF. A. B. MACCALLUM, PH.D., SC.D., LL.D., F.R.S.

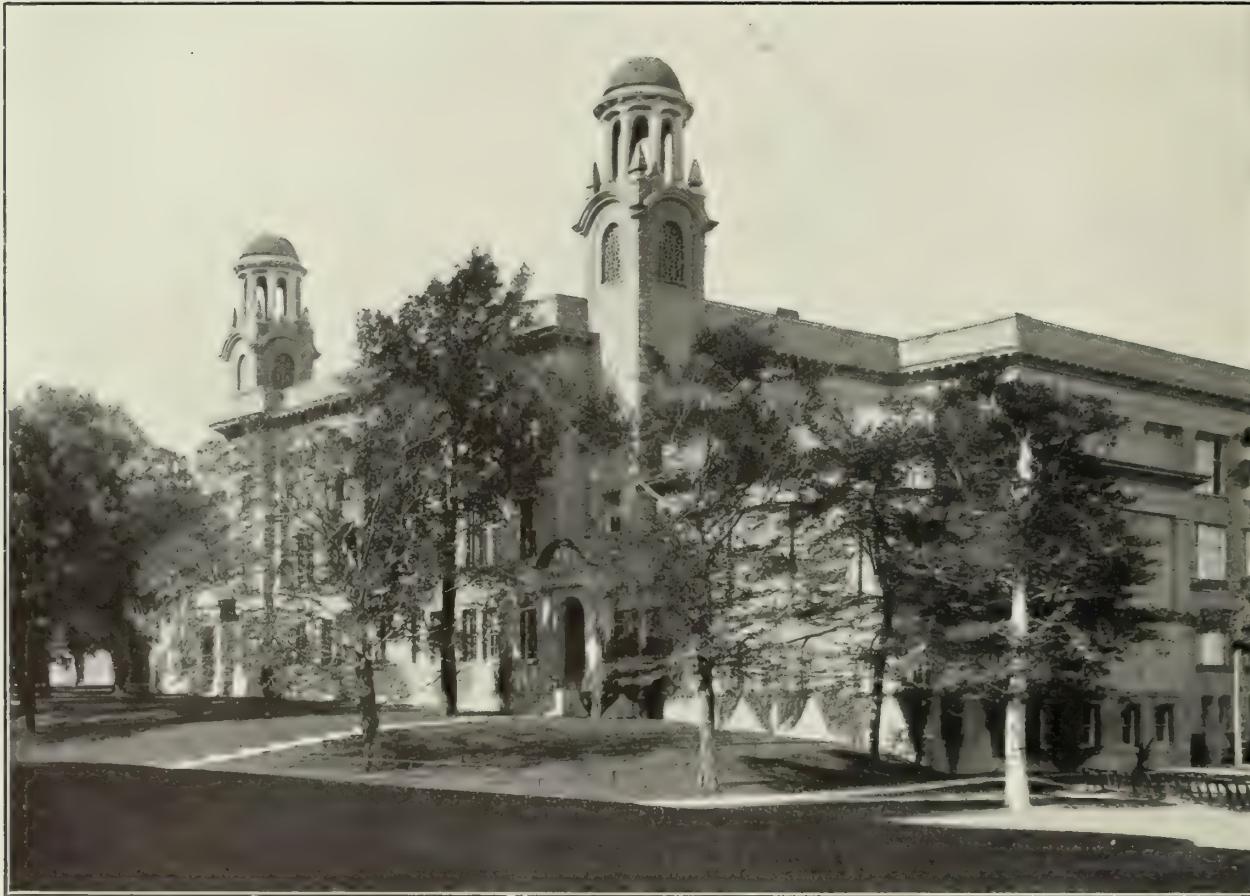

The Oath

Swear by Apollo the physician, and Aesculapius, and Health, and All-heal, and all the gods and goddesses, that, according to my ability and judgment **I will keep this Oath** and this stipulation—to reckon him who taught me this Art equally dear to me as my parents, to share my substance with him, and relieve his necessities if required; to look upon his offspring in the same footing as my own brothers, and to teach them this Art, if they shall wish to learn it, **without fee or stipulation**, and that by precept, lecture, and every other mode of instruction, I will impart a knowledge of the Art to my own sons, and those of my teachers, and to disciples bound by a stipulation and oath, **according to the law of Medicine**, but to none others. I will follow the system of regimen which, according to my ability and judgment, I consider **for the benefit of my patients**, and abstain from whatever is deleterious and mischievous. I will give no deadly medicine to any one if asked, nor suggest any such counsel. **With purity and with holiness I will pass my life and practice my Act.** I will not cut persons laboring under the stone, but will leave this to be done by men who are practitioners of this work. Into whatever houses I enter, I will go into them for the benefit of the sick, and will abstain from every voluntary act of mischief and corruption; **And further**, from the seduction of females or males, of freemen and slaves. Whatever in connection with my professional practice or not in connection with it, I see or hear, in the life of men, which ought not to be spoken of abroad **I will not divulge**, as reckoning that all such should be kept secret. While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art respected by all men in all times. But should I trespass and violate this Oath, may the reverse be my lot.

—HIPPOCRATES.

THE MEDICAL COLLEGE.

The Chronicles of '11

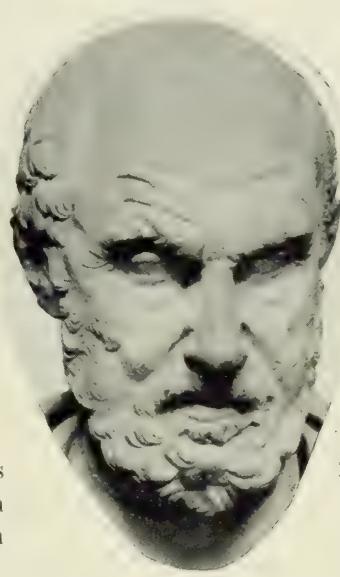

BEING A VERACIOUS ACCOUNT OF THE DOINGS OF A GOODLY COMPANY OF MEDS. IN EMBRYO AND DEVELOPMENT, SET DOWN HERE BY H. M. MOSDELL

CHAPTER I.

The Coming of the Æsculapians.

THESE be the chronicles of the Æsculapians, the men of the east and of the west, seekers after knowledge even from the uttermost parts of the earth:

1. Now it came to pass in the year when Robert Falconer first came from the east to rule over the men of 'Varsity, Edward VII., of glorious and peaceful memory yet reigning on the throne of Britain the Greater, that the Spirit of Wisdom, of understanding, and of discernment came into the hearts of men widely scattered upon the face of the earth.
2. And they said one to the other, "Go to, now, let us forthwith go up even unto Toronto and hold communion with men of lore that we, even we, may learn wisdom and acquire knowledge."
3. And he who could not take counsel with his fellow, held communion with himself and hearkened also to reason, even such great and marvellous words thereof as are set down in the Book of the Calendar of 'Varsity.
4. For, lo, a rumor had gone forth and a saying that they who ruled in the land had ordained a lengthening of time and an increasing of years, whereby much labor would be added to all who sought to become dwellers therein and to be hailed doctors and masters even as had their example and forerunner, Æsculapius himself.
5. And, moreover, the fame of the Temple of Æsculapius at Toronto being exceedingly widespread and the priests thereof hailed as learned and all-wise, they speedily made all haste to come to the City of Learning.
6. Eleven score men and ten and six were they, the greatest multitude that had ever come at one time to sit at the feet of the learned men.
7. And the citizens marvelled exceedingly at the sight, for, lo, the strangers were such as had never aforetime come to their city;
8. Of one they said, "Behold he is an hayseed, for there be many burrs in his hair and he doth carry a fallow field on his boots,"

9. And of another Toronto men said to their fellows, "Saw'st ever such a vivid green? It is even the color of the salt sea waves. And the breath of the sea is on their clothes. Of a truth these be from the shores of the great oceans!"
10. And all the strangers were exceedingly fresh.

CHAPTER II.

How they came even to the Halls of Learning.

1. Now on a day appointed the mandate went forth that the newcomers, who were long to travail as Freshmen, should repair even to the Hall which is called Convocation. And they did so.
2. And the hearts of the Freshmen waxed small within them as they lifted up their eyes and saw the fearful and wonderful array of learned men and great who sat even on the platforms;
3. "Wherewith," groaned they, "shall we ever find favor in the eyes of our lords, the Professors?"
4. But as one spake they waxed exceedingly thirsty and the drought became great even as that of the sun when he shineth on a parched earth in all his splendor.
5. But they possessed their souls in peace, "For," said they, "yet a little while and these things cannot be."
6. And on the morrow they went forth to their labor at which they were utterly unskilled.
7. But taskmasters were set over them to require a tale of tasks for every day and they relented not, neither did they suffer any to shirk.
8. And the manner of laboring was this, namely, that the Freshmen were taken into rooms, even laboratories, and there commanded to do strange things, such as irked them, with physical and chemical apparatus.
9. And many a time did a Freshman make a break, yet, sometimes intentionally, and the result thereof was a smell, the odor whereof was in every man's nostrils and abode long in his wearabouts.

The Chronicles of 'II—Continued

10. But the greatest travail of all was theirs when they were summoned of the locus difficile, even the dissecting-room, wherein they abode for many days.
11. And the knowledge of their presence therein went with them abroad into all parts of the land.

CHAPTER III.

The Freshmen elect themselves Rulers.

1. Now, while the days of the Freshmen were yet young in the land, they said one to the other, "Lo, we be as sheep having no shepherd.

Let us, therefore, appoint one as leader and add others thereto as councillors that wisdom and system may mark the way wherein we go."

2. And it was done, even as had been suggested.
3. But the manner of choosing guides and leaders was wonderful, yea, marvellous, and the way thereof even as an earthquake and a strong cyclone.
4. And at the noise of the appointments the buildings did shake and tremble exceedingly.
5. And when the uproar had ceased, it was found that one, John Gardiner, slight of stature, but tall and withal amiable of temper, was chief officer, even president, and he ruled over the Freshmen during all their days in the land.
6. With him to rule were given Christie and O'Leary, with whom he took counsel concerning affairs of weight.

THIS IS VERY PRETTY.

7. Now it chanced that the desire for knowledge had brought also to Toronto certain ladies of assorted ages and appearances who forthwith were enrolled as Freshettes.
8. Now these Freshettes, whose numbers were exceedingly small, bethought themselves how they might vote even as the Freshmen, for the thought of doing so delighted their hearts.
9. But when account thereof was given to the High Priest, he forbade it, saying:
10. "Your presence in a class election row would be even as that of precious pearls before swine."
11. Then did they cease their wailing and took comfort at his words.

CHAPTER IV.

Concerning Hustles and Class Dinners.

1. Long time did the Freshmen go to their labor in fear and trembling, for it had of long time been the custom for certain men who had sojourned longer in the land to fall suddenly on the newcomers, to hustle them, yea, to ill-treat them until they were left in evil case.
2. But one said: "Why should we fear the enemy? Are we not more than they? Let us fight them with a heavy hand," and they decided so to do.
3. When word of this was noised abroad to the Sophomores, they spake one to the other, saying: "It is even so. But let us send them word, lest we stink in their nostrils."
4. So they sent a flag of truce, affirming that they had righteously decided to leave the Freshmen in peace, seeing that the High Priest discountenanced hustles and such disturbances.
5. And for long time the land was at rest.
6. Now it came to pass that certain Freshmen, of lean and hungry mien, lifted up their voices with an exceedingly great and bitter cry, saying:
7. "Lo, these many days have we dwelt in restaurants, and as for a square meal, we know not even if there be such a thing or no.
8. "Let us, therefore, go with many shekels to the keeper of some goodly inn that we may feed to the full and delight our souls with good things."
9. And it was even so.

The Chronicles of '11—Continued

10. And at the hotel that is called Arlington, they ate, drank and made merry in such wise that the landlord marvelled greatly, saying:
11. "Of a truth, there be little profit in relieving a winter's fast."

CHAPTER V.

How the Freshmen entered the Exam. Lists.

1. Now, when the snows had all disappeared from off the face of the earth, the Freshmen became sad and heavy of heart and their countenances did cloud exceedingly.
2. For it had been noised abroad that with the time of the singing of the birds they must pass through an ordeal dreadful as by fire, in the like whereof many goodly men had aforetime been grievously treated.
3. So they made much careful preparation therefor.
4. And when the lists were all closed and every Freshman had held close conclave with the examiners, a spirit of deep faintness settled down upon the land.
5. And, lo, when the fiat went forth, it was told how many a man had gone down in the test.
6. But there was much rejoicing by these who had escaped "ploughing" and were not numbered amongst the "plucked."

CHAPTER VI.

They return to 'Varsity as Rejoicing Sophomores.

1. The winter being again nigh at hand, the Sophomores returned to 'Varsity that they might imbibe yet more of wisdom.
2. And the lodging-house keepers and they who ran hash-houses and pie foundries rejoiced exceedingly, saying:
3. "Lo, these sixteen weeks have we mourned empty rooms and lean purses, the which shall no longer trouble us."
4. And when the Sophomores had once more gathered in their great strength the citizens of Toronto said one to the other:
5. "Whence this big army and who are these with raiment of such wondrous hue and fashion? And wherefore carry they themselves as though they were of much account; yea, even as R. J., the great, himself?"
6. And all the city did marvel greatly as they walked abroad.

7. And when the class had assembled again within their strongholds it was told that a score were missing from the lists, so that for a space there was much sorrow.
8. All that year the Sophomores toiled exceedingly, yea, were even as slaves.
9. Meanly were they arrayed in the dissecting-room and the frog mortuary, and, lo, professors lectured them from the rising of the sun even to the going down of the same.
10. But many of the Sophomores budded not out as trees of knowledge, or even became sprigs of understanding.
11. And much marvel was made thereat.
12. And all through this pilgrimage, which was exceeding irksome, their leader was one Bert Baker, who was counselled at length by Smith, otherwise, I. R., and John MacLean, who furthermore guarded the shekels.
13. Much glory did the Sophomores gain on the athletic field, vanquishing all enemies in the game that is called Association, whereof they were champions.
14. Then did they much honor to Langford, the captain of the team, and also to Scott, the manager thereof.

CHAPTER VII.

Concerning Juniors and Their Ways.

1. When the army of the students again went up to the University City, it was found that a score and two men had been finally counted out of the fight.
2. And, lo, that year it seemed as though the toilings of the past had never been, for, behold, the whole order of things was changed.
3. And the men rejoiced exceedingly that the lines had at last fallen to them in pleasant places.
4. In this year also did the

The Chronicles of '11—Continued

Juniors win much renown in sports; inter-year baseball and soccer did they capture and were victors also in intercollegiate soccer and inter-faculty track events.

- 5 And in all these struggles did the following men acquit themselves right well, even Gardiner, Langford, Hutton, Sproule, Sebert, Copeland, Davis, O'Leary and Scott.
6. And the men of the Junior Class were well content.
7. But in athletics even greater honor than these aforementioned was gained, and the class rejoiced exceedingly when it was told how the 'Varsity Rugby Team had won for themselves the championship of the Dominion of Canada.
8. For Park and Lajoie did no little to help the team to victory.
9. And with great rejoicing the men of the Junior Class did hie them to the place called McConkey's, and there did feast upon the abundance of the banquet that was spread.
10. And Scott did rule as President of the Year.

CHAPTER VIII.

Wherein the Esculapians reach the Final Year of their Sojourn.

1. Nine score men, less one, did the company number that assembled at 'Varsity to complete the final year of their travail.
2. And Smith, of the large frame and genial countenance, even he whom every Senior knowest as Davie, was President of the Medical Society and Chief Officer of the Year.
3. In this year came also many athletic honors to the Class, and they were acclaimed champions of inter-year baseball, the which H. S. Shields, E. Kells and Tripp did no little to secure.
4. Sebert, furthermore, became President of the Athletic Association and champion short distance runner; Copeland, champion with the discs and Scott with the hammer at the day, even the great day, of field sports.
5. Then also did the 'Varsity Rugby Team go to Hamilton that they might hunt the Tigers even in their lair, and they came not thence until they had despoiled them of that which they coveted exceedingly, even the Dominion championship.

6. And again the Class did rejoice greatly that two of their men, even Lajoie and Park, gained no little renown in the contest with the Tigers.
7. Now it came to pass that seven men were required to represent the Seniors at notable affairs of other Halls of Learning.
8. And because the honor was great and the commissions most pleasant, a multitude of candidates arose, saying, "Send us, even us, thereto."
9. And, lo, there was a great tumult and many strong men hied them abroad that they might influence the Seniors to honor their candidates with the commissions, and the tumult waxed great even to heaven and men marvelled greatly thereat.
10. Now, when the uproar had ceased it was found that by the vote, even by the will of the majority of the Class, Bryans was to go to McGill; Moffat to Queen's; W. J. McKenzie to London; Orr to Arts; Davis to Osgoode, and Stirrett to the School of Practical Science, whereat all were well content.
11. And the Seniors said, "Go to now, let us make us a banquet and a feast the like whereof has never aforetime been known round the Halls of Æsculapius, and it shall be that in the years to come the ears of men shall tingle at the news thereof."
12. And it was even as they had said.
13. And a menu, even a writing of the good things of the feast, was prepared, fearfully and wonderfully was it decorated, and beholders marvelled much thereat. But when the diners had partaken of the feast and its side orders they looked much thereon and said, "Behold, it is indeed very good!"
14. And that the faces of the men of the Class, even the varied lineaments of their mugs, might be handed down for the unwilling admiration of posterity, the Class ordained that pictures should be taken and presented in the book that is called "*Torontonensis*," the which was done.
15. And this matter was performed by Benson, Bouck, Hanley, O'Leary, McQuibban and Miss Roberts.
16. Here endeth the chronicle of the men of 'Eleven, their doings and their varied fortune at 'Varsity, the Queen of the Universities of the Land of the Maple.

ALEXANDER, CHARLES CLELAND.

"Catching a Scotchman young, you may do something with him."

This note of "Sandy" the taciturn, Charles Cleland Alexander,—"Sandy"—third member of the Alexander Male Quartette, was born in Palo Alto Co., Iowa, U.S.A., in 1884. He started his education there, and, later, after a visit to the places of interest in Britain, he settled in 1895 on a farm near Seaforth. From Tuckersmith School he took his Entrance and Pt. I. Junior Leaving, thereafter attending Seaforth Collegiate. He subsequently graduated with the Clinton Model class of '04, becoming a pedagogue. Again returning to Seaforth, he completed his Matriculation and Senior Leaving and in the fall of '07 entered on his Medical course.

ARMSTRONG, ARTHUR CHESTER.

*"Nature made him as he is,
And ne'er made such another."*

Born in Drayton, Ont., in the year 1888, and spent his early days as a robust urchin, dissecting house-flies, garden worms and bumble-bees. He passed through the trials of his early education, and matriculated in the year 1906. He was again in evidence, enrolling in the Faculty of Medicine and looking around corners for Sophomores with green paint and shoe polish. However, Chester passed through these persecutions with but slight interference with his liberty. During his course in Medicine he has made many lasting friends, and his success is assured him.

BAKER, ALBERT HENRY, B.A.

"At once to charm, instruct to mend."

Bert's influence in the welfare of humanity showed itself early, when upon making his debut into the world, up in Walkerton, Bruce County, he delivered a lecture which was a masterpiece of firm but courteous remonstrance against existing conditions. He received his early education in Quebec, and afterwards came to McMaster University, from which institution he received his B.A. Teaching proving unsatisfactory to him, he decided to devote his time ministering to the physical rather than the intellectual wants of suffering humanity, and accordingly joined the '11 class in Medicine at Varsity. He entered freely into class life and his associates know him to be a gentleman, ever ready to help and ever ready with a courteous reply.

BARKER, HAROLD RICHMOND, Phm.B.

*"A wise physician's skill, our wounds to heal,
Is more than armies to the public weal."*

—Pop.

Barker, Harold R., Phm.B., received his early education at the West Toronto Model School. After graduating in Pharmacy with a gold medal, he entered Medicine in the same fall with class '11. He is quiet and industrious and his many friends wish him much success in his profession.

BARRETT, WYMAN DOUGLAS.

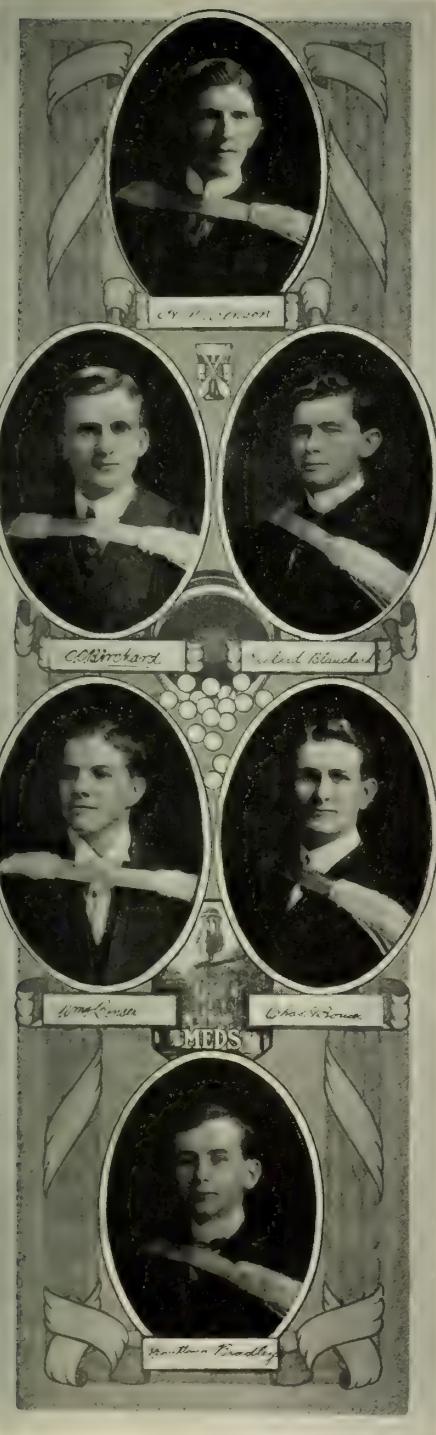

"A brother to a prince and fellow to a beggar if he be found worthy."

"Spot," as he is familiarly known, saw his first sunrise in Gesto, Essex County, some twenty odd years ago. After experiencing the joys of multiplication tables and other exciting pastimes, he migrated to Amherstburg. He spent a pleasant year at High School there, but Essex offered greater advantages. Completing his matric. at the latter place in '07, he came down to Varsity and enrolled in Medicine with the illustrious class of 1911. Books have never been a bore to him, for he realized that baseball and At-Homes are also very essential to a thorough education. His many friends predict for him a most prosperous future; for his happy smile will make friends for him wherever he may decide to practice.

BARTON, NEWTON JAMES.

"Deep thirst for knowledge hath his footsteps led."

Newton James Barton was born in Simcoe County, Ontario, on a farm. He completed his public school education in the rural school and continued his preliminary education at Beeton, before entering college. In the meantime he ardently followed the plow until ambition bubbling over could be restrained no longer. No farm was large enough to keep down the thirst for knowledge and incidentally for the pleasures he anticipated in a college career. Hence, with eager footsteps and eye aflame, he started out for that great educational institution, Toronto University, where he gained wondrous and diverse knowledge, and will graduate with the class of '11.

BENSON, HARRY WORDSWORTH.

"Deep thirst for knowledge hath his footsteps led."

Harry Benson began his education at a small country school in Northumberland County, where he manifested a keen interest in the intricacies of the multiplication table. At Port Hope High School he early became noted among the teachers for his controversial tendencies and independent opinions. Throughout his medical course he has not only stood at the head of the honor lists but has found time to be interested in all sides of student life. In future years, his kindness and tact will win him the confidence and gratitude of his patients, and some day we expect to see him occupy a well-deserved place among the leaders of the profession.

BIRCHARD, CECIL CLINTON.

"Plato, thou reasonest well."

Cecil Clinton Birchard was born at Valentia in 1886. He received his public school education at Janetville and at Cobocoenk. His course of three years at Lindsay Collegiate Institute gave promise of what he was to do later in the wider sphere of university work. In '05 our subject enrolled in the School of Practical Science Chemistry course, where he spent one year, taking premier honors. But the "man from Cobocoenk" was destined for Meds '11. Enrolling in 1907, he has in this course gained the distinction marking his previous career, winning a scholarship in each of his undergraduate years. A keen thinker, a patriotic citizen, and a true friend, Cecil is bound to make his mark.

BLANCHARD, RICHARD.

*"If he had any faults, he has left us in doubt,
At least in four years I could not find him out."*

At Linsdale, Ont., Dick first gave voice to his independence in 1885. After acquiring all the knowledge possible in public school, he was deported to Uxbridge High School. He soon graduated, however, and after having successfully taught school for two years, he entered Medicine in 1907. His genial manner and his merry laugh soon became known throughout the college, in return for which he was elected corresponding secretary to the Medical Society in his fourth year. We predict a very successful future for Dick in his chosen profession.

BONSER, WILLIAM.

*"Keeps his counsel, does his duty,
Cleaves to his friends and loveth beauty."*

Wm. O. Bonser first expanded his lungs in the impure air of Detroit, Mich., in the year 1888, but was shortly removed to Toronto. His early desires for knowledge were made manifest by his frequent absences from school, hunting pollywogs and worms. Bill entered Medicine in 1907, after a whirlwind finish at Technical High School, where he distinguished himself both in his studies and socially. This reputation he has maintained in his course in Medicine. He was a representative to the Students' Parliament in his 3rd year, and, doubtless, if he could have been persuaded to offer himself for office in his final year, would have headed the poll. We are sure that a most successful future awaits our friend.

BOUCK, CHARLES.

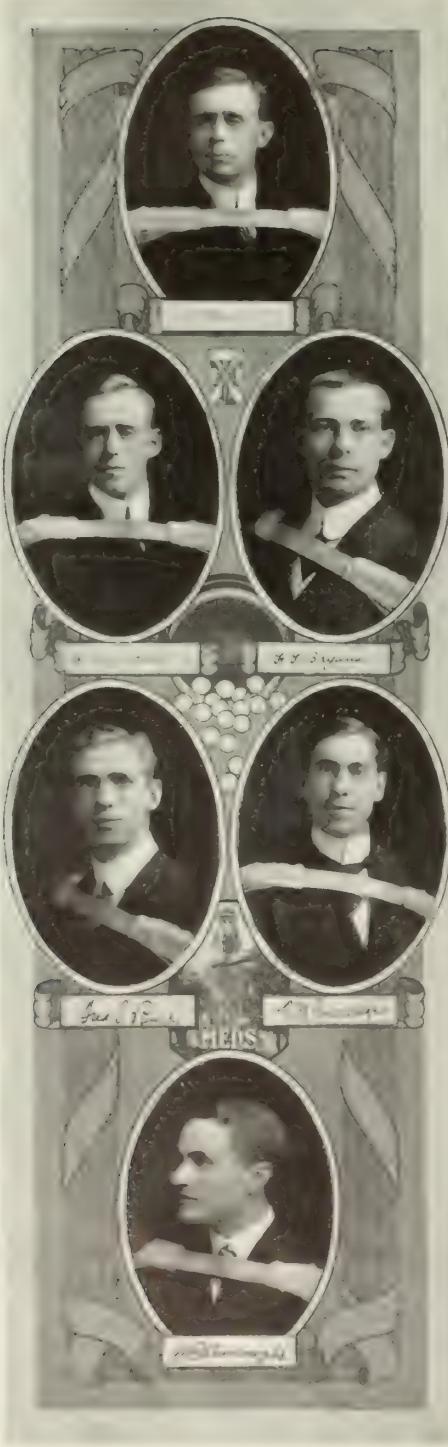

"'Tis passing strange how little determines a career."

In the early morning of May 12th, 1886, when first sniffing the air of Brinston, Charlie detected therein the aromatic odor of carbolic acid. The idea became subconscious, and was only brought to consciousness by a process of association. He received his public school education at Toy's Hill, and his High School education at Iroquois, and for two years was an honor student at the Royal College of Dental Surgeons, where, while at work, he again detected that aromatic odor. All the old associations returning, he longed for the study of medicine, and entered class '11, where he has each year obtained honor standing. For the past two years he has been a member of the Students' Parliament and now serves on the Torontonensis Committee. May his success in practice equal that in college.

BRADLEY, JOHN COURTLAND.

*"Conspicuous for mirth and laughter,
The ladies first, the ladies after."*

On a cold March night in 1886, J. C. arrived in Prescott County, a bouncing baby. The child grew and thrived and betimes became a schoolboy at Fenaghvale. Later he attended Vankleek Hill Collegiate and Model School, graduating in 1904. Since then he has led a varied career, wielding the birch in the village school, travelling, and, later, making seidlitz powders behind the apothecary's counter. In the fall of 1907 he joined Meds '11, and has stayed with them since, taking an active part in every phase of student life. His record as a student and his pleasing manner assure him the success which his many friends wish him.

BROE, LAWRENCE.

Lawrence hails from Chilliwack, B.C., but was born under the Stars and Stripes in North Dakota in 1883. After spending some time in Aldergrove, B.C., and Sumas Prairie, he made his home in Chilliwack. Securing his matriculation in New Westminster, he taught school for a few years, and then came east in 1907, joining the '11 Meds. In his medical course Lawrence has taken Honor standing, and in his final year he was secretary of the Alpha Omega Alpha Honour fraternity, of which he was a member.

BROGDEN, LAWRENCE FREDERICK.

*"A man he seems of cheerful yesterdays,
And confident to-morrows."*

In the year '85 Lawrence first made his appearance in the little town of Mitchell. There he received his early education, developing incidentally the spirit of mischief within him and escaping many merited punishments. On graduating from the Mitchell High School he spent three years wielding the birch in the little red school-house. Higher education then appealed to him, and he decided to delve into the science of medicine. Coming to Toronto in '07, he has since devoted his time to the pursuit of learning when not otherwise engaged. He has ever proved himself a good fellow, and, judging from his success in the past, his many friends feel safe in predicting for him a bright future.

BRYANS, FREDERICK THOMAS.

*"In praise and in dispraise the same
A man of well attempered frame."*

Huron County has given to Canada not a few of her most distinguished sons, and, unless all signs fail, the Huron County boy who is the subject of this sketch will some day add one more to the lengthy list. "Fred," as his intimates know him, received his High School training at Listowel and then taught for five years. Entering Medicine in 1907, his splendid physique and good-natured bearing soon attracted friends, and in his final year his fellow-students showed their appreciation of his worth by electing him their Representative to the Annual Dinner of McGill Medical College. His success in his profession is never in doubt.

BURK, FRED SYPHER.

*"There are, dear Michael, two points in the Adventures of the Diver,
One — when, a beggar, he prepares to plunge,
One — when, a prince, he rises with his peare."*
—From Paracelsus. Browning.

Frederick, otherwise "Micky," is a genial Irish-Canadian hailing from the Scotch town of Fergus. In 1882 Fred sounded the trumpet alarm of his approach to this earth. After his arrival he attended the schools of Fergus, where he was attended to-o. Graduating into blue overalls and iron filings, he became an expert in metal mechanism. But Galen had need of a successor, and Fred became a student of human mechanism. As an undergraduate he was a member of the At-Home, Theatre and Dinner Committees. Four years of study—and waiting—leaves this genial Mickey with hopes almost certain of victory, and the crown of olive for his reward.

BURROUGHS, CHAS. MCINTOSH.

Burroughs, Chas. M., first saw the light in the town of Arnprior a quarter of a century ago. His boyhood was spent in the Canadian Capital, and he received his academical training in Trenton High School and Shawville Academy, Quebec. Charlie's sterling character and characteristic laugh have rendered him well-known and well-liked, while his enthusiastic work at elections has extended his acquaintance through all the other students in medicine. One can confidently predict a bright future for Charlie, if professional attainment, social standing and winning personality are means to that end.

BURROUGHS, HAROLD CALDWELL.

*"He is a man
We shall not look upon his like again."*

Harold Caldwell Burroughs got his first glimpse of earth in Fallowfield, near Ottawa, in 1884. After the usual public school course he put his hand to the plough, but later he turned back and entered Kemptville High School, from which he entered the B. & P. class at Toronto University in 1906. During his one and only year in Arts, which he did successfully, he was elected Secretary of Committees on the Unionist ticket. Wishing, however, to make his course as short as possible, he joined Meds '11. Burroughs is a quiet and industrious fellow, and his classmates wish him all kinds of good luck for the future.

MEDICAL AT-HOME COMMITTEE.

BURWASH, BYRON R.

Byron Burwash struck "terra firma" in the town of Smith's Falls in 1884, one dark and stormy night, the stork having never carried a more precious burden. He received his early hidings and education at Baltimore, and finally matriculated with honors. He then became the staid and sober pedagogue of a country school, which he presided over with great success for three years. But his ambitious spirit did not rest after reaching this noble height. He saw greater opportunities for service in the medical profession, and entered the Faculty of Medicine with the class of onety-one. Here his career has been fraught with every success and he is truly a genuine "hail fellow well met." The best wishes for success go with him in his noble career.

BUTT, WILLIAM HENRY.

"But me no Butts."

William Henry Butt, the son of a Methodist clergyman, was born at St. Johns, Ont., in 1885. His public school training, therefore, was not confined to any one place. At Chatham, Centralia, and Wallaceburg he received such preparation as fitted him for the High School course. He attended the Windsor Collegiate and Leamington High School and prepared for the teaching profession by graduating from the St. Thomas Model School. In the fall of 1907 he entered the Faculty of Medicine, and is preparing himself for a useful career as a medical practitioner. Those who know him well are impressed with the manner in which he has retained and utilizes his early home training.

CAMPBELL, JOHN GEORGE ALEXANDER, B.A.

"As true as steel, as faithful as the years."

It was in the winter of 1889 that George first gladdened the hearts of all by his sunny smile and winning ways. A good preparatory education, received partly in Quebec and partly in Ontario, left him athirst for wider knowledge, and, as the profession of Medicine seemed to offer the best opportunities for usefulness and self-sacrifice, he entered the B. & P. course in University College with the definite aim of graduating with the Class '11 Meds. After an Arts course, brightly adorned by honors, academic, social and athletic, George graduated into the higher sphere of Medicine, and, that he is one of the most popular men in his class, is but one proof of his sterling merit and genial personality. Onety-One graduates him as one of her most promising sons. He is President of the Lewellys Barker Club and a member of the Nu Sigma Nu fraternity.

CAMPBELL, WM. CHAS.

"A combination and a form indeed,
Where every god did seem to set his seal
To give the world assurance of a man."

William was born in Hastings County in 1886. His public school education was received in the village of Tweed. He then, with his parents, moved to Belleville, entered the Collegiate Institute there, and matriculated in 1904. Three years were then spent by him in acquiring an accurate and thorough knowledge of drugs. While in this pursuit, the broad avenues of Medicine beckoned to him with alluring charm, and the corridors of the University of Toronto received in 1907 a warm personality. A co-operative spirit, and diligent application, have won for him many friends. We predict for him a bright and prosperous future in the ranks of his profession.

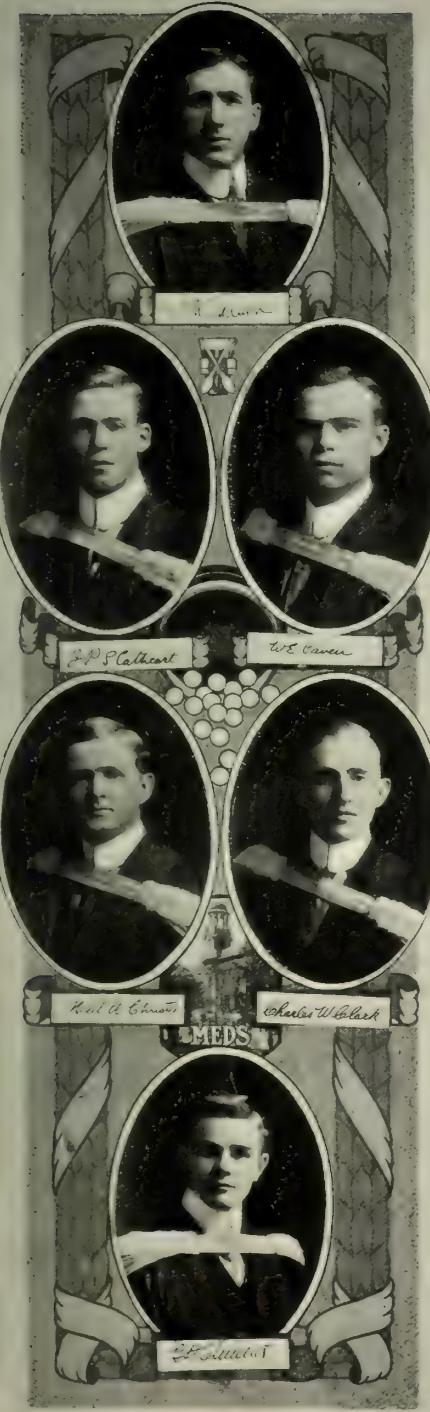

CANN, WILLIAM RICHARD.

Born in 1884 at Oshawa, Ont., his boyhood's home, he received his preliminary education at the pubile and High Schools, matriculating in 1902 to the University of Toronto. He early established a reputation for integrity, natural ability and painstaking perseverance, as well as a genial good-nature and comradeship which secured for him many friends. From 1904-1907 he taught school at Baltimore, Ont. He entered as a student in the Faculty of Medicine in 1907. Early impressions of him are sustained by his obtaining "Honors" in every examination (standing among the first nine), and by his being elected a member of the Students' Parliament as well as class representative on the Dinner Committee in his third year.

CARLETON, GEORGE WYLIE DUNDAS.

"Soft eyes looked love to eyes which spake again."

Born in West Toronto; now resides in Thornhill, Ont. Was educated in public and High Schools of Thornhill and Richmond Hill, from which he graduated with honors and entered on his Medical career at Toronto University at the age of seventeen. By spending his summers in the wilds of Northern Ontario, and on the billowy surface of Lakes Huron and Superior, he kept himself rugged, and fit for his persistent and energetic labors during his winter terms, and made for himself a name equalled by few of his age. If success is a measure of merit, then his great life work should carry relief and happiness to many of life's unfortunates.

CARSON, GEORGE M.

George was born in 1883, in Dufferin County. He received his primary education in Perry School. Subsequently he entered Orangeville High School and matriculated in 1902. Two years he then spent in moulding the minds of some Ontario youths. Later he went West and attended the first Normal School in Alberta, at Calgary, and continued his professional duties for two years in that Province. Possessed of a tender love for humanity, medicine called him, and he entered Toronto University in 1907. True to his sense of duty, steadfast as a friend, co-operative to the best interests of the student body, a host of friends assure for him a bright and prosperous career.

CATHCART, JOHN PHILIP SELBY.

J. P. S. Catheart, to his friends "Selby," was born in the village of Courtright, July 26, 1890. After a preliminary canter in the Courtright public school, he entered the Sarnia High School in 1904, matriculated in 1906, and after taking an additional year in the sciences, entered Medicine. Since that event, he has more than fulfilled his early promise; he has taken a high stand in his work, and his scientific attitude towards the problems which have confronted him is earnest of a successful career. Aside from his scholastic attainments, he has distinguished himself on the year baseball team, and in his third year was a member of the University Rifle Association team. He stands six feet one inch, in his stockings, and intends to go west and grow up with the country.

CAVEN, WILLIAM ERNEST.

Bill first cried for certified milk in Erindale about a quarter of a century ago. Here he received his primary education, and entered Medicine in '07 with an honor matriculation from Parkdale Collegiate. He took honors in his first year but decided he could not keep this up and also his social standing. He was Secretary-Treasurer of U. of T. Track Club in 1910. In his third year he was a member of the Dinner Committee, and in the fourth year General Secretary of the Students' Parliament. He played on the Med. team in the Mulock Cup series. His keen observation and energy point to a successful career in the profession he has chosen. He is a member of the Lewellys Barker Club.

CHRISTIE, NEIL ALEXANDER.

In October, 1884, Duntron welcomed into its midst a chubby little lad who later became known as Neil. It was here he was chastised and educated, and later Collingwood Collegiate and Bradford Model School contributed to his store of knowledge. After a year's principalship of Nottawa public school, he held sway in his home school for four years. In this time he perfected the morals of his home district and in the fall of '07, fair, fat and frisky, he entered Medicine at Toronto. As a freshman he marshalled the forces against the mighty second year, and in the same year he was elected to the Executive of the Medical Society. In his second year he played on the inter-year champion football team, and now, at the close of his college career, with a hop, step and jump, he makes his debut into professional life followed by the good wishes of a thousand friends.

CLARK, CHARLES W.

"Ah, take the Cash, and let the Credit go," "Blondie" entered this "vale of tears and trials" in the year 1888. For preliminary training in the way he should go he attended the London public schools, and, later, Harbord Collegiate, Toronto. Matriculating from this institution, he entered the University of Toronto, joining the 1911 class of Medicine. Everybody knows Charlie, and to know him is to like him. This is the highest eulogy. Unassuming, but always ready to help where assistance was required, he made his presence felt in no small way. He is a member of the Alpha Kappa Kappa fraternity and the Lewellys Barker Club.

CLEMENT, GEORGE HERBERT.

"For the Docteur's he's de ole-fashion' kin'
Doin' good was de only t'ing on hees min'!"

Millbrook can boast of many arrivals in the later eighties, but none more welcome than that of "George." From childhood he evinced an insatiable desire to get at the roots of things. Toronto, then Bolton, witnessed the efforts put forth by this young hopeful as he grew in learning until he matriculated in '06. After a year's deliberation he finally decided to affiliate himself with "Onety-one," and has by his love of sport and study brought himself into a favored position among his classmates. His geniality, his keenness of perception and his faithfulness to duty ensure him a most successful career in his chosen profession.

In Memoriam
Alice Josephine McCarthy

Born January 21st, 1887
Died July 21st, 1910

COATES, LLEWELLYN HERBERT.

"A man of deep thought is a man of few words."

"Llyn" received his early education in the Brantford Public Schools, matriculating from the Brantford Collegiate Institute in 1907, afterwards taking a year in Form IV. before commencing the study of Medicine with the class of 1911. At school he was prominent in hockey and has always taken great interest in all sports. Conscientious in his work and of a retiring but determined disposition, he is bound to succeed. His gentlemanly, genial and cheerful manner bespeak for him a successful career in the healing art.

CODY, WILLIAM MACPHERSON.

*"Clear-headed friend,
If ought of prophecy be mine
Thou wilt not live in vain."*

"Can any good thing come out of Hamilton?" Well, "Bill" Cody comes from there, and everybody says "he's all right."

Born in Kemptville, he received his High School training at the Windsor Collegiate Institute, graduating in 1903. Four years of wandering to and fro on the face of the earth followed, and then his ambitions drove him to study medicine.

His college career has been one triumph heaped upon another. No honor list is complete without his name, and still he always has time to spend a social hour with his hosts of friends. He's the biggest "little man" we have, is sure of success in his profession, and we predict for "black-eyed Bill" a place at the top of the ladder.

CODY, MORLEY GARNET.

"A proper man as one shall see in a summer's day."

Newmarket boasts of two great achievements, the one Morley Cody, the other the canal. The former is decidedly complete; the latter, well, 'nough said. Here Morley attended the Public and High Schools, and did credit to himself and these institutions. After graduating, he entered the Sovereign Bank, and quickly rose to be accountant; but after four years of business he entered Medicine. Let it be whispered softly, that following on his resignation, came the insolvency of the bank. His walk is characteristic; alert, buoyant, and energetic—essentially businesslike. This, coupled with his genial face, his boundless good-nature and professional learning, should form the foundation of a successful Medical career.

COLWELL, HARRY H.

He was born in York County, Ont., near Aurora, some twenty-eight years ago. From Vandorf Public School he went to Aurora High School, thence to Parkdale Collegiate Institute. After an interval he entered the Ontario Agricultural College, Guelph, and was graduated B.S.A. in 1906. From agriculture he turned to medicine, all in preparation for foreign missionary work. Although one of the quiet ones among the student body, he was known by a wide circle of men, and upon all he met, whether in College or out of it, he brought his glowing enthusiasm for the foreign missionary enterprise to bear. As an agricultural-medical missionary he will undoubtedly do good work because of those qualities of unselfishness, manliness and good-will to all, which have so marked him in his College career.

CONNOLLY, CHRISTOPHER FRASER.

"Lector, si monumentum requiris, circumspice."

Christopher Connolly discovered Caintown in 1886. Matriculating from Athens High School in 1904, he followed in the footsteps of his brother Bill, and came to Victoria College. He joined the Biology and Physics crowd of '09, and finally the class of 1911 Medicine. That brings him up to date—as to the future, here's hoping.

COPELAND, GORDON GROTE.

"Labor omnia vincit."

The "doctor," as he is familiarly known about the halls of Medicine, matriculated from the Parkdale Collegiate and entered the Class of '09, from which he graduated with honors. Not satisfied with such small success he decided to devote his mind to the noble profession of Medicine, and with this in view entered the Class of '11. Notwithstanding his omnivorous love for study he has found time to devote his attention to other student activities. He has been a leading member of the Track Club for several years, and excels particularly in hurling the discus, the championship of which he holds at the present time. He is also an enthusiastic member of the Rifle Club.

COSTAIN, WILLIAM ALFRED.

W. A. Costain received his early education in the Brantford High School, and Western Canada College, Alberta. Matriculating in 1907, he came to Varsity and enrolled as a Med. with the Class '11. In athletic circles he took a keen interest, playing hockey in the Jennings' Cup Series. He was a medical representative of the Glee Club, and a member of the Students' Parliament. While he always paid strict attention to his labs., clinics, and lectures, Billy was one of the few who could successfully combine pleasure with work. Next year he will devote his time to hospital work.

CUNNINGHAM, STELLA ALICE.

"Twinkle, twinkle, little star."

In the fall of '07 a dark-eyed, determined maiden wandered with other forlorn freshettes in quest of the registrar's office. History's record shows success, and Fortune continued to smile on her as she pursued the endless round of lab. and clinic, the common lot of the Med., piloting her with unerring hand through the dangerous shoals of May. Although Stella neglected few of the pleasures of College life, she showed a perseverance and skill in her work, and a kindness of manner, which predict a future in which she will be a "star" in the profession of her choice.

DAVIS, HENRY CLARKE.

"Give me thy hand."

Was born in Schomberg, Ontario, in 1887. He matriculated from Jarvis Collegiate Institute in 1906, and entered Medicine the same year with the Class of '10, but later, discovering that the Class of '11 offered wider scope for his ambitions, he joined that merry band. Henry has always been prominent in athletics, and holds the Intercollegiate record for the high jump. During his first year he won his T, and in his third year made the University lacrosse team. In his final year Henry was sent as representative of the Medical Society to Osgoode Hall. A good student and a better fellow, his success in Medicine is assured. He is a member of Alpha Kappa Kappa.

DEFRIES, ROBERT DAVIES.

It was in the golden summer time of the year, 1889, that "Curly" forsook the "atelectic stage," and took an active interest in life. After safely coming through the perils of early childhood, he began to prepare himself for the class of 1911, by entering the Provincial Model School in Toronto, thence to the Jarvis Street Collegiate, spent an extra year in taking the Honor Matric. in part. where he made many friends, and liking the place so well, Then in 1907 he joined with the Class of 1911. "Bob" is one of the youngest and one of the most respected men in the year. He was a representative of the Students' Parliament in his third year, and vice-president of the Medical Y.M.C.A. in his final year. To have Bob for a friend is to have one who will never spare himself if he can be of help to others. We know that a splendid future awaits him.

DICK, DAVID L.

*"He loves to love a mason
'Cause a mason never tells."*

Dick, commonly known as "The Expert from London," struck this planet in the peaceful atmosphere of Selton, Ontario. After receiving his early education here, Richard continued his study at the Ridgetown Collegiate Institute, matriculating in 1904. Being an ardent admirer of human nature, he graduated from the Chatham Model School to spend the next three years with "the sons and daughters in misery" in moulding the minds of our fair country's youth. Desirous of what he thought was higher education, Dave registered in '07 as a freshman in the Faculty of Medicine. Of a bright disposition "The Expert" takes pleasure in work as well as in play, and will graduate with best wishes from his fellows.

DOUGLAS, ROY GLADSTONE.

*"A little learning scattered o'er
A frolic of four years or more.
Then—Presto, change!—and you create
The sober college graduate."*

Roy Gladstone Douglas, as a "wee laddie," played on his father's farm near Meaford, Ontario. He graduated from the Meaford High School in 1904, then spent two years in "teaching rural gods, goddesses and otherwise." Here, realizing the truth of the adage, "Mens sana in corpore sano," he decided to become a disciple of Esculapius, and entered the Faculty of Medicine, Varsity, in the fall of 1907. Here his quiet unassuming modesty, and sound common sense, won him many friends among his fellow students. The future for him looks bright, and we expect more "curing" than "killing" from his concoctions.

DUROCHER, ULYSSES JOSEPH.

Ulysses, designer of the great wooden horse of Grecian fame, was born in Petite Côte, Essex County, Ont. His early education was absorbed in Sunnyside School, after which he entered Assumption College, Sandwich, graduating from there in 1901. He then entered the Windsor Collegiate and graduated in 1903. After this he spent three years teaching school, and in 1906 migrated to the U.S.A., where he entered upon a course at the Detroit College of Medicine, from which he obtained his degree of M.D. in 1910, and also his license from the State Board of Physicians and Surgeons of Michigan. He took a year's course at the University of Toronto, and during his stay here has shown himself a good student, a good fellow, and a good friend.

EAGLES, ALLAN SLOANE.

Was born in the eighties, near the town of Meaford, where he received his early training. Having graduated as a school teacher from the Meaford Model School, there he taught for three years, after which he turned his mind to the University centre, and registered in Medicine in the fall of 1907. His industrious habits and studious mind have given him a strong place among the midnight toilers of his year. Allan's presence in the sick room will bring assurance, and, if perseverance added to skill will conquer disease, all ills will disappear under his watchful eye. We predict for him a rosy future in the combined field of medicine and surgery.

EMERY, E. V.

Was born once upon a time, received enough of the rudiments somewhere to gain him an entrance into the Faculty of Medicine, and is now about to be thrust upon the unsuspecting world in the guise of a medico. Throughout his course he has never bothered the professors more than he could help, and they have appreciated it by letting him through his exams.

EVANS, DONALD THOMAS.

"Why should life all labor be?"

The subject of this attack was born in Georgetown in 1889, but says this event caused no undue excitement there. Matriculated at Collingwood Collegiate Institute in 1905, and entered Medicine in 1907. Since then he has faithfully performed his painful duty as one of the social butterflies of the year, made himself popular with his friends and incidentally studied a little medicine. Don religiously attends all class dinners and dances, and has often been seen at clinics. His ready wit and happy disposition assure him of the goodwill of everyone he may meet in his chosen profession. He is a member of the Alpha Kappa Kappa Fraternity.

FERRIER, DAVID JOSEPH NORMAN.

*"A head to contrive, a tongue to persuade
And a hand to execute any one."*

Born in Wellington County, where as a boy he lived with his parents on a farm and acquired a knowledge of the proper tilling of the soil. Not being greatly attached to this strenuous occupation he started out to seek his fortune in the mercantile line. His still unsatisfied ambition led his footsteps to the doors of Woodstock College. Here he was valued both as an assistant in the maintenance of order and as a student, and graduating in '07, he was just in time to enter Medicine under the four-year curriculum. Norman has an undying love for Medicine, in which he realizes great possibilities. Success must follow him.

FETTES, ALEXANDER.

"A truer, nobler, trustier heart, more loving or more loyal, never beat within a human breast."

Alex. is a product of Grey County, wherein he set down his corner stakes and also—oh, well, girls, if you don't know, it won't disturb your peace of mind. At any rate, when A. F. wasn't shooing hens on the farm he was foregathering with the kids in the nursery. Having decided to be respectable, Alex. studied for matriculation at the Mt. Forest High School and joined the Class of '11 at Toronto. "Still waters run deep," you know, and Fettes is the kind of chap who keeps "mum"—and works. Apart from medical knowledge a man of his character cannot fail to be a beneficial influence in any community.

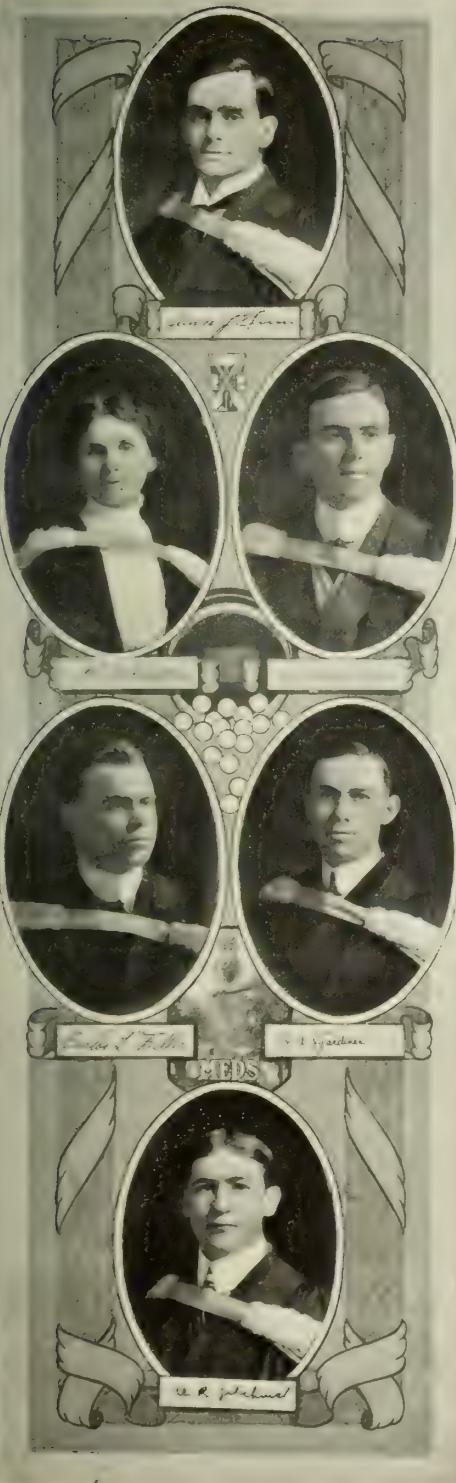

In Memoriam

George Walley Clark

Born 1891

Died October, 1910

FINN, JAMES JOSEPH.

*"Strong in will
To strive, to seek, to find and not to yield."*

This phrase from the forceful "Ulysses" very aptly describes Jim's character. He first saw the light of day in New York, N.Y., in 1882. But his star of destiny seemed to prefer for him the green slopes and healthful waters of Hamilton, Ont., to the increasing turmoil of the great metropolis, for in that delightful Canadian city he spent his youth and obtained his early training. Later he removed to Toronto, pursuing his studies at St. Michael's College; here he made a name for himself in class and field, winning the Anglin Cup for athletic championship. He also played baseball with St. Mary's senior championship team, and won the gold medal for athletic championship twice from this club.

FOTHERINGHAM, SUSIE L.

*"Out of the quiet ways,
Into the world's broad track."*

To a singularly even temperament, Miss Fotheringham unites a clear insight into the essential nature of things. Her ability to grasp the salient features of a subject has carried her successfully through her course with little apparent effort. Before entering upon the study of medicine, Miss Fotheringham was known as a specialist in Nature study. Though her love for "all out-doors," she has felt the healing influence that Nature exerts over those who seek to learn of her. This experience should make our friend more than successful in her work in the medical field. She is a member of the Zeta Phi Sorority.

FINNERTY, EDWARD JEROME JOSEPH.

The only and original E. J. J. Finnerty was born in the City of Toronto in the 80's, received his primary education at St. Peter's Separate School and St. Michael's College, Toronto, graduating from the latter institution with distinction. Ed., or "Fin," as he is commonly called, is extremely popular; his genial manner and everlasting smile has won for him in the hearts of the "boys" a very warm spot. He is a very enthusiastic sport, and in '09 captained the "Year" baseball team which won the Inter-Faculty championship with comparative ease, thereby demonstrating his ability as a high-class ball player. The last three years he has figured in the Mulock Cup games, playing as a fast and brilliant outside wing.

FULLER, CARLOS LE ROY.

*"And he would smile,
Ye gods, how he would smile."*

In 1887, in the town of Essex, Carlos first opened his eyes to the light of day. When eleven years of age he was removed by his parents to a beautiful lakeshore home near Leamington. There he attended High School to gain his matriculation if work did not interfere with his sport. In '06 he entered the Medical Faculty, but his sporting proclivities proved too much for him, so Carlos stayed out a year to work for the Parke, Davis Co. and learn the gentle art of compounding the dope so essential to the medical man. Carlos' jovial manner will make a hit with the suffering public if his medicine does not.

GARDINER, JOHN ALEXANDER.

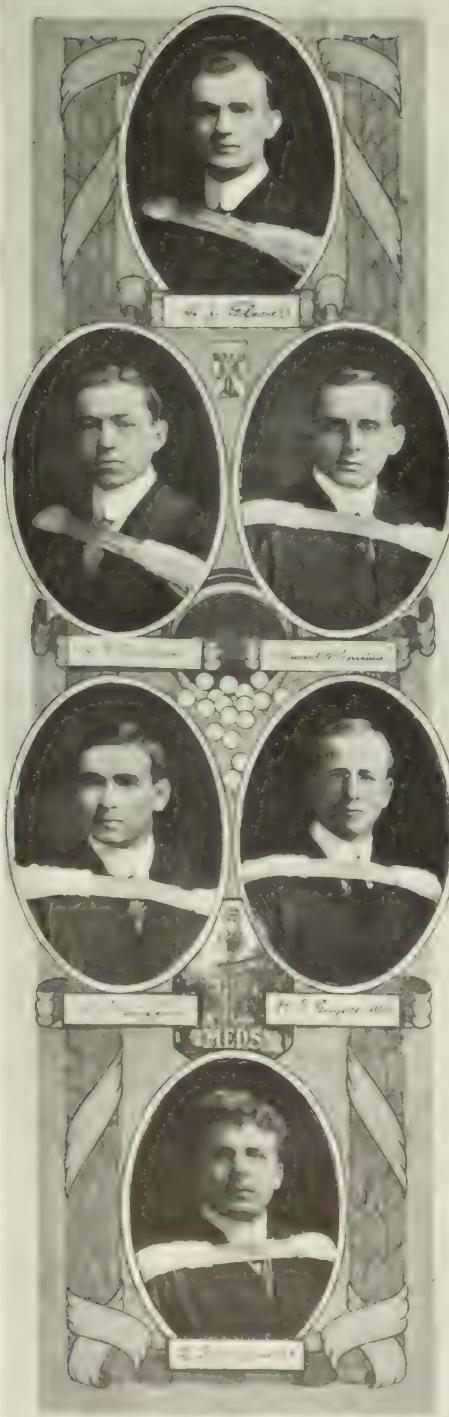

*"A wise physician's skill our wounds to heal
Is more than armies to the public weal."*

John Alexander Gardiner, born at Leadbury, Huron County, Ontario, received his preliminary training at Seaford Collegiate Institute, and later at Toronto University, where he took the Mathematics and Physics course in Arts. Graduating in Arts in 1906, he served as lecture assistant in Physics the following year. During the same year he obtained his M.A. Degree, and in 1907 entered upon the study of medicine. Besides being President of the class of his first year, he has served on the Executive of the Y.M.C.A. and of the Medical Society, and for three consecutive years held a position on the Senior Association Football team.

GILCHRIST, ARCHIBALD RONALD.

*"The good die young."
"Here's hoping he may live to a ripe old age."*

The stork in the course of his many wonderings found time to drop off a small parcel at Gilchrist, Ontario. That parcel was "Gilly." Country air suited his constitution and he grew. Having absorbed enough knowledge at the Public School, he went to Barrie Collegiate, where he had eager hopes of choosing the highest calling, so he chose Medicine. Throughout his course he has shown himself to be a capable student, as well as a genial and true friend. Our best wishes for the future go with him.

GLOVER, THOMAS JOSEPH.

*"Who can foretell for what high cause
This darling of the gods was born?"*

One morning in the 80's Tom seized the opportunity of starting up for himself. He has never regretted it, and Toronto may congratulate herself on his choice. He attended school in the Queen City and then entered the employment of the Grand Trunk Railway, where he studied America's transportation problems. Mr. Glover has shown himself a splendid student, a master of anatomical details, and a loyal supporter of the social life of the school. His election by acclamation to the exacting position of chairman of the "At Home Committee" this year is but slight evidence of the esteem and confidence in which he is held. Deliberate in speech, cool in reason, he is known but to be appreciated.

GORDON, HOWARD HILMAN.

"And he could almost heal a broken heart."

Born 18—, graduated 1911, died 19—. Thanks to the abundance of birch in his native County of Carleton, his early training was not neglected. Later at Kemptville High School he established a reputation as a student, and as an admirer of sport and beauty in every form. He then, as "the village master taught his little school," wielding the rod with no small degree of skill. In 1907 he joined Meds. '11, and has been actively associated with all the doings of his class. He has taken honor standing and is a member of Alpha Omega Alpha. A host of friends wish him success in his chosen profession.

GORSSLINE, RAYMOND M.

It was in the summer of 1885 that Ray first saw the light of day. In the kinetograph of his memory the film is dim until he graduated from Picton High School in 1903, with some kind of honors. After his honorable discharge from that seat of learning the lights of the great White Way lured him from his native land (sobs), and from 1903 to 1907 he lived in New York. What he did in New York is a question. Ray, himself is very reticent concerning it. In 1907 he entered Toronto University and has since then attended enough lectures to blow through his course with no stars. And we might add that he is a very nice boy, and that we all like him.

GRIFFIN, LAWRENCE OSWALD.

*"All that wakes to noble action
In his noon of calmness lies."*

Lawrence hails from Essex County, having been born on a farm near the town of Leamington in 1881. He obtained his early education in the rural Public School, and matriculated from the Leamington High School in 1901. He attended the Windsor Model, and taught school for several years, first in Wellington and later in Grey County. In 1907 he entered the University of Toronto Medical College as a member of Class '11. He has been an earnest and successful student throughout his course, and we have no hesitation in predicting for him a useful and successful career in his calling.

GUYATT, RICHARD EMERSON.

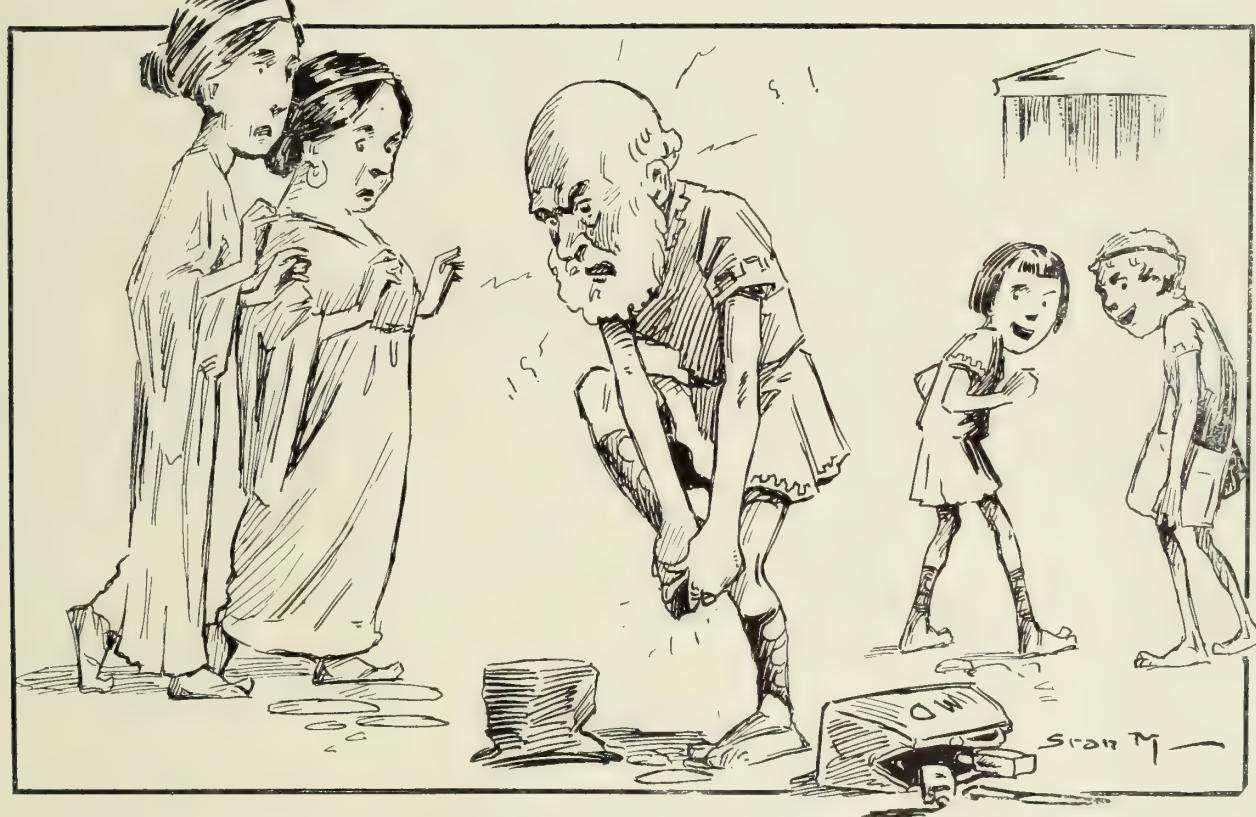

*"Worth, courage, honor, these indeed
Your sustenance and birthright are."*

A few summers ago a fair-haired baby boy entered a determined plea for a chance to live at Binbrook, Wentworth County. This was our Dick; but his father called him Richard. His determination to be a man led him to Woodstock College and McMaster University, from which institution he graduated. Meds. '11 called him, and he has well repaid them the effort. He has played football and knows the game. Dick is a firm believer in "work" and has acquired the talent to a startling degree. His daily attitude is expressed in two words, "Well, why?" We trust that his high hopes of domestic happiness will counteract his intense seriousness. The West will get him.

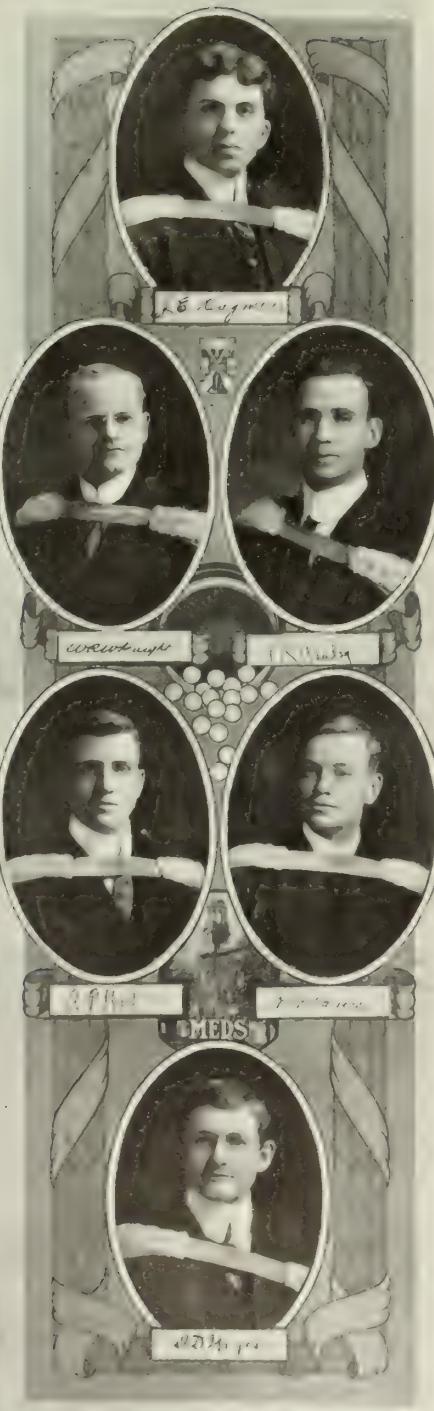

HAGMEIER, GORDON L.

"With mirth and laughter let old wrinkles come."

The above was born in the town of Hespeler, Ont. Here he lived his boyhood days and received his public schooling. His High School course was taken at Galt. Coming to Toronto, he entered Medicine with the year '11, and throughout his course has done well. With application to study, he has a love of sport, that made him a factor in his year's athletics, until the acquirement of Rugby knee. To love of sport he adds a never-failing fund of wit and humor. The possession of such will aid him greatly to the success he should win in his chosen profession.

"HIPPOCRATES' OATH"

HAGMEIER, JOHN EDWIN.

"A mind to contrive and a hand to execute."

The hustling and wide-awake city of Hespeler prides itself in being the birthplace of "Ed." After walking through the Public School, he could no longer supply the demands of his budding genius in his native city, and so he betook himself to a higher seat of learning—Galt Collegiate Institute. After exhausting the curriculum there, he entered 1911 Medicine. Quiet and thorough-going, he has always impressed those with whom he was associated; while his pleasant manner and sympathetic nature have already won for him many friends.

HAIGHT, WALTER REUBEN WIGMORE.

*"Strong in will, to strive, to seek,
To find, and not to yield."*

Walter R. W. Haight was born at Minden, and after Public School training in Haliburton County, fitted himself for teaching at the Norwood High School and Orillia Collegiate. After teaching a year, he found that other lines of activity proved more attractive; and, therefore, began to study the intricacies of railroad transportation, and devoted his energies in that direction until entering the medical course with Year '11. He was a member of the Parliament of Undergraduates for two years, and also served on the Executive of the Toronto Medico-Literary Society, but Walter is essentially musical, and the Glee Club has benefited by his services. His bright and genial disposition has won for him many friends who will watch with much interest his future career.

HANLEY, THOMAS RICHARD, B.A.

"Mens sana in corpore sano."

"Tom" comes from Midland. He graduated with honors in Arts, '09, and entered the Faculty of Medicine with Class '11. His name is a by-word in University affairs, and his popularity is fittingly shown by the many offices which have been showered on him by his fellow-students. He is famous as a lacrosse and hockey player, having played in Canada, United States, England and Australia. He has been a member of the Senior Hockey and Lacrosse teams, President of the Basketball Club, Vice-President of the Athletic Directorate for two successive years, manager of both hockey and lacrosse teams, and what not. His latest honor is that of the Lewellys Barker Club.

HART, ALFRED P.

"Worth makes the man and want of it the fellow."

Born in 1888 in the village of Wilfrid, where he received his Public School education. He entered Uxbridge High School when fourteen years of age, and matriculated two years later. During his collegiate days he took an active part in athletics, and on more than one occasion carried off the coveted wreath. "Alf" then turned his attention to the business world, and for two and a half years was associated with the W. R. Brock Co., Toronto, finally entering Medicine with Class '11. While pursuing his course he has been a thorough, conscientious student and a genial friend. With his enthusiasm, energy and high ideals we predict for him a position in the front ranks of his chosen profession.

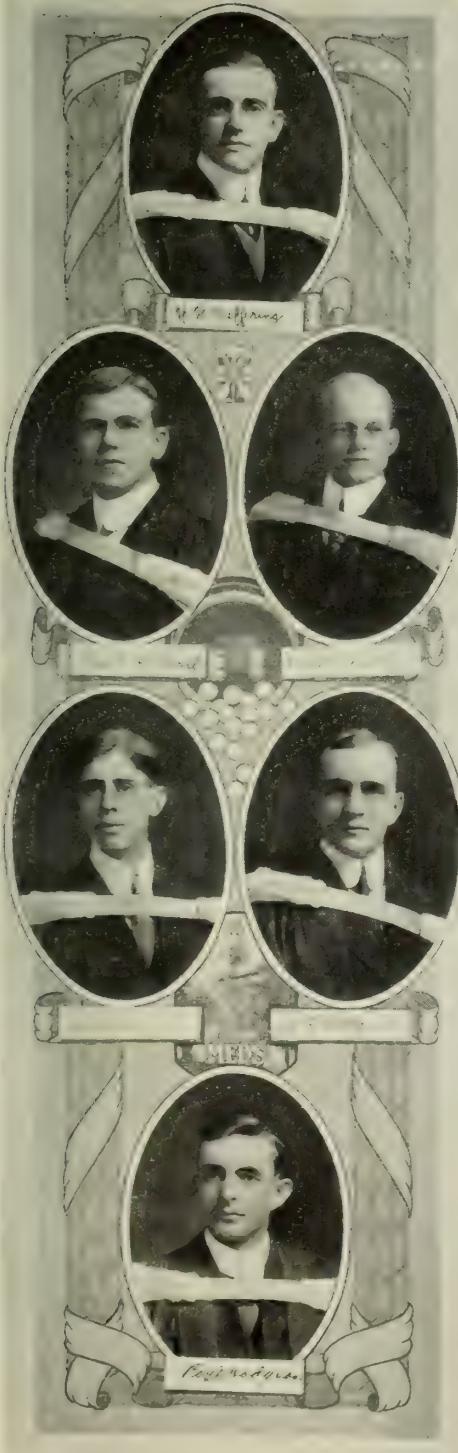

HARVIE, HORACE HANLY.

Horace comes from the Village of Coldwater, Ont., where he was born in September, 1889. There, too, he got his Public School education. He matriculated from Orillia Collegiate Institute in 1906, and came to Toronto and joined Meds, '11. H. has proved himself a successful student and a good fellow. Being young, of good address, upright and capable, there is, no doubt, before Horace a life of worthy medical service. He has the good wishes of Meds, '11.

HAYES, IVAN DWIGHT, B.A.

"And 'tis much pride for fair without the fair within to hide."

Ivan was born in Middlesex County, Ont., where he received his early education. He then became the pride of Lucan High School until 1905, when he entered the Biological and Physical Science course at Varsity. Having graduated in Arts in 1909, he joined the Class of '11 Medicine. Here he has shown himself a diligent and systematic student; his love for things medical being only surpassed by his love for a skate at "Little Vic." Ivan possesses that quiet perseverance which is sure to make his professional career a successful one.

HEFFERING, HAROLD H.

Born in Toronto, July 21, 1887. Matriculating from Meisterschaft School, he entered Medicine in 1906. Immediately his pleasing manner and winning smile were perceived and admired by all, and he just became a favorite companion of his fellow-students. During his course he has proved his worthiness and ability to become a member of the medical profession, while his musical talent contributed to the pleasure of his year. Harold has taken an active part in all social functions, and in 1909 successfully represented his year as Vice-President on the Medical At Home Committee. He is a member of Nu Sigma Nu Fraternity.

HELLIWELL, PAUL VAUGHN.

"He doth the little kindnesses that others leave undone."

Paul was born in Toronto in 1887. After graduating from Jarvis Collegiate, he came to Toronto University, graduating in Arts in 1909. He was particularly a favorite with the ladies when in Arts, but in Medicine he is loved by us all, not only because of his innate hospitality, for not a few of us will look back upon happy Sunday evenings spent at his home in Rosedale, but because of his unfailing friendship, kindness and thoughtfulness toward us all. True to his name and altruistic nature, Paul is going to be a missionary. "He hath chosen that better part," and we can only predict for him a most happy and useful career, and wish him godspeed.

HENDERS, CLARENCE WELLESLEY.

*"A man that dares effect
To spend his life in service to his kind."*

Clare was born in Mt. Forest in December, 1885. Subsequently, with his parents, he moved to Toronto, where part of his primary education was obtained. Later he took Port Perry as his abode, continued his studies there, and matriculated in 1904. Dr. Arnold was then his worthy ideal, and he spent three years in "teaching the young idea how to shoot," in which vocation he was an eminent success. But a nobler work called him, and he entered Toronto University with Class '11 in Medicine in 1907. Diligent in the path of duty, warm and genial in spirit, his many friends predict that his future will be a bright one.

HENDERSON, DAVID PALMER.

"Quietly he pursued the even tenor of his way."

Up near Fergus in the year 1884 David Palmer Henderson first saw the light of day. Ever since then his vision has been gradually extending, till now he has the prospect of a bright career in the field of medicine in full view. Fergus High School and Elora Model School are the two seats of learning where "Dave" was instilled with the principles of Higher Education. Teaching school appealed to him, but not for long. His ambitions told him that there was a bigger work ahead, and he heeded the warning and came to the University. Everybody who knows D. P. Henderson knows he will succeed. The natural reserve of his nature is mingled with an equally natural inclination to see the pleasant side of life, and that's a combination of qualities that would be hard to beat.

HODGINS, GEORGE LYALL.

"A man's a man for a' that."

Lyall was born near Lucan, Ontario, about twenty years ago. He received his primary education at the Public School there, and later attended Lucan High School. He obtained matriculation and Junior and Senior Leaving Certificates, and always took a good standing in his examinations. He entered the Faculty of Medicine, University of Toronto, with the Class 1911, and took honor standing in his first year in Medicine. He has always indulged in sport, Rugby and football. He is a member of the Alpha Omega Alpha Medical Fraternity.

HODGSON, ROY OLLEN.

Roy Ollen Hodgson, a man with an enviable disposition, was born at Whalen, Ont., in the year 1888. It was here that he received the earlier part of his primary education, the remainder of his Public School training was in Wellesley School, Toronto, Granton and Staffa. His High School career was spent at St. Mary's, where he was one of the then notorious Granton gang. He then commenced a course of study in the Faculty of Arts, University of Toronto. After completing his year he entered the realm of Medicine. His abilities as an athlete were immediately noted, and he consequently has played a prominent part in the University sports.

HUTTON, WILL LAWRENCE.

"Nowadays one would almost suppose that health is a state of unnatural existence."

Born in Winnipeg one bleak November morn, the year Louis Riel was hanged. At four the bundle was removed to Brantford, and has since continued to roam. He tortured Public School teachers in Ridgetown and Chatham, and then became connected with the plow industry in Brantford. Matriculating from Albert College, Belleville, in 1907, he entered Medicine with Class '11. During his course he has been interested in the Harrier Club of the University, being Secretary in '09 and President in '10. To his untiring efforts much of the club's success has been due, as it won the Inter-Collegiate Championship of Canada in '09. His many friends wish him success and long life in his chosen profession.

IRELAND, RICHARD ALFRED.

*"A heart that can feel for another's woe
And share in their joys with a friendly glow."*

Alfred's home town is Trenton, where he was born in 1889. He matriculated from Trenton High School in 1906. The following year he spent in the drug business and then began his academic career in medicine in Toronto. His work here has been that of a student who considers and ponders over the many problems that arise in a profession as deep as his, because Alfred is a chap who wishes to make a success of life. He has a young man's best recommendation, "he is extremely fond of home and the old folks."

JONES, LAWRENCE PERCY.

Born in Surrey, England, 1884; he received his early education at Tiffin's School, Kingston-on-Thames, subsequently spending some years in the smoke, fog and business whirl of London. For health's sake in 1902 he came to Canada, and after three years farming, he entered Albert College, Belleville, to train for the ministry. While there he learned of the urgent need and grand opportunities of the Medical Missionary in China, consequently we find him with Class '11. He has served his year on the Association Football Team, as Secretary to the Medical Volunteer Band, as Representative to the Students' Parliament, and as Chairman of Banquet Committee, 1910. Like a thousand others, he has earned and paid his own expenses at College. We wish him godspeed and abundant success in China.

JONES, LAWRENCE A.

The subject of this sketch drifted on to this planet some time back in the eighties and has continued to reside in various parts of it ever since. The most eventful period of this residence was in the four years which he spent in Medicine with 1911. Here he not only learnt to cut people up scientifically, but he has enjoyed himself in other things as well. The best wishes of his friends go with him.

KEELEY, J. AUSTIN.

*"Who mixed reason with pleasure
And wisdom with mirth."*

February 14, 1890, was auspicious for the good people of Arthur, for then they welcomed a new member to their community and Canada received another sturdy citizen in the person of J. Austin Kelley. It is not surprising that Austin should, after receiving his primary and High School training, be found wending his way to our great centre of education and culture, when we recall the numbers it has already received from this place so friendly to higher education. Austin is a whole-souled, good fellow, as popular on the gridiron as with his class for whom he regulates the finances. A cheery doctor has half the battle won, and, this attribute granted, we can expect little but success from Austin in his chosen profession.

KELLS, EPHRAIM ELWOOD.

"He was a six-foot man, all clear grit and human nature."

"Eph." was first introduced to the medical profession in June, 1886, near Palmerston, Ont. His elementary education was obtained at the country schoolhouse and later at Harriston High School. After doing Pedagogic work a couple of years as principal of Holstein Public School, he decided to follow the medical profession and joined Class '11. Athletics have always claimed Eph. during his academic days, having figured on the different championship teams in football, while his College vacations were spent twirling the disc in Western Canada. With Athletics, "Popularity" has taken her share, his frank disposition and good fellowship having won for him the esteem of both Faculty and students.

MEDICAL DINNER COMMITTEE.

N. Christie

A. H. Veitch

A. H. Baker,
Secretary

T. D. Park

D. J. Sweeney

E. E. Kells,
President

Prof. Chambers,
Hon. President

C. M. Burroughs.
Treasurer

KELLS, GEORGE WOOD.

It is safe to say that when the medical profession lured the subject of this sketch within its ranks it opened up a field of usefulness for which by nature he was splendidly equipped. Born and reared on a farm near Palmerston, his early education laid well the foundations of a sturdy physique and a keen inquiring mind. Matriculating at Harriston High School, he enrolled as a student at Toronto University. Throughout his course George has been an outstanding figure and is known as perhaps no other student is to the junior years. Always declining office, yet ever in the thick of the fray, his genial personality has been a factor in all the student contests. As representative to Victoria "At Home" and member of the first Students' Parliament he showed his interest in the social life as well as in the intellectual. As a practitioner we can assuredly predict that the future holds a bright career in store for him.

KELLY, THOMAS FRANCIS.

"Best be yourself—imperial, plain and true."

The subject of this sketch is a Toronto boy by birth. St. Paul's School and Jarvis Street Collegiate Institute assumed the responsibility of his early academic training. Having travelled extensively before entering college, he has acquired a proper practical viewpoint. Frank has a character and a disposition all his own. Those who know him best will well remember him as an intelligent, tactful young man blest with a great deal of native ability, and if this can be taken as a gauge for the future, Frank will always find himself the centre of true admirers.

KERGIN, LOUIS WELLINGTON.

*"Praised be the art
Whose subtle power can stay the pain."*

Lou first saw the light of day in St. Catharines, July, 1887. Here he received his primary training. Later he came to Toronto and attended Jarvis Collegiate. He next migrated to Port Simpson, B.C., where he became connected with the lumber industry. In 1907 he matriculated from Columbian College, New Westminster, and the same year entered Medicine with Class '11. As a sophomore he had the honor of being Vice-President of the Medical At Home Committee, and in his final year Vice-President of the Western Club. He is optimistic to a high degree, keen in his intellectual pursuits, and open-hearted in nature. The Great West will be richer in possessing a man with untiring service to his kind.

KIRBY, WALTER JAMES.

*"A likeness to the wise below,
A kinship with the great of old."*

Walter was born in Toronto some few years ago. Here he attended Borden Street and Perth Avenue Public Schools, finishing at the latter when he was fourteen. Business now attracted his attention for several years, until he was seized with a thirst for further knowledge. Accordingly, he attended the Wiarton High School, preparatory to a course in Arts at Victoria College. His intention being to study Medicine, in 1909, he graduated in the department of Biology and Physical Science. Since then he has continued to be a jolly, energetic, and faithful follower of Hippocrates. We are assured that his future career will be one of success.

KISTER, CHARLES OTTO EARLE.

"Illustrious conqueror of common sense."

Earle Kister is a member of the far-famed Class of '09, B. & P. As a freshman he avoided all receptions and like frivolities, and throughout his Arts course remained indifferent to the charms of the freshettes. In examination results he has held an enviable position, and has always been known as an enthusiastic supporter of college sports and a thoroughly "good fellow." His pleasant manner and the air of wisdom which he can assume when necessary will secure him scores of patients.

KITT, ALLAN NORMAN.

*"Logic makes an important part
Of the mystery of the healing art;
For without it how could you hope to show
That nobody knows so much as you know?"*

The subject of our sketch received his early education at Lucean, Ont. After graduating from the High School in that town he decided on a university career, and chose the Biological and Physical course as a foundation for his later medical achievements. He graduated in the Faculty of Arts with the Class of '09. Throughout his medical course, his moderately studious habits, combined with his pleasure in the attendance at an occasional football game, has helped to make him that man whose successful future career seems inevitable.

Davy, Waxing Full, Speaketh

An old Scotchman once married a very homely woman. His friend met him and said: "Sandy, what sort of wife have you?" "Well, Alec," said Sandy, "She's God's handiwork, but I'll no say she's His masterpiece." Now, sir, not only is the Class of '11 the handiwork of the gentlemen at the first table, but we are pleased to believe that it is their masterpiece, and therefore, sir, as we roll back the curtain and attempt for a few minutes to gaze into the future the spectacle we behold must of necessity be very inspiring and exceedingly varied.

I suppose, sir, the vast majority of us will be leading the humdrum existence of the ordinary general practitioner, and, in spite of the

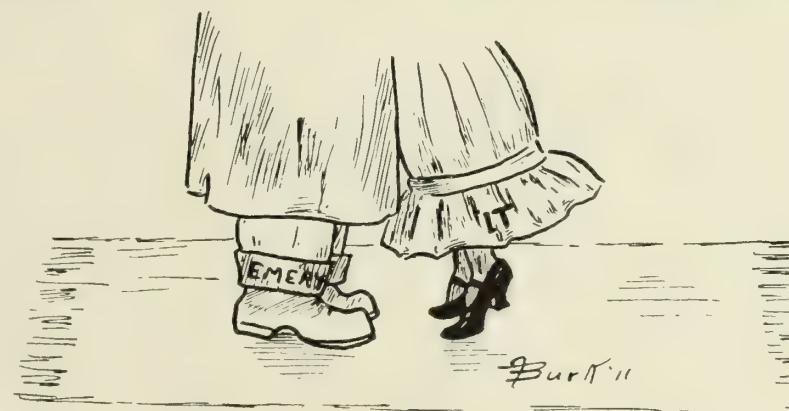

warnings of Dr. Sheard, we will be married and glued to some spot by a wife's relations and half-a-dozen children. Welcomed at every fireside, beloved by rich and poor, Sunday-school superintendents, school trustees and church deacons, we will be making an honest living and hoping to die in the harness. But while I have thus summarily disposed of the large majority of us, I can by no means place all the Class in that category, for we have men among us who will soar to the farthest heights of fame.

I need but mention the names of Mr. Frank Scott, Mr. F. S. Burk and Mr. John S. Livingstone, who, with great calmness and nerve, by the use of Kocker's intricate method, coaxed the shoulder of an elderly lady back into its socket one morning last fall.

We have, too, embryonic heart specialists in our midst. It is reported that Mr. E. H. McGavin has already, by several parlor sittings, been actually able to transfer the heart of one of Toronto's popular young ladies from her bosom to his own and transplanted his own to where hers used to be. All honour to such an one as he. Compared with feats like these, how simple the diagnosis of initial incompetence or aortic regurgitation. The only difficulty I foresee in Ed's specialty, however, are the numbers that are entering the same field. The toastmaster himself, I understand, has performed the feat several times.

Time will but permit me to mention a few others, and among them I must place: Mr. Copeland, the great biologist-to-be, already a student of the manners and customs of the fishes; Mr. W. R. Tutt, physiologist of international repute; Mr. Frank Kelly, and Mr. W. O. Bonser, world-famed gynaecologists; Mr. W. M. Cody, homeopathist, and Mr. Morley Salmon, resuscitator and restorer of fainting and other women.

Mr. Chairman, the list seems endless, but I must desist. Before closing, however, I cannot refrain from paying my tribute to the noble band of gallant men of our Year who have pledged themselves to carry on the work of medical missionaries in the dark corners of the earth and who

GOOD NIGHT

twenty years hence will be in far-off China, India and Africa, spending their lives and their talents in the service of the Master. And now, sir, I think I have painted the future of the Class in sufficiently glowing colors. It only remains to say that there are several hurdles to clear before we get out into the open, and while air castles are pleasant to build and to contemplate, hard work, after all, is what brings results.

LAJOIE, JOHN MICHAEL.

He was born in the early eighties in the vicinity of Cobourg, Ont. After finishing his Public School education there he went into business for a time. Later he decided to enter professional life and attended Ottawa College, where he matriculated, got a gold and a silver medal, and made a name for himself at Rugby. He then joined the Class of 1911. He has been a worthy member of the Senior Varsity Rugby Team of '10 and '11 when they won the Yates Cup and Dominion Championships. His cordiality and quiet, unassuming manner have won for "Jack" a warm place in the hearts of his classmates. He is a member of Alpha Kappa Kappa Fraternity.

LANGFORD, CLIFFORD KERBY.

Clifford was born in the peaceful village of Kentbridge. Having there received his preliminary education, he attended Chatham and Ridgetown Collegiates, matriculating from the latter in 1902. He graduated from Chatham Model School in 1903, and for three years applied his energies in the interests of the younger generation. In sports he has always been an active participant, winning the individual Ridgetown Collegiate Championship in '02, and he has assisted in winning a total of twenty Soccer trophies. Since entering Medicine in '07 he has proved himself a worthy student and maintained his former athletic reputation, having played with the University Soccer team throughout his course, being captain in his third year, when the team won the Senior Intercollegiate Championship. His many friends predict for him a bright future.

LEACH, WILLIAM JAMES.

"He knew the cause of every malady."

In North Gower, Ont., on January 2nd, 1886, a second Socrates was first slapped on the back, and caused to give forth a proclamation of a right to an existence. After an incubation period in which he took the part of "The Bare-foot Boy," Bill was sent to Kemptville High School, where he procured his Senior Leaving in three years. His next move was to Prescott Model, and then he taught school for three years. With a keen desire to be an M.B., and to acquire the healing art, this scholastic youth came to Toronto and registered with '11. He has taken honors all through and is bound to make good. He is a member of Alpha Omega Alpha Fraternity.

LEONARD, ARTHUR V.

*"The true things, the blue things,
The quiet men who do things."*

"Art" was first foisted upon an unsuspecting public in the town of Warkworth, Ont., in 1889. When two years old he hied himself to Hamilton, where he received his early education, attending St. Mary's School. Eight years later he came to Toronto, where we find him attending St. Michael's School, and later De La Salle Institute, from which he matriculated in 1906. Still thirsting after knowledge he entered Medicine in 1907. In athletics he has made a name as scrimmager on the Champion Varsity I Rugby team of 1910. "Art" is a student in the true sense of the word, and his popularity speaks for itself. He is a member of the Alpha Kappa Kappa Fraternity.

LEPPER, AMBROSE FREDERICK.

"A good life is better than a long one."

On a bleak December night in the middle eighties Ambrose made his first appearance at Rosseau in the Highlands of Ontario. Here he received his primary education and at sixteen he came to Toronto, where he attended Harbord Street Collegiate for two years. Upon matriculation he went West, where he entered into business, which he pursued successfully for three years, until he joined the Class of '11. As a student, Ambrose is apt and earnest. He has always identified himself with the best in college life, and has devoted much time to good advantage in Y.M.C.A. work. Ambrose has won the respect of all, and we predict for him a successful and useful career.

LEVY, MAURICE.

"If I've been merry what matter, who knows."

Maurice first brightened the world with his presence at Philadelphia, in August, 1890. He longed, however, to go to a country which offered a greater opportunity for his vast ability. As a result we hear of him ranking high in Montreal High School. Then he came to our fair city and entered Jarvis Collegiate, from where he matriculated in 1907. He then took up the study of Medicine, entering Class '11, among whom he has made many friends. Though carefully avoiding over-exertion, his student life has been very unsuccessful. His many friends predict for him a long and successful career.

LIVINGSTON, JOHN MILTON.

"Livy" began his career in Baden a little more than twenty years ago, and after testing the patience of the Public School teachers there, completed his matriculation at New Hamburg and Tavistock. He then came to Toronto and graduated with first-class honors in '09 B. and P. He has served on several executives, is quite a favorite, especially among the ladies, and, besides, obtained the highest honors in his class. True to his friends, kind and generous to everyone, firm in what he believes, "Livy" has won the friendship and respect of a host of friends, whose best wishes follow him in the bright career which promises to be his.

LUNZ, GERALD D.

Gerald Lunz is continuing his astral existence on earth in every sense but an academic one. He is a bold, bad man when the spirit moves him, but, as a rule, no one could be more peaceable than he. That he should have selected Medicine as his life's work is but another tribute to his soundness of judgment and ability to pick out a soft spot. All the world steps back to welcome Dr. Lunz.

MACDERMOTT, WILLIAM BERNARD.

"Mac" cried first for stimulants at Comber, County of Essex, in 1884, where he later acquired a preliminary education sufficient, in those days, to be awarded his matriculation in 1904. "Mac" has filled several appointments as schoolmaster in different climates, in the last of which when acting as chief in the famous Battleford "Indian" Industrial School he was further stimulated to inquire into the mysteries "that are," and, as a result, "Mac" will go forth upon the "unsuspecting public" as a medical practitioner. Since joining the Class of '11 he has won a merited place in the esteem of all his fellows. As a practical man, he is unexcelled, and a brilliant career in the medical world is before him.

MACKENZIE EWEN A.

*"Mac's tall and sonsy, frank and free,
Lo'ed by a' and dear to me."*

Born in Kirkfield in '84, Mac early recognized Toronto as a centre of learning, so he migrated hence in '92. He then attended Queen Victoria School and Parkdale Collegiate Institute. He showed his inclination for hard work by choosing railroading as a means to the end—Medicine.

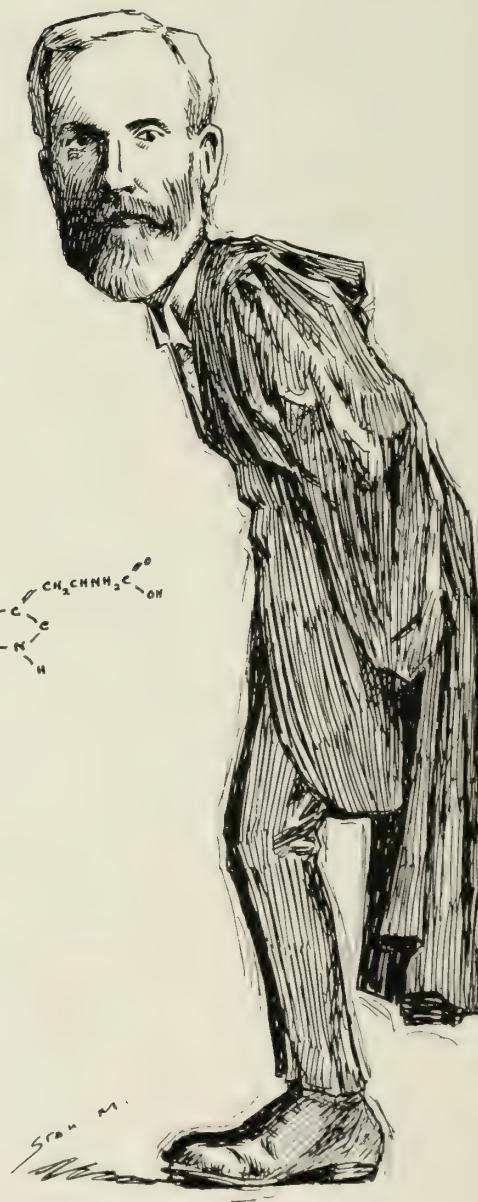

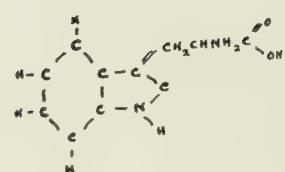

MACKENZIE, W. J.

*"Work like a man
But don't be worked to death."*

Warwick, Watford, and Toronto claim him. Into the strident life of each he has entered and upon each he has left his mark. During his four years in Medicine he has coveted few offices for himself, but his influence has been a potent factor in the returns of many an election. In the social notes of college life he has ever been a prominent figure. In his graduating year he represented the Medical Faculty at the At Home given by the Western Medical College. His academic standing has been a good one—strong evidence that a man can combine study and a thorough good time in an undergraduate course.

MACKLIM, JOHN EDWARD.

John was born on his father's farm in the County of Halton. His father died when Jack was ten years old, and after he had passed through the Public School there the family moved to Hespeler, where he worked for some years. Later he came to Knox College for a year, but theology was not juicy enough for him, so he entered Medicine, 1905. Next year he stayed out and worked; took a year in Arts, 1907-8, and in October, 1908, joined the present class. All through his course he has worked about twenty-five hours a week to help defray college expenses, and we expect of him the success he deserves.

MACLEAN, JOHN.

*"I dare do all that may become a man,
Who dares do more is none."*

"Jack" was born in Glasgow, and is a full-blooded Hielanman and "proud of it." At school he was the man to beat. As a sailor he was always on deck, as a railroad man right on the job, during the Boer War a true soldier, as a village schoolmaster "skilled to rule," in fact, he has made good at everything, but he deserves pre-eminence in the college as a fee collector. It was then that his smile was most irresistible. In '08-'09 he was Councillor of the Medical Society. He is President of the Y.M.C.A. and has proven to be the man for the work. Everybody knows "Jack."

MACMURCHY, ARCHIBALD H.

The subject of this biography was born in 1888 in North Bay, Ont. He secured his early education in his native town and matriculated from North Bay High School in 1906. Being a chip of the old block, he decided to take up medicine. With this end in view, high hope in his heart and a tear in his eye, he left home for Toronto in the fall of 1907, and registered in the Faculty of Medicine. In his four years at college he has proved himself a success socially as well as intellectually, and the many friends he has made among both sexes will watch his future career with great interest.

MACPHERSON, CHARLTON ARCHIBALD.

"Mac" was born in St. Thomas about the time when lilies blow. After receiving his preparatory education there he removed the seat of his activities to Toronto with particular attention to the Medical College. He has enjoyed life, and learnt a few things on the side.

McCABE, CHARLES J.

"For some we loved, the loveliest and the best."

"Chas." entered this mundane sphere in the year 1890 in the city of Hamilton. It was in the Collegiate Institute of this rising young city that he had instilled in him the first principles of knowledge and integrity, which were fostered in the years that followed, but did not blossom out till he reached Toronto in 1907. Entering with the Class of 1911 as an ardent follower of Æsculapius he made his presence felt from the very first. Not only in the College halls, but on the Campus, if need be, he could shine. But where his glorious radiance was supreme was in the evening by the fireside with the Fair Ophelia by his side. "Chas." is a member of Alpha Kappa Kappa Fraternity and the Lewellys Barker Club.

McCAFFREY, PETER SINCLAIR.

*"Hear him but reason in divinity:
The courses of his youth promised it not."*

"Pete," "Dannie's" and "Dan's" brother, first breathed life at Madoc, Ontario, July, 1882. Reared on a farm, he grew up good-natured and robust. Passing through the regulation "Little red school at the foot of the hill," he finally emerged (but we must not say how) from High School with a Senior Leaving qualification. Lured Westward, Pete wielded the hickory stick until entering Medicine with the present class. The Wild and Woolly West left him a hail fellow well met, with a good story or joke on any occasion. Judging the future by the past, we feel confident that Pete will attain a due measure of success in his Western home.

McCALLA, ARTHUR IRVINE.

Was born in St. Catharines in the year 1886. Obtained his primary education in the public schools and Collegiate Institute of that city. In the fall of 1905 entered the University of Toronto, enrolling in the Biological and Physical Science course. Graduated in Arts in the spring of 1909. Since that time has been completing his medical work, and that being finished, will start out for himself.

McCRACKEN, JOHN FLEMING.

*"Here's the scroll,
The continent and summary of my fortune."*

"Curly's" eyes first reacted to light in the town of Brussels in the year 1899 amid circumstances of which he has no recollection. He received his preparatory education in and around Brussels, matriculating in 1905. His thirst for scientific knowledge led him to enter the engineering course. It took him only two years to find out that he would rather be a follower of Hippocrates than a member of the chain gang. With his usual discretion he enrolled with the Class of '11 and neither he nor his fellow-students have been sorry that he did. From his record we feel sure that astronomy is not his hobby. A bright future awaits him.

MC CULLOCH, CHARLES DOUGLAS.

*"Hand
Grasps hand, eye lights eye, in good friendship,
And great hearts expand
And grow one in the sense of this world's life."*

Charles was born in good old Durham County, June 13, 1886. After completing his Public School education, he entered High School and matriculated from Bowmanville in 1904. The next two years he spent in directing the minds of a few Canadian youths. This vocation, though noble, was not sufficiently alluring to retain him, and he entered the Faculty of Medicine with Class '11 in 1907. His warm genial personality, coupled with his decision of character, cause him to be held in the highest regard by his many friends. We feel assured that he possesses those sterling qualities which are so commendable in a man whose life is the welfare of humanity.

MC DONALD, MARSHALL.

"A man of sense and sympathy, honor and perseverance."

Marshall McDonald celebrated his first birthday in Sandfield, Manitoulin. He further showed his respect for Canadian institutions by being born on Dominion Day, 1876. His public school training was received in his native town, after when he spent several years alternately farming and teaching. He matriculated at Meaford High School and entered Medicine with Class '09, with whom he completed his freshman year. The greater part of the next two years he spent in Fernie, B.C., and re-entered Medicine in 1908 with Class '11. Since this time he has proved himself a good student, and his many friends are assured that his future will be one of success in his profession, and usefulness to the community in which he resides.

MFARLANE, GORDON LEMON.

"Ave atque vale, McFarlane."

"Mac" made his debut into this green orb in the sunny month of June, 1890. The preliminary of his education was obtained at the old Irish school near Stratford, and at the noted Stratford Collegiate Institute. We next hear of "Mac" enrolled as a student in the Faculty of Medicine. In his earlier days he was somewhat of an athlete, but on coming to the University he became too fat to indulge in such physical torture. In University life he became popular among the students and has been successful with his work, although he never allowed his studies to interfere with his education. We next hope to hear of "Mac" as a successful practitioner.

MC GAVIN, EDWIN HENRY.

*"He was a man of honor,
Of noble and generous nature."*

On a farm in Huron County, there first entered life's troubled sea Edwin Henry McGavin. A sturdy boy he must have been, for short of stature he is, but strongly built and athletic. His preparatory training covered three years at Seaford Collegiate Institute, when he obtained Junior Leaving standing in 1903. Subsequently he wielded the birch in a public school for three years, after which his ambitions led him to seek a wider field of usefulness in the world of Medicine, entering in 1907. His genial manner has won him hosts of friends, while the industrious habits that have made even medical exams seem easy, will insure him a high place in his chosen profession.

MC GILVERY, FRANK E. BEACHEM.

Born in Norfolk County, "Mae" received his early education at Port Rowan Public and High Schools. After matriculation his natural inclination led him to enrol with the Medical Class of '10. Here he soon became a favorite, and because of his winning manner and pleasant disposition was ever to the front in both the social and intellectual life. Last year he spent with a physician in general practice, and although but a third-year man, proved himself to be eminently fitted for his chosen profession. Entering with the Class of '11, he has made many new friends. A good sport and a good student, he has the best wishes of all for a brilliant future.

McPHERSON, JOHN ALBERT.

*"Who saw in every man a brother
And found in each a friend."*

"Mac," as he is familiarly known, came to us with a smile and a stride that bespoke a sunny disposition and a confidence in self. He was born in 1878 at Bolsover, Victoria County, that hot-bed of Scotchmen, and received his early training in Lindsay Collegiate Institute. He journeyed to Toronto in 1903, and entered the School of Practical Science, graduating in Electrical and Mechanical Engineering in 1906. "Mac" entered Medicine in Queen's University in 1908, where he completed two years' work, and returned to Toronto University for his senior years. His genial disposition has won him many warm friends, and we predict for him a brilliant future.

MCQUIBBAN, GEORGE ALEXANDER.

*"Steady, calm, and self-possessed,
His feet, his hands could never rest."*

First testing his lungs in Oxford County, the subject of this sketch has spent the greater part of his life in and around Harriston, where he received his early training. Well may the little northern town be proud of George, for since entering on his medical studies in '07 his has been one success piled on another. A good sport, an excellent student and a trusted friend, his University life has been full of activity. No baseball game without Geordie on first, no examination without Geordie in the honor list, no social function without Geordie taking a leading hand would be complete. First, last and all the time a hustler, we predict for him a most useful and honored career.

MCQUIBBAN, JAMES WILLIAM.

*"Contentment and duty shall hallow the spot
That Providence orders for me."*

The subject of this sketch, although born in Oxford County, spent most of his boyhood days in the little town of Harriston, where he received his preparatory training. His early surroundings have played their part in the production of a healthy body and a well-balanced mind. After leading a pedagogic life for four years he made Medicine his chosen profession. Since entering College "Jimmie" has taken a healthy interest in all affairs pertaining to the undergraduate body, serving on various committees as well as being a member of the present Students' Parliament. "Jimmie's" true worth and character—delineated in all his activities—presents him to his fellows as an excellent type of Christian manhood, the keystone of whose life-arch spells future success.

MACE, R. D.

Mace is a spicy piece of goods, and is excellent flavoring in certain kinds of pickles. His course in Medicine has been marked, however, by a consistent clinging to the narrow path of virtue which quite belies any imputation which might lie in his name. Not only to be a doctor, but to be a good one, has always been his aim, and to this end he has exerted himself. He will graduate to take an honored and well-merited place in his profession.

MAHLANGENI, MACNASSEH ROBERT.

"Dicunt, Quid dicunt? Dicant."

He was born at Foleni, Transkei, Cape Colony, South Africa. He spent his early days hunting lions, leopards, elephants, etc., in the jungles of the Dark Continent. In the year 1904 he left the palmy groves and came to Canada to hunt larger game in the form of a degree from the University of Toronto. During his stay with Class '11 he has proved himself a capable, energetic student, and his success is assured on return to his native soil.

MAINPRIZE, WILLIAM.

William was ushered into a worldly existence in 1888. Mount Albert was jubilant over the fact, and has always refused to be ashamed of its enthusiasm. The public school commenced and Markham High School completed his preparatory training, and then he roamed the parental acres for a year. His soul revolted from the soil, and he embarked into Medicine with 1911. Always cheerful, and at time studious, Bill has sufficiently overcome his bashfulness to become known to all, and to be highly respected in consequence, both among the students and the faculty. His particular star seems to be fixed in the zenith.

BIOLOGICAL BUILDING.

MANNING, HERBERT KENT.

"And no man here but honors you."

Kent is a son of the parsonage, and, consequently, was raised all over Ontario. Brampton High School gave him his secondary education. And then for two years he engaged in Y.M.C.A. work in Winnipeg. Coming to Victoria with the Class of '10, he learned in one year all that institution had for him. He entered Medicine with '11, and has demonstrated the wisdom of that choice by his success and zealous application. This year he is Sec.-Treas. of the University Boxing Club. He plays basketball and Rugby, and was one of the champion U. of T. lacrosse team of 1910. Kent's gentlemanly manner and kindly sympathy along with devotion to his work, are safe criteria of highest success.

MARTIN, ALFRED CHARLES.

A. C. Martin, better known as "Alf," was born in the Ambitious City in June, 1890. Imbued with the energetic spirit so characteristic of a mountain youth, he determined to delve into the mysteries of disease, and lend a helping hand and fertile brain to alleviate the ills of man. With this in view, one early morning he lay aside his childish toys and ascended the Hill of Bagdad. From its loftiest peak he scanned the eastern horizon, and a smile crept over his face as he fixed his gaze upon a comet resting above Queen's Park. As he watched it, its tail broke loose and rested upon the Medical Building. While here his energies have been attended with no little measure of success. It is necessary, however, to live with him to appreciate his true worth. Witty by times, sarcastic in spots, but beneath it all is a constancy and integrity which never fails. You can bank on Alf.

MARTIN, WILLIAM GEORGE.

"Smile, and the world smiles with you."

William G. first saw the light in the little town of Bradford, Ontario. After receiving a preparatory education in the Public and High Schools there he taught for a year. He came to Toronto University in the fall of 1907 and registered in Medicine with the Class of '11. Throughout his College course "Will" has worked faithfully, systematically and intelligently with the only possible result—Success. His extreme good-nature and good-fellowship have made for him very many friends among the students who heartily wish him good luck in his future career.

MAVETY, ALBERT FRANKLIN.

"A handful of good life is better than a bushel of learning."

"Bert" is a West Torontonian and matriculated from his home Collegiate in 1903. The following fall he registered in the Natural Science course at Varsity, but after two years in this course he decided in favor of his father's profession—Medicine. His academic course has been considerably lengthened, owing to a couple of years spent extramurally, one of which was occasioned by a serious accident resulting from Rugby. Bert has always taken a keen interest in athletics, playing in the inter-faculty series in both football and hockey. For the past few years he has successfully coached the West Toronto Collegiate Rugby team. "Bert" is a "good head," and his success is assured in the profession of his choice.

MIDDLETON, JOHN JOSEPH.

*"Describe him who can,
A reproduction of all that is pleasant in man."*

Middleton is a man of many and various parts. He can draw a bead on a transit, discuss the total depravity of man, write an obituary or console a co-ed. To those who know him the next remark is unnecessary, and to those who know him not it will convey a great deal more than can be expressed otherwise—Middleton hails from the Emerald Isle. His transition from childhood to adolescence was, however, accomplished in Schenectady, N.Y., where he lived before coming to Toronto University. He can physick the heart with pleasantness, with an even greater degree of skill than he can the sick body with medicaments. As a journalist he ranks with the cleverest; as a society man—well he will have to refuse to allow social calls to trespass on office hours when he obtains the parchment.

MITCHELL, ELMER WALKER.

"A man not of words, but of actions."

Elmer Walker Mitchell was born at Sand Hill, Peel County, in 1887, and there he received his early education. In 1902 he commenced secondary education in Brampton High School, where he was successful in obtaining Senior Teachers' and Honor matriculation standing in 1906. After spending a year teaching, in which profession he proved a success, he decided to become a follower of Æsculapius, and entered Medicine with the Class of '11. Since entering upon his medical course, Elmer has succeeded in taking an honor standing and by his quiet, unassuming manner has made many friends who will be pleased to hear of his continued success. Elmer is a member of the Alpha Omega Alpha Honor Fraternity.

MOFFATT, HERBERT BAYNE.

*"He's little, but he's wise,
He's a 'terror' for his size."*

In May, '87, "Herbie" alighted from "The Stork Express" in the Village of Manotick, near Ottawa. Being of a sociable nature, he migrated to the Capital, where he received his education from kindergarten to matriculation. Apart from politics and athletics he spent his spare moments in the drug business, but finally turned to his chosen study and registered in Medicine in '06. During his sophomore year, he took "a rather advanced course in surgery," and after a prolonged battle with the Pneumococcus, found it necessary to return to the dissecting room with '11. His election as representative to "Queen's" can be attributed to his jovial manner, which, along with his ability in the healing art, will assure his success as a practitioner.

MOSSMAN, JAMES KILBURN.

"I loved to stray from learning's ways."

This virtuous youth was born in Toronto in 1889. Received his primary education in this country and in England. Returning to Toronto, he matriculated from Harbord Collegiate in 1906. Entering Medicine with Class '11, his first worry was how to avoid taking lectures and still get his attendance. Jim has always been prominent at year functions, and his rendering of the "Balcony Scene" at a certain dinner shows his keen appreciation of Shakespeare. An ardent student, he is occasionally seen at clinics but rarely stays long enough to outwear his welcome. He is a member of Alpha Kappa Kappa and the Lewellys Barker Club.

MUNRO, ROBERT WALTER.

"And nothing meets my eyes but deeds of honor."

Bob was born in the township of Scott, Ontario County, in 1881. He received his Public and High School training at Uxbridge, from which place he matriculated in 1902. Dr. Arnold was then his well-chosen ideal, and he spent some time directing the "younger mind." Being possessed of a tender sympathy for humanity and its service, Medicine called him and he entered the Medical Faculty. Those who know him best are well aware of the felicity of his choice. His many friends are assured that he possesses those sterling qualities which will brand his life a success.

NANCEKIVELL, THOMAS WESLEY, B.A.

"God bless you Doctor, and well done."

Born in Oxford County, schooled at Ingersoll and Woodstock, six years a teacher, a short residence in St. Louis and Saskatchewan, and considerable travel, are the chief facts of his pre-university experience. Tom entered the B. and P. course with Class of '09. Here he delved deeply into his studies and also entered with spirit into every college activity, taking an energetic part in athletics. His high ideals, sound moral principles, and boundless fund of humor specially fit him for his noble profession and augur well for a brilliant and successful future.

O'LEARY, GEORGE ARTHUR.

"A man he was to all the country dear."

Early in the eighties an event occurred in the town of Lindsay which has grown in importance as the years have passed. The event in question was the birth of George A. O'Leary. To the Separate School in his native town is awarded the honor of having bestowed on George his primary education, which was continued at St. Michael's School and the De La Salle Institute, Toronto. As year councillor on the Medical Society Executive, member of the Torontonensis Board, and Medical Representative on the staff of "Varsity," George O'Leary's college record has been one of activity. In the field of sport, too, he has always been in the foreground, and he can swing a baseball bat with as much ease as he can diagnose a serious malady.

ORR, HAROLD.

Harold was born in Toronto twenty-one years ago. After receiving his early education he obtained his matriculation from Harbord Collegiate. His keen interest in athletics was manifested by his three years service on the track team, and as Vice-President of the Medical Athletic Association. He is also an officer in the Canadian Militia. His quiet, unassuming ways have won for him many friends who wish for him the best in his professional career.

PARK, FRANK STEWART, B.A.

"Hereunder lieth a man of fame."

As I visited this haunt of universal knowledge, my attention was directed to one who seemed to have partaken of its universality. Rugged in form was he, and of the noble Roman style of countenance. Some slight furrows on his brow showed the mark of busy, wasting thought, but his eye burned with the fire of an heroic soul, and there was something in his whole appearance that indicated a being of a different order from the bustling race around him. I inquired his name, and was informed that it was Frank Park. This then was the hero of the Rugby field for five consecutive years, this the captain of the lacrosse team and vice-president of the Y.M.C.A. A distinguished Bachelor of Arts and Medicine, though I fear more bachelor by name than by nature. I drew back with an involuntary feeling of admiration.

PARK, THOMAS DONALD.

*"A useful life must needs be one,
That lives to help his fellow man."*

Thomas D. Park was born at Banks, Grey County, in 1883. He received his elementary education at Banks Public School, from which place he passed his entrance examination. After leaving the public school he entered the Collingwood Collegiate Institute, from which he matriculated in 1900. That fall he entered the Oriental Language Course at Toronto University, graduating in Arts in 1904. Three years later he again entered the University as a Med., where he has served the prescribed apprenticeship.

POLLOCK, MAURICE A.

*"He took the suffering human race
He read each wound, each weakness clear."*

July 8, 1886, will always be remembered by Maurice. It was the day upon which he was made part owner of this world's atmosphere. Even while in his cradle he determined upon an educational course. His primary education was received in New York and Toronto. He matriculated in 1905 and entered the B. and P. course the same year. His attempts at the examinations have always been successful. A thorough gentleman, with a large amount of grey matter, we can predict for him a brilliant career.

POOLE, ALBERT GOWER.

"Bert" was born in 1882, and comes from the town of Trenton, Ont., where he received his public and High School education. After matriculating he spent several years in a drug store in Trenton, finally completing his apprenticeship of four years in Cobourg, Ontario. He graduated in Pharmacy with the "Noughty-Four" class at the age of twenty-one years. After spending two years in Brantford, Ont., he returned to Toronto in 1906 and became the managing director of a local drug-store there. This position he held till he commenced his medical career.

PRATTEN, FRANK HARTON.

October 30th, 1886, was an eventful day in the history of Waterford, for on that day Frank first opened his eyes to the wonders of the universe. He developed physically and mentally to such an extent that he soon knew far more than his teachers in the public and High School of that burg. Matriculating in 1902, he came to Toronto, where for five years, under the tutoring of Dr. Kendall, he dispensed epsom salts and calomel pills. Aspiring to something higher, he entered class '11 in medicine. Being an ardent and zealous student and the embodiment of all that goes to make a model practitioner, Frank bids fair to rank first and foremost in the profession.

REID, ALYMER JOHN.

"Much can be made of a Scotchman if you catch him in time."

On a bright, frosty morning in 1885 John first inflated his lungs at Chesley. Having spent his boyhood days on the farm near Pinkerton, he proceeded to Paisley High School, from which he matriculated. Proceeding then to Walkerton Model School, and from thence to a country school-house, he wielded the rod for three years. At last his greatest ambition was realized in the fall of 1907, when he entered the 1911 class in medicine. Jack is a genial companion, an ardent admirer of sports, and is a general favorite. This was shown in his third year, when he was elected Recording-Secretary of the Medical Society. His success is assured in his chosen profession.

RICHARDS, JOSEPH.

*"He was the mark and glass, copy and book,
That fashioned others."*

Wise men are said to have come from the East long years ago to seek increase of wisdom. And still they come, and amongst the noble army who venture forth seeking an increase of knowledge in these latter days is J. Richards, from the most ancient of all the British colonies. 'Twould scarce be politic to tell how many summers J. R. has seen since first he added to the squalls that blow prosperity along to his fellow-islanders, but you should count the hairs on his upper works. For a season he taught the young idea to shoot. May his career as a disciple of Æsculapius be even more successful.

RICHARDSON, ERNEST AIKINS.

*"While we live let's live in clover,
For when we're dead we're dead all over."*

Born in Toronto, March 29, 1885. Matriculated from Parkdale Collegiate Institute. While in attendance there, he, on two successive years, shared the honors for the inter-scholastic lacrosse championship. Entering Medicine in 1907, he became an ardent student, and has displayed an unquenching thirst for knowledge of medicine and some of the finer arts. His course, as well as successful, has been a happy one. Ernie has been a faithful supporter of Varsity athletics and has spent much time assisting in the social functions of his year. He is a member of the Alpha Kappa Kappa fraternity.

RIGG, DEARDEN.

On the seventh of June, 1885, Dearden began his individual career at Montague, Ontario. Here he spent his boyhood, passing through all the ills and fights incidental to that crucial period with flying colors. His primary education was obtained in Schuooles' School, Welland County, Dunnville High School, and Niagara Falls Collegiate. He spent a year at the S. P. S., Toronto, and entered Medicine with the class of '11. From the determination to succeed Dearden has shown in his college course his many friends feel certain his success in Medicine is assured.

RIGG, JAMES FREDERICK.

In the spring of 1888, the air was set astir near Wellandport, Ont., with the first calls of our now curly-haired Fred. He received a careful training under his father's guiding hand and his mother's slipper. He received his rudiments at the Dunnville High School, from which he matriculated in '06. While there he was quite popular with his school-mates, who made him captain of the Cadets. He then cast in his lot with Meds '11, among whom he has made a host of friends. We wish him his merited success.

ROBERTS, ISABELLA MARY.

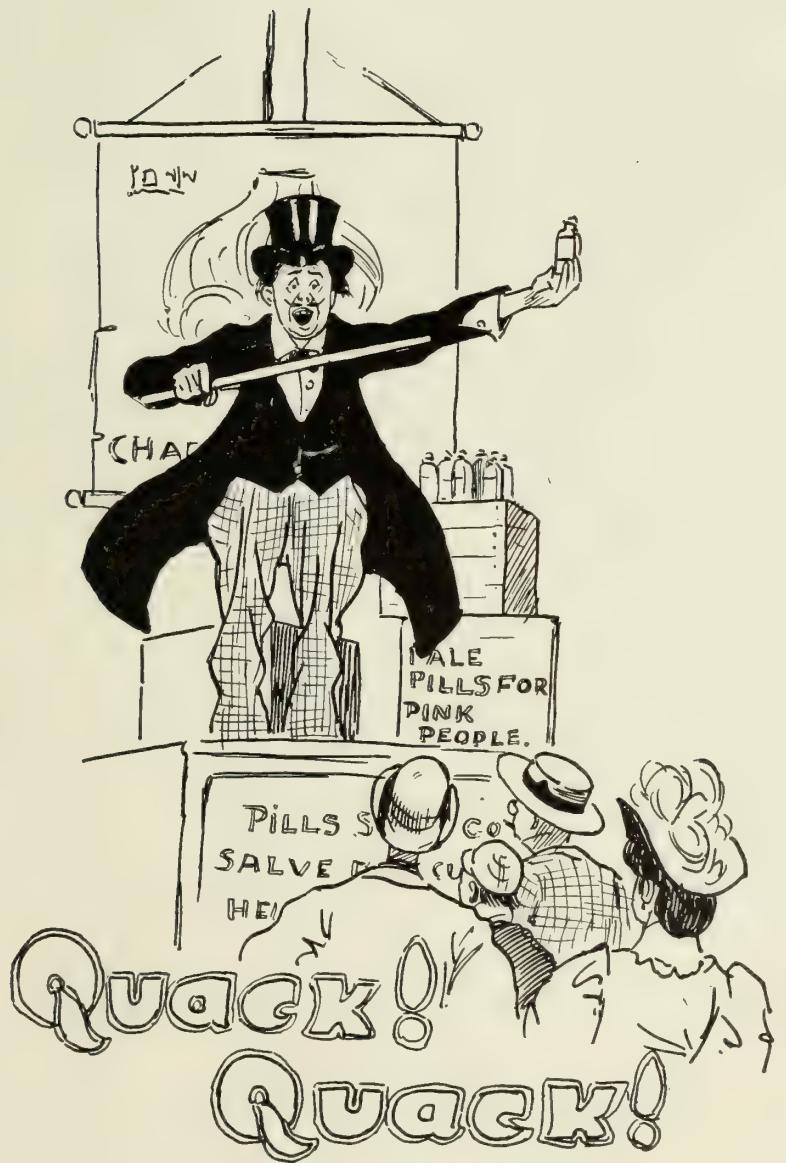

*"Spontaneous wisdom breathed by health,
Truth breathed by cheerfulness."*

Near Peterboro', surrounded by the beautiful scenery of the country, Miss Roberts spent the early part of her life. She matriculated from the Peterboro' Collegiate in 1905. The following year she came to Varsity, and during the whole of her course she has been most popular. In her final year she has been a member of Torontonensis Board and President of the Women's Medical Literary Society, in which she has shown unusual executive ability. With a smile and a cheerful word for everyone, we have all felt that we were better for knowing her, and in the practice of her profession she will be sure to have the greatest success.

ROSE, GEORGE BLAIR.

"She was a phantom of delight."

"Rosie" was born in Elora, Ont., in 1887 and has never quite lived it down. After getting his matri. at Elora High School he came down to Toronto and tried a year at the School of Science. He became disgusted with this, however, naturally enough, and joined the merry crew of '11 Medicine, in the fall of 1907. Since then he has been a constant source of joy to his many friends. Blair is an enthusiastic member of Class '11, and our prognosis for his success in his chosen career is good.

ROSS, ARCHIBALD EDWIN.

"And even his failings lean to virtue's side."

The subject of this sketch was born in the County of Simcoe. The trend of his onward march of success was first measured in a near-by country school-house. At the age of seventeen he secured his Senior Leaving at the Barrie Collegiate Institute. The same fall he enrolled in Medicine as a member of the class of '11. Since coming to college, Archie has proved himself to be a student of the first rank. His sincerity of purpose, his true sense of honor, and duty have shown the fitness for the high calling of his chosen profession. All the circumstances and good fortune of his boyhood life seem to have converged in his present state, for the production of a young man, virtuous, noble, and true.

ROSZELL, AUSTIN.

*"Cool, unperturbed by stress and hurry,
Inclined to work, but not to worry."*

Austin Roszell announced his arrival among humanity on Sept. 25th, 1884, near Smithville, Ont. His public and High School training were received near home, and were followed by a term in the Model School at Hamilton. The following two years he taught school at Caistor Corners, and during this period his inclinations determined him to enter Medicine, which he did when Class '11 came into existence. Those who have since been associated with him know that his college career has justified his choice of profession, and his conscientious work and sympathetic manner speak well for his future success in the practice of Medicine.

ROWNTREE, HAROLD L.

"His years are young, but his experience old."

Harold L., more familiarly known as "The Boy," made his debut into this busy world at Green Holm Villa, a peaceful spot on the banks of the old Humber River. After receiving a preliminary education, he moved to Weston and graduated from the Weston Collegiate in '06. He then spent a year among the wilds of Alberta, but finding his talents better suited to other work he registered in medicine in '07. In this department of knowledge, by his cheerfulness, buoyant spirits and scholarly ability, he has demonstrated the undoubted propriety of his choice. That good fortune and success may follow him is the ardent wish of class '11.

ROY, LOUIS ARTHUR, B.A.

The subject of this sketch is a Westerner, hailing from Moosomin, Sask. He was born in 1888, and spent the first few years of his life at the public and High Schools of his native town. After matriculating in '05, the B. & P. course at Varsity attracted his attention, and he entered with the class of '09. Art has been generally interested in college affairs, athletics, etc. He is a member of the Alpha Omega Alpha fraternity.

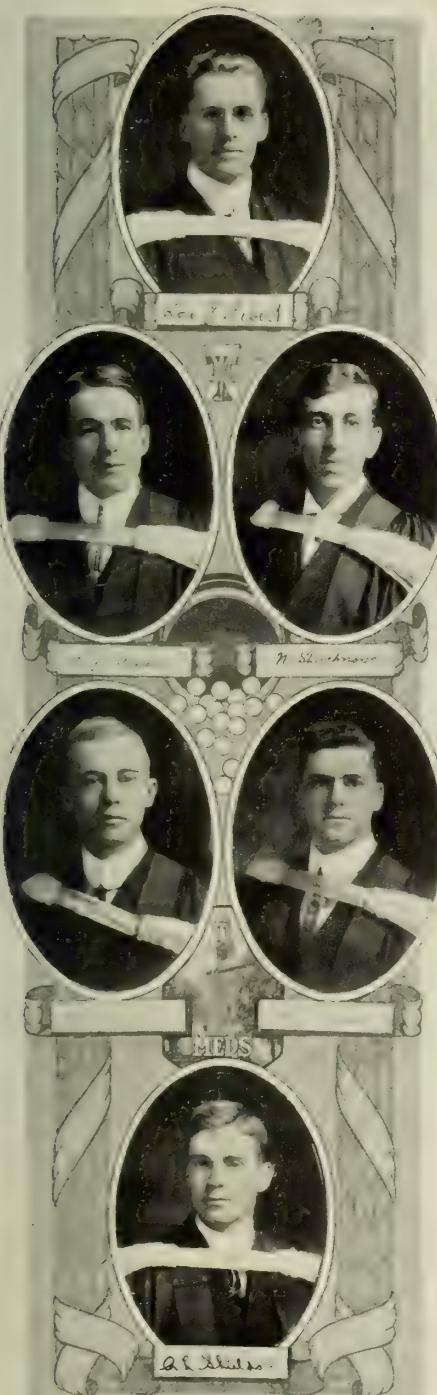

SALMON, MORLEY CUTHBERT.

*"If he hurls a few mortals from this world,
He'll make amends by bringing others into it."*

Born—in County of Middlesex, to Mr. and Mrs. A. Salmon, a son.—Such were the necessary credentials that introduced Morley to the busy public. Reared in Bruce County, he early developed that one characteristic common to Bruce Old Boys, namely, "grit." With this acquisition, he determined to get an education. Receiving his rudimentary at Holyrood public school, he left for Kincardine High School, from where he matriculated. After three years teaching, he enrolled with class '11. Since entering Medicine he has taken a great interest in every affair, being elected Curator of the Medical Society, '09-'10. His sunny disposition has won for him a host of true admirers, who predict a brilliant future.

SCOTT, FRANK R.

True to the tradition of his race, "Scotty" came to this sphere with no language but a cry to warn the natives of Beeton of his arrival. He received his primary education at Beeton, and then engaged in business for seven years. He matriculated in 1907 and in the fall of the same year commenced the study of Medicine. Here he was prominent in athletics, figuring on the University track team and Varsity I soccer team, and also on baseball, hockey and rugby teams. But his achievements were climaxed when in the spring of '09 his classmates elected him president of the third year by acclamation. May his popularity here be a criterion of success in after life.

SEBERT, LOUIS JOSEPH.

"Forti et Fideli nihil Difficile."

Lou was born in Whitby back in '86. He received his primary education there, and matriculated from Whitby Collegiate with the intention of entering Pharmacy. He spent the following two years as a drug apprentice, but wishing to learn of the higher sciences, entered Medicine with the Class '11. Lou has been a very popular student during his four years at college; in the first year he was a member of the Dinner Committee, a member of the year Dance Committee, and in the 4th year a member of the At-Home Committee and the Med. representative on the Theatre Committee. Lou is one of Canada's foremost athletes, being a member of the Olympic team in '08 and four times a member of the Inter-collegiate track team. He holds the inter-collegiate records for the 100 yards and one-quarter mile. He is a member of the Nu Sigma Nu fraternity and the Lewellys Barker Club.

SEXTON, THOMAS JOSEPH.

*"A wise physician's skill our wounds to heal
Is more than armies to the public weal."*

Tom was ushered into this tumultuous world in Boston, Mass., in 1891. From the first he showed his disapproval of Uncle Sam's bombastic style, thus persuading his parents to become domiciled at Port Dalhousie, Ont. Here he received his early education, after which he attended St. Catharines Collegiate Institute, matriculating in '07. In the same year he registered in Medicine at Toronto with the banner Class of 1910. Though an unassuming and diligent student, his good-fellowship has won him many friends, who will retain a keen interest in the success he is sure to meet in his professional career.

SHACKNOVE, NATHAN.

*"I have learned
To look on nature not as in the hour
Of thoughtless youth, but hearing oftentimes
The still, sad music of humanity."*

Nathan was born in Siberia, September, 1884, and there received his primary education. He came to Canada at the age of twenty, and although he settled at Hamilton, he nevertheless worked with such great zeal in preparing for the matriculation examination that he was enabled to enter Toronto Medical College with Class '11, and he has kept pace with the class ever since. "Shack" will always be remembered for his friendliness and conviviality, and especially for his sermons on Socialism. Knowing his sympathetic nature, and his capacity for work, his friends predict a successful future for him.

SHARPE, NOBLE CARMAN, B.A.

*"And drops it careless on the floor
To grasp at things unseen before."*

Noble was born in Kemble, Ontario, September, 1888. Being a parson's son, he lived the rambling life. Graduating from London Collegiate, 1902, he entered a business life for three years. Then he came to Victoria College in the fall of 1905, graduating in Arts with the Class of '09 B. & P., and is now with 1911 Medicine. As for the future—Quien sabe?

SHIELDS, HARRY JAMES.

"His open eyes desire the truth."

For a detailed account of Harry's previous history, and for a list of well-deserved encomiums concerning his high mental and physical qualities, Torontonensis of 1909 should be consulted, since, as a graduate of '09 of the B. and P. course, the story of his career is there mapped out. The many accomplishments he then possessed have been still further developed in the last two years, while his favor with the ladies has been further enhanced by an increased expertness at dancing. Harry is a favorite with all and well deserves such an enviable reputation, for in spite of his splendid qualities he is one of the most unassuming men of the year. All who know him wish and predict for him the very highest success.

SHIELDS, ROSS LESTER.

"Though more to know could not be more to trust."

Ross was born in Toronto in 1889. Received his primary education in Grace Street school. Went to High School at Markham, matriculating in '05. In the fall of '07 he decided to take up the study of the honorable profession, and entered Medicine in the class of 1911. Ross is conceded by all a good fellow, a good student, and a good sport, having taken an active part in the athletics of his college. R. L. is assured of a career of ever-extending usefulness.

SINCLAIR, CHARLES WILFRED.

"Much can be made even of a Scotchman if he is caught young."

Charlie was born at Aylmer, Ont., on January 22nd, 1888. Here he received public school and Collegiate education, and having passed his senior matriculation examination in 1905, he joined the staff of the Sovereign Bank. After two years in the Aylmer and Toronto offices he resigned his position to take up his medical studies at the University of Toronto. By never exceeding a sleep limit of twelve hours a night and by keeping awake in some of the lectures, he succeeded in making the honor list. Keenly observant and exhibiting that spirit of scientific inquiry advocated during the course in physiology, his future success is assured.

SKEELES, LESLIE ORDE CAMPBELL.

*"He took the suffering human race,
He read each wound, each weakness clear;
And struck his finger on the place,
And said: Thou ailest here, and here."*

Leslie claims Toronto as his native city and the year 1888 as that of his birth. Being given much to circumspection, he noticed at quite an early age many social evils in need of much reform and evinced a determination to be in the future of some service to his suffering fellows. Therefore, in order to fit himself for the work, he entered Medicine, and naturally chose the B. & P. course. His success has not only proved the wisdom of his choice, but has also stamped him as one whose achievements will add much to the fame of the class of '11.

SMITH, WILLIAM WALLACE.

*"A man not given to words or strife,
A man of sense."*

Bill was born in Oxford County, near Ratho, in 1884, but after a short residence there, went to the Royal City, where he has made his home ever since. He received his early education in Guelph Collegiate. On leaving, he turned his attention to teaching school, and here cruised for four years. Finding too limited scope in that profession, he decided to undertake the study of the "healing art," and so gained Class '11. His course at University has shown that he is a good student and he has the best wishes of his numerous friends for a brilliant future in the practice of Medicine.

SMITH, ROBERT SCOTT.

"He stood four square to all the winds that blew."

The world first became aware of Bob's presence when the stork dropped him in Oxford County, near Bright. As soon as he developed his vocal powers, he made known his desires to travel. After a brief stay in his native county he took up his residence near Guelph, where he learned to spin the top and imbibe the rudiments of education and agriculture. Graduating from the Collegiate Institute of his home town in '04, he aspired to wielding the rod, but, tired of this, he sought a field of greater activities and registered with class '11. Bob is the possessor of many sterling qualities which will gain for him the confidence of those who will come under his "gentle care."

SMITH, HARRY GRAY, B.A.

Harry G. Smith was born in Port Dover in the early eighties. His youth was passed in the public and High Schools of his native town and a few of the following years were spent on the heavy end of a hickory stick. As this business lacked opportunities and the B. & P. course looked inviting, he came to Varsity and cast in his lot with the class of '09. He has been interested in college affairs in general and his chances of success seem good in the medical profession.

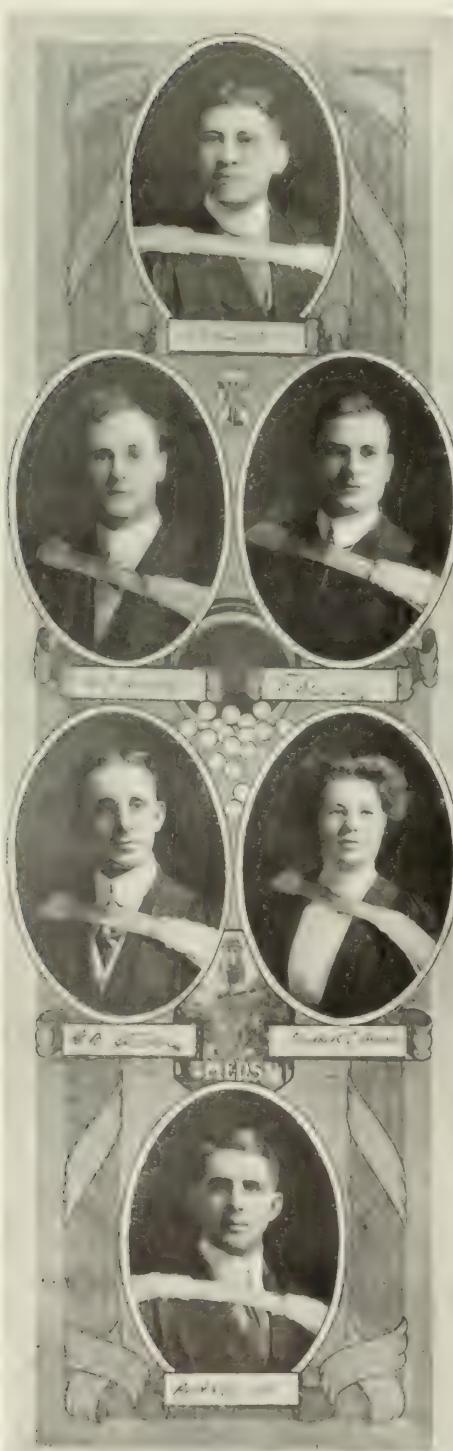

SMITH, WILFRED DAVY.

*"His life was gentle; and the elements
So mixed in him, that Nature might stand up
And say to all the world, 'This is a man!'"*

There be some men whose antecedents need never be related; to know them is to know of a surety what they have been. Their chronology is reckoned by deeds, not by years, and such a man every student of medicine at Toronto reckons Davy Smith. And they emphatically voiced their estimate by electing him President of the Medical Society by a splendid majority. He's a big man in the truest sense, is Davy; hence the big positions always come his way. It was so in his school-teaching experience and as a student. And as a practitioner he will be no less a credit to Oxford County, his birthplace

A REAL FRATERNITY.

SMITH, ISSACHAR REUBEL.

On a bright May morning in 1889, "Councillor" attended his first committee meeting in Toronto,—the question at issue, a medical one—his own welfare. Ever since then he has had a voice in affairs about him. He attended the Technical High School and later entered University College, where he spent a year. The next fall found him registered as a freshman in Medicine. During his first year he was a member of the Students' Parliament; during his second year he was a Class Councillor and a member of the Executive of the Medical Society. Enthusiasm is characteristic of him in whatever he undertakes. He intends pursuing post-graduate work.

SPROULE, HERMAN FREDERICK.

*"Keeps his counsel, does his duty,
Cleaves to friends and loveth beauty."*

"Herm" first showed signs of an animate being in Toronto Junction on March 26th, 1889. Here he obtained his preliminary education, graduating from the Collegiate in '05. That same fall he entered Victoria University to engage in the mysteries of the Biological and Physical Science course, but became enlightened in '07, and, seeing the error of his way, came over to the Medical building, as he discovered that the telephone service there was more prompt. During the four years' sojourn with the class of '11, in addition to cultivating the social and aesthetic side of college life, Herm has been a consistent worker. Popular with the ladies, popular with his fellow-students, possessed of an abundance of tact and good judgment, we can certainly predict for him a brilliant future.

STAINSBY, FRED.

*"Modest in mien
Cool in calculation
Quick in decision
Bold in execution."*

Fred came of English parentage and paid his first visit to this planet of work and worry at Yarmouth Heights, on June 2, 1885. Here he received his primary education and obtained his entrance standing. His parents then moved to Hamilton, and he spent two years in Hamilton Collegiate. The offices of the Hamilton Wheel and Foundry Company claimed his services for the next seven years, but his ambitions yearned for a broader field and he decided to enter Medicine with Class '11. His quiet manner has won him the esteem of his fellow-students and we can predict that he will be a credit to his profession.

STALKER, GORDON BERKELEY, B.A.

"His little body contains a great heart."

Berkeley hails from Walkerton, Ontario. There he was born in the year 1886 and there he received his primary education. Having completed his course in the Walkerton High School, in the fall of 1905 he registered in the Biological and Physical Science course in University College. The course is a stiff one, but Berk has proved equal to the occasion and been successful throughout, receiving the degree of Bachelor of Arts in 1909. Since coming here, he, by his ever-present smile and friendly aspect, has made many friends, who, while deeply regretting his departure, wish him a successful and happy future.

STEWART, ELIZABETH L.

"Her heart is in her work, and the heart giveth grace unto every art."

The itinerant system is responsible for the fact that Miss Stewart has lived in so many different parts of Ontario. It was in North Bay that she attended High School, and from there came to Toronto to enter Medicine with the Freshettes of '11, the most youthful member of the group. Throughout her course she has been a universal favorite, and the Medical girls have found in her one of the truest of friends. Her tact, her quiet, capable manner, and her sympathetic helpfulness, will in future years bring her the gratitude of many patients.

STIRRETT, ROBERT R.

"Embellished with good morals and just thought."

The subject of this sketch, although born in Forest, Ontario, was brought up and educated in Petrolea, where he obtained his matriculation. After spending a year in business, he decided to break away from the ranks of the "Laity" and made Medicine his life's work. That he has made no mistake has been well demonstrated. "Roy" has figured very prominently in athletics, especially in rugby, where he played with Varsity III in his first year, Varsity II in his second year, and it was only through a mishap that he has not graced the first's line. At present he is managing the Senior Meds. Mulock Cup team, and is the Meds. representative at the School of Practical Science At-Home. Fraternity: Phi Sigma Tau.

STRUTHERS, JAMES DOUGLAS.

"You were aye leal and true, Jamie."

James Douglas Struthers first became a member of his father's family on April 7th, 1886, in the County of Bruce, near the little village of Underwood. He obtained his public school education in the country schoolhouse and later his matriculation at Port Elgin High School. After a half-year spent in business college, followed by the duties with railroad office work, James decided to become the "Doctor," and joined the class of '11. He spends his summers practising in the north country and his student nights in faithful application. Scotch ancestors have given Jimmie determination and decision, which qualities have made him friends amongst old and young and claimed him as Treasurer of the "At-Home Committee" of Year '11.

SWEENEY, PAUL JOSEPH.

*"He was stately, young and tall,
Dreaded in battle, loved in Hall."*

The subject of this sketch was born twenty-one years ago in the Township of Arthur. He received his early academic training at Arthur public and High Schools, and entered the Faculty of Medicine in the fall of 1907. Paul is a believer in the idea of a virtuous and noble education, which gives value to the separate items which make it up. Wisdom is to his soul what health is to the body. His persistence and faith have so ripened into action that one has only to look at his manly stature, observe his serene and dignified demeanor, to gauge what the future has in store for him, and what his friends may expect of him.

SWEENEY, DENIS.

"Cool as an icicle and determined as the rock it hangs upon."

Sweeney, Denis, was born at Arthur, Ont., and received his preliminary education at the same place. After matriculating in 1905, he entered upon his medical studies at Toronto. His course here has been characterized by quiet, enthusiastic work, and his chosen pathway is bound to be illuminated by results profitable to himself and the world. His perseverance, industry, good common sense, and high ideals of honor, won for him the love and respect of his class. "Good luck to Denis" is the unanimous farewell extended to him by all his friends in the illustrious class of '11.

SWENERTON, WILBERT CECIL.

"He is generous and noble as well as valiant and honorable."

Our class has not a member who is better or more favorably known than the subject of this sketch. Cecil, although born in Exeter, Ontario, is a typical Western hustler. After matriculating from Manitoba College, Winnipeg, '04, he taught a couple of years, then moved to his present home in Vancouver. Since coming to Varsity, Cecil has taken a very active interest in college life: served on the "At-Home" Committee, '08; represented the Meds. on the Varsity; also Secretary-Treasurer Medical Athletic Society, '09, and at present is playing on Varsity First soccer team, and is Secretary-Treasurer of the C.I.A.F.U. With his ambitious nature and cheerful disposition, he is assured a bright and successful future.

THOMPSON, FRANK L.

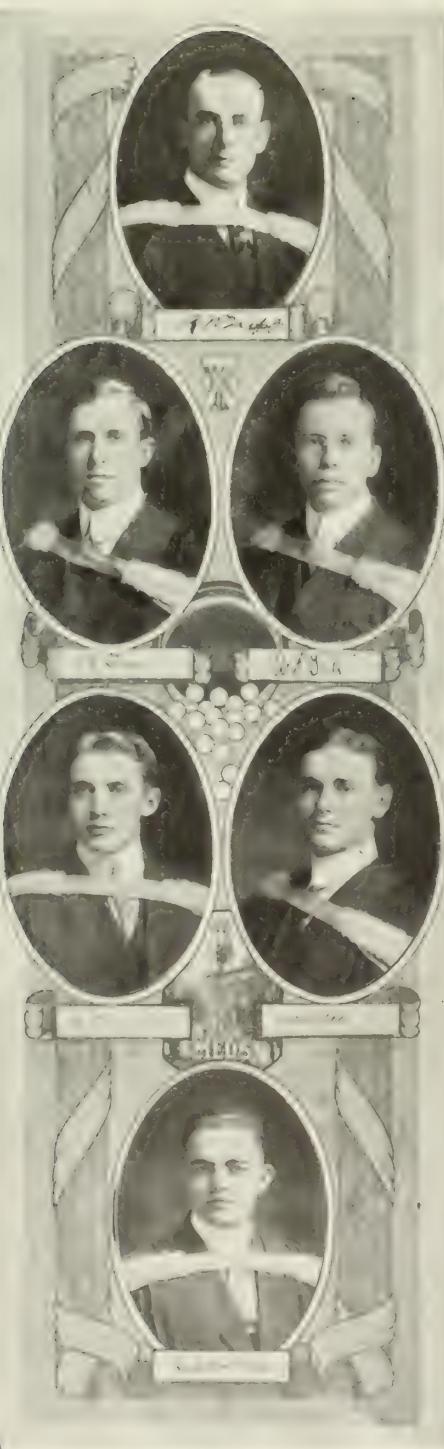

"Titles of honor add not to his worth."

Born at Uxbridge one smiling day in April. After receiving his primary education, he entered High School. Here he labored for three years. As his aim in life was service, he began teaching. After spending six very successful years at this, he joined the class of '11. As a student of Medicine, Frank is keen and quick, and by the bedside his genial manner wins the confidence of all his patients. Every man must have some interest outside his study. In the freshman year our friend was the organizer of a club. He has always devoted much time to class interests and Y.M.C.A. work. We are sure Frank will make a success of the profession he has chosen.

THOMPSON, HOWARD E.

"I know the gentleman to be of worth and worthy estimation."

Howard began life at Seagrave, Ontario, where he started his education at the age of eight. He passed the entrance at eleven, and at fourteen obtained his matriculation from Port Perry High School. The following year he entered business in Toronto and was there till he finally decided to take up medicine as his life's work. In this, as in business, he is sincere and practical, as was shown by the fact that he assisted a busy physician in Toronto during holidays and spare moments. Everyone is certain that his future will be a successful one.

TRIPP, ROLPH NEWTON.

"And smile, and smile, and be a villain."

"Parson" Tripp was born in Forest where they grow peaches. By the time he was eighteen he had absorbed all the knowledge in that part of the country and migrated to Alberta, where he bought a "Stetson," annexed a quarter-section, and taught the little Doukhobours to sing "Rule Britannia." After four years of books, clinics, baseball, and rugby, he goes out to practice medicine with a goodly store of knowledge, a twinkle in his eye, and a bald spot on the top of his head worth at least \$500.00 a year.

TROW, CHARLES EDWARD.

"Be silent, and people will think that you are a philosopher."

Charlie was born in Toronto in 1887. He received his primary education at Jarvis Street Collegiate Institute, where most of his time was devoted to football, hockey and athletics. He entered the study of medicine with the class of '11, and has always been popular with his fellow-students. An enthusiastic golf player, he will always be found on the Rosedale links if time and weather permit. He is a member of Nu Sigma Nu, an earnest student, and the good wishes of the class go with him in his chosen profession.

TUTT, WILLIAM ROBERT.

"The mind's the measure of a man."

Will was born in the rock-bound town of Parry Sound in the year 1887. He received his education in his home town, obtaining his Junior Teachers' certificate at the age of fifteen. After trying his hand at drugs and teaching, Bert, as he is popularly called, came to Toronto University to begin his study of Medicine in the 1911 Class. In his Third year he was Class Assistant in Physiology. His vacations have been spent in the wilds of New Ontario, developing muscle and incidentally "browning up." Throughout his college course, Bert was identified with the Y.M.C.A. of the University. We predict for him a successful post-graduate career.

VAUGHAN, MERRITT CARLTON.

"Carl" first sat up and took notice in Elcho, Ontario, in 1889, but, not contented with his first place of abode, he migrated southward to Fork's Road; here he passed his boyhood days and attended the Fork's Road public school. Early in life Carl showed an ambitious desire for higher education, and on graduating from the Dunnville High School he decided to take up Medicine. At the early age of seventeen, he began his university course with the class of '11, being one of the youngest students in that large class. In his third year he had the misfortune to contract scarlet fever, but, thanks to his previous good work, was awarded a well-deserved agrotat standing. We join in wishing Carl a prosperous career.

VEITCH, AMBERT HASTIE.

"Doc" was born at Linwood, but resided for the most of his life at Port Elgin. The bracing Lake Huron breezes, and lunches between meals, have developed the manly form which one day will be the foundation for a silk hat. "Doc" spent one year in business, but decided there was not sufficient scope there to smoke except after tea, so he hit the Medical College in 1907. He has come through unscathed in spite of the fact that he diets himself with his work. He will make a good doctor, for he has got a hold on some of the fundamentals and is not afraid to use them.

WALDRON, CARL W.

Carl was born in 1887. In due time he presented himself for kindergarten instruction and his troubles began. He matriculated from Harbord Street Collegiate Institute in '05, and the fall of that year found him entering upon the study of Dentistry and Medicine. Carl takes a deep interest in his work and has made many friends among his fellow-students during his six years at U. of T. In his final year he had the honor of representing the Meds at the Dental At-Home. He is a member of Nu Sigma Nu fraternity.

WARE, FRANK B.

Frank Ware was born in Montreal, and later moved to Toronto. After completing his preparatory education, he spent some time in a bank, but deserted that calling for the lure of the dissecting-room. He does not let work spoil his appetite, but if the professors permit he will make good in his profession.

WESTON, FREDERICK WILLIAM.

"Of their own merits modest men are dumb."

Fred was born in this city some twenty odd years ago. Finishing public school, he divided the next few years between business, music, and the pursuit of happiness. Tiring of the former, he entered Woodstock College in 1902, and emerged two years later with the gold medal. His next four years were spent at McMaster University, where he distinguished himself both in lecture hall and on the athletic field. Entering Medicine in '08, he has pursued a very creditable course, and we predict for him a bright and prosperous future.

WHITTEMORE, WILLIAM LAWRENCE.

"Lawry" was born in Toronto in 1886, but passed his youthful days in Chicago, winning his matriculation in the Lewis Institute Engineering School. The "land of the maple" reclaimed him, and he entered the B. & P. course, graduating in Arts in '09. In Arts his popularity brought him many executive honors and a membership in the XIII. Club. In Medicine, he was elected to the Llewellyns Barker Club. Since continuing in Medicine, he has generously given of his time and energy to the work of the Y.M.C.A. On graduating, he will take with him the deep regard of his host of friends.

WILKINSON, WILLIAM MORLEY.

"A friend, noble and sincere."

Morley, commonly known as "Wilkie," was born in the picturesque village of Morpeth, on the old Talbot Road. After receiving his preliminary education here, he attended the Ridgetown Collegiate, matriculating therefrom in 1902. Always athletic, we see his name mentioned as one of the stars in the R. C. I. football champions in the spring of '03. In the fall of '04 he attended the Chatham Model, and spent the succeeding three years with the younger generation of Selton. The fall of '07 brought him among us, and in '09 we find him captain of Senior Meds soccer team. He is now known by all to be a student, a cheerful companion, a true and useful friend. His classmates will watch his future with great interest and expectation.

WILSON, WALLACE ALGERNON.

Wallace Algernon Wilson was born in Morden, Manitoba, 1887. His preliminary education was taken in the Ottawa Collegiate Institute. After matriculating, he decided to come to Varsity and enter the B. & P. course. In '09 he graduated in Arts, and the next term he joined the year '11 in Medicine.

WILSON, CLEVELAND ROY.

"There is more in him than thou understandest."

Roy first made known his intention of carrying on a separate existence on July 1st, 1888, in the town of Brampton. The Dominion Day boy soon moved to Toronto Junction, where he received his primary education, matriculating in 1906. He entered Medicine in 1907. His natural good humor won him a place in the hearts of many men, not to speak of the ladies, with whom he has always proved a general favorite. He has shown the happy faculty of being able to "Work while he works, and play while he plays." We can see plainly that, with the determination which has characterized his college life, nothing can prevent him from being a great success in his professional calling.

WILSON, JOHN PARR.

"Nobleness of character is nothing but steady love of good, and steady scorn of evil."

In 1886 J. P. first beheld a beautiful May morning in Peel County, Ontario. He received his public school education at Mt. Wolfe and Tottenham, afterwards completing the teachers' course at Barrie. After four years of painstaking work as teacher in Mono and Adjala, he entered Medicine with class '11. In spite of his characteristic quietness and reserve, he has won a large number of sincere friends, and those who know him best appreciate his sterling qualities. His career as a physician will be attended with the sure and steady progress which follows sound and thorough work.

YELLAND, HERBERT MAXWELL.

"Men like bullets go farthest when they are smoothest."

The object of this sketch was born in the city of Peterboro' in 1888. He graduated from the local Collegiate Institute in 1903 and afterwards engaged in business for four years. In 1907 he came to Toronto and entered the Medical course, and his career in the University has been very creditable and profitable. He has played on the Medical basket ball team each year and, while not taking a very prominent part in athletics, has always combined work and play. He was a member of the Students' Parliament in his second year, and has also held other positions of like responsibility.

YOUNG, CLARENCE RANDOLPH.

"He speaketh not and yet there lies A conversation in his eyes."

Clarence R. Young was born in 1887 at Guelph. He attended public and High School at Guelph and Model School at Elora. He then taught school for two years, and entered as a student in Medicine in the class of 1911. He has shown his interest in military affairs by serving both in the infantry and the artillery. In his third year he represented the Medical Faculty at the Macdonald Hall and O. A. C. reception at Guelph. Our friend is as much at home in the ball-room as at his books, and has been a universal favorite with the class, and we predict a successful professional life for him.

YOUNG, ROLAND WILBUR.

"A' was a merry man."

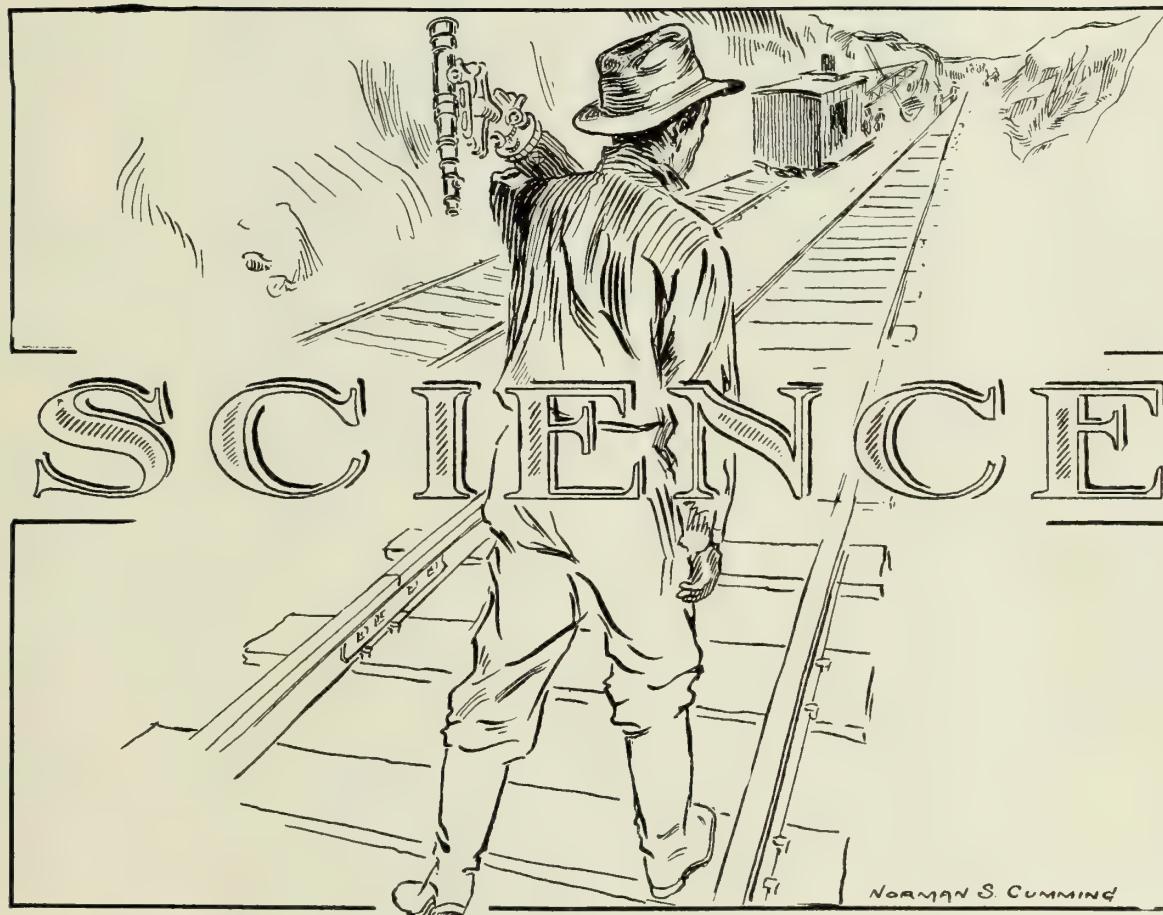

Rolly was born in Waterloo, Ont., in 1883. Matriculated from Woodstock College in 1903 and then proceeded to an Arts degree at McMaster. Here he played for two years on the Senior Rugby team, and in the winter of 1905-6 played hockey with the champion Marlboroughs. He also put in three years in pro. hockey and made a name for himself which will not soon be forgotten. His athletic record would not be complete without passing mention of his triumphs at baseball and "soccer" with various teams. Rolly is an all-round good fellow and we know that wherever he goes his never-failing fund of wit and his happy disposition will win him many friends. He is a member of Alpha Kappa Kappa.

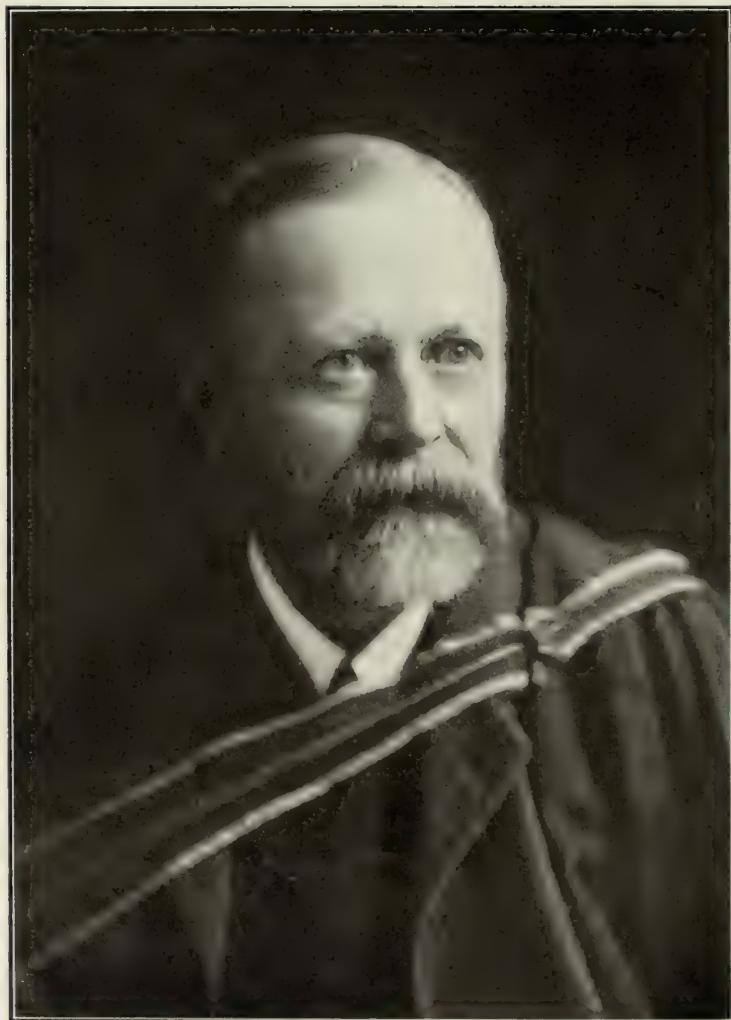

ZUMSTEIN, ERNEST WILLIAM.

"That's a colt indeed. For he doth nothing but talk of his horse."

Ernest William Zumstein, having been chucked out of Heaven for talking horse, made his earthly debut at Winslow, in Lincoln County, in the year 1884. His early education was of the best, that of the farm and country school. After a brilliant course at Smithville High School, he broadened his outlook by four years spent in the teaching profession. Then, to attain his cherished ambition of becoming a "saw-bones," he entered Toronto University with Meds '11, and while here has made many friends, who predict success with confidence, for, while he will not make a scientific recluse and has an absorbing interest in horses, his interest in his patients will be most sympathetic, the kind of interest that pays.

DAVY SUTHERLAND'S DREADFUL DREAM

What did not happen at the Assault-at-Arms

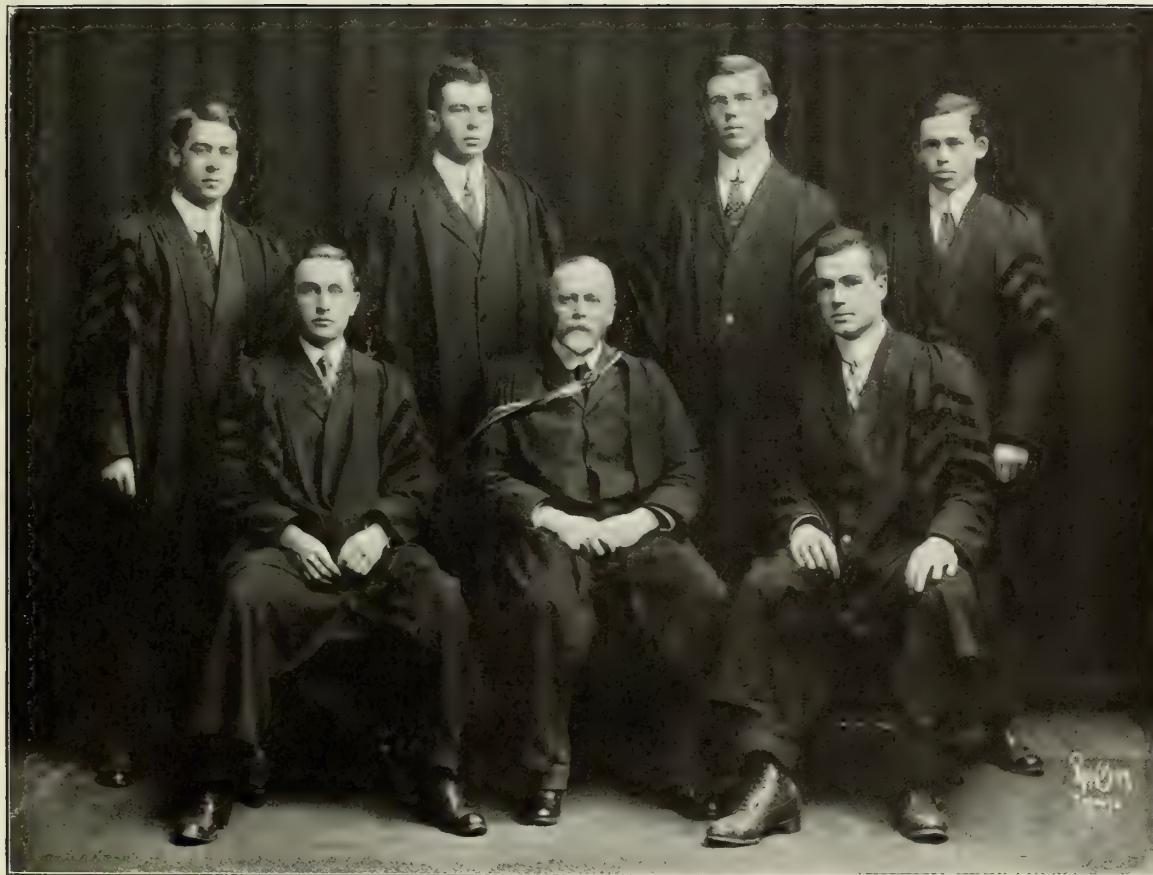

Science 'II

THREE years ago from the school, the farm, the shop and the field we gathered at the "old red schoolhouse," wondering what of life three long years had in store for us. The Gates of Wisdom stood invitingly open for us to take what we would. All were ambitious to get that which would ensure most success in the larger university of life's work. The lecture and the laboratories were but necessary parts of the day's work; the examinations but milestones marking our progress toward that broad future which gives unlimited opportunities for work and expansion. And yet of those who entered with us were many who did not accept the privileges offered, who were unwilling to undertake the struggle for the great end they had in view. Unmindful of the hard, unceasing toil that must accompany success of any kind, and, attracted by the less irksome things of life, they dropped behind. But, happily, there are the majority who have fought the fight and attained the crown of victory.

But now we come to the end. The Class of Science '11 has done its part, and from now on its members will be merged into the great mass of graduates which yearly is adding its lustre to the name of Toronto. We see university institutions as flourishing as ever, the men of Science still maintaining their prowess on the athletic field, the Engineering Society still holding its strong position, sound and strong in a united membership. So we pass out the last of the three-year men, for with us the Faculty of Applied Science loses that distinctive feature of the old "School"—the three-year course. May future graduates accomplish as much in the Engineering world as those old "School" men.

Many friendships have been formed in these three years, some to last through life. Perhaps some of us who have worked together are separating never to meet again. "Ships that pass in the night and speak each other in passing," but the world is a little place and many will foregather again at some end of the earth and fight again the battles and live again the triumphs which were fought and won at the good old University.

EXECUTIVE OF CLASS 1911, S. P. S.

J. A. Elliott

W. S. Steele

K. A. Farrell,
Vice-President

W. J. T. Wright

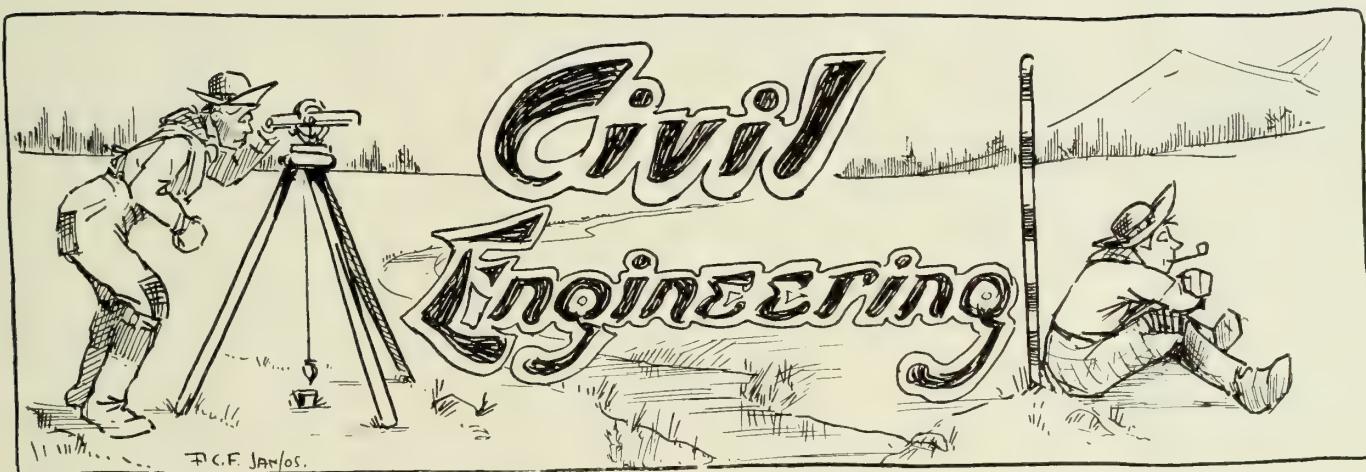

R. J. Fuller,
Secretary-Treasurer

Dr. Ellis, B.A.Sc.,
Honorary President

W. T. Curtis,
President

PROFESSOR ANGUS, B.A.Sc.

F.C.F. Jan/O.S.

ALISON, ALBERT E.

*"Happy am I, from care I'm free,
Why aren't they all content like me?"*

Albert E. Alison, a Prince of Good Fellows, owns Toronto for his birthplace. Bert received his primary education at St. Andrew's College, where he gained his colors in Rugby, Hockey and Cricket, and first showed the managerial ability, for which he afterwards became so justly famed, as manager of Varsity First Rugby Team, champions of Canada in 1909. He has had the happy faculty of being able to commingle social and athletic affairs; for, besides playing on several Mulock Cup teams, he was Secretary of the Book Club in his second year. Bert has a most genial smile and the happiest of natures, and we are sure that, even if he lived deep in the woods, the trail to his door would be a well beaten path.

ALLAN, LESLIE B.

*"The heights by great men reached and kept
Were not obtained by sudden flight,
But they, while their companions slept,
Were toiling upward in the night."*

Leslie B. was born near Crystal City, Man., 1889, and, while quite young came East to obtain an education. After sixteen years he matriculated from Brockville Collegiate Institute. Then he entered the business world but, being adapted to engineering, he finally enrolled in the Civil Section of the S.P.S. He was "Southpaw pitcher" on School Baseball Team and was also renowned member of Jennings' Cup Champions, besides playing indoor baseball, etc. His many friends sincerely wish him every success connected with his profession.

BADGLEY, LEON AMEY.

"He'll not barter truth to serve the hour."

Leon Amey Badgeley was born in the county of Halton on September 28th, 1889. He received his public and High School training at Canfield and Caledonia respectively—matriculating in 1906. Engineering inclinations lead him to enter the Canadian Westinghouse Company, Hamilton, where he held a responsible position for two years. It was here that environment helped him to decide definitely for the Civil Engineering Course. At the School, Leon has always taken a high stand in his class, having received honors in final examinations. His quiet earnestness and sincerity, together with his faithfulness in the details of his work, will assure him success in life's undertakings.

BARTLEY, THOMAS HOLMES.

Thomas Holmes Bartley was born in Toronto, April 21st, 1889, the Irish child of Irish parents. In a Toronto kindergarten he made his entry upon the Toilsome Road which leads to learning—continuing the journey through the public schools of Collingwood, Barrie and Orangeville, until, in 1904, he was entered at Jarvis Collegiate, Toronto. In 1907, he obtained his Junior and one year later Honor Matriculation, subsequently joining Year '11 of S.P.S. The eagerly expressed ambition of his infantile mind "to be a policeman" was ultimately cast aside, and to-day he stands among his fellows—a promising young embryo engineer. He has in the intervals of College lectures experienced nine months of practical work in the wilds of Northern Ontario.

BERKELEY, GARNET LAWRENCE.

*"And still the wonder grew,
How one small head could carry all he knew."*

Garnet is numbered among the May flowers which sprang up in Belleville, Ont., in the year 1890. There he obtained his early education and took his matriculation in 1906. Then he said, "I shall survey the world." But Garnet, after two years spent at land surveying in Northern Ontario, migrated to Toronto and being one "whose motto is meekness and peacefulness," he entered the S.P.S. with Class '11 in 1908. With a bright and genial disposition, Garnet has won many friends and enters upon his career as an engineer with the best wishes of all who know him.

BOWMAN, FRED.

"He was little:—But, oh, my."

Fritz was introduced into this world of toil and worry on October 24th, 1889, in the city of Berlin, Ontario. Here he received an excellent public and High School education, taking special interest in the Technical Branch, and, in return for this, he gave the masters ample reason to remember him. After graduating he decided to pursue the Engineering profession, and entered School with the Civil Class of 1911, where he became popular with his fellow students. He was on the University Gym. Team in his second year. His many friends join in wishing him every success in his life's work.

BROUSE, WILLIAM HENRY DAVENPORT.

He was born in Toronto in 1891. He attended school on Avenue Road, and later at St. Alban's, obtaining at the latter institution, Entrance, and in 1908 Junior Matriculation. From the first, there was engendered in him a proclivity to investigate things mechanical. In addition to building several electrical machines he was very successful in constructing two engines, the latter one being entirely of his own design and workmanship. In the face of these forecasts for a brilliant mechanical course we find him joining the Civil Engineers, and becoming a devotee of the transit and the level.

CAMERON, CHARLES S.

*"Twould take a Burns and a Napol-con
Rolled up in one to make a C. S. Camer-on."*

Cam. was born in Beaverton and, after receiving his preliminary training at Lindsay Collegiate, did not take long in acquiring and putting into practice the desire to see the West. After a couple of years in Winnipeg we find him on the trail for Dawson City, where he arrived in '05. The next three years were spent in newspaper work and—looking at the midnight sun. The U. of T. was the next stop-over and since 1908 he has been prominent in his Year, and also in University athletics as a member of the Track Team.

CAMPBELL, CHARLES DONALD.

"Nosce te ipsum."

Born in the little settlement of St. James, Manitoba, on August 23rd, '89, true to his Celtic blood, our friend early developed the thirst for education. Aided by the worthy institutions of Ottawa and Cleveland public school systems, he endeavored to pry a few gems of wisdom from the rock of knowledge. After matriculating from Ottawa in 1907, he determined to become an engineer, and so, entering S.P.S. in '08, we find him graduating with the Class of '11 as a "Civil," after a very creditable course. An ardent "Y" man, a military enthusiast of the 2nd Canadian Engineers, and an equally enthusiastic "School" man, generations yet unborn are sure to profit by the work of Charlie.

CHANDLER, RALPH BORTHWICK.

"Chan." was not discovered by Dr. Cook or Capt. Peary. Mr. and Mrs. Chandler, Stratford, Ont., have claimed that honor since July 15th, 1889. Ralph neither assumes any responsibility for the publication of Chandler's Calculus, nor poses as his namesake the astronomer. His early education was received in the Classic City public schools and Collegiate Institute. On graduating he entered Civil Engineering in Varsity with the Year 1911 magnates, and has as yet a creditable record. As a sprinter he shows "some class," having made the track teams of '08, '09 and '10, and capturing his "T" with Varsity's champion Intercollegiate Relay Team. His speciality is Sanitary Engineering, and, judging from his past achievements, we can assure him a successful future.

CHERRY, PERCY GORDON.

"Chérisse l'espoir."

Percy G. Cherry lives to learn and thereby learns to live. He was finally bequeathed to the yearning world in the city of Toronto. He spent some of his babbling youth in England, dissipated many fat years in the Queen City, roamed the boundless plains when about twenty and allows Winnipeg to use his name in advertising itself. He has many of the capitalistic proclivities of the financier and yet was successful once as a junior engineer to a large electrical firm. His soul runs out to well-creased trousers and disports itself with Omar Khay-yam when feeling good. He abhors the ways of the swash-buckler, avoids the cement walks of the wicked, but hath a good eye for neat affairs in muslin.

CLARK, HIAL JACKSON.

*"Ah, make the most of what we yet may spend,
Before we, too, into the dust descend."*

In 1888, at a very tender age, Clark decided to visit the planet Earth. It was near the village of Wellington, on the shore of Lake Ontario, that he stepped off and 'twas there he decided to stay. Public school there, along with Picton High School, opened the way for the Junior Teacher's Certificate obtained by Jack in 1906. Deciding not to go into the ministry, Jack, as a compromise, joined Class '10 at "School." Staying out a year, he resumed his studies in the fall of '09, with Class '11. Jack's main athletic diversion has been on the diamond: may he play the game of life as well as he plays ball.

CLARK, FRANCIS W.

A wanderer over the face of the earth, Clark came to Toronto at the tender age of twelve. Born in St. Paul, he lived in Chicago, Boston, Buffalo and other centres. In Toronto he apparently found peace. After gaining his matric. from Harbord, "Honey" sought release from books in the outer world, distributing some years between two of Canada's largest corporations. Not satisfied, he joined Class '10, but mercenary inclinations led him to stay out a year with the Ontario Hydro-Electric. "Honey" is a good sport. Indications point to his entering the engineering profession at an early date along wholesale and retail lines.

CORNELL, CHARLES WALTER.

"He was a gentleman in whom I built an absolute trust."

C. W. Cornell claims as his home the county of Lambton, which has produced and is producing so many of Canada's foremost public men. His earlier years were spent in the hard work of the farm, but the lure of the city held him and he became an electrician in Toronto. Ambition, however, still held its beckoning lamp before him, so, snatching his education as he went along, he finally matriculated and entered the Faculty of Applied Science. A conscientious student, a diligent and capable worker, and a loyal friend, Cornell is ranked high by those who know him. High ideals, backed by a restless ambition and a strong will, will ensure his success in engineering work.

CROUCH, MILTON E.

"A short life and a gay one."

Crouch, Milton E., of Rochester, N.Y., better known as "Squat," after gleaned a preparatory education from East High School and pursuing knowledge further for two years in the Arts Course of Rochester Varsity, determined to add the finishing touches by cutting a few leaves from the Toronto "arbor," whence he graduates as a polished "Civil." His pleasant voice and his merry quips have endeared him to his fellows, who unite in hoping that he has squatted permanently on this side of the line. The attitude of humility suggested by his name will not deter him from rising to a lofty stand in his profession.

CUMMINS, OLIVER.

"The world knows nothing of its great men."

Oliver Cummins came to this world some three and twenty years ago, crying vociferously for a hockey stick and a baseball. In due course he started to the Walkerton High School, graduating with a first-class certificate at the age of seventeen. He was a Knight of the Birch Rod for four years, but finally entered the Class of '11, taking honors as he proceeded. Oliver has taken an active part in sports, being manager of the Intermediate School Hockey Team, and has also played in the Senior and Intermediate O.H.A. His holidays have been spent prospecting in Gowganda district and on railroad work in the West. During his college course he has made a host of friends, who predict for him an honored and dignified position in the Engineering world.

CUNNINGHAM, CHARLES HERBERT.

"Can any good thing come out of Hamilton?
Come and see."

Yes! the Ambitious City claims our friend Charlie Cunningham as her own product. Of course, 'tis not his fault; as he was born there and for several years considered himself too young to make an effectual protest. Coming to years of more discretion he joined the S.P.S. in the hope of one day becoming a Civil Engineer. To our surprise he seems to be in a fair way to fulfil his ambition. We would advise him to take out an accident policy, however, if he intends to continue to play football against those rough Arts men.

CURZON, JOHN HOWARD.

"Beastly, ripping, old chap."

Early in 1890 our hero was first introduced to Miss Toronto. No silver spoon has been preserved to prove that it once protruded from his mouth, but it no doubt did exist. Acquiring a knowledge of the "R" triplets at public school, Jack gained, in '07, his Science Diploma from the Technical High School of his birth-place. It was then he decided to join the elect. Jack is a student member of the Canadian Society of Civil Engineers, and belongs to the 2nd Field Company Canadian Engineers. His extensive experience includes surveying of mining claims in Larder City, Government work in Missassauga Forest Reserve and Rainy River district, and railway work with the Algoma Central. We think it time Jack settled down.

DAVIS, WILLIAM BOYD.

*"Here's to the light in woman's eyes
That lies and lies and lies and ——."*

W. Boyd Davis came in August, 1889, to old South Simecoe, the banner county of Ontario, and liked the neighborhood so well that he decided to stick around awhile. After running the show at home for six busy years, he quit work and went in for education, leaving Ivy school in 1906 with a Junior Matriculation Certificate. The following year was spent in Barrie Collegiate Institute as preparation for his entering S.P.S., whither he came in '07 to take up Civil Engineering. Not content with the onerous duties of the regular work, he entered, also, in his second year, upon an unusually heavy correspondence course which entailed the expense of so much time and thought that he passed over into the Class of 1911, and thereby hangs a tale.

DUNBAR, WILLIAM BOWIE.

*"King of two hands, he'll do his part,
In his own useful toil and art."*

Will was born August 8th, 1890, in Pickering, Ont. This village was responsible for his public school and part of his High School trainings. In 1905 Pickering College was burned, so Willie migrated to Whitby Collegiate. Matriculating in '07 he graced their Fourth Form for a year. Then, aspiring to higher things, he came to Toronto and entered the Civil Section of Class '11 S.P.S. Bill is some wrestler, and it is rumored that he once played a game of rugby. He has always stood well up in his class, and it is the belief of his friends that he will succeed as well in his future work as he has at school.

ELLIOTT, GEORGE REGINALD.

"A heart to resolve, a head to contrive, and a hand to execute."

Reg. started life in the usual way at Goderich in 1888, and then followed the simple life until matriculating from the G.C.I. in '04. Senior Teacher's standing crowned further efforts, after which he became one of our would-be engineers. Two years an active participant in Toke Oike enthusiasms and honor reward for academic endeavors with Class 1910 were followed by a year behind the gun on Railway and Canal Engineering. Returning to the School to graduate with '11, he helped win the Brotherton Harrier Cup, and was on the Varsity team in the Intercollegiate Cross-Country Meet—incidental to that never-to-be-forgotten trip to Kingston. A 2nd Field Company Engineer and the Union's favorite pianist.

ELLIOTT, C. FRASER.

"A bold, bad man."

From the very first day he forced his way into the S.P.S. building and enrolled as C. F. Elliott, Fraser has steadily gained in reputation, until at the present day he is little short of notorious. Born in Winnipeg, 1888, the spirit of the West still animates him, and there is practically no form of athletics into which he has not enthusiastically plunged. The present status of the Gym. Club is largely due to his tireless activity in its interests. On the wrestling mat, a second Hackenschmidt, in the swimming tank a regular hell-diver—Fraser has shone with no common brightness in every sport to which he turned his boundless energy. His efforts have been crowned with success for medals—"as the sands of the sea for numbers,"—and the senior colors decorate his manly bosom. May a like success attend his life work.

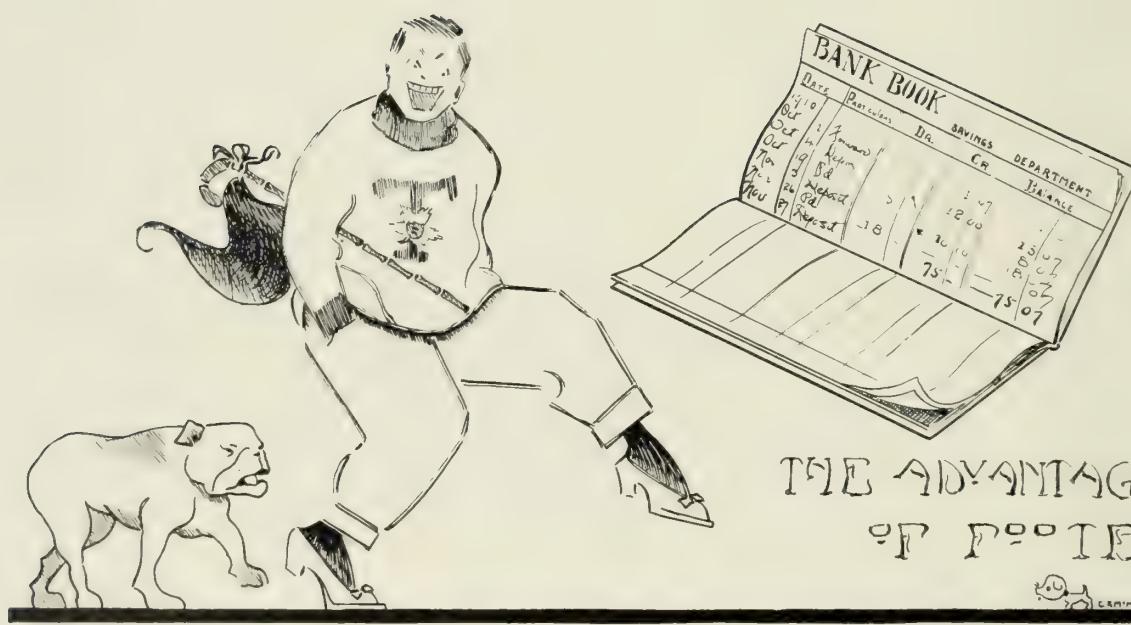

FARRELL, KING A.

*"We will not see his like again
For months and months and months."*

The most noticeable feature in the early life of K. A. was the tendency on his part to do nothing that would cause any excuse for the usual prognostications of future greatness. King was just an ordinary, average boy, who first patrolled the vicinity of Belleville and later the halls of Cornwall Collegiate in the customary style. After a year at Parkdale C. I. he entered the '11 Class and since then has been one of the best known and most popular members of the Year of which he is Vice-President.

FLOOK, SAMUEL EVERETT.

Samuel Evert Flook, better known as Sammy, was born in Willowdale in March, 1887. He received his public school training in that place, and after passing his entrance examination, remained out of school for several years. Later on, however, he took up matriculation studies without attending school and, in 1908, he passed his examination at Toronto University. In the fall of that year he registered in the Civil Engineering Department of the Faculty of Applied Science and, since entering, has always stood well in his annual examinations. He took a great interest in gymnasium work and succeeded in winning the silver medal for wrestling in his class. Since entering the School he has been employed on Ontario Land Surveyor work during vacation.

THE ADVANTAGES OF FOOTBALL

Page 13

FREEMAN, J. ROY.

"He is a freeman whom the truth makes free."
—Shakespeare Allan.

J. Roy was born at Brighton. While quite young he learned to make a bee-line for the cupboard, thus developing his engineering instincts. After matriculating from the Brighton temples of learning, he enrolled with the civil section of the S.P.S. where he is learning to put his theories into practice. His many friends join together in wishing him every success in his future life.

FYFE, HERBERT DIXON.

After having worried a pass from the Guelph Collegiate, Herbie decided to become a Civil Engineer, and so the Toke Oikes claimed him. He is a member of the Phi Sigma Tau Fraternity. Throughout his course Herbie has been an ardent supporter of athletics and has played in the Mulock Cup games. He has made a creditable showing in his studies and will depart from the "School" with the best wishes of all.

GRAFTON, SYDNEY GORDON.

Was born in Toronto on April 4th, 1891. He started his education at the Model School, Toronto. From there went to U.C.C. and matriculated in 1908, coming to the School the same year, and has since been noticed at several lectures.

HAMILTON, GERALD MUSGRAVE.

"Contemplation makes a rare turkey-cock of him."

"Ham," began a strenuous career in 1888. Graduated from Berlin Collegiate in 1905, and after some years of commercial life in Toronto we find him in Year '11. Indulgent professors having allowed him to escape the obstacles which engage the feet of the unwary, he here makes his bow to the world as almost an Engineer.

HAMILTON, JOHN RAYMOND.

"Hammy" is from the West, having been presented to a long-suffering world in Moosomin, Sask. In the due course of time he grew up and after having learned all that there was to be learned at St. John's College School in Winnipeg, he came to Toronto and enrolled with the "Meek and Peaceful" in Civil Engineering. He is a member of the Phi Sigma Tau Fraternity, and throughout his course has shown himself to be a capable student and a good fellow.

HUFF, ALFRED JAMES.

*"I'm a peaceful minded feller,
But when I get goin'—bing."*

'Twas in Chatham on September 12, 1889, that Mr. Albert J. Huff received his first glimpse of Canada and things in general. At the age of three years he accompanied his family to Edmonton, Alta. Here he grew up, and, after matriculating, put in two years' university work in Alberta College. Then, naturally, he came to the S.P.S. Here he has shown himself to be capable of taking honors while still enjoying himself and doing his duty to the "School" as a hockey player. During his holidays he has been profitably employed "digging gravel" for the Huff Grading Co., Edmonton, and as assistant chief on D.L.S. work in northern Alberta. Surely a great future awaits him.

The Engineering Society Annual Dinner

THE twenty-second annual banquet of the Engineering Society of January 19th has been added to its lists of predecessors as a success from every point of view, and the Executive upon whose shoulders rested the responsibility of the undertaking are reaping a reward of praise for their untiring efforts.

To undergraduates, graduates and guests of the Society the dinner provided ample entertainment. To Schoolmen the event has been a yearly opportunity of assembling one of the strongest organizations of its kind, to meet with graduates of other years, and to listen to men who as statesmen and engineers are the foremost in the land.

To graduates the banquet is a reunion, a rendezvous of old classmates and instructors, and the founding of an acquaintance with those still in their student days.

To these gentlemen present as guests the dinner gives an idea of the magnitude of this faculty of the University, of the student *esprit de corps* that is so necessary to its advancement, and of the forces behind it all, on which the student to-day relies so much.

Upwards of six hundred guests were in attendance and Mr. A. D. Campbell, President of the Society, officiated as toastmaster. He extended a welcome to all, on behalf of the Faculty and its students, and in addressing the members of the Toronto Board of Trade dwelt briefly on the fact that some of their interests were along lines parallel to many of our own future interests.

Mr. L. E. Jones, '11, proposed the toast to "Canada" and coupled with it the names of Dr. Robertson, Chairman of the Royal Commission on Technical Education, and Major Leonard, of the Board of Governors.

Mr. R. A. Sara, '09, then proposed the toast of "Canadian Industries," and Mr. R. S. Gourlay, the President of the Toronto Board of Trade, was called upon to reply. The speaker made mention of the many classes of industry that had not reached as yet "the infant stage" in Canada.

President Campbell then called upon Mr. L. R. Wilson, '09, to propose the toast "The Legislature." In doing so Mr. Wilson reviewed the interest the Legislative Assembly had taken in the engineering progress of the country, and in endeavoring to further technical education.

The Hon. J. S. Duff, in response, expressed his appreciation on the subject of military training for the Canadian boy, and also voiced his intention of watching with interest the great progress of the University, especially of the Faculty of Applied Science.

"The University" was proposed by Mr. J. Galbraith, Jr., who likened its success to that of its football teams, and pronounced "team work" as being the mainstay of success in both. He voiced the appreciation of the student body with regard to the magnificent gift of buildings lately presented by the Massey Estate.

President Falconer, upon rising to respond, was received with the usual enthusiasm, which bespeaks the place he holds in the hearts of the undergraduates of the Faculty of Applied Science.

In replying to the toast "The Faculty," proposed by Mr. Chas. Webster, Dean Galbraith commanded the rapt attention of every hearer as he reminiscently reviewed the progress of the "School" since the days, thirty years before, when Dr. Ellis and himself constituted the teaching staff, and the total enrolment consisted of seven students.

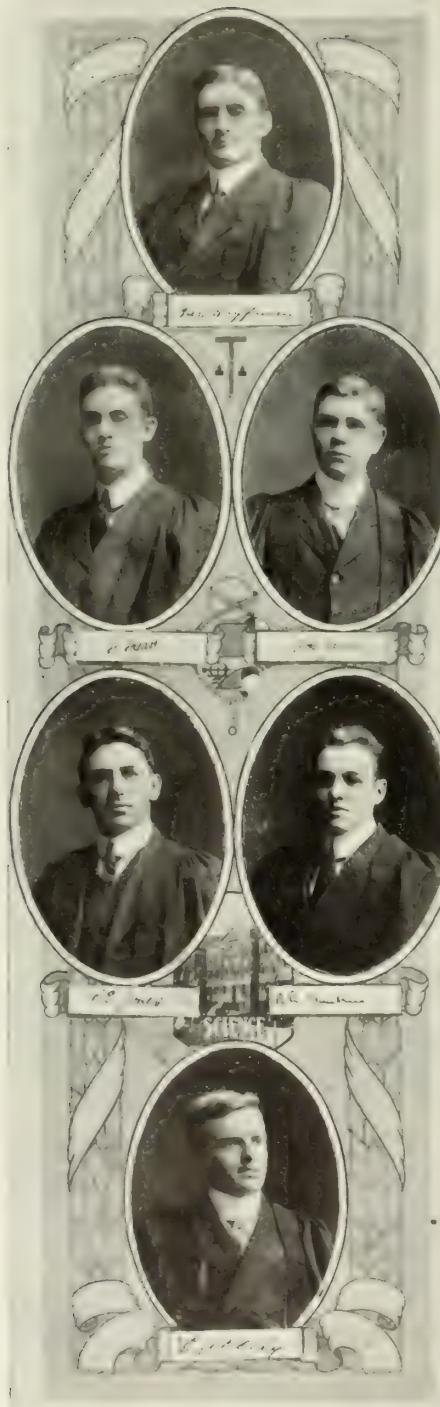

Mr. W. A. O'Flynn proposed "The Engineering Profession," and coupled with it the name of an old and most successful graduate, W. J. Francis, C.E., of Montreal. The address of Mr. Francis, as that of one student to others, appealed strongly to every student and young graduate present, and could not have been replaced by a more fitting or more appreciated response.

The lengthy programme of speeches was relieved by musical selections, rendered in a most pleasing style by the Science Octette, the members of which this year are: Messrs. W. A. O'Flynn, W. A. Costain, P. S. McLean, G. B. Macaulay, J. H. Craig, W. C. Blackwood, R. B. Chandler, G. J. Mickler. The Octette was under the leadership of Mr. Clayton E. Bush.

The success of the twenty-second annual dinner was due to the united efforts of the entire Executive, and to the able assistance of Prof. Wright and others of the staff.

THE ENGINEERING DINNER.

HUFFMAN, KARL.

*"He was in logic a great critic,
Profoundly skilled and analytic;
He could distinguish and divide
A hair 'twixt south and southwest side."*

Karl was first disclosed to the chilly world on May 12th, late in the eighties. He migrated to Port Hope, but soon tired of the simple country life and returned to Toronto, where he again took up his studies in the Technical School. While there he was an active member of the lacrosse, Rugby and hockey teams, until he matriculated and entered the School with the famous Year of '09. But between good times and good jobs he is graduating with '11. He has been an enthusiastic supporter of the Varsity sports at all times.

HYATT, HUBERT.

Hyatt was born at Philadelphia in 1888, but in the same year came to Toronto, which has since been his home. In a private school in Parkdale he learnt his A B C's and primary mathematics before leaving for the city of his birth to attend Bryn Atho Academy. Here he received his preparatory college education prior to joining Class '11 at School to take up his chosen profession—Civil Engineering. His honor standings at the examinations have been supplemented by two years' engineering experience with the C.P.R. in the Maintenance of Way Department on the Lake Superior Division. His friends wish him all success.

JARVIS, RALPH HIMSWORTH.

*"Along the strangely varied path of life
Pursues the even tenor of his way."*

R. H. Jarvis entered into being on October 22, 1890. His first education was received at the Toronto Model School, where he spent six pleasant years. In 1903 he entered upon a High School course at the Jarvis Street C. I., where, after conducting himself in a very creditable manner, he passed the Junior Matriculation Examination of 1906. He spent one year in Arts, taking the M. and P. course, and then entered the Faculty of Applied Science, taking up Civil Engineering. He has passed both years at "School" with honors, and has spent the vacations on survey work. We are certain he will be an honor and a credit to his splendid profession.

JONES, LOUIS ELGIN.

"Industria in agendo, celeritas in confiendo, consilium in providendo."

L. E. Jones was born and reared in St. Thomas, Ont. It was there he received his public and High School education before graduating in Arts from University College. At the School, his career has been one of usefulness and distinction. In his first year he was President of his class, while in both the early years of his course he was an active member of the Engineering Society Executive. Besides, the honor lists show that he did some work sometime. For his executive ability, for his skill in handling men, for his qualities of fairness and broad-mindedness, he is none the less remarkable than for his enthusiasm in any good cause and his devotion to friends.

JUNKIN, ROBERT LAWRENCE.

*"Do I view the world as a vale of tears?
No, reverend sir, not I!"*

Nearly twenty-one years ago in Brockville, by the old St. Lawrence River, Lawrence first saw the light. There his scintillating wit and sparkling blue eye were a source of wonder to the villagers. Canada little suited this precocious child, for at an early age he moved to London, England, where he acquired his English accent. Always aspiring towards higher things, he moved to Hamilton, Ontario, and finally to Toronto. Here he attended St. Andrew's College and later spent a few months in Arts. Olly eventually settled down in S.P.S., where his brilliant success already gives promise of an even greater future.

KELLY, EDWARD ARTHUR.

*"Has anybody here seen Kelly?
Not Kelly from the Emerald Isle."*

The subject of this sketch was ushered into this vale of tears on a very auspicious date—July 1st, 1889, at Sarnia, Ont. Having absorbed his preliminary education in the Sarnia public schools and Collegiate Institute, and, being of an Engineering turn of mind, he duly wandered into the halls of the "School" and cast in his lot with the Civils. Throughout his course "Kel." has shown an honor standing and has also shown himself a good fellow. During his vacations he has been on the Engineering Staff of the C.P.R. on their Western extensions. He is a member of the Phi Sigma Tau Fraternity.

LAWLESS, NORMAN.

*"But, sure, he's proud,
And yet his pride becomes him.
He'll make a proper man."*

Norman Lawless was born in Hamilton, Ont., on December 16th, 1887. He inherited, along with a number of other commendable qualities, the ambitious spirit of his native town. As a child he was fascinated by the Incline Railway, and early determined to become an Engineer and build one himself. While still quite young he emigrated to Toronto, where he received his preliminary education, graduating from the Toronto Technical School in 1906. The following year he entered the Civil Engineering course at the "School." In one subject he excelled all others, and that was astronomy. Anything that Norm. didn't know about stars wasn't worth knowing. His easy manner and optimistic disposition have won him many friends who all wish him the success which surely awaits him.

LOWRIE, A. W. P.

*"The things we know are neither rich nor rare,
But wonder how the devil they got there."—Pope.*

The subject of this sketch was born in the town of Russell, Eastern Ontario. He received his earlier education in Russell and matriculated from Vankleek Hill Collegiate. Prior to his advent in University life in the fall of '08, he spent several years in newspaper work. Subsequently he was assistant on the Dominion Hydrographic Survey in Alberta. By occasional attention to work and his sense of duty to his fellowman, he has made his career at the School a successful one, both mentally and socially, and we predict for him equal success in the profession he has chosen.

MACBETH, ROBERT EDWARD ANDREW.

"'Gayety'—who would not?"

In Toronto, July 18, 1890, "Bob" opened his eyes, and, gazing upon a beautiful world, determined to grow and become a "big man." Since then, this growth has been sure, not only in size, but also in popularity and "book-lore." He graduated from Parkdale Collegiate in 1907, having gained such honors as two scholarships; winning the Intermediate Cross Country Run; captaining the 1907 champion second Rugby team. To the great joy of "'11 School," "Bob" located with them. First-class honors in his initial year satisfied him. Since then enough work to ensure a pass, with plenty of "Gayety," has sufficed. His summers were spent in fire ranging and topographical surveying on Vancouver Island. Success, Bob!

MACDONALD, FRANK MANNING.

*"A guardian angel o'er his life presiding,
Doubling his pleasures and his cares dividing."*

Frank was thrust upon the cold world in Toronto on December 13th, 1888, and received his preparatory school training at St. Andrew's College, where he made a name as an all-round man. On coming to S.P.S. he took part in the various sports, and has figured on the Jennings Cup winners and a couple of times with the Junior Varsity champions. He is well known and ought to be successful as a contractor, in which business he is now interested. He is a member of Kappa Alpha Fraternity.

MACLAURIN, JAMIE G.

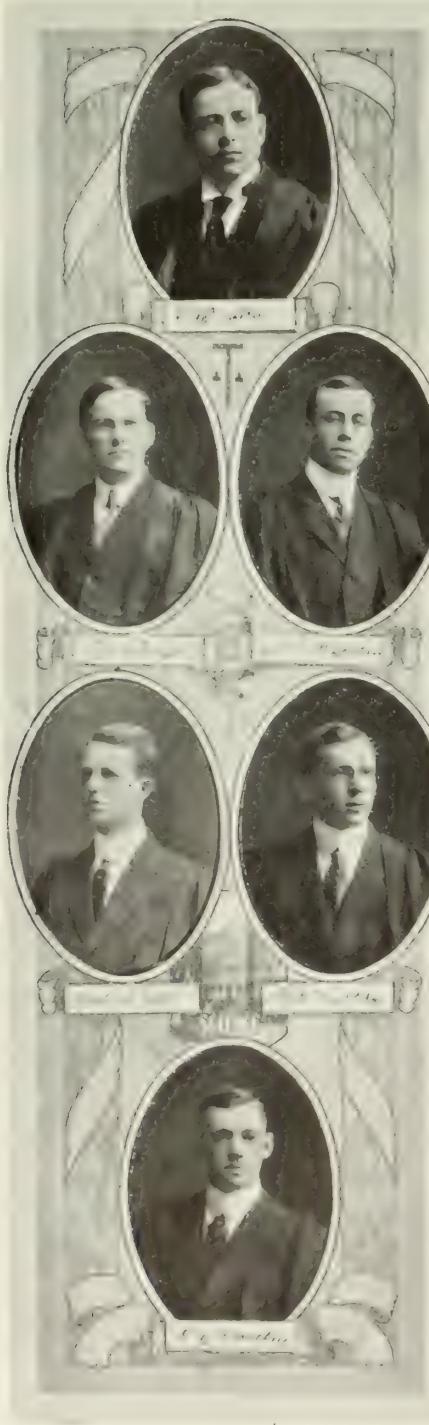

"He makes a friend where'er he goes."

When "Jamie" first opened his mouth at Lachute, P.Q., he let out a "Hoot mon!" Aye, that he did, "weel and brawly." History does not show where he received his rudimentary education, and we first hear of him at Vankleek Hill Collegiate Institute. In 1904 the "spirit of the West" appealed to him, and for three years his name appeared on the pay sheets of the C.P.R. The thirst for learning gaining possession of him, he entered the "School" with the renowned "Class of 1910," passing his Freshman year with honors. In 1909 we hear of him as draftsman with the T.C.R. on location, drawing a sled or carrying a load like a true, hearty Scotchman. Those who have been associated with him at College or in work join in wishing "Hamish" the best of the best. "Hamish, here's how!"

McANDREW, JOSEPH B.

"Strong to the end, a man of men, from out of the strife he passed."—Whittier.

Joe was born in St. Catharines, Ont., in 1899, received his preparatory education in the St. Catharines Separate School and Collegiate Institute, and matriculated to Toronto University in 1908. Being always more or less associated with engineers, and possessing a tendency towards mathematics, he entered S.P.S. with the Civils. Since he came among us he has added to his already numerous friends through his genial disposition, and all agree that Joe is a "jolly good fellow."

McCARTHY, THOMAS VINCENT.

"Oh, what a rare bird am I!"

"Mac" made his initial appearance in Chalk River, July 3rd, 1888. He was happy then, and has been happy ever since. After the usual formalities, he matriculated from Pembroke High School in 1905, and then turned his attention to the choice of a profession. After two years of Engineering work, he joined Class 1910, and finished his first year with honors. The second year was an unfortunate one, and diphtheria was responsible for his presence in 1911. Mac's cheerfulness and application should prove a valuable asset in his professional career.

McFADYEN, ANDREW J.

*"It is the moon, I ken her horn,
That's blinkin' in the lift sca hic;
She shines sca bright to wile us hame,
But, by my sooth, sh'll wait a wee!"*

Near the pretty village of Balsover was born our Highland laddie, familiarly known in the "School" as "Andy." On leaving the land of porridge and shorter catechism, he enrolled in the Lindsay Collegiate, graduating in 1905. The "School" being his lodestar, he joined the famous Class of 1910, but, through illness, he remained out after the first year, resuming work with Class 1911, and was warmly welcomed therein by many of his old friends. His brethren wish him every success in his profession and trust that we will yet have "mony a wee nicht thegither."

MCLELLAN, ROY ALEXANDER KENNEDY.

The peaceful stillness of a summer morning was broken by the strident cries of a new born babe. Harris-ton, Ont., in 1889, was the scene of the noise. When a mere slip of a lad, he, like Burns, followed the plow. Like most students, he didn't take his public and High School work very seriously. After talking the Faculty of Harris-ton out of a diploma, "Mac" strolled gracefully into the School with Class of 1911. He has spent his vacations in Municipal Engineering near his home. As a student he had plenty of hustle and integrity, and with these requisites he will make a success at anything he may undertake. His classmates join in wishing him unbounded success in his professional career.

MILLS, LESSLIE GORDON.

"My nature is subdued to what it works in."

Less. awoke to the difficulties of this world on November 11th, 1890, and has been busy solving them through his twenty years of eventfulness. He gleaned his early information at Jarvis Street Collegiate and St. Andrew's College, but soon tired of this elementary knowledge, so joined '11 to grapple with Engineering. Less. has always taken an interest in sports, and has made a large number of friends during his course. He will be back for his post-graduate course before he launches out into the world for himself. He is a member of Delta Kappa Epsilon Fraternity.

MURPHY, HARRY.

"Master of himself though china fall."

Harry was born at Belleville, January 2nd, 1887, but received his primary education in St. Basil's School, Toronto, and afterwards at De La Salle High School. Being ambitious, "The School of Science for me," said Harry, and away he marched to the handsome red building bearing that name. There he has ever displayed his customary courtesy of manner, which has won him many friends in the past and will win him many more in the future. In the year of 1910-11 he was elected Vice-President of the Civil and Architectural Sections of the Engineering Society.

NORTHEY, ROBERT KIRKPATRICK.

*"I've gotter motter
Always merry and bright."*

Robert Kirkpatrick Northey entered Varsity in 1908 from Harbord Collegiate and the Technical High School. By an error on the part of the examiners he slipped through his first year successfully, but in his second year went the limit in the line of those embellishments improperly called stars. He showed signs as a freshman of developing into a tennis player of note, but his summers on the T. & N. O. have interfered with his future in this respect. Bert is equally at home at a football game, in a scrap or at an afternoon tea, but his unobtrusive personality reserves the best that is in him for his intimate friends and his ability and geniality will carry him far in his chosen profession.

OKE, VERNER W.

"And certainly he was a good fellow."

"Okey" selected Toronto on October 21st, 1888, as the base of his first operations, but later emigrated to Gravenhurst, where he received the greater part of his early education. Returning to Toronto, he secured his matriculation from Harbord C.I. in 1904, and in the fall of the same year joined the Class of '07 in the School of Science. As '07 was not irresistibly attractive, we find him finally transferring his affections to '11, in which year he expects to graduate. Verner is one of the best-known men at the "School," and his large circle of friends wish him success in his chosen work.

PATTON, JOHN McDONALD.

"Lands he could measure and chemistry forgot."

Age—Old enough to vote.

Height—A fathom.

Weight—Should be more."

"Pat," as he is known to most of us, hails from the West, Regina, Sask., being his home. Here he received his High School education, and then, seeking practical experience on the "bald-headed" prairie, was engaged on Dominion irrigation surveys, and, later, on Saskatchewan public works survey parties. He joined Year '11 in the fall of '08 to satisfy his desire to be an Engineer. Last summer he was engaged on municipal work in Regina, Sask., and reports a most successful season, and we trust that succeeding years will be likewise.

PRATT, FOREST MILLEN.

At Ottawa, within sound of the great Chaudière, was born our friend Millen in 1891. After receiving his preliminary education at Ottawa he joined the Class of 1911 in Civil, and has passed through the different years with honors. Throughout the course his domicile was North Hall, where, as at St. Margaret's, he was very popular, and here he received enduring fame as a member of the Meteoric House Committee of 1910. The call of the northern camp grounds, and the swing of the auto proved irresistible to Millen, hence our sketch of his summer Civil Engineering experiences must be reduced to the limit. His many friends, however, have every confidence that the same measure of success will be his in the profession as that during his College career.

QUINLAN, LEWIS JAMES.

In April, 1887, Lewis J. Quinlan was born near the city of Stratford, Ontario. The early part of his life was spent on a farm, and during this time he attended a neighboring public school. Subsequent to this, he took a course at the Stratford Collegiate Institute, where he obtained his junior matriculation. This was followed by a year's study at Advanced Mathematics, preparatory to entering the Faculty of Applied Science. Then various labors occupied his time for three years, after which he commenced the course in Civil Engineering in Toronto University in autumn, 1908. His vacations have been spent at D.L.S. work in the great Canadian West. He graduates with Class '11, and his friends extend to him their best wishes for a bright and prosperous career.

RAILTON, LANCELOT WILLIAM.

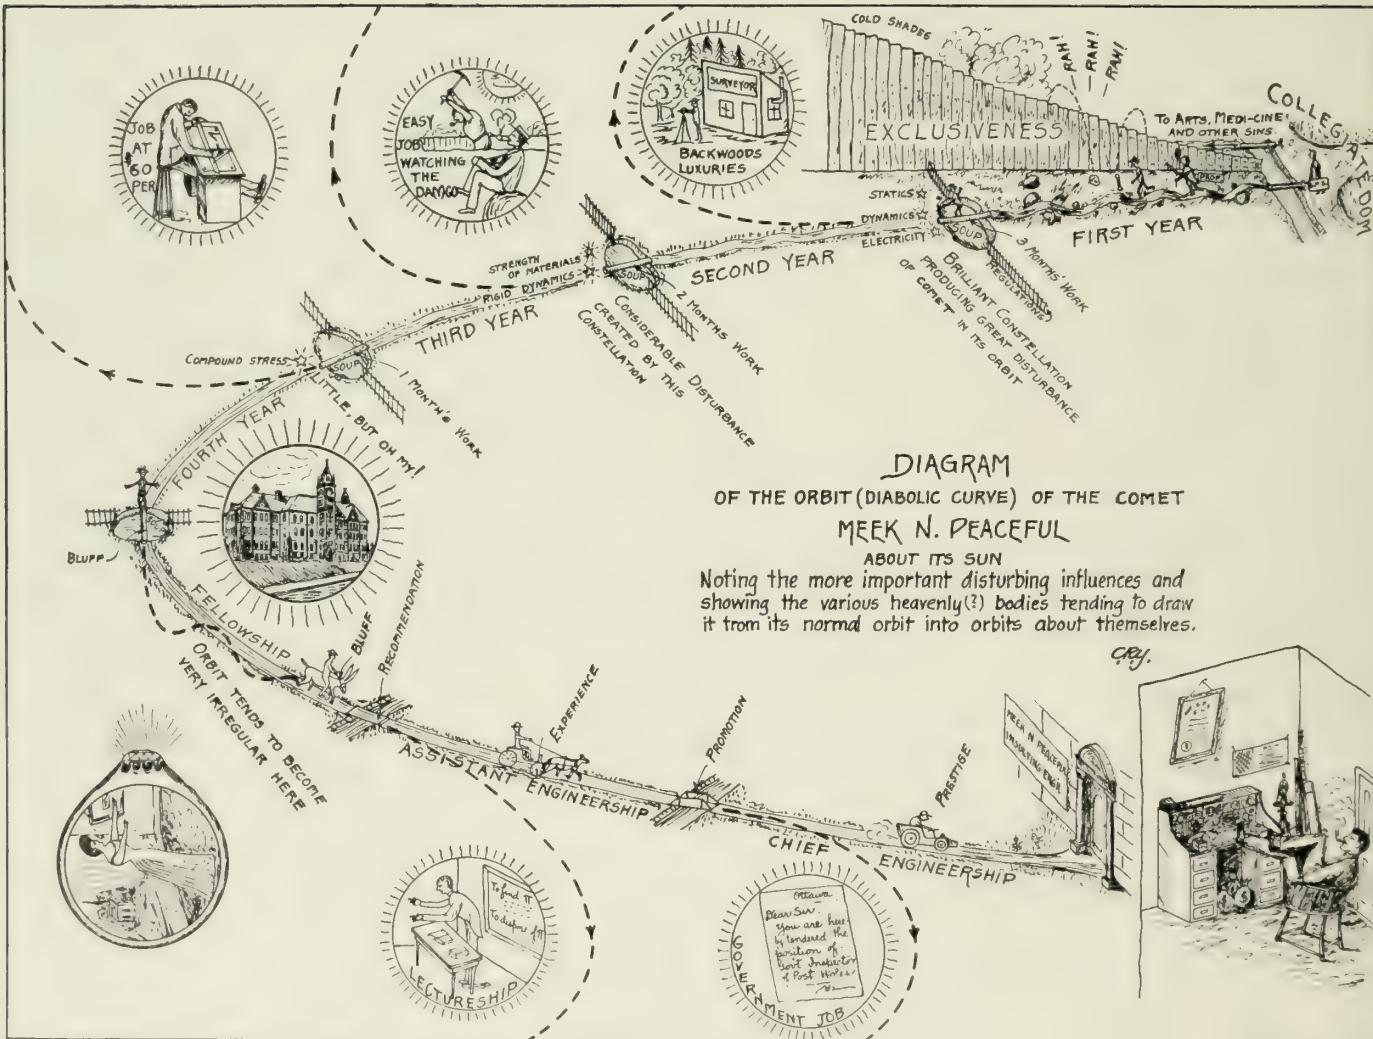

*"And strong of will
To strive, to seek, to find, and not to yield."*

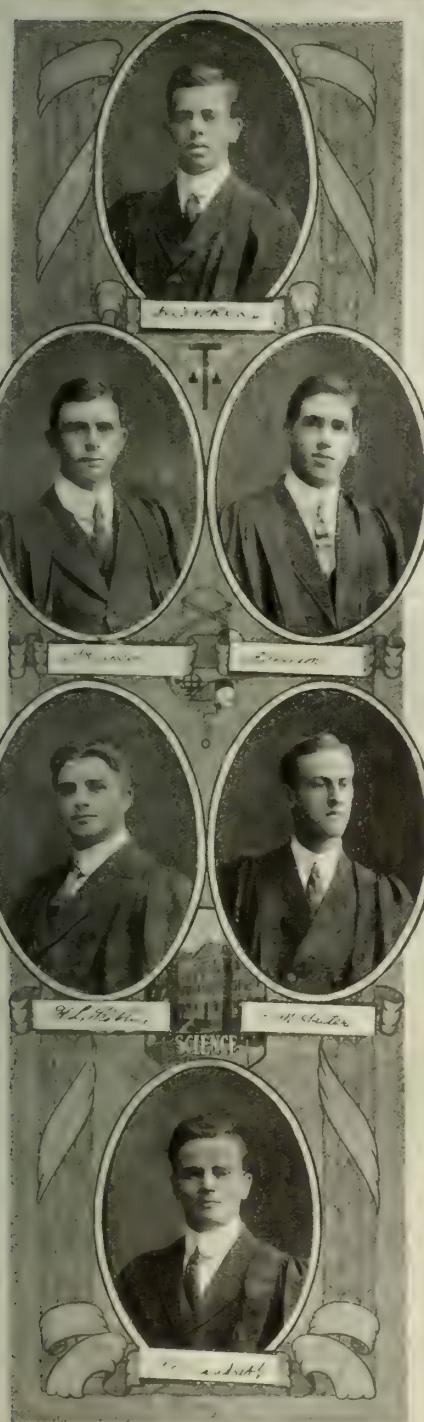

Towards the latter end of the "seventies," L. W. Railton gave the honor to Barmarthen, S. Wales, after which he grew up, receiving his education in Plymouth, England. Some six years ago he came to Canada, and for two years previous to entering the School was on Government railroad survey work in various parts, obtaining further experience in that pastime during the summer vacations. In his second year he suffered a setback through typhoid fever, which necessitated his repeating that year. Towards the end of his course he developed, among other things, a keen interest in boxing, soldiering and bridge. Being of a methodical nature, he naturally made good at all.

RATZ, JOHN EARL.

"Who said rats?"

It's nearly a quarter of a century since the doctor said "It's a boy." John Earl Ratz grew in grace, wisdom and stature in his native village of Elmira. After attending Elmira public school, his thirst for knowledge brought him to another Dutch town, Berlin, from whose Collegiate Technical Institute he graduated in 1908. Being of a mild and meek disposition, he decided to enter the ranks of 1911. Civil Engineering was his aim. After qualifying as a D.L.S. Asst., he spent the summer of 1910 on a survey in the Far West. After his graduation, we predict a happy home for him amongst the myriad homes of earth, but there burns within his breast the wanderlust; so, possibly, the West, Klondike, or even South America may in time fall heir to our budding Engineer.

READ, FREDRIC NEWTON.

*"He's a jolly good fellow, a generous chum,
And the boys wish him luck for all time to come."*

Fred made his first appearance in Owen Sound on January 23rd, 1891. Here he received his early education, matriculating from the Collegiate Institute in 1907. After spending an extra year in the Collegiate, Fred's thoughts turned towards Engineering, and, accordingly, he entered the Civil Course of the Faculty of Applied Science with the Class of '11. During his College career, Fred figured prominently in athletics and at the tournament in the spring of 1910 showed himself to be a skilled wrestler. After spending the summer months of 1910 as assistant to the City Engineer, Owen Sound, he returned to graduate with his class.

RICHARDSON, WILLIAM AUGUSTUS.

*"And falling, aye, to the hosts behind,
Play up, play up, and play the game."*

The subject of this sketch first appeared on the shores of the Pacific in the beautiful city of Victoria. His early education was obtained in public and High Schools and at Upper Canada College. He is a disciple of Nimrod, and an ardent follower of Isaak Walton. As a member of the Q.O.R., he accompanied them on their recent trip to the army manoeuvres in the Old Land. Kind, manly, unselfish, a true and devoted friend, he has won the esteem and regard of his fellow-students, and they all feel sure that in his chosen profession he will achieve the success which he so richly deserves.

ROBINSON, WILLIAM EARLE.

"If hot air were music you would be a brass band."

Bill was discovered by Columbus (Ont.), August 18th, 1888, and in due time became one of the troubles of Oshawa High School teachers. Leaving there he worked for three years under Sir Thomas Shaughnessy (a long way under), for the C.P.R. He entered the School as a Civil, and has been lucky with the Faculty ever since. Bill, like his namesake Taft, has always a smiling countenance, surmounted by a black pompadour, which makes up in size what it lacks in elegance. He is by no means a recluse like the Crusoe branch of the family, he having a surprising hobby for females, making a specialty of the pedagogical variety.

ROBLIN, HERBERT LESLIE.

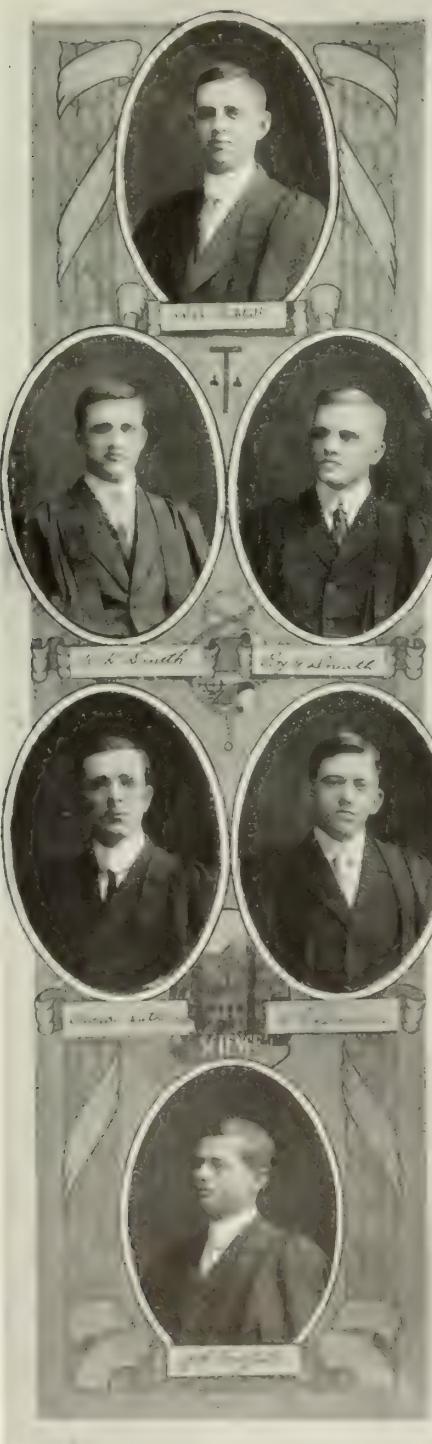

Some twenty years ago there arrived in London, Ont., a bright little individual, Herbert, by name. London pleased him, and there he took up his abode. Somebody evidently asked him what he knew about machinery, for after matriculating from London Collegiate Institute in 1906, Herb. entered the mechanical shops of the C.P.R. to find out just what he did know. But having persuaded himself that to be a master mechanic was not his vocation, he came to Toronto and entered the School with Class '11. A conscientious student and a jolly good fellow with all whom he meets, Herb. carries with him the best wishes of his classmates for a successful career.

SALTER, ERNEST MILTON.

Fortune descended on Auburn, N.Y., on November 17th, 1889, in the form of Ernest Milton Salter. His early education was obtained in Fulton Street Public School and Central Grammar School, and, at the age of thirteen he found himself permitted to proceed higher up. Looking around for the best in higher education he finally moved, with his parents, to Toronto, where he obtained his matriculation from Toronto Junction Collegiate in the second form. After a year and a half of futile attempts to convince business interests of his value, he decided his abilities fitted him for a successful career as a Civil Engineer. Accordingly, S.P.S., 1910, found him as an integral part, but sickness secured first mortgage, and 1911 became the lucky year. His classmates predict for him a large sphere of usefulness as a shining light in his profession.

SCANDRETT, FRED. R.

Fred. R. Scandrett, was born on a farm near the pretty village of Belgrave, in 1888. Having spent the usual time in public school, Fred. put in a couple of years on the farm. But the "simple life" was not for him. He entered Wingham High School; there, besides making a name for himself in baseball and football, he matriculated. The pursuit of that ephemeral something—knowledge—led him to the University of Toronto, where he registered as a student of the Faculty of Applied Science and Engineering, joining the famous Class of 1910. But through illness, he was compelled to graduate with the more famous Class of 1911.

SIBBETT, WILLIAM ALGERNON.

W. A. Sibbett was born in Bracebridge, Ont., on November 4th, 1890. He obtained his preliminary education in the public school of his native town. After passing his junior matriculation, he entered the Barrie Collegiate Institute, and here secured senior matriculation. During the last part of his Collegiate course he spent considerable time at mathematical work and acquired a desire for work involving that subject. This tendency caused him to choose Civil Engineering as his prospective profession. Accordingly, he entered the Faculty of Applied Science in the fall of 1908, and graduates with Year '11.

SMITH, KENNETH HAROLD.

"He is a man of letters, manners, morals, parts."

Born in a small sawmill community in Kent County, Ontario, the subject of this sketch doubtless acquired from such an environment more or less of the taste for practical affairs, which eventually brought him to the Faculty of Applied Science. Notwithstanding his interest in mundane things, he also believed in cultivating another side of his nature, and to that end devoted considerable time to music. Before entering the Faculty of Applied Science, he spent four years in Victoria College, being graduated from the University of Toronto in the honor department of English and History with the Class of '08. Unusual as such a course may seem for a prospective member of the School of Science, he has never yet regretted it.

SNEATH, ROY GOODERHAM.

On the morning of January 12th, 1889, Roy Gooderham Sneath having donned his "vesture of decay," landed on this planet. To him the world seemed very big and in need of competent inspection. Accordingly, he spent several years in visiting the Toronto public schools, and after this three years in the Technical High School. In 1907, Roy registered in Applied Science, joining the illustrious Year '10. However, owing to a combination of circumstances we now find him with Class '11. Six summers Roy has spent in acquiring practical experience, four of these in the northern wilds. A townsite on the Transcontinental Railroad duly surveyed during the summer of 1910, tells of an industry, which, combined with his pleasing personality, should assure for Roy success in his chosen profession.

SUTHERLAND, DAVISON.

The name of "Davy" Sutherland stands out bright on the annals of the past quarter of a century. After seeking knowledge in the Toronto public schools and Jarvis Street Collegiate, he stepped up a notch and entered Upper Canada College. Here he acquired a liking for things Engineering, and now we have him on the verge of completing the theoretical side of his profession, graduating with the Civils of Year '11. He was a valued member of the '10 "Gym" team, and a follower of all College sports. "Davy" has had practical experience with the Roadway Department of the City of Toronto, and his many College chums wish him good speed in the pursuit of his calling.

SZAMMERS, CHARLES FRANKLIN.

The subject of this sketch was born in Toronto, Ont., on October 9th, 1888. His early life was spent at East Toronto, at which place he also received his High School Education and a year's experience in the motive power department of the G.T.R. He decided to take up the Civil Engineering course, however, because engineering offers both physical and mental work in the correct proportions. His practical experience consists of two seasons with the T. & N. O. Ry. in Northern Ontario, where all the difficulties of a Civil Engineer are to be met and surmounted.

TEMPLE, JOHN BLAKE.

*"His signal deeds
Demand no pompous eulogy."*

Born 1889, John immediately began to enjoy life, and early developed an optimistic nature and a talent for music, gaining some distinction as a pianist and organist. This talent shows itself to advantage in the "Meddlesome Choir" particularly during the rendering of Tennyson's pathetic ballad, "Hail, hail——." Graduating from St. Michael's College, 1907, John entered "School" with Class '11 and his merry ways and cheerful demeanor soon made him a favorite. Our friend also took a prominent part in social life, both in and outside the University and won many friends, who along with us wish him every success and trust that the fine experience in Engineering, gained by him during the vacations, will stand him in good stead.

TORRANCE, ROBERT DOUGLAS.

"I am a part of all that I have met."

Robert Douglas Torrance came to 'Varsity from Guelph with a love for Mathematics and a summer's experience on a survey, so he entered Civil Engineering. In his second year he got cold feet and almost switched to Arts, but three months in the West with the C.P.R. brought back his first love and he now thinks well enough of the School to take a fourth year. As a sophomore, he played goal for 1911 in the Jennings Cup series, but of late has taken his athletics more passively. Doug. may be found occasionally at lectures, but always when University supporters are needed, from the Tiger-Varsity football game to an Intercollegiate debate. Popular, able and thorough, this seeker of knowledge will make a success of whatever he chooses to enter.

TOUGH, WILLIAM GORDON.

*"Full many a flower is born to blush unseen
And waste its fragrance on the desert air."*

Such was not the case with Gordon, though born in the little town of Pembroke, Ont., in 1889. He soon sought to remedy this fault, and moved to Toronto, where he completed his primary education and entered Parkdale Collegiate Institute. While there, he played on the famous championship Rugby team of 1906, with such men as Hugh Gall, Fat Coryell and G. Rankin. Gordon graduated the same year, and, having had some practical experience in Civil Engineering, he decided to enter "School" and follow up the profession. While there he made many friends who wish him all kinds of good luck and who feel sure that the experience gained by him assures his ultimate success.

VICKERS, THOMAS NEWELL.

"He needs no eulogy; he speaks for himself."

This mundane sphere was in need of an engineer. Therefore, at Renwick, in 1890, the career of Thomas Newell Vickers was begun. The fundation of his education was laid in the "little old red schoolhouse," and in 1906 he matriculated from Leamington High School. The next two years were spent in Windsor and Detroit in the pursuit of wealth, and from thence he found his way to Toronto University, joining the Toke Oikes of Class '11. The summer of 1910 found him gaining practical experience in the West with the District Engineer of Regina, and, judging from his success there, his work in College and his purposeful and energetic character, we predict for him a brilliant future.

WALCOTT, WILLIAM DANIEL.

*"Cease man, to mourn, to weep, to wail,
Enjoy thy shining hour of sun!"—The Kasidah.*

He was born in the lovely isle of Jamaica and was educated at Rusea's Grammar School and Jamaica College. A close follower of cricket, he carried off the prize bat in 1903. He came to Canada in 1907 and entered the School the following year. We know him as a delightfully genial companion—strong and versatile—a sportsman in the true sense. He will live long in the memory of his comrades whose lives he has enriched with the charm of his personality.

WARDELL, ARTHUR.

Arthur Wardell was born in the city of Toronto on October 12th, 1890. He received his public school training in the Lansdowne School and passed the Entrance in 1903. After three successful years of study at Harbord Collegiate Institute he ventured out into the business world by accepting a position in the office of the Canada Foundry Company. While there his occupation brought him in contact with the engineering features of the work of the large foundry, which tempted him to pursue his studies further. By careful study in the evenings, together with help from the Central Business College, he succeeded in passing the Junior Matriculation in 1908. In the fall of the same year he registered in Applied Science at our University.

WATSON, FREDERICK ERROL.

Frederick Errol Watson was born in Aurora in 1889. Here he commenced, and continued in Toronto, his scholastic training. He obtained his Junior Matriculation at Harbord Collegiate, and the following year studied Honor Matriculation work at Jarvis Collegiate. In his early high school days he was attracted to the Medical profession, but his propensity for engineering predominated and in 1908 we find him at "School" in the heterogeneous array of vainglorious freshmen. Errol has always been a supporter of clean sports, and an apt student immediately preceding examinations. His obliging disposition, the good-natured philosophy with which he takes a disappointment or dissects a difficult problem, presage for him a prominent and well-deserved place among our Canadian engineers.

WORDEN, WALTER GARTH.

*"Who, with the natural instinct to discern
What knowledge can perform, is diligent to learn."*

St. Thomas has the honor of being Walter's birthplace, and also the responsibility of his primary education. At a comparatively early age his social and intellectual instincts began to assert themselves, and, accordingly, he betook himself to Toronto. Here he found his inclinations turned toward the intricate problems of Civil Engineering, so he registered in the Faculty of Applied Science. Since following his chosen study he has taken a deep interest in construction work, spending most of his vacations in Northern Ontario. Walter's frankness and genial nature have made him popular with his fellow-students and he will long be remembered as a good fellow by his classmates.

WRIGHT, WILLIAM JAMES TURNBULL.

"Who shall become a master of the art?"

It is doubtlessly recorded that Billy became a native of Clinton, Ont., some twenty years ago. Toronto claimed him at an early date, undertook to educate him and to Lansdowne School he went. Harbord Collegiate Institute was next in line and Billy graduated from the ranks, entering the University with Class '11 in Engineering. His ability as a student is well known for he stands second to none. A lover of sports, Billy handles a rugby ball or hockey stick equally as well as he handles his pen in the examination room. Modesty is one of Billy's many fine qualities and, holding the highest esteem of all who know him, he embarks upon an undoubtedly successful career.

WRONG, FREDERICK H.

"What's in a name?"

It was at Chatham, Ontario, that the subject of this sketch began his earthly career. Graduating from the Collegiate Institute of his native hamlet, he entered the Detroit offices of the Pere Marquette Railroad. It was here that Civil Engineering cast around him its spell. The lure proved too strong and in 1908 he came to the S.P.S. Fred has taken a creditable stand throughout his course. He is a member of the Glee Club and takes an active interest in athletics, of which rifle shooting and boxing are his favorite departments. He wins the confidence and respect of all who know him and is one of the best types of an all-round Varsity man. His many friends predict for him a successful future.

YOUNG, STEWART.

Born and educated in Owen Sound, Stewart has, at times, lived up to the old O. S. C. I. motto:

"Dum virimus vivamus."

He spent several years in the Civil Service, but the Goddess of Engineering cast her mystic spell over him, and in '08 he entered the University. By his unfailing good nature he has made his career at the school a very successful one. His vacation of '10 was spent on the staff of the Town Engineer of Cobalt, studying the philosophy of the pick-handle. Brightest prospects to you, Stewart, as a Civil Engineer. We shall miss your beaming countenance, especially as we remember it under the brim of an old "christy."

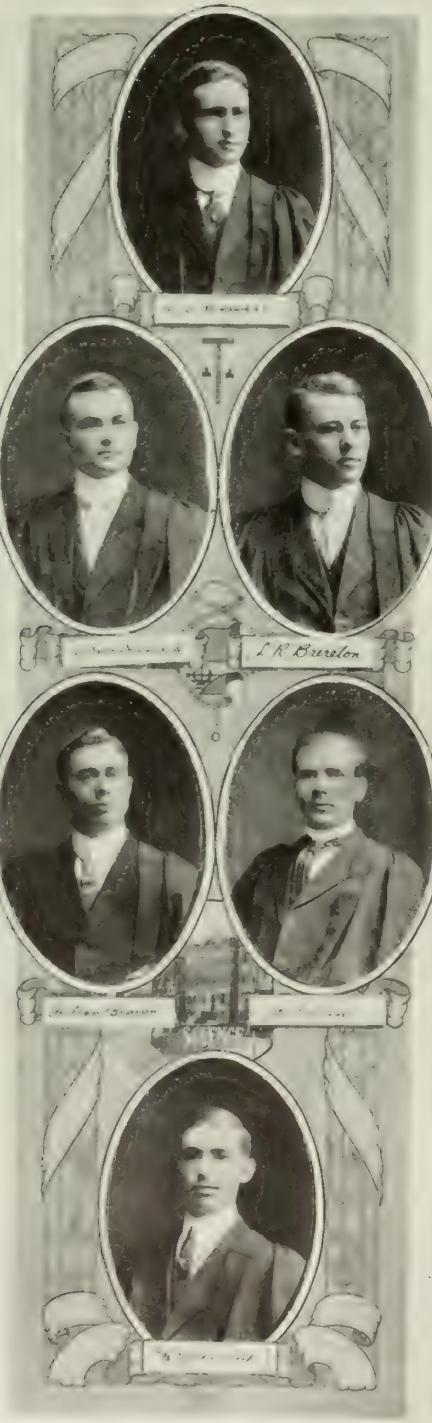

ZINKAN, WILLIAM EDWARD.

Commencing at school at Southampton,
He took his matric. at Port Elgin.
He journeyed then down to Toronto,
And went with '07 to "School."
There were few things Bill couldn't get on to,
For Bill is a hard man to fool.
He then went to Vic. for two seasons
And was President there of his Year,
He left there for very good reasons
Which Bill never makes very clear.
Two years then he spent on the Prairie
In the largest, the greatest, last West,
But I guess for the "School" he got weary,
Or maybe he needed the rest.
He joined Oneto One's famous bunch,
And worked all the year with a vim,
And, boys, sure as h——l, I've a fine hunch,
'Tis the top of the ladder for him.

ELECTRICAL & ENGINEERING

BOSWELL, WALTER OSLER.

"Some men are born great, some achieve greatness, and others have greatness thrust upon them."

Ushered into the rather quiet life of Cobourg, Ont., in January, in 1890, was one Walter Osler Boswell. He grew into short pants, and in 1896 went to Sherbrooke, Que., where he laid the foundation of his later work in the High School. Later, coming to Toronto in 1904, he matriculated from St. Clement's College in 1907. The fall of that year marked his evolution into a "School" man where his energies turned into many channels. Here he delved into the mysteries of Electricity, Calculus, the Waterloo of many a student, and numerous other subjects which sometimes appear to be designed to torment the minds of incipient Engineers.

BRACKINREID, THOMAS W.

*"And ne'er did Grecian chisel trace
A nymph, a naiad, or a Grace
Of finer form, or lovedier face."*

T. W. Brackinreid, better known as "Brack," was born in Toronto in November, '91, and spent his early life there. He received his early education in the public schools of that city, entering Jarvis Collegiate in '04, from which, with the help of a year at Riverdale High School, he matriculated in '08. The same year, aspiring to higher things, he enrolled with Class '11, S.P.S., in Electrical Engineering and has succeeded in continuing a member of the same by dint of much midnight toil. "Brack" is a jolly, straightforward, fellow, and a good sport, and his many friends wish him a highly successful career in his chosen profession.

BRERETON, LLOYD RANDOLPH.

Born June 18th, 1890, in village of Bethany, county of Durham, where he attended public school. He attended Albert College three years, entering in '04, and leaving in '07. The following year he spent in Western Canada, returning to Toronto, September, '08, and entered S.P.S.

BROWN, HILTON ORLAND.

*"For nature made him what he is
And ne'er made such another."*

Hilton Brown first opened his eyes in this bright world on July 28, 1890, in the village of Port Sydney, Ont. He spent the earlier years of his life among the rocks and hills of Muskoka, coming to Toronto in the spring of 1908 and matriculating the following summer. October, of the same year, he entered the Class of Electricals in the S.P.S., and during his whole course has shown himself to be an apt and industrious student. His many friends wish him every success in his future career.

CAIN, EVERETT T.

*"Self control, a head to contrive,
And a heart to sympathize."*

Everett T. Cain was born near Uxbridge in 1884, and spent his early life on the farm. After leaving public school he attended Uxbridge High School, to whose principal he owes a debt of gratitude. After graduating from High School with honors in 1906, he attended Port Perry Model School and was engaged successfully in teaching until his ingenious turn of mind brought him to Toronto University to obtain his first precepts on the technical side of an Engineering profession.

CHESNUT, E. FRASER.

*"Whence is thy learning? Hath thy toil
O'er books consum'd the midnight oil?"*

Born at Toronto Junction on January 24th, 1892. He received his preparatory education in the public schools of Toronto. He entered St. Andrew's College in '01, and matriculated from that institution in '07. In '08 he enrolled in the Class of '11 of "School" as an Electrical Engineer, and has contrived by diligent study to continue with his class. His many friends join in wishing him the best of success in his chosen future.

COOK, AUSTIN SYLVANUS.

"I am a part of all that I have met."

Austin was born May 10th, 1884, near Tillsonburg, Ont., and afterwards moved to the neighborhood of Ingersoll. Soon he entered the I.C.I., where he "drank life to the lees." After graduating he spent two or three years at home repairing the farm machinery and wiring the house for electric bells. Engineering seemed to be in his line. He decided that a thorough grounding is necessary to succeed, so he indulged for a short time in Higher Mathematics. October, '08, found him enlisted at the S.P.S., where, since he has won deserved success and many friends. He spent one season with the Ontario Power Co., and then came a comprehensive tour of the Canadian West, adding to his already varied experience of life and charm of personality. These, together with an unusual strength of character and success in his studies, ensure him a position with the most successful of his profession.

DEGUERRE, FREDERIC CLAUDE.

On July 13th, 1888, in the town of Strathroy, our worthy classmate first announced his presence to the world. At the tender age of three, his parents, wishing greater scope for their gigantic offspring, took up residence in Galt. As the years rolled by he grew and waxed mighty, and in 1904 we find him among the graduates of the Galt Collegiate Institute. He, having a great predilection for things mechanical, entered the works of the Stevens Co., of Galt, where three years were spent in the making of machine shop tools. Ambition, however, would not allow him to rest contented, and in 1908 he entered the "School" and cast his lot with Year '11 in the Electrical Course. During his association with the School he has always manifested great interest in College events, and in his future career we predict great success.

CUNERTY, THOMAS JOSEPH.

*"Who first invented work and bound the free
And holiday-rejoicing spirit down?"*

Tom alighted on this orb, July 22nd, 1888, in this the fair Queen City. After receiving his early education in the separate schools, he matriculated from St. Michael's College, and thence cast his lot with the "School" forces, choosing the Electrical Course. His practical experience in this line has been varied and successful, and his many friends wish him the best success in his future endeavors.

FARRELLY, THOMPSON J.

*"The runner bends to wait the shot
That sends him off upon his trot."*

Thompson J. Farrelly, a sturdy native of Canada, was born near Arthur, a little burg in North Waterloo. He received his early education in a little brown school in the country, and early attaining some reputation as an athlete, he continued the noble pursuit. He won further experience as a sprinter at a place called Jackson's Point, Elora. This stood him in good stead in after years, when on departing from his school teacher's life and rambling down to 'Varsity to browse off the Tree of Knowledge, he fortunately made one of the famous 'Varsity four who won the Intercollegiate Champion Harrier race in 1909.

D'ALTON, FREDRICK KEITH.

"Non loquendo sed agendo."

Unheralded by the appearance of Halley's Comet, or even in the ringing of bells in his native place, Fredrick Keith D'Alton opened his inquiring eyes upon this world in 1890 in the town of Milton. His search for knowledge commenced on his native heath and continued in the classic halls of Weston High School, where he matriculated in 1907. His next step was into the old School, which he entered with the Class of '11, and where his tastes have run very decidedly along a single line, and that an "electric" one. He leaves with his Class and we think we are safe in prophesying for him great things in the highly-charged atmosphere of electricity.

GREENE, ELLIOT ANSON.

*"So nigh is grandeur to our dust,
So near is God to man,
When duty whispers low 'Thou must,'
The youth replies 'I can.'"*

Born in Toronto, November 1st, 1889. Received preparatory education at Harbord Collegiate and Upper Canada, matriculating from latter in '07 and going to R.M.C., Kingston. Graduating from his Cadet Course, he entered School in Class of '11 as an Electrical. Elliot is a good sport, playing football at both U.C.C. and R.M.C., and spare for the back division with 'Varsity during the fall of 1910. Also he has won a few tennis honors, and enjoys nothing better than a good horseback ride. He has made many friends in his year who all wish him the greatest success in his future career.

HADCOCK, JAMES PERRY.

"If you would hit the mark you must aim a little above it."

He was born in Mount Elgin, Ont., in 1888, and in '92 moved to Brantford. He received his primary education in the public schools of Brantford, Hudson, N.Y., and Orangeville. He entered the School with '10, but missed two years through working on the Winnipeg Electric Railway and on the Hudson Bay Railway Survey. It is his intention to enter Electric Railway or Canal work.

HALL, HAROLD GEOFFREY.

*"You'll find as you get vider, you'll get viser;
Vidth and visdom always grows together."*

Our prodigy respectfully acknowledges Woodstock, Ont., as the scene of his "de-boo." Having absorbed all he could from the Collegiate and Woodstock College, he clutched the Governor-General's Gold Medal in one hand, a ticket for Toronto in the other; and took up his residence at a safe distance from the School. He takes an intense passive interest in athletics, and during the late winter is a devoted student. His summers are spent in his chosen Electrical work, in which his many friends wish him success.

HILL, HERBERT RUSSELL.

On April 11, 1890, there arrived in Kingston a young gentleman, neither ripe in experience nor full of years. In 1893, "His Royal Highness" having already proved himself an aspiring candidate for the "Portsmouth Seminary," was brought to Toronto. Here, after the public school course, he completed his preparatory course at the Technical High School in 1908, and after a few months of mental recuperation, sought a higher plane with Class '11 in Electrical Engineering. He has had considerable practical experience in both mechanical and electrical lines, and if examination results are a mark of brilliancy "Russ" is steered right. A good fellow, an enthusiast in sport, his only weakness is fondness for the feminine element.

KIRKWOOD, MACLEAN.

"Every man has his fault, and honesty is his."

"Max" began his existence in Toronto, April 19th, 1891. He attended the city public schools in his tender years and matriculated from Parkdale Collegiate Institute in 1906. After another two years in the Collegiate, Max decided that he would like to study the relation of Greek letters to Applied Science, so joined the School with the Class of 1911. Among us he has proved himself a thorough student by carrying off honors each year. He has taken a great deal of interest in Y.M.C.A. work, being at present Vice-President of the School Branch. His pet hobby is looking after a troop of boy scouts, whom he teaches, by precept and example, the art of preparing and serving afternoon teas.

LEADMAN LAWRENCE.

Lawrence Leadman received the first glimpse of his allotted "three score years and ten" on a "corner fifty" in East Missouri Township, Oxford county. He obtained his public school education in the same township. There he carved his name large by means of a jack knife on all the surrounding furniture. He attended St. Mary's Collegiate Institute, where he matriculated, and also developed an "Eliza crossing the ice," sort of feeling whenever he thought of his future occupation. Two summers spent on railway construction in the Dakotas settled the question, and the S.P.S. received the result of his cogitations.

LILLIE, GERALD LAWRENCE.

"Behold the lilies of the field."

For the greater part of his life Gerald imbibed the breezes off Lake Huron as they swept through the streets of that metropolis, Port Elgin. From there he moved to Oakville, another densely populated centre, and got his matric. in its High School. His work at the School has always been thoroughly and carefully done, and from our acquaintance with Gerald we should say that it will never be otherwise in anything he undertakes. His branch is Electrical Engineering. Here's luck.

AT-HOME COMMITTEE, S. P. S.

M. B. Hastings	Wm. Curtis	P. V. Perry	L. C. Forgie
M. B. Watson	T. C. McBride, <i>Secretary-Treasurer</i>	Jas. McNiven, <i>Chairman</i>	R. M. B. Thompson
			P. G. Cherry

LYTLE, LLOYD B.

*"Long ago I used to dream of treading such a path,
To find the treasure that I knew would turn
All things to gold."*

Lloyd was born under the "Stars and Stripes," in Iowa, on July 18th, 1890. When nearly one year of age he dodged Canada's immigration officials, and later commenced his educational career at Sault Ste. Marie. In 1907, from the Listowel High School, he obtained his Junior Teachers' standing and matriculation, the former with "honors." The following year he pursued Senior Teachers' studies, and the next autumn we find him registered in the Electrical Engineering Course at 'Varsity with the famous Class of 1911. Lloyd has spent his summers in Peterborough and New Ontario. Having ability and character, his friends wish him the success he is assured in his life's work.

MACAULAY, ROBERT VERNON.

"To strive, to seek, to find, and not to yield."

Mac. struck terra firma about two decades ago, and, with evident satisfaction, settled in Lindsay. After his primary education there, he went to Harbord Collegiate Institute, Toronto, from whose congenial atmosphere he departed to follow the elusive "juice" with Class '10 in Electrical Engineering. The first two summers at the School were spent at the silverholes up north. The colic communi of that district became too friendly and typhoid fever forced Mac. to abandon the third year. After a holiday, he went to Hamilton, where he worked eight months as works electrician at the Westinghouse shops. However, we joyfully chronicle his rescue from Jungle Town and his return with Class '11.

McEWEN, HAROLD JAMES.

*"What cannot Art and Industry perform
When Science plans the progress of their toil!"*

Out of the Everywhere and into Here came Harold McEwen in the year of our Lord 18—. Ask him, as he was a witness of the event. He alighted in a farm in Brant county, escaping a collision with the "Telephone City" by only a few hundred yards. His earliest scientific investigations were conducted on his father's homestead. Later, he entered the Brantford Collegiate Institute, where he obtained his honor matriculation in 1908. The same year he joined the Electrical Engineering Class of '11 at S.P.S. During his course, he has shown great ability, having taken honors in his first year. His many friends wish him every success.

McKENZIE, DANIEL ALEXANDER.

Daniel Alexander McKenzie was born in Sombra township, near Brigden, Ont., in 1888. At the age of four years he got the Western fever, and, with his parents, removed to Wawanesa, Man., but returned to Ontario in 1894, locating at Adelaide, Middlesex county. Here he received his early education, entering Strathroy Collegiate in 1901. In spite of a break in his education, caused by the return of the family to Wawanesa, their present home, he matriculated at Brandon in 1905, and after a Normal Course, taught school for three years with considerable success, finally entering Toronto University in 1908. His career there has been a brilliant one, and he shows great promise in his chosen career of Electrical Engineering.

McKIRDY, WILLIAM STUART.

In 1887, Brockville, Ont., gave excuse for its existence by becoming the birthplace of William Stuart McKirdy. However, Nipigon, Ont. (near the boisterous waters of Lake Superior), had to bear the responsibility of his early life. "Mac" received his High School education at Harbord Street Collegiate Institute, Toronto, where he also took a prominent place in athletics. He entered the "School" with the Class of 1910, but, as a proof of his discerning disposition, joined the men of 1911 in their second year, and since then he has worn that contented look, which, with his genial disposition, has won Stuart many friends.

McQUEEN, ALLAN ALDERSON.

*"'E's little, but 'e's wise,
'E's a terror for 'is size."—Kipling.*

Allan Alderson McQueen dates back to August, 1888. Born in Toronto, educated in Toronto, we find him at various stages of his scholastic career in Queen Victoria School and Parkdale Collegiate Institute, matriculating in 1906, and entering the School in 1907. "Mac" as a student has always maintained a high efficiency curve; as a "scout" has been highly popular, and in sports an enthusiastic leather-lunged rooter of the most rabid type, cheering on old P.C.I., School, and 'Varsity to many a championship. Of late years our friend has developed into a most inveterate ladies' man, but, in spite of this, we predict for him in this life, at least, "a bright and blazing future."

MARTIN, JOSEPH CARDER.

Carder Martin has the advantage of having been born on the front fifty of a fine Ontario farm in the historic township of Pilkington, Wellington county. He commenced the business of life by hoeing turnips and driving the self-binder. In obedience to his parents' wishes he started to walk the beaten path. He walked through the little red schoolhouse at No. 5, and played tag with Latin and Mathematics at the Elora High School. He now approaches the inevitable graduation, and has not cultivated a moustache, or written "lines to his lady's eyebrows." He will probably do more thinking than talking, and whatever niche he secures in the temple of fame, it will be the result of honest merit.

NIXON, CHARLES KNIGHT.

"Truth is stranger than fiction..."

Charles Knight Nixon is called "Nick" by his friends, and, worse than that, by his creditors. At an early age he was undecided whether to be a pirate or just a cowboy, however, parental influence induced him to enter school and combine the two. Most of his latter years of public school and all High School preparation was obtained in Detroit, Michigan. Not wishing to be made President of the United States just then, in September, 1908, he started on the perilous trip to Toronto. After a hazardous trip, he arrived unscathed and with sufficient breath to give the pass-word, Toike Oike.

NOBLE, EGERTON S.

Egerton first rose to the surface in Toronto on August 2nd, 1890. After spending the usual time in Jesse Ketchum public school, he entered Technical High School, from which he obtained matriculation in 1907. He entered the "School" in 1908 with Class '11, and holds his own with the best, as shown by his honor standing. He leaves the School with the highest regard of his fellow-students, who prophesy a brilliant future in his chosen career of Electrical Engineering.

PARKER, JOHN S.

"The field is free to talent; industry is crowned with the reward due to its own pains."

Genius is the capacity for taking infinite pains. This has always been true, and is to-day, especially with Jack. Born in 1887, in Peterboro' county, he spent his early years developing this ability in the freedom of his native lakes and woods. At five he was carving hieroglyphics on the old school benches, which still bear testimony to his early skill. Eight years later he completed his public school education and took the next step higher, Collegiate work, in Norwood High School. Following his graduation, he spent five years teaching in various parts of Ontario, when he came to 'Varsity to achieve his boyhood's ideal, a course in Electrical Engineering.

PEARSON, CLARENCE L.

He was born in the Queen City. His early subjection to study and corporal punishment occurred at Wellesley School. Upon leaving this institution he further continued a somewhat prefunctory pursuit of the elusive sprite, "Knowledge," in the employ of a well-known book publisher. A renewed infatuation for the aforementioned sprite, led to three years in Jarvis Collegiate Institute with the result that C. L. found himself enrolled with School '08. His insatiable craving for hard work was satisfied in the Sudbury mining region, where for three years he astonished the natives by his great versatility. But the trials and pleasures of School life, like all things good, must end, and he goes forth into the world a graduate of 1911.

PERRIN, WM. JOHN CLARK.

"After all, the joy of success does not equal that which attends patient toiling."

W. J. Perrin was born in the village of Kirkfield, county of Victoria, May 21st, 1888. On his parents removing to Georgetown, Ont., he attended the public and High Schools of that place. After teaching a country school for two and one-half years, he entered the "School" in 1908 with the Class of "Onety-one." Since that time he has willingly devoted his time and energy to the course in Electrical Engineering, which is his choice of a profession. Will has always been a thoughtful and earnest student, and his friends are looking forward with considerable expectancy to the time when College days are over and Will sallies forth into the world of science.

PORTE, EDWARD HARRIS.

"Ted," as he is familiarly known, was born in the town of Aylmer, on May 26th, 1892. He attended the public school and finished his studies at the Aylmer Collegiate Institute, taking his Junior and Senior Matriculation and always being at the head of his classes. At an early age he displayed talent for things electrical, and is never happier than when he is experimenting with some electrical apparatus. He decided to cast his lot with Year '11, and we all wish him success in his chosen profession.

RUNCIMAN, ARTHUR SALKELD.

"Many are called, but few get up."

On August 11th, 1890, the stork left Arthur, the only hopeful of his doting parents, on a doorstep in Goderich. In a few years, Arthur (commonly called "Phatte"), started in the Goderich public school, and remained at school there until the age of eleven, when the family moved to Stratford. In 1903 he entered the Stratford Collegiate Institute, and matriculated in 1906. He entered on his Electrical Course with the Class of '11, passing successfully each year. Arthur's chief weakness is oversleeping, but he is young yet, and it is hoped he will recover. His many friends wish him every success in the career he has chosen.

RUST, FREDERICK CHARLES.

"He forgot himself when he could be of use to others."

Born on September 24th, 1888, and has lived in Toronto since that date. He has had a varied school career, beginning with the public schools, going from there to the High Schools, and finally matriculating from Upper Canada College—evidently believing that "variety is the spice of life." His vacations so far have been profitably employed in electrical work at the Canadian Westinghouse and other places. We wish him the best of luck in his future life.

SEATON, NORMAN DUNDAS.

The Western Rebellion of 1885 was scarcely suppressed when another trouble arose in the form of Norman Dundas Seaton. He had not long enjoyed the freedom of the prairies, however, when his family moved East to Durham county, Ont. Here his steps were first directed along the path of knowledge, and after graduating from the Peterboro' Collegiate, he undertook to guide others along the same rocky way. N. D. entered University in 1908 in the Electrical Engineering Course. He has taken an active part in College life, and is socially connected with the Haveram Club. His many friends wish him every success.

SOULES, LLOYD VERRAL.

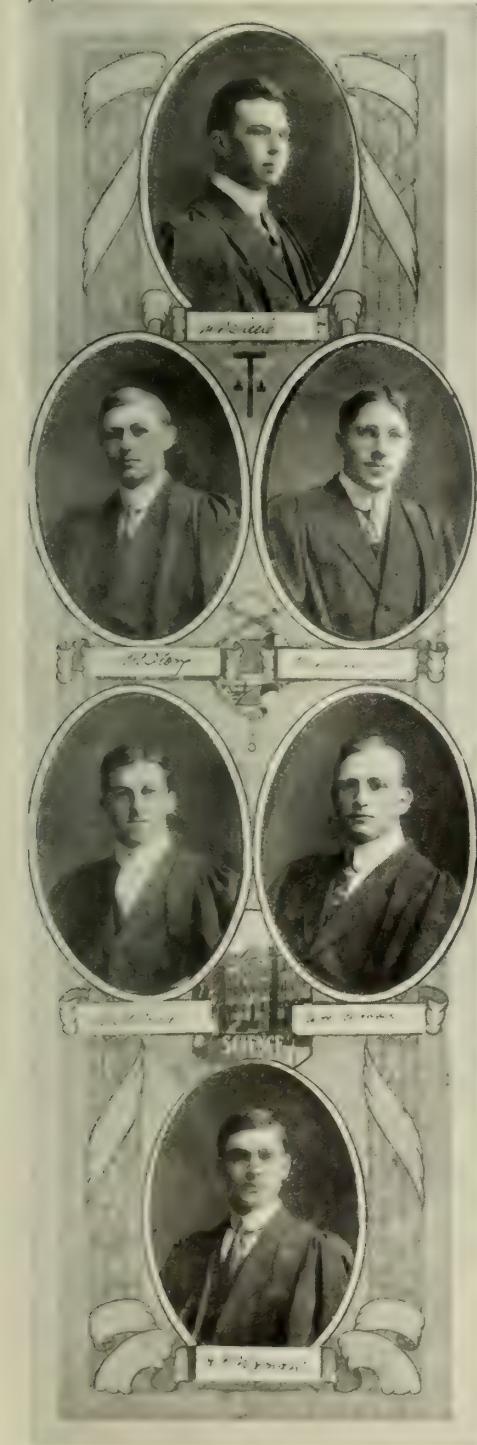

*"Come one, come all, this rock shall fly
From its firm base as soon as I."*

Lloyd Verral Soules, is the son of the soil. Born 1890 at Mt. Forest, he began his primary education there. This was continued in Wellington and Bruce counties, and finally ended at Richmond Hill. Here he matriculated when 16, and the following year was spent at home in Richmond Hill. In 1908 he entered S.P.S. with Class '11. Lloyd's bent is Electrical Engineering, and we are sure that his jovial nature, coupled with his goodly supply of brains, will bring him certain success in that department.

SQUIRE, GEORGE ETHELBERT.

*"In deeds, not years, piercing the depths of life,
So that no wonder waits him."*

George first opened his eyes to this troubled world on July 27th, 1888, in the township of Enniskillen, Lambton county. In the little school on the "fourteenth" he early gave evidence of those qualities as a student of which his "honors" in later years have given proof. From Watford High School he matriculated with honors in 1905, and after teaching for two years he entered the "School" with the Class of '11. Since then, in spite of all difficulties, he has persevered to the bitter end, and he leaves the "School" with the highest regard of his fellow-students, who prophesy for him success in his chosen career of Electrical Engineering.

STEELE, WILLIAM STANLEY.

On November 28th, 1890, the stork did its duty and Mr. and Mrs. Steele, Port Stanley, Ont., found a package labelled (William Stanley) in the portico. The contents were duly educated in the St. Thomas Collegiate Institute, and, graduating there, our hero entered a Science Course in University of Toronto. "Rev." hold certificates as Cadet Instructor in the Canadian Militia, and sergeant in the 2nd F.C.C. Engineers. As a rifle shot he ranks with the best, winning the 1910 O.R.A. Medal and also prizes for highest aggregate scores in '08, '09, '10. During his course in Electric Engineering he has made the problem of the "gas engine in the automobile industry" a special study, spending his vacations in the test rooms of the Packard Motor Co., Detroit. The "gang" wish him a prosperous career in his chosen profession.

STORY, ROLAND AVISON.

"*Not swift, nor slow to change, but firm.*"

The subject of this biography spent his public school at Wawanesa, Man. In 1905 he went to Brandon (Man.) Collegiate Institute, at which two years later he passed his matriculation with honors. After having spent a year out of school, he entered the Faculty of Applied Science and Engineering with the Class of '11. In his Collegiate days he captained the students' basketball team, winners of the city championship, and has since played on the School teams. He is also on the Executive of the School Y.M.C.A.

THOMAS, GEORGE CECIL.

"*Character will draw conditions after it.*"

George Cecil first started to be good in 1889 in the little village of Edgar. After two years expansion it was found necessary to remove him to Barrie, where, in due season, he matriculated from the Collegiate. After a year in business he joined Class '10, but after a few months with them he began to weary for a change, and, knowing "variety is the spice of life," he contracted mastoiditis. Failing to become a little angel in this manner, he returned to join Class '11, and has since been engaged in elevating the standard of that august body.

WOOD, CLINTON STUART.

Clinton Stuart Wood was born at Clinton, B.C., in 1888, and is the son of a widely-known member of the British Columbia Methodist Conference. His youth was spent in many different places, the family having resided since 1888 at Lulu Island, Vernon, Revelstoke, Kaslo, Kamloops, Salmon Arm, Sidney and Victoria, B.C. Notwithstanding these peregrinations he contrived to assimilate the knowledge necessary to obtain his matriculation in 1905 at Vernon. The following year he spent gaining a practical knowledge of the lumbering industry, afterwards teaching school at Salt Spring Island, till 1908, when, becoming fired with the ambition to become an Electrical Engineer, he entered Toronto University.

WOODS, WM. H.

Born at Stratford, Ont. At an early age he entered his practical career as an Engineer by smashing his father's fiddle. After graduating from the Sarnia Collegiate Institute he came to the School of Science to take up an Electrical Engineering Course with 1911 Class.

WYMAN, HUGH KENNEDY.

Hugh Wyman was born in Essex, Ont., and there received his preliminary education. Entering the High School in '05, he matriculated with honors in '08. With a natural bent for things practical, he came to "The School," where he has since sustained his good record in the Department of Electrical Engineering. He is a good "Schoolman," supporting with his ready hand the S.P.S. Debating Club, Y.M.C.A. and other student organizations, including that most worthy of all institutions, the Field Day "Scrap." Hugh intends taking up the commercial side of his chosen work, in which, we are willing to believe, his clear judgment and practical insight insures success.

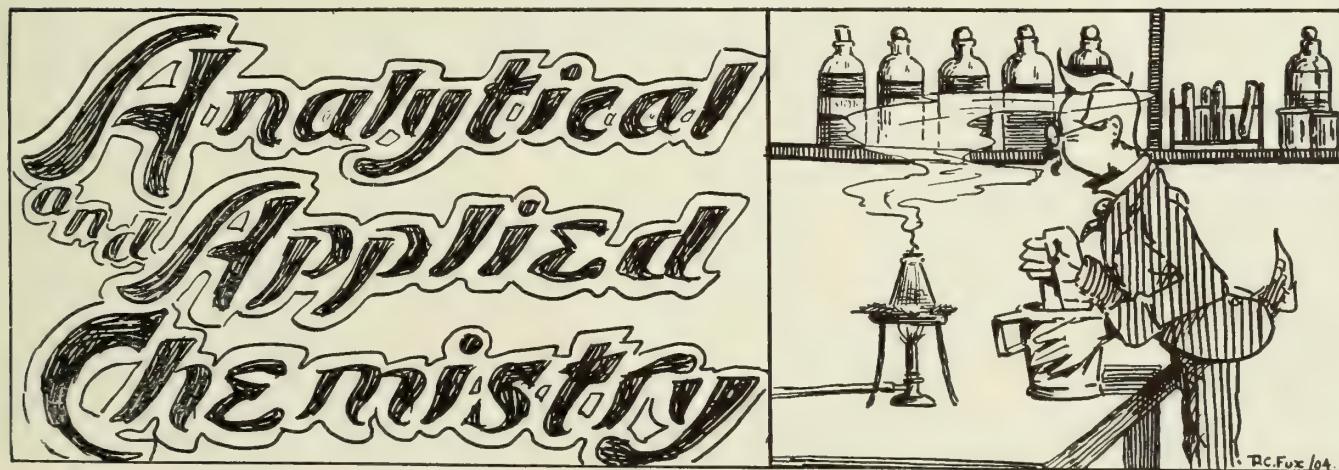

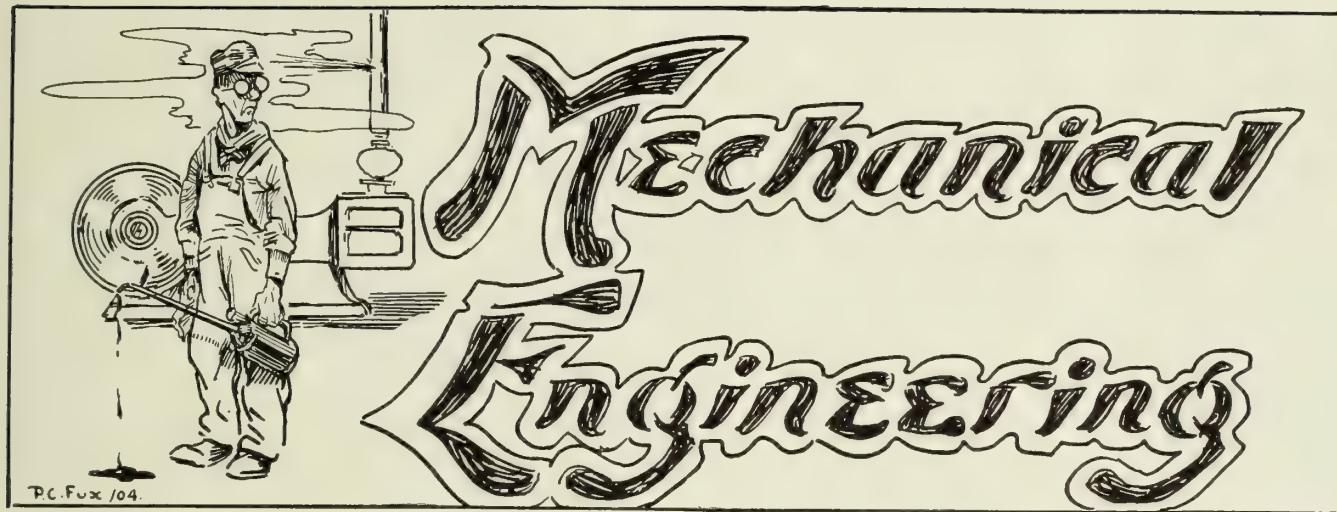

YORKE, LAYTON PARK.

"Once on a time there was a boy."

When still quite young, he was born in 1891, in N. Dorchester, Middlesex. After due time he entered Ingersoll Collegiate, later moving to Brantford, where he matriculated in 1907. The following year he received his

Senior Matriculation at London, and in the fall of 1908 registered with Year '11. Since with us we have found him to be a true student—a boy among boys, always giving hearty support to social functions, mischief or sports. His pleasant smile, his frank and open-hearted manner have won for him a merited place in the esteem of his fellow-students.

AITKEN, JAMES.

"Hello! Another call from Brantford."

Entered life's school October 29th, 1889, in Brantford. Here he mastered the mysteries of readin', ritin' and 'rithmetic and in '06 graduated from the Brantford Collegiate Institute with a deep knowledge of lacrosse and other learning upon which his teachers insisted. In '08 he entered the Applied Chemistry Course with the Class of 1911. School reagents synthesized brain and brawn, both yields exceeding fondest speculations. As a member of its Executive he contributed much to the success of the Chemists' Club. Jimmie's fellow chemists and many other school friends are certain that, if earnest effort, executive ability and technical training spell success, his choices are a "sure thing."

BILLINGS, JOHN HARLAND.

"Every man has a sane spot somewhere."—Lowell.

Born at Leskard in 1888. After treading the usual flowery paths in a country school, he attended Bowmanville High School, from which he graduated in '05. He then spent three years in teaching the young idea how to shoot, after which he entered the course in Mechanical Engineering. "Josh" has been an active worker in student societies from the time he first entered college, his fellow students showing their appreciation of his services by electing him President of the School Y.M.C.A. and Vice-President of the Electrical Club. He played on the School Senior Soccer team and was manager of the Intermediates.

CHADWICK, WALTER WYBURN.

*"At church, with meek and unaffected grace
His looks adorned the venerable place,
And deep asleep he seemed yet all awake."*

Walter Wyburn Chadwick began the study of Applied Chemistry in Hamilton, in 1891, when for the first time he eliminated oxygen from air. He entered Hamilton Collegiate Institute in 1904 and in 1908 began his course in Chemical Engineering, and basketball, the favorite pastime of his native city. Chad is specializing in the latter branch of his course. He expects that on graduation, half of the members of his Class will find employment in the paternal brass works. He is deservedly popular among his associates, and, notwithstanding many distractions, occupies a front position in his Class.

CLEARY, FRANCIS S.

F. S. Cleary was born in the year 1886 in the city of Windsor. He received his early training in St. Michael's College. Obtaining the necessary registration fee he entered the School as a Mechanical. He has spent his vacations working on the construction of the Detroit River Tunnel.

CRUTHERS, WILLIAM MAURICE.

"I never saw so much essence of devilment put in so small a vessel."

Bill was born in Manitou, a small town in Southern Manitoba. The West failed, however, to hold him and his present abode is in Oakville. The latter town is the recipient of many slams, but it seems to possess a charm sufficient to satisfy even his exacting nature. After a short time at school in the West he came down to Trinity College School where he received his training preparatory to entering S. P. S. Here he took up Mechanical Engineering. While at the University Bill has earned a reputation for being a consistent worker and a more consistent "fusser," while the constant smile rivals "the smile that won't come off."

DOWNING, FRED HALE.

"An engineer; red blood at high pressure and all valves fit."

When Downing came to Canada he looked for neither a peaceable time to come nor a soft spot to light upon. In search of trouble, the Rebellion of 1885 saw him settling near London. A short time later he removed to Lucan, where man must be strong physically, mentally and morally to survive. Fred survived. Here he completed his public and High School education, graduating with Senior Leaving in 1906. In 1908 he entered "School" with Mechanicals. Here you will find his name on the School hockey, football and honor lists. In his graduating year the Mechanicals and Electricals saw fit to make him their representative as Vice President on the Engineering Society Executive. Socially he has been connected with the Haveram Club.

ECKERT, CLAYTON H.

*"Searching an infinite Where,
Probing a bottomless When,
Dreamfully wandering,
Ceaselessly pondering,
What is the Wherefore of men?"*

He began the battle of life at London, Ont., in 1890. It was here that he received his public school and Collegiate Institute education. He matriculated in '07 and, after another year in necessary preparation, he joined the Class of '11 in the Department of Applied Chemistry. Having full scope for his energies he has done ample justice to the mysteries of T. T. and Alembic. He has been an untiring earnest worker and a cheerful, good-natured fellow-student. With the graduation of this member of the Chemists' Club, there goes the best wishes and friendliest feelings of his classmates.

ELLIOTT, JAMES ALEXANDER.

Came into existence on May 16th, 1885, in the city of Halifax. Finished his public school education and took a stab at High School laziness, until marine engines caught his fancy. After spending five years with the W. and A. Moir Marine Engine Company, Jimmie took a notion for the ocean. Two years between the West Indies and the North Pole were enough to give him a physique hardy enough to keep him always in the best of health and spirits through his three years in the Mechanical Engineering Course.

FARQUHARSON, WILLIAM.

"He was a man of actions, not of words."

Bill's capacious lungs were first expanded to the embracing air of the town of Walkerton. Here originated his engineering proclivities, which were further developed by a three-year apprenticeship with the Kay Electrical Company, of Toronto, and as electrician with the H. L. Sackett Company, of Buffalo. Feeling, however, the necessity of a science course, Bill graduated from the Tech, and decided to enter the Class of '11, taking the electrical option. He has spent his vations with the Canadian Customs at the port of Lewiston, N.Y. With his past experience and natural abilities, Bill will undoubtedly add to the honor of Year '11.

FRANKEL, EGMONT LIONEL.

Egmont's birth, on July 6th, 1891, added another child of Fortune to our midst. After a short, but brilliant, career at the Model School, Toronto, he wended his way to the little red school-house on the hill, Upper Canada College. For four years his time was spent in showing his masters his full appreciation of their teaching abilities. In 1908 his efforts were finally rewarded and he was put on an Avenue Road car with a matric. passport, entering upon the strenuous and odorous sea of Chemistry with the Class '11. Since coming to the School, Egmont has managed to successfully evade the never ceasing vigils of the examiners. His chosen field is one in which we are sure he will make a success.

FULLER, ROYDEN JOHN.

*"Self-reverence, self-knowledge, self-control,
These three alone lead life to sovereign power."*
—Tennyson.

"Fuller" was born in 1882 in the town of Alliston, Ont. His early life was spent in Watford, where he received his public and High School education, and from where he passed to Model School, and later to Normal College. After teaching for four years in Paisley as principal of the Continuation School, he decided to depart from this sort of life and joined the ranks of the School with the Year of 1911. In this Class he has always been a leader and in his second year was elected as Representative in the Engineering Society. We expect great things from a man of this calibre when he launches out in his profession.

GOODERHAM, JOHN LEYS.

Leys was born in Toronto on July 2nd, 1888. The initial part of his education was looked after by the Toronto Church School and Upper Canada College. From the latter he took his matric. in 1905. In 1906 he came down to Arts, where he spent two years in the C. & M. Course, and then "getting wise," he enrolled with the "Chemists" of '11, S. P. S.

EXECUTIVE OF CLASS 1913, S. P. S.

C. A. Webster

W. B. Caldwell,
Secretary-Treasurer

N. H. Lorimer

R. S. Black

T. E. Torrance,
Vice-President

J. A. Styles, B.A.Sc.,
Honorary President.

E. R. Gray,
President

H. R. Banks

GREEN, ROBERT EARL.

Earl was first heard from in 1887 at Windham, Ont., where his early life was spent. In 1898 he entered Waterford High School, where he distinguished himself between the goal posts for the High School Football Team. Having obtained his Senior Teacher's Standing, he went the way of the pedagogue for three years, but finally wearying in well doing, he cast in his lot with the Class of 1911, S. P. S., where his facility as a student points to a successful future in practical life.

LONG, ALLAN L.

*"The name was Long, the glasses gold,
The minstrel was infirm and old."*

Born in June, 1889, at the famous town of Peterborough, Ont. He soon outgrew his surroundings, however, and when a few months old went forth into the world with nothing but a pair of gold-rimmed spectacles, which he wears even unto this day. He soon learned the ways of the world and, after a few years, turned up at Toronto in Applied Science (Chemical Engineering), the same old boy of Peterborough, with a little more hair and a decidedly more intelligent mien. At present he constitutes fifty per cent. of the graduating class in Chemical Engineering, and is pianist by special appointment to the Chemical Club.

MACCOLL, EVAN BEAUMES.

"An angel was tired of Heaven."

In a farm house near Glencoe, Ontario, in 1888, he first saw the light of day and it was from there our Engineer in embryo trudged to the school where the foundations were laid for his future career. At the Glencoe High School he received his Collegiate training preparatory to his course at the University, which he entered with the Class of 1910. He was successful in his examinations, and was elected to the Executive of the Class in 1908. Nothing daunted, however, by an attack of typhoid, he again entered with the Class of 1911. He is a member of the Phi Sigma Tau Fraternity. In the near future he will have to be reckoned with among Mechanical Engineers.

MACKENZIE, WALLACE SUTHERLAND.

"Scots wha hae wi' Wallace bled."
—Burns.

"Mac" was born in Woodstock, Ontario, October 1st, 1888, and received his primary education in the public schools of that city, later entering the Collegiate Institute, which he attended for three years. In 1905 he decided to try college life and matriculated from St. Andrew's College in 1906. After spending some time in Winnipeg, he returned east to renew his studies and registered at the "School" in the fall of 1907. The Class of '11, with which he is associated, look forward to a successful career for him when the trials and troubles of "school" life are over.

McEACHERN, JOHN ARCHIBALD.

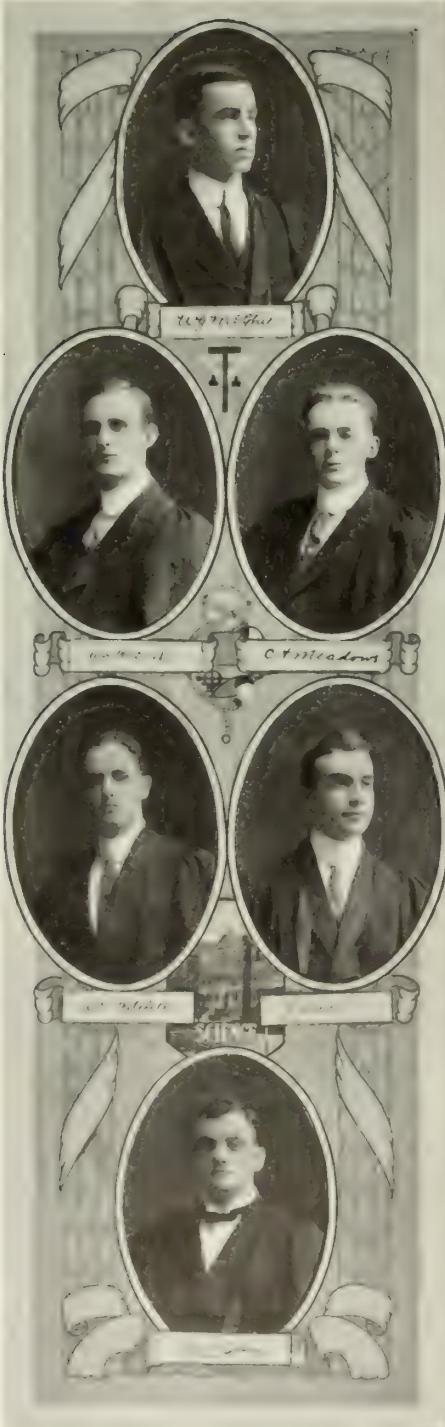

*"His step is first in peaceful ha',
His sword in battle keen."*

"Jack" claims Glencoe as his civic mother, for near there he first saw day. He entered the Glencoe High School in 1903, receiving his First-Class Certificate in 1907 with high standing. He remained at home for a time, increasing in stature and entered the Mechanical Section of '11 to grapple with its problems. In the Class lists, he always ranks high and, although he is a lesser light on the campus, yet, at every game he sheds his spirit and raises his voice for his Alma Mater. "Mac" has ideals and ambition to transform those ideals into triumphs and will some day reap the reward of something more lasting than a verdant wreath.

MCELROY, ROBERT WILLIAM.

"Gentle in manner, resolute in execution."

"Mac" had no choice in the matter else he might not have selected such an illustrious spot as the Hamilton "Mountain" for a birth-place. For some years he scrambled up and down that bluff, until he obtained the necessary certificates to enter Varsity. Then, moving to Toronto, he took a year in Arts. After about six years spent in manufacturing and various pursuits, he decided to satisfy his tastes for things electrical by taking a course in that line of engineering: thus we find him graduating with Class '11. "Mac" is a right true fellow and success is assured him in his chosen profession.

McGHIE, WILLIAM GORDON.

*"Sport
Went hand in hand with Science."*

W. Gordon McGhie was born in St. Catharines, Ont., in 1891. Here he received his public and High School training, matriculating in 1907. With Gordon there was never any question as to what profession to follow, as both his natural gifts and inclinations lay all in the line of Science. So after an extra year in Mathematics, he gravitated to S. P. S., entering with Class '11. He has taken honor standing throughout his course—Mechanical Engineering. "Mac" has always taken a very keen interest in sports of all kinds and, although quiet and unassuming in manner, has always been rich in friends. If character and ability are the criteria of success, Gordon's future is assured.

MCLEISH, ANGUS GRAY.

"Gus" began his struggle of life back in the chivalrous days of '85, in the township of West Williams, Middlesex, known for its offspring of husky men and worthy scholars. He received his early education in the Saba Public School, after which he entered the Collegiate in Strathroy, where he gained his matriculation in 1903. Having taught school a few years, he decided Engineering as his vocation, so he hied him to Toronto University in 1907. Among his fellows Gus is well known, taking a keen interest in College life. He is a lover of sport, a steady worker, a striking figure in the Debating Society, in the Glee Club, a member of the Schubert Choir, once Vice-President of Y. M. C. A., and a member of Torontonensis Board.

MEADOWS, CLIFFORD AUSTIN.

*"What's the matter with Meadows?
He's all right.
What's the matter with Meadows?
His hair is white."*

The year 1890 was marked by the notable advent of Clifford Austin Meadows. During his boyhood Cliff early showed his liking for Structural Engineering by the erection of various designs of chicken houses and pigeon coops. In Harbord Collegiate Institute he was taught the elementary theory of engineering by his venerable pedagogue "Tommy Smyth." After graduating from H. C. I. in 1907, he spent a year in practical work on steel construction and entered "School" in 1909 to learn "passing up," running and a little Mechanical Engineering. Cliff intends, on acquiring his B.A.Sc., to enter the wire and iron works of his father.

MITCHELL, LAWRENCE CORLEY.

"Small, but of infinite wisdom."

Larry first synthesised carbon dioxide in 1889 and was foisted upon the trusting public at Meaford. He underwent an educational reaction at public school, which resulted in a very theoretical yield. Meaford Collegiate had the honor of contributing to the sum total of his intellectual attainments and yet remembers him as the stormy petrel of College life. Grasping for more of the unknown, Larry threw in his lot with the illustrious Chemists of 1910 and here became famous as the "School" man, who held at bay the Arts one hundred strong. However, an unknown element precipitated Larry into the Year of Onety-One, with whom he graduates to make good as a man among men.

PARKIN, JOHN HAMILTON.

"His heart is true as steel."

Parkie entered the gay white way in Toronto, September, '91. After receiving all knowledge obtainable in the public school, he entered the Technical High School in '04, and matriculated from there in '08. His mind then rose to higher things and that same fall he enrolled with Class '11, S. P. S., choosing Mechanical Engineering as his profession. Jack was a strenuous member of Amen Corner. But, although he found plenty of time for amusement his name was always found high up in the Class list. J. H. is a good old sport and made many friends who wish him good luck in his chosen profession.

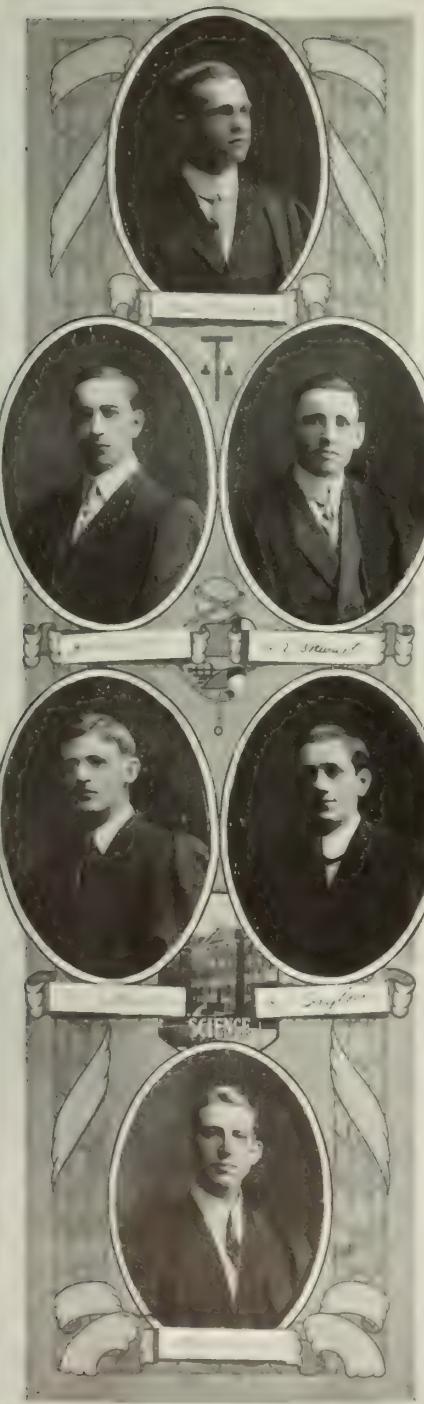

ROTHERY, LUDWIG WASHINGTON.

*"I have made for you a song,
It may be right or wrong,
But only you can tell me if it's true,
So 'Rockie' here's my best respects to you."*

Born in Niagara Falls, Ont., during the 19th century, Rockie obtained his early education in a Sunday school. After graduating he entered the electric railway business, from which he obtained the qualifications of a "Stationary Engineer." With this good grounding he entered the Class of 1911 at the "School." His residence life of his second year will be remembered by his connection with the South Residence fire brigade, of which he was "chief." Rockie has always been on hand at elections with his rough house organization abilities. Nuff 'sed.

THE CHEMISTRY BUILDING

RUTLEY, FREDERIC GEORGE.

"All great men are unique."

Fred first graced this world on the 28th of September, 1890, and, quite naturally, has continued to do so ever since. After recovering from his preparatory education, he decided to become illustrious and solve the mysteries of Engineering. It is well known that he is an energetic draftsman and is said to have a passing acquaintance with nine o'clock lectures, although this cannot be verified. Fred's athletic career was brought to an end by injuries while playing with the Champion Third Rugby Team of 1909, and he managed the same championship team in 1910. With making friends, playing rugby, and a little work, he has had a strenuous time, and bids fair of giving the world a similar time when he leaves the School.

SCOTT, JACK WILLIAM.

"Du bist wie eine Blume, so schön, so hold, so rein."

It happened in Ottawa, June 8th, 1890, and spent the first four years of its existence under the shadow of the Capital Hill. At that age, having shown no marked interest in politics, it was removed to Toronto, where in due time knowledge enough to enter the School was absorbed by it at the Model School and Parkdale C. I. Always having had a mixed mind it entered the Course of Mixtures, namely "Analytical Chemistry." It is a user and a willing lender of tobacco, the supply, alas, exceeding the quality, and has had a liberal and varied female education. Despite the above it gives promise of blossoming into a brilliant member of its species.

STEWART, ALAN EDGEWORTH.

Although born in Yankeeland, Alan Stewart began to exhibit remarkable discretion at an early age; and, when barely two years old, resolved to settle in Toronto. He quickly mastered the language of his adopted country, and when only six, could say "Goo-goo Papa." On dit that he had a shady reputation across the border, but, of course, he was young. Since his arrival in Canada, he has done nothing of note except work, play, eat and sleep, the balance of his time being given to idleness. He will undoubtedly revolutionize Chemistry. Just watch St. Peter's countenance when A. E. passes the golden gate, with one of his evil-smelling test tubes in each hand.

STEWART, ROSS O.

"He says he'll never marry."

Ross O. Stewart entered upon this theatre of woe and joy in much the usual and ordinary fashion at the particular spot on the earth's surface entitled Lindsay. At the youthful age of seven his parents decided that he had too much time for mischief, so they sent him to school, where he has been sojourning ever since. He went the rounds of public school in Lindsay, those of High School in Peterboro', and took his matric at Welland. During all which time nothing more happened than that he learned sufficient to squeeze into S. P. S. in time to be at hand for the graduating Class of '11.

TAYLOR, WILLIAM GEORGE ROSS.

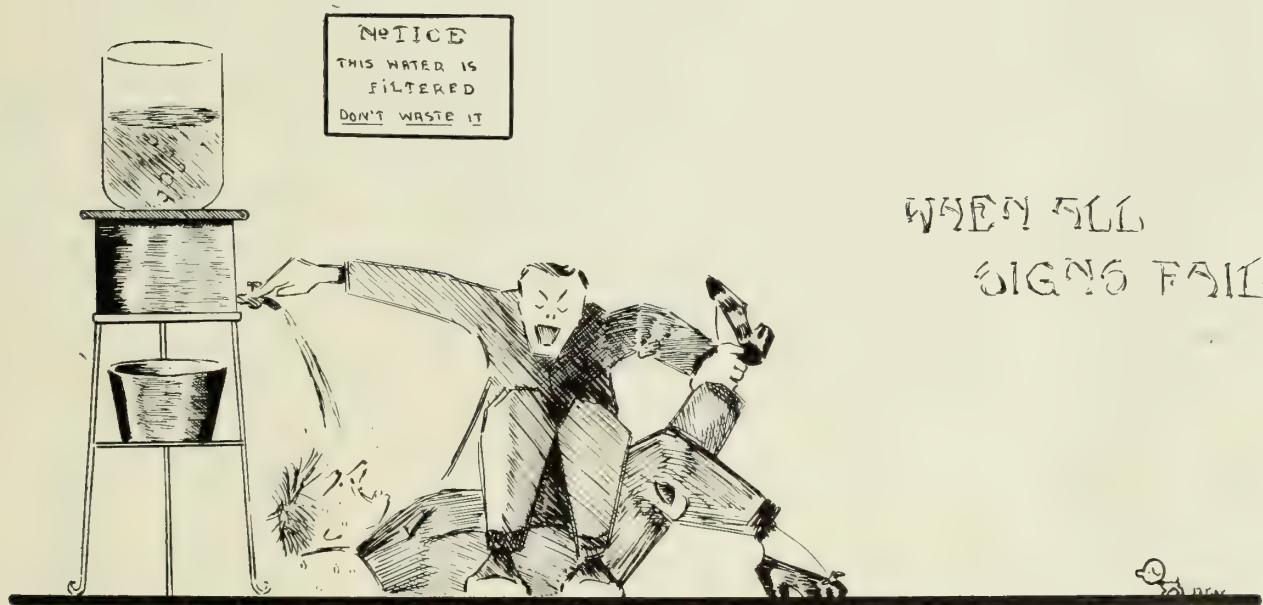

"Character is one of the greatest engines ever given to a man."

Taylor, William George Ross, was born in Toronto in 1891. He commenced his school career in Gladstone public school. Later he attended Parkdale Collegiate, and thence he went to the Technical High School. He entered the University in 1908 at the age of seventeen, enrolling in the Faculty of Applied Science and Engineering to study Mechanical Engineering. He was successful here and for his aptitude in his particular line of study he was appointed Mechanical Councillor to the Electrical Club. "Ross" will leave the "School" with memories of many true friends.

TRAIN, CARL WELLINGTON.

"He liveth long who liveth well."

Carl Wellington Train was born in Meaford, Ont., in 1885, and attended High School at Burk's Falls. He came to Toronto in 1902, and was for three years in the employ of the Canada Foundry Company, gaining much practical experience. After spending a year at Toronto Junetion Collegiate Institute, he joined the ranks of the "School" in 1906, taking up Mechanical Engineering. Since then he has only attended alternate years at College, and has had charge of extensive prospecting for the Nipissing Mining Company, Cobalt, the past three summers. He has always taken great interest in athletics and was twice in the Mulock Cup Series. While at College he has made many friends, who wish him every success.

WALLACE, GORDON LESLIE.

"Scots wha hae——"

Gordon Leslie Wallace was born in October, 1889, in rural Ontario. His primary education was received in the village of Greenbank, where he has lived and which he continues to call home. At the School, on farm and soccer field he developed mind and body. From January, 1906, until the summer of 1908 he attended the Uxbridge High School, where he was ever known as a good student, a clever sport and a book-worm. Matriculating in 1908, he came to the S. P. S. and entered in Mechanical Engineering. Being connected with all student activities, including the Glee Club, Debating Society and Y. M. C. A. work, he is known and respected by a wide circle of friends within and without the University, who all join in wishing him continued success.

WELFORD, PERCY GOULD.

*"That ever with a frolic welcome took
The thunder and the sunshine."*

"Pete" first saw the light in London, Ont. He appeared in the halls of learning at Rectory Street public school and later at the London Collegiate Institute, matriculating in 1905. For some years he worked for the Queen City Oil Company, and thus made such a study of "grease" that nothing would suit him but the Mechanical Engineering Course at S. P. S. Accordingly he entered with the noble year of 1911, and since has distinguished himself in "School" and out of it. "Pete" still loves his home town and likes nothing better than a week-end trip occasionally to see how things are getting on.

WILKES, GERALD HYDE.

"Each 'Eve' that saw him did enchant his mind."

Gerald Hyde Wilkes was born at a very tender age on July 17th, 1891. He was from the first a very taking boy having on one occasion taken first prize at Sunday school (a silver mug about half the size of his own). Unfortunately the teacher saw him take it and made him put it back. Nothing daunted, he took his way through the Wakefield Preparatory School. Gerald continued his taking ways and took an opportunity to address a large audience at the last school elections on Woman Suffrage. His friends at this auspicious occasion take the opportunity of wishing him good luck as he now takes his leave.

WILLIAMS, EGBERT R.

"Still waters run deep."

Williams is a Toronto boy. His varied abilities speak volumes for Toronto school training. His passion for Chemistry was developed in Harbord Collegiate. After spending some time in Cobalt he chose to enter the field of Chemistry and entered "School" with Class '11. From the start "Prox" Williams has interested himself in all things chemical. His friends include the members of the Chemists' Club, of which he is Vice-President, and many of the other students. His conscientious, careful work has won him an enviable place amongst his Class, and besides his diploma Prox carries away the blessings derived from personal contact with many of Class '11 and their confident trust that he will make good.

WILSON, HARRY ALTON.

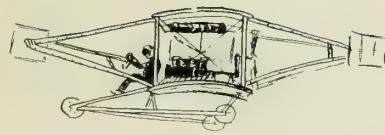

*"If there is another world, he will live in bliss,
If not, he will make the best of this."*

Alton began his activities near Picton in April, 1890. His course was disturbed in the Picton public school by his a b c's and possibly a strenuous schoolmaster. After an active childhood we find him migrating to that famous mountain city, Hamilton, where he endeavored to gather a little more of life's experiences at Highfield School. Following a pleasant tete-a-tete for two weeks with the "matric" examiners, he persuaded them to provide him with "un billet au Universitat" and straightway hied himself to Varsity, where he launched upon the greasy sea of Mechanical Engineering. However, Alton has shown himself to be buoyant at exam. time and we predict for him a very bright future.

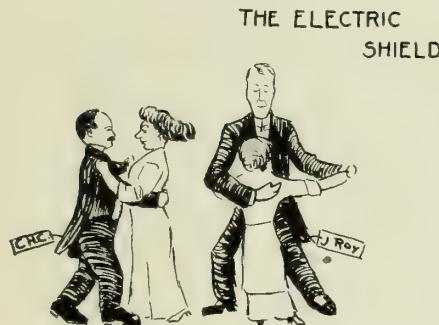

YOUNG, ALBERT.

"We must get rid of the idea that a little learning unfits a man for work."

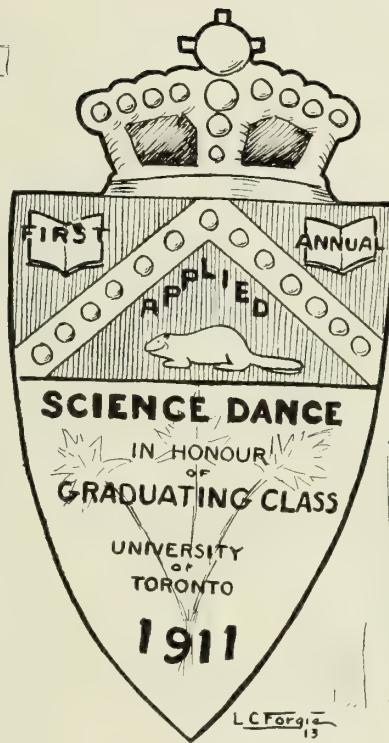

Bert Young was born in the centre of a big farm in the township of Binbrook some time in the year '84. Here he became acquainted with such "machines" as the hoe, spade, etc., and these caused him to lean toward Practical Science. His High School education took place in Hamilton C. I. Afterwards he embraced pedagogical pursuits for several years. In the fall of '08 he took his first steps to satisfy his soul's desire and registered with the "Hicum-Tieums" of Year '11. As a student, Young is just an ordinary plug with too much respect for life to waste time and enough love for work to prevent things from becoming utterly stale and unprofitable.

LOTS TO LOOK AT.

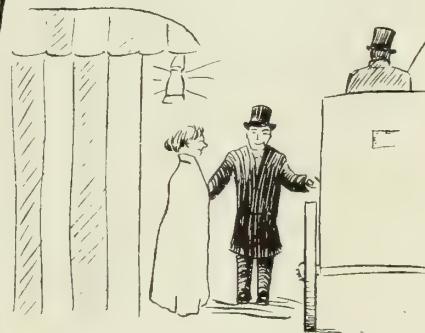

THE FACULTY WERE THERE TOO.

L.C. Forgan
1911

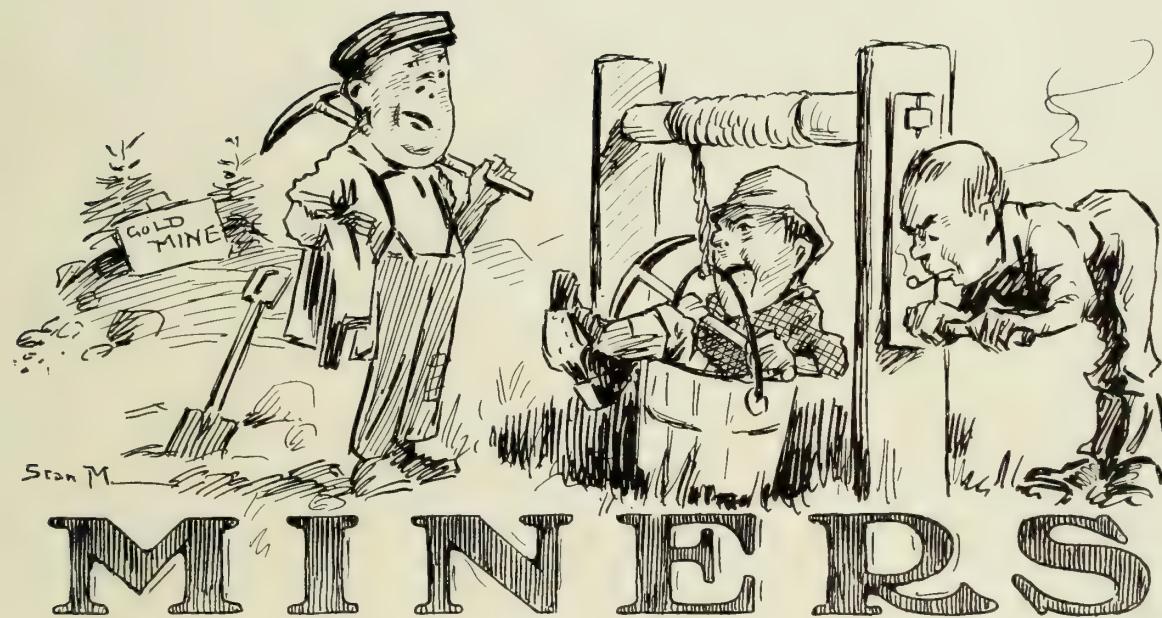

"Is your programme full, Miss—?"
"No; I only had a sandwich and two olives!!!"

ALL'S WELL THAT ENDS WELL.

THE MINING BUILDING.

BATTEN, HAROLD LESLIE.

H. L. Batten first made his appearance in Singapore one hot morning in the winter of 1886. He received his education in Northampton, England, and spent some years in business in Manchester. Coming to Canada in 1906, he spent two years at the O.A.C., Guelph, and in 1908 entered the S.P.S. Mining. Quiet and unobtrusive, "Bat" is "there with the goods" all right, as he has shown both in the examination hall and the ring. Passing with honors, he made a good standing in both years' work, and won third and second medals in the lightweight boxing. If hard work leads to success, we have no hesitation in predicting a very bright future for Batten.

BISSETT, JAMES R.

"They that govern the most make the least noise."

In 1888 Kincardine was startled by the appearance of James R. Bissett. The excitement, however, soon subsided, and to-day the general feeling among Kincardine people is that they had reason for mutual congratulation on that incident rather than for dismay. James R. entered the High School in 1901, and matriculated in 1905, leaving in 1906 to spend a couple of years in the industrial advancement of his native town. While at the "School" he has proved himself by two noteworthy characteristics—he does not make a noise and he has never come late to a lecture. We wish him all the success that his reliability and sound common sense will no doubt earn for him.

BROCK, WILLIAM MIDDLETON.

"And Brock's inspiring voice rang out,
'We are the Engineers.'"

Although a namesake of the immortal "Hero of Upper Canada," Bill is not held directly responsible for the famous scramble up Queenston Heights. He arrived just seventy-three years, one hundred and thirty-six days too late for the battle, and, probably, remained ignorant of its occurrence until enlightened by the village schoolmaster at his native Thamesford, Ontario. Upon graduating from Ingersoll Collegiate Institute, however, he was well informed on the event, and, later on, after three years spent as a country pedagogue, knew more than the text books. 1908 saw his initial appearance at "The School," where, in the role of "The Subdued Irish Enthusiast," he has made a decided hit with the gallery.

CHARLTON, OLIVER WELLINGTON NELSON.

"Our ideals are our better selves."

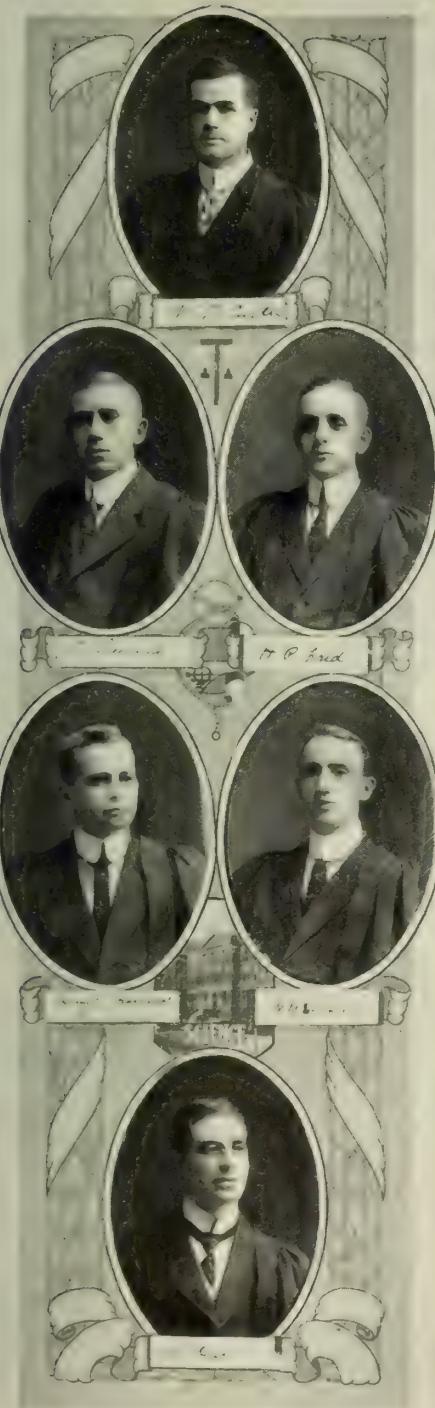

If there is anything in a name, then Oliver Wellington Nelson Charlton will attain distinction. Born in Toronto, Nelson did his babbling there, following closely upon which was the hackneyed routine of education. He reversed the pious wish of his parents and entered, instead of the ministry, the "School." Except when occasionally within the sombre confines of his college, "Nell" is seldom seen out of the company of the ladies. As a side line Nell has done some work, not only in mining up north, but with the T. & N. O., Polson's Iron Works, Toronto Electric Light Company, City of Toronto, etc. Nell's aristocratic tendencies lead us to hope that he marries an heiress.

CLARKE, JOSEPH E.

Joe came into this world November 3rd, 1899, with a smile on his face. Toronto was the scene of this happy event. He received his early education in Toronto, and later attended De La Salle Institute, from which he matriculated in 1907. Before entering the "School" in the fall of 1908, Joe spent a year at Parkdale Collegiate Institute, where he made a place on the champion Rugby team. "Never-a-worry-Joe's" achievements to date are two years' examinations successfully passed, and a summer spent in Cobalt. Joe's everlasting good nature and his continuous smile have made him a favorite with those acquainted with him. It has been a pleasure to know him, and we all wish him the greatest success and happiness in his future life.

COLE, DONALD BROWN.

"Don" was born at Newark, N.J., in 1890, and rumor has it that "Fussy's" first words were, "Is my hair on straight?" However, after attending preparatory schools in Buffalo, N.Y., and Elizabeth, N.J., he matriculated from "Tech," Toronto, 1908, and entered the "School" in the fall of 1908. Honors obtained in his first and second years, a summer spent in work at Copper Cliff, Ont., another in chasing contours in British Columbia for the Geological Survey, and the distinction of having the best defined trouser crease in the School are his achievements to date. We'll miss his sunny smile and his faultless cravat, but we'll remember him because we liked him. Long life to you, Don, old chap.

CURTIS, WILLIAM THOMAS.

"Play on, McDuff."

"Bill," as he is familiarly known among the men of Class '11, first disturbed the calm evening silence of the town of Tillsonburg some one-and-twenty years ago. After a rough but uninterrupted passage through the public and High Schools of that town, his thirst for further knowledge urged him towards the School of Science. He entered with Class '10, but his yearnings for Class '11 soon changed his affiliations. That this feeling was mutual is evidenced by his election as President of Class '11 in their graduating year, the highest honor that could be paid him. In the realm of sport he figured as a strong man on the intermediate Rugby team of Varsity in 1910. Bill has spent a couple of summers in Cobalt as a miner and everyone wishes him the highest success in his profession.

FREELAND, EDWARD EWING.

*"For he was long and lank and lean;
The thinnest mortal man has ever seen."*

Synopsis.

(1) Born Brandon, Man., 1885. (2) Matriculated Upper Canada College, 1901. (3) Bank of Toronto, 1902-1907. (4) The School 1907--infinity, including exams., pluckings, honors, and things, mostly things. (5) Geological Survey during blessed respite from lectures. (6) Vice-President for Chemists and Miners. (7) Coming back for a fourth year, "Examiners willing." (8) Best luck, long life, happiness. For further particulars apply Tiny Freeland, "Insulting Engineer," any time after 1925.

FRID, HERBERT P.

*"Keeps his counsel, does his duty,
Cleaves to friends and loveth beauty."*

"Hub" entered upon the stage of life in the "Ambitious City." Educated at the Collegiate Institute there, he chose Engineering for his life's work, and joined the Class of '08. At College he took an active part in athletics, playing with the Senior School, winners of the Mulock Cup, and '08 Intercollegiate Junior Rugby champions. The following spring found him in Chicago where he reinforced his academic training with active professional work. In '10 he returned to College to finish his course in Architecture. His friends will indeed miss him, but are sure he will, in later years, reflect credit on his Alma Mater.

HARCOURT, HARRY EDMOND.

Harry was born in Toronto about twenty-one years ago. Several years later he blew into Chicago, and the Windy City remained his home until 1904. Then he returned to Canadian soil, developed a studious frame of mind and agonized the teaching staff of Newmarket High School for about a year. He next transferred his energies to Central Business College. After a flier in business, this eminent gentleman decided to further irrigate his brains with knowledge and entered St. Andrew's College, leaving it in 1908 to enter S.P.S. with Class '11. Mining Engineering has occupied his attention, and he has gathered quite a lot of information about it. He also played Rugby with Senior School.

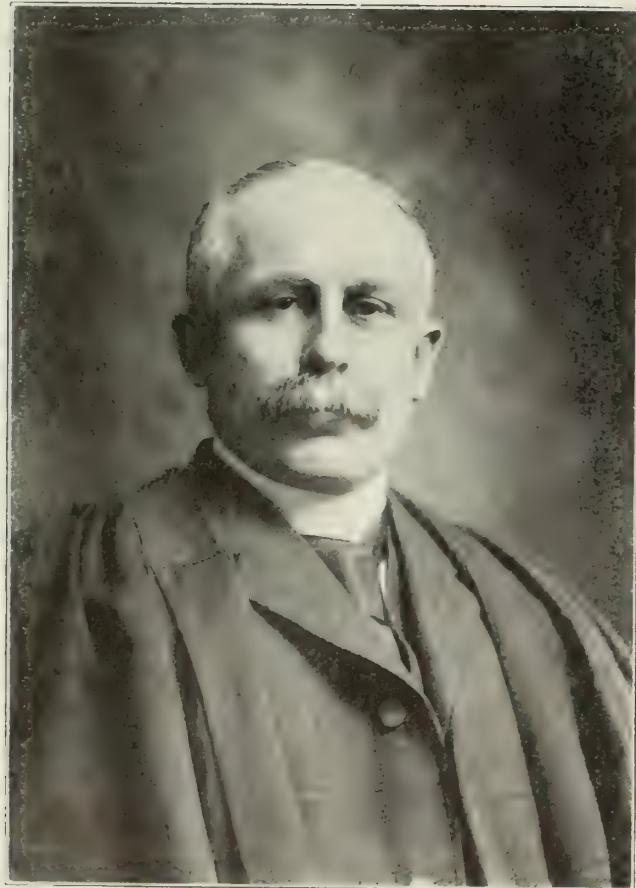

HEEBNER, MILLER BEEKMAN.

*"In deep cavernous voice our hero spoke,
'Tis useless, Old Chap, I cannot go, 'I'm broke'!"'*

"Jock" was born in Brooklyn, N.Y., in 1888. During his "prep." in High School he came to surface as a football artist, and then kept on coming and going. The first operation landed him the Presidency of his Graduating Class, the "going" was due to the Principal of the School. Next he blew himself through Michigan Military Academy on the slide trombone. In the autumn of 1908 "Yank" packed his suit case, unostentatiously oozed into Varsity and entered Mining with Class '11. During his course he has played Senior School Football, has been a member of the University Orchestra, and of the Glee Club; always passes his exams. and is quite a familiar figure on the Campus. His numerous friends all join in wishing "Jock" success as a Mining Engineer.

HELSH, FREDERICK I.

"Brownie" began his career in Lindsay, where he received his public school training, and graduated from the Collegiate Institute there in 1904. He spent the next three and a half years teaching, and then joined the Class of 1911 as a student in Mining. He is an enthusiastic hunter and duck-shooter, and his old friends of the rod and gun take this opportunity to wish him every success.

PROFESSOR C. H. C. WRIGHT.

PROFESSOR H. E. T. HAULTAIN.

LANNING, JOHN.

*"This man's metallic; at a sudden blow
His soul rings hard."*

Exploits, one of Newfoundland's important fishing ports, welcomed our subject to earth some time in the eighties. Mr. Lanning gave his earlier years to his country's principal industry, and later he entered the teaching profession, where his ability soon earned for him first-class professional standing. While a teacher he fought manfully through the press for an adjustment of teachers' grievances, and his efforts were more or less successful. Eventually John developed the mining fever and joined the miners of Class '11 in the Faculty of Applied Science. As Newfoundland is fast becoming a mining country we bespeak for Mr. Lanning a useful career on his native heath.

LIEBERMAN, MOSES J.

*"For he was a senior prizeman once,
And the pride of the College eight."*

Legal records state that M. J. Lieberman first smiled on life in the city of Toronto some time during the latter half of the 19th Century. In early years he was moved to Kingston, where he received his primary and Collegiate education. After serving the required sentence, "Moses" was privileged to return again to his native city and enter the Tech., from which he received Junior Matric. He entered the Science Faculty as a student in Mining in '08. If optimism and enthusiastic effort combined may be indicative of future glory in the Mining field we are safe in assuming that none of Class '11 are more fitted to drill and bore Earth's solid strata than is our mutual friend Moses.

MACBAIN, JAMES TURNER.

*"He's on one side of the line, we're on the other;
What's the diff? Just shake hands, brother."*

Our popular young friend, "Jimmy," first saw daylight in Buffalo, N.Y., about 1890 A.D. At five years of age, our future mining magnate struggled heroically through his first lessons, finally hitting ye old "S. P. S." in 1907. Having captured honors with apparently little efforts so far, it is safe to say that H will follow his name this year as usual. He has had quite varied experience in mining at the Otis, also as chemist in Buffalo at the copper smelters, and in the Lackawanna Steel Plant. With his pleasing personality, American ambition, and Scotch shrewdness, it is easy to prophesy a successful mining career for "Mac."

McDOUGALL, ARCHIBALD CAMERON.

One of those eccentric sinners of '11 who, in his first year of innocence and ignorance took Honor Standing—but who has since proved his penitence by amply rectifying his mistake. A prominent member of the renowned East Residence, and the ultimate authority of that august assembly on all matters ranging from tobacco to comic opera. A clever student and a most genial companion. He is universally acknowledged by his friends to be the embodiment of excellence in the gentle arts of repartee and conversation, his greatest fault being a marked tendency to think aloud, and to answer questions the same day they are asked. His favorite forms of recreation are pool, hockey and story-telling. In the last of these fields of diversion he excels. In the first he is probably the worst player alive.

MCLAREN, ARTHUR JAMES.

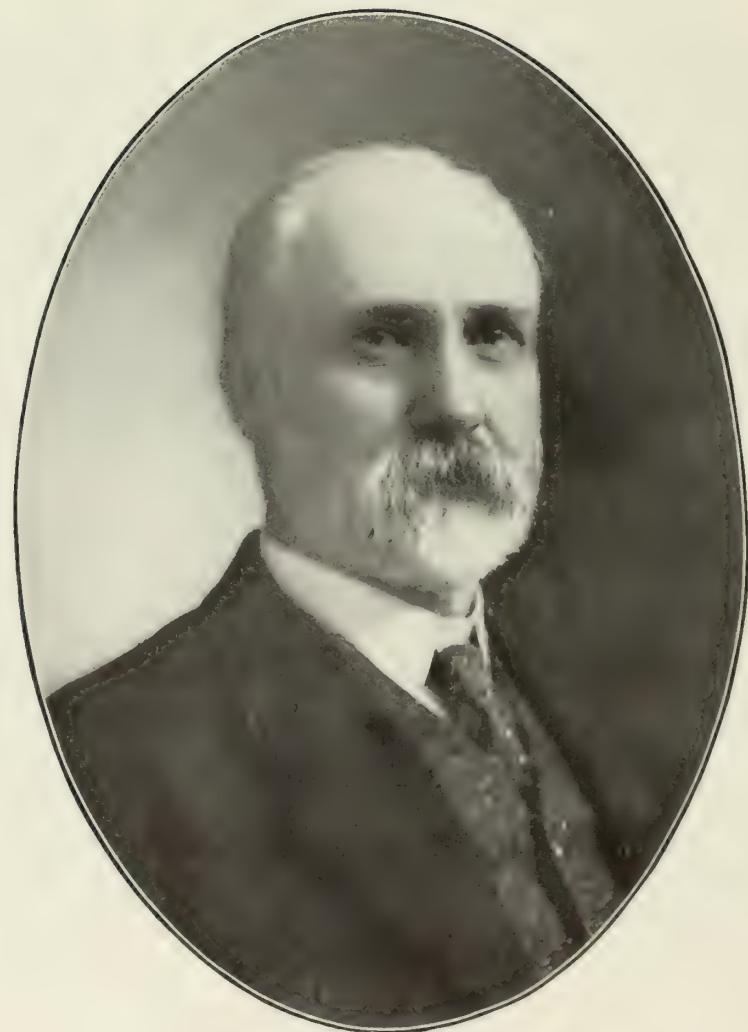

*"He shed a radiant smile around
And smoked a rank cigar."*

Considerably less than a quarter of a century ago Arthur first created a sensation in the lumbering town of Buckingham, Quebec. While in this limited sphere the gods, no doubt, discerned his latent abilities and decreed that Ottawa should be his home, but fearing lest he be drawn into the social maelstrom of the gay capital, his guardian angel led him into Collegiate life at Vankleek Hill. Here the thirst for knowledge increased. The result being an Arts course in McMaster University. Graduation was followed by enrollment in '10 Applied Science. A year in the balmy South followed and we now see him towards the end of his academic career enriched by experience, study and travel. Alert to grasp opportunity, keen to achieve success and exhibiting withal a never-failing good humor, "Bon Voyage" on the sea of life is the wish of all his friends.

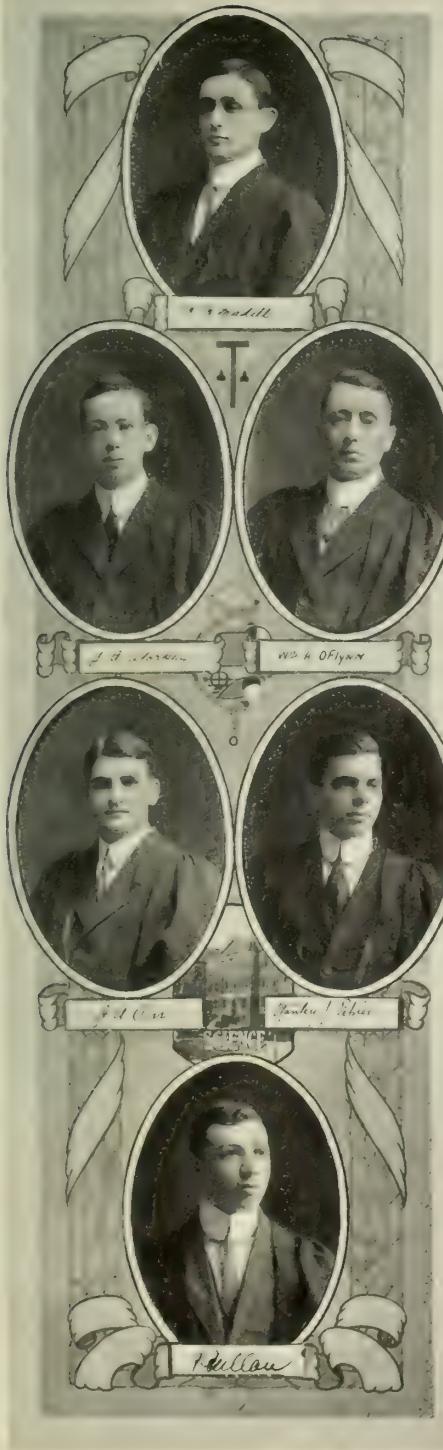

McPHERSON, WILLIAM BATTEN.

*"Merely look at his face and no doubt you'll declare
His head is no mere loafing place for hair."*

"Bill" has been absorbing knowledge—more or less—since October 21st, 1888. A Torontonian, he received his preparatory education at St. Andrew's College. After completing his course in Mining Engineering it is his intention to study Law, specializing in the controversies of the mining world. He has spent the major portion of his vacation in learning the practical side of the mining professions. Bill has represented his years on Mulock and Jennings Cup teams, besides captaining the Champion III Rugby Team of 1909. Fraternity—Kappa Alpha.

PROFESSOR COLEMAN.

MADILL, H. HARRISON.

The subject of this sketch was born in Beaverton, Ont., and has resided in Toronto since 1896. After graduating from Jarvis Collegiate, he attended Business College and received the diploma of the Business Educators' Association in 1908. Then, deciding that "a little knowledge is a dangerous thing," he enrolled himself as an architect in the Class of 1911 S.P.S., where, owing to the generosity of the faculty, he took honors in the two "spring-time guessing contests." After being a member of the Jarvis Cadet Corps, of which he was captain for a year, Harry became affiliated with the Queen's Own Rifles and held the rank of color-sergeant in their trip to England. His many friends wish him every success in his chosen profession.

MORPHY, JOHN AUBREY.

"*Of manners gentle, or affections mild,
In wit a man, simplicity a child.*"

Aubrey was born in Oshawa on January 24th, 1891, and so is still in the prime of his youth. After going to school at home he spent some time at St. Andrew's College before registering at S.P.S. He knows how to enjoy things and how to take his bumps, and ought to be well fitted to battle with the world at large. No doubt the trials and troubles of Mining will be easy for him.

O'FLYNN, WILLIAM ALOYSIUS.

"*The reason firm, the temperate will,
Endurance, foresight, strength and skill.*"

Born and educated in Dublin, Ireland, "Bill" came to the land of his adoption in the nineties. After spending some time in Mining in British Columbia, he changed to Civil Engineering and put in several years at Land Surveying, Railroad and Water Power projects. During the summer of '08 he was Assistant City Engineer of Calgary, and in the fall came to the University. He has made his career at the "School" a very successful one, his vacations have been spent winning the hearts of the Cobalt magnates. Good luck to you "Bill" in your future career as a Mining Engineer. We shall miss your picturesque vocabulary and that tough suit of overalls.

ORR, J. A.

Mr. J. A. Orr appeared to fill his allotted place in history at the very tender age of—he can't just remember what—in the little village of Clarkson's in 1888. He spent his youthful days on the farm. After completing the prescribed course with the village schoolmarm he attended Oakville High School, from which he graduated in 1904. The next four years saw him back once more on the farm. His thirst for knowledge, however, again asserted itself, so he came to Toronto and joined the Class of '11 in the School of Science. Joe has the best wishes of all his friends in his future career.

PEPLER, STANLEY JAMES.

Though christened by the above name we wish to state the peculiar fact that he never has been known by it since, but is commonly called "Duke." Duke was born in the Queen City on November 17th, 1889. His early years were spent here, till he migrated to Port Hope, where for several years he went to T. C. S. Here he was a good all-round pupil and we have record that he was duly caned for the first use of the "weed," though, unfortunately, it failed to cure. Duke entered the "School" in 1908 as a "Mechanic," but having seen the folly of his ways he became a "Miner," in which branch we assure him success.

PULLAN, HARRY.

The sun first shed its golden rays upon Harry Pullan not so many years ago, in Toronto. Shortly after graduating into knickerbockers, he removed to Ottawa, where he received his primary education. Thereupon he returned to his natal town, where, with his sunny smile and cheerful disposition, he graced Parkdale Collegiate Institute and subsequently S.P.S. Harry enjoys the reputation—and toleration—of being the smallest man in his class. His many friends think that he should be heard of in the future, as he has many years yet before him.

REID, ELLIS VAIR.

Ellis Reid originally came from Belleville, Ontario. Of course he is not to blame for this, and we are willing to forget the past. Education being a matter of grave importance to so sober-minded a youth, he enrolled in Jarvis Street Collegiate on his arrival in Toronto. Here he contracted the work habit in its most malignant form and also the nick-name "Peter." As Peter Reid he registered at the School of Science, but was uncertain which department he would favor; "Be an architect" suggested the registrar, "no home is complete without one"—and straightway our hero went and joined the Class of '11, Architecture. The air castles which he builds are reputed to be truly magnificent.

ROWE, THOMAS LEONARD FLETCHER.

Obtained his early education in Toronto, the city of his birth. After a campaign of ten years in the commercial world, with the "T" and set squares as his weapons, he realized the inadequacy of his equipment and turned his steps once again to study, choosing Engineering as that avenue which would best bear him to the Hall of Fame. During his college days he might sometimes have been seen in the lecture room, and was even known to have attended every lecture of a single day. Realizing, to some extent, the honor of the school depended on him, he heroically gave up to study all his free evenings, which were indeed few and far between.

SHEARD, PAUL.

"All work and no play, makes Jack a dull boy."

Our subject matriculated from U.C.C., and joined the Class of 1910 on their march to glory. Possessed of a restless spirit, however, he changed into Year '11 at a later date. Paul's artistic propensities headed him toward the Architectural Course and he has stuck to it ever since with commendable tenacity. Rumor hath it that Paul is shortly to undertake a complete rebuilding of Westminster Abbey, St. Peter's Cathedral and the Leaning Tower of Pisa, on completing his course here. As there is little, after all, that a man of intellect and optimism may not accomplish, we feel sure that in the future his feet will be heard printed on the halls of fame, while he himself remains seated firmly upon the sands of time.

SILLS, CHARLES P.

The subject of this sketch drew his first breath in the town of Seaforth, Ontario, 1885. Educated at the Seaforth Collegiate Institute, he graduated with a first-class certificate. After four years in the hardware trade he entered Science Faculty, a Mining student, in fall '08, securing "honors" in both Freshman and Sophomore years. In Athletics, "Charlie" has been one of the mainstays of the School and Varsity Soccer teams. His connection with the famous Seaforth "Hurons," many times champions of Ontario and the W. F. A., helped him to a place on the Varsity team, winning his "colors" in his Freshman year. Captain of the S.P.S. team, '09, his efforts helped materially to land the Inter-Faculty Cup, and as manager of the Varsity Soccer team this season safely piloted them to victory.

WAITE, JAMES HENRY CECIL.

"Old growing but ever learning."

"Ike" was born in Port Hope, but of course the town is not to blame for that. He received his "prep." training at Port Hope High School, where he figured prominently for three years in Rugby and Hockey. Desire for fame caused him to cast in his lot with the Miners of '11, and through his whole course he has been popular with the boys because of his eagerness for a "Freshie Tap Scrap," and his love for everything free and easy. "Ike" leaves the School this year (if the examiners permit) to pursue Mining, despite his hatred for Mineralogy. His prominent swagger and "tardiness for lectures" will be missed by all, but we all join in wishing him success.

WHEELER, A. G.

Wheler went through all the experiences of being born and educated, though the exact location of these interesting events remains a dark secret. However, when he came to the School, it was in a burst of radiance, which has surrounded him and all his doings ever since. He is justly popular among his Class and everyone wishes him well.

WYLYE, WM. H.

"He has staked a little claim—in Paradise?"

About twenty-five long and weary years ago, Bill the minor, located in the prosperous town of Carleton Place. After obtaining his early education, he turned his attention toward Mining, and spent a number of years in New Ontario. Thinking that a little theory would not be

out of place he joined the School with Class '11. He has always taken a prominent part in Athletics since coming to "Varsity," and besides obtaining his "T" in soccer, has played on Varsity III hockey, and Science soccer and hockey teams. His quiet but pleasing personality has won for Bill a host of friends in the University, and if general popularity has anything to do with success Bill's future is assured.

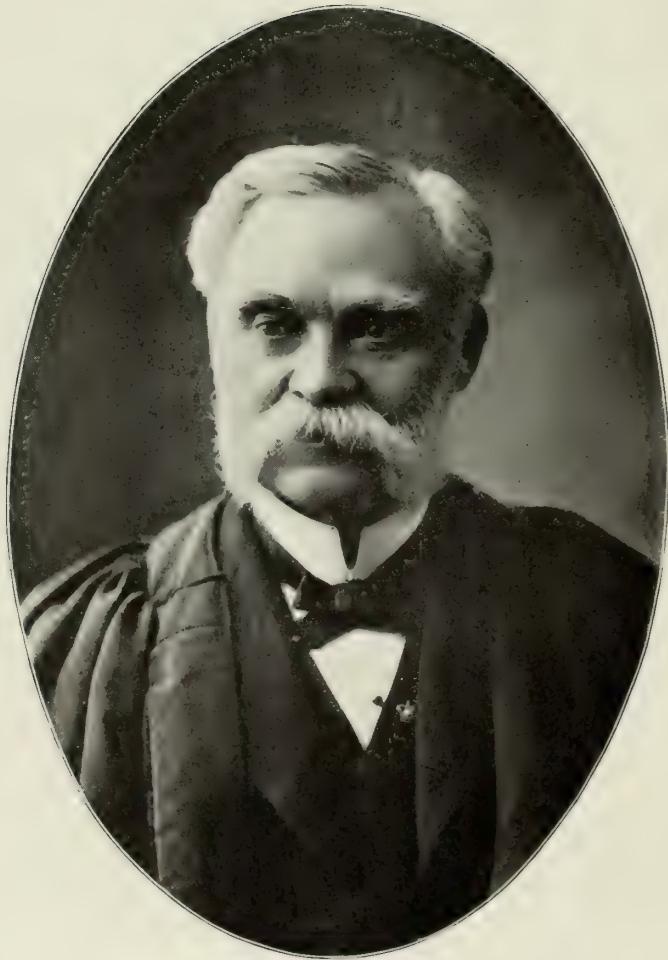

"FATHER" LANNING.

THE ROYAL COLLEGE OF DENTAL SURGEONS.

JAMES BRANSTON WILLMOTT, D.D.S., M.D.S.

History of Royal College of Dental Surgeons

HERE is probably not a college in America that has developed by its own individual efforts so steadily and surely as has the R. C. D. S. It never has had any outside support, such as Government grants or private bequests, during its existence. Developing as it has from three small rented rooms to the present magnificent structure is sufficient in itself to prove that the Dental profession plays no small part among the professions of to-day.

No doubt we, as Dentists of Ontario, feel justly proud of the fact that our Dental College has made such marked advances. From the time of its incorporation up to the present, our College has been owned and managed by the Dental profession and a great share of honor is due to a few individuals, who gave much time and energy to its development. Chief among these are Dean Willmott and Dr. Luke Teskey.

Previous to 1875 there was no systematic means of obtaining a dental education in Ontario. At a meeting of the Ontario Dental Society which met in Hamilton in the same year, a resolution was adopted arranging for the opening of a School of Dentistry in Toronto. The work was left in the hands of Dr. J. B. Willmott and Dr. Luke Teskey.

The first session opened November 1st, 1875, with eleven students in attendance occupying rented rooms at the corner of King and Church Streets. Dr. Willmott was made Dean and Dr. Luke Teskey lectured on Anatomy. In 1877 Dr. Teskey resigned and Dr. W. T. Stuart took the gavel and has remained to present writing as Professor of Anatomy and Chemistry.

Next year saw an advance in the profession. It was necessary to secure greater accommodation and hence the College was removed to

rooms at the corner of Victoria and Richmond Streets and then to 13 Louisa Street.

In 1888 the R. C. D. S. became affiliated with Toronto University and on April 22nd, 1889, the degree of D.D.S. was conferred upon twenty-five graduates by the University. This was the first degree in Dentistry conferred by a British University.

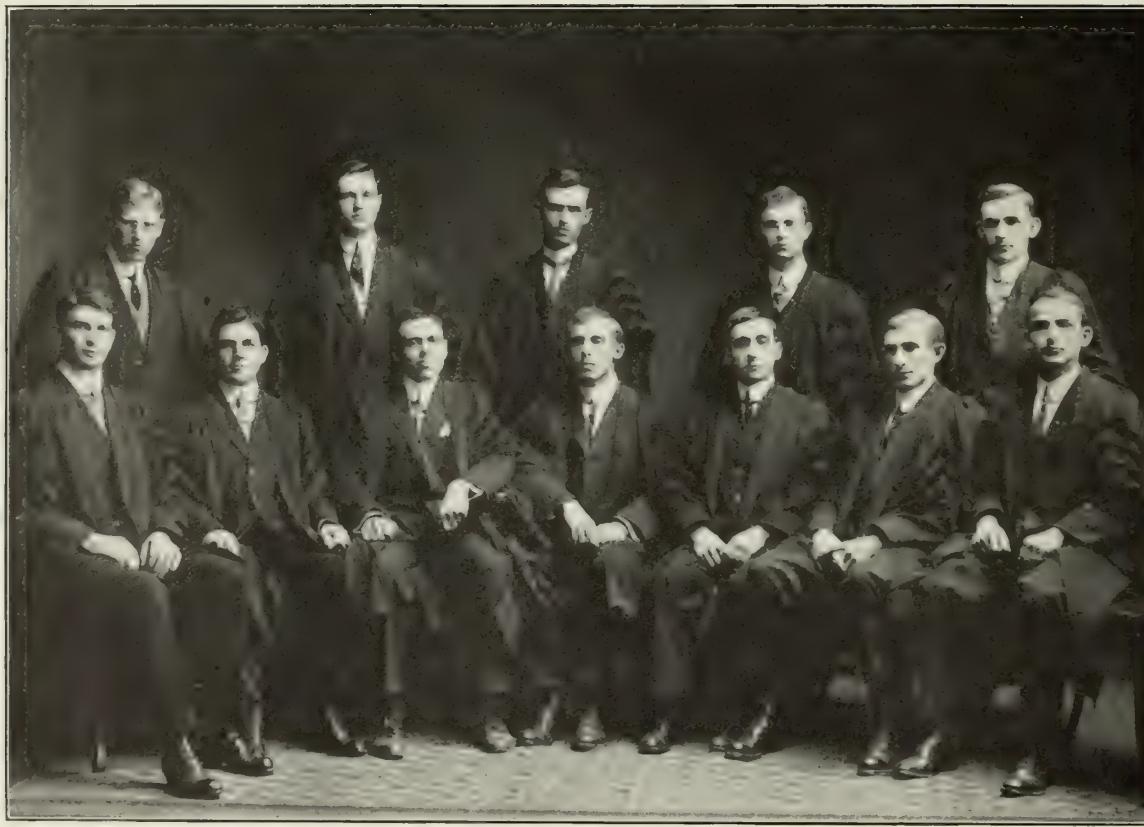

In 1892 the business of the College was placed in the hands of a Board of Directors, which arrangement was continued to present writing. The course was extended to three sessions of six months each.

The continued growth of the College necessitated still greater accommodation and in 1896 a new College was erected at 93 College Street. On October 3rd of the same year it was formally opened by Sir George Kirkpatrick, Lieut-Governor of Ontario. New additions were made in 1898 and in 1903 respectively.

It was thought by the Board in 1901 that a more thorough course of instruction was necessary, so, beginning with the session of '03 and '04, the course was made four terms of seven months each.

In 1907 the College at 93 College Street was sold to give accommodation for the New General Hospital. The Board of Directors secured a suitable location at the corner of Huron and College Streets, and in 1908 plans and specifications were completed for the erection of a new R. C. D. S. at the cost of \$160,000. The new building was completed for the student body October 12th, 1909. It was formally opened, however, during the Christmas vacation, 1909, by his Honor the Lieut-Governor of Ontario, Col. Gibson.

A memorial window was presented to the new Dental College by the Dental profession of Ontario in honor of Dr. J. B. Willmott and in commemoration of his services to the cause of Dentistry. This window has been placed at the head of the first landing in the rotunda of the College.

CLASS OFFICERS, 1910-11, ROYAL COLLEGE OF DENTAL SURGEONS.

History of Class '11—Dental College

ONSISTENTLY, through four successive years and four distinct stages, the Class of 1911 has worked its way, until now it stands on the threshold of an entirely new state of things. The door which shuts on our college life opens on the field of our greatest endeavor and most earnest action. Here we who for four years have grown to know and respect one another must part, and go our separate ways and fight our own battles. But there will always be a tie binding us together in spirit, so that, wherever we may be, and however much we may change, the link will never be completely broken as long as we live and remember the Class of '11.

What a host of memories is contained in our four years' course! Memories of the defeats which as freshmen we inflicted on the sophomores, and as sophomores we dealt to those who were playing in our discarded rôle. For our Class was ever mighty in battle, and wise in counsel. The spirit of change which dwelt in the institution stirred in our blood, and urged us on to doughty deeds and the attainment of lofty ideals.

The professors doubtless thought otherwise, and took frequent

occasion to ask themselves for what reason they were cursed by the obligation to minister to such a turbulent crew. However, their forbearance and sympathy have been repaid by the respect and genuine appreciation which we have not stinted to accord them in our more sober senior years.

In athletics our Year has ever stood pre-eminent. For four years our team has held the College championship in hockey in spite of the fervid efforts of our rival, '10, to wrest the honor from us. In inter-faculty sports, the Year has contributed many of the stalwarts who have served to make the R. C. D. S. such an important factor in all branches of University athletics.

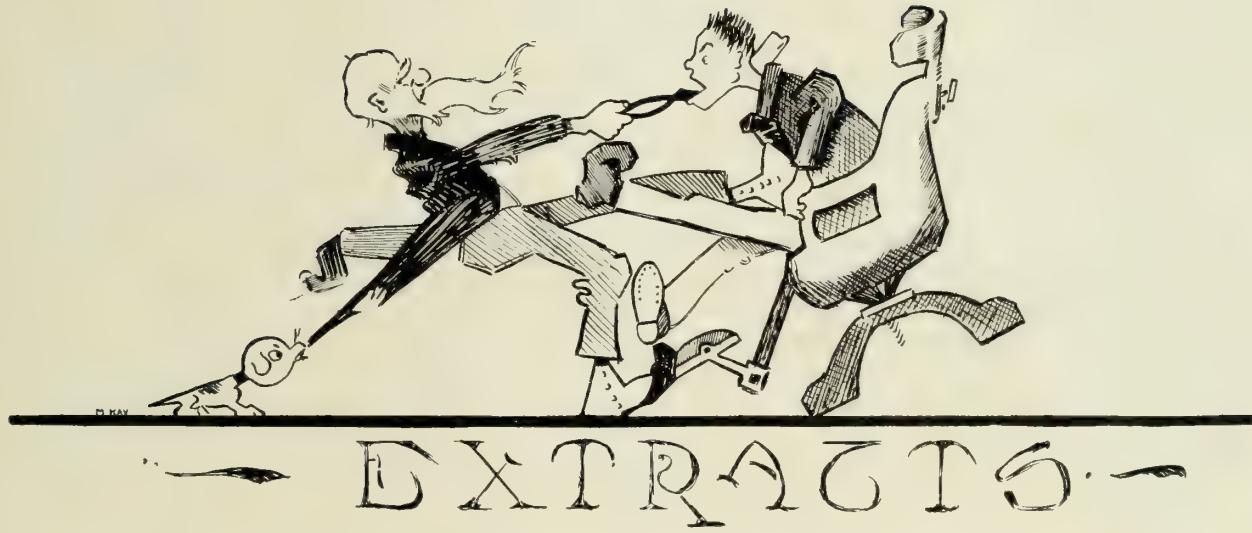

It is nearly over, our four years' sojourn, with its alternations of irresponsibility and carping anxiety, accordingly as exams loomed far or near. It is a miniature world we have lived in. At times it has seemed almost too miniature to be worth while, but it had its tests, and he who has measured up to the standard here will do so in the larger world beyond. And in that busy place which now awaits us, let us all have a common ground of interest which centres round the dear old happy days when we were freshmen, sophomores, juniors, seniors of the grand old Class of '11 at the R. C. D. S.

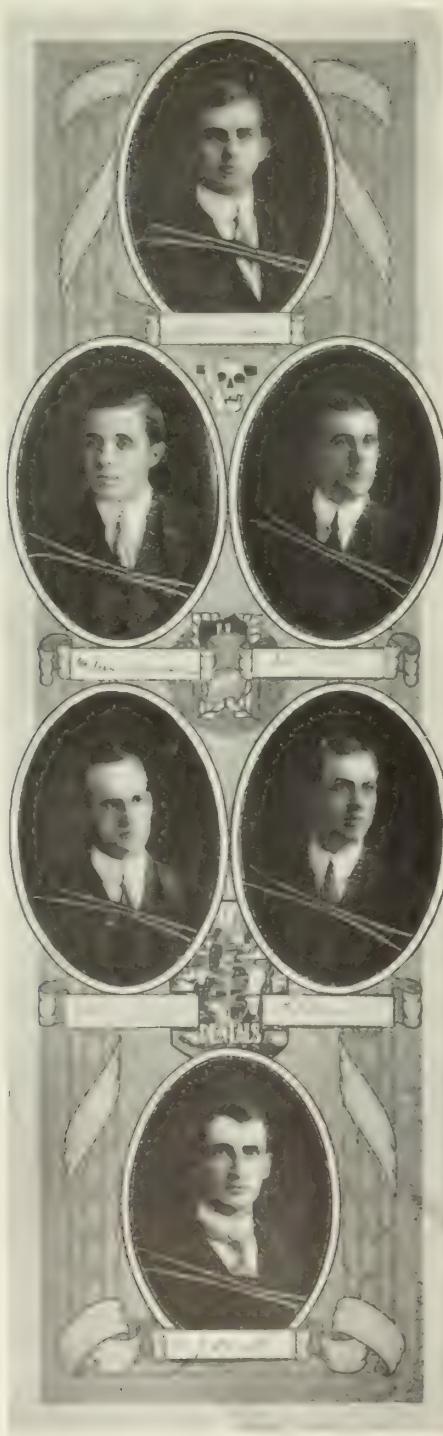

DR. BONNYCASTLE.

WALLACE SECCOMBE, D.D.S.

— EXTRACTS —

ALDERSON, SAMUEL GEORGE.

Honors—Vice-President of R.D.S.
Chairman of Decorating Committee, 4th year.

Carlisle, Ont., can congratulate itself on having been the birthplace of Sam. Although he did not say much he did not lack ideas. Every man in the College liked him, and estimated his worth correctly. His skill as a practitioner and his engaging manner will win him a large patronage.

ARMSTRONG, MILTON TAYLOR.

Honors—Chairman At Home Committee 4th year.

"Micky" was presented to Parry Sound in 1887, and in return received his education in the High School. He is the kind of goods that comes in small packages. His optimistic smile was always working overtime, and the smile will likely be his fortune. He needs no other equipment for the future, because his record as a student assures the rest.

AULT, JAMES WESLEY.

Honors—First year Rep., R.D.S.
Fourth year Rep., Football.

Jimmy was born at Pittson, Ont., in 1886, and matriculated from Iroquois High School. He was a quiet man who worked diligently and consistently, and, like most quiet men, was none the worse for being silent. It is said that Jimmy has a liking for Hamburg steaks and blondes, but the future has even better things than these in store for him.

BANFORD, HECTOR CHARLES.

Honors—President of Sophomore Year.
President of R.D.S., Senior Year.

"Ban." would have swelled the population of Quebec, since he was born at Lachute in 1881, if he hadn't been wise enough to come to Toronto. He has been a welcome and beneficial addition to our Class, for he has always acted as a sedative when our spirits threatened to overwhelm our good sense. Exams. never worried him and they gave him a good chance to display the brilliancy which is going to place him and keep him among the top-notchers in the profession.

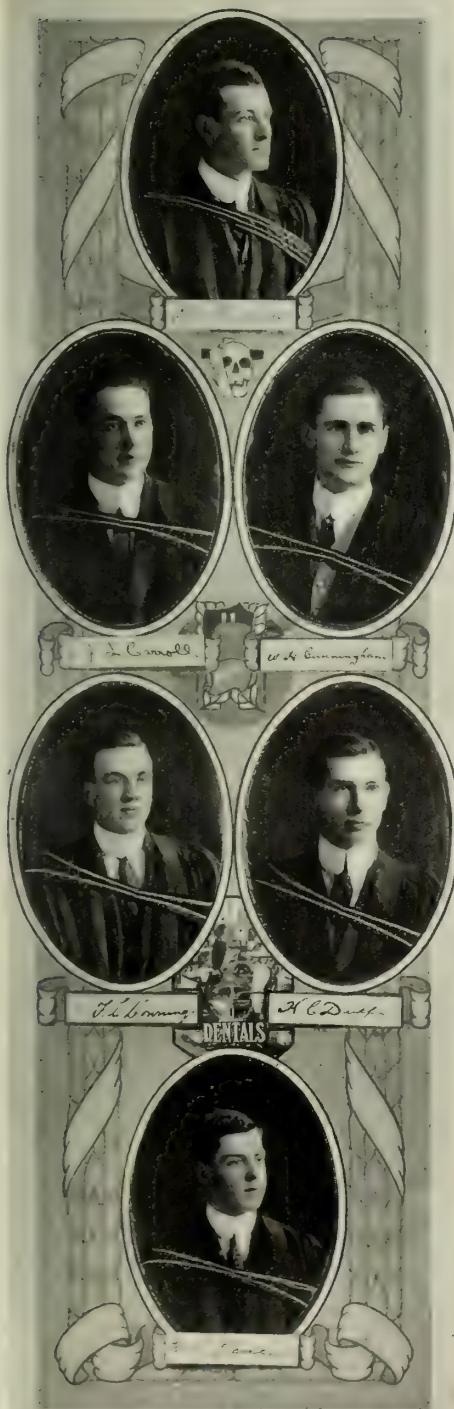

BASS, FREDERIC LORNE.

Fate was kind to Prescott when it got Freddy in 1882. It was kinder to '10 when he came to Toronto to join them, but it was kindest of all to us when he decided to wait till '11 caught up to him. He is quite an orator, and when the talkfest gets going, and Freddy springs that smile, his opinions are irresistible. He is a member of the Xi Psi Phi Fraternity. Sincerity and genuineness are his prominent traits, and surely these alone will keep him well abreast of the race.

BRETT, AUGUSTUS JASPER WALSLEY.

Allison claims Augustus as her son. He matriculated from West Toronto Collegiate. His independence of thought and frankness of speech have not lowered him in the estimation of the Class, and his ability to shine in the exams. recommends him to the professors. As a climax to all the joys which he has never neglected to seize, it is rumored that he intends to take a flyer into matrimony as soon as he graduates, and end up with a trip around the world. After this, Gus will settle down to the serious task of courting success.

BURGESS, ROSWELL MORRISS.

Honors—Assistant Business Manager of "Hya Yaka."

Member of At Home Committee.

Burgess sat up late o' nights and always ranked with the leaders in the exams. He was fond of a practical joke, but always blushed beautifully when the laugh was on him. His friend from Port Dover undertook to instruct him in worldly matters, and Ross learned all right. He was well up in the technical side of his work, which spells success for him in his profession.

CARROL, JOHN LIONEL.

Honors—Too numerous to mention.

John hails from Gananoque and the Dental College acknowledges the debt which she owes to that town. He has filled enough offices to satisfy three ordinary men. Rugby is his long suit, and he has held down a place on the first team all season, besides playing on the II's for three years previously. He has been a member of the Varsity Rugby Executive for four years, and prominent in Rugby affairs in his own College. He is Sub-Editor of *Torontonensis* and Class Historian for this year. Withal, he knows a good deal about his profession and will always be able to pay the rent. He intends taking a post-graduate course next year. He is a member of the Sigma Delta Fraternity.

CUNNINGHAM, WARD HARRISON.

Honors—Business Manager of "Hya Yaka," Senior Year.

Ward first appeared on the scene at Villa Nova, Norfolk county, in 1886. A quiet, steady man, who is interested in his work, he has gathered and kept a host of firm friends, and he has a plaster of paris mask of everyone of them. If a good College record means anything, life can have few menaces for our classmate.

DOWNING, FREDERIC LODGE.

Honors—Treasurer of "Hya Yaka," Senior Year.

Sandown welcomed Fred. in 1888, and Vankleek Hill High School put the finishing touches on him before he was sent down to join 1911. He is an affable, good-natured fellow who at once sprang into universal favor with the class. His vices were "fussing" and chewing gum, but even this did not keep him out of the honor lists. His share of the world's good things awaits him whenever he wishes to go out and pick them up.

DUFFIN, HARRY CLIFTON.

Honors—President of College Parliament, Fourth Year.

Duff. induced the stork to drop him somewhere near Belleville in 1887, and ended by inducing the examiners to let him through Albert College of that city. His eloquence could persuade anybody and the Class has found it very useful. He scorned to work too hard, and since he has a slight propensity for politics, he will very likely never need to do so. If he sticks to Dentistry, his office will be a busy one.

EAMAN, WILBERT ROY.

Honors—Class Rep. to R.D.S., Junior Year.

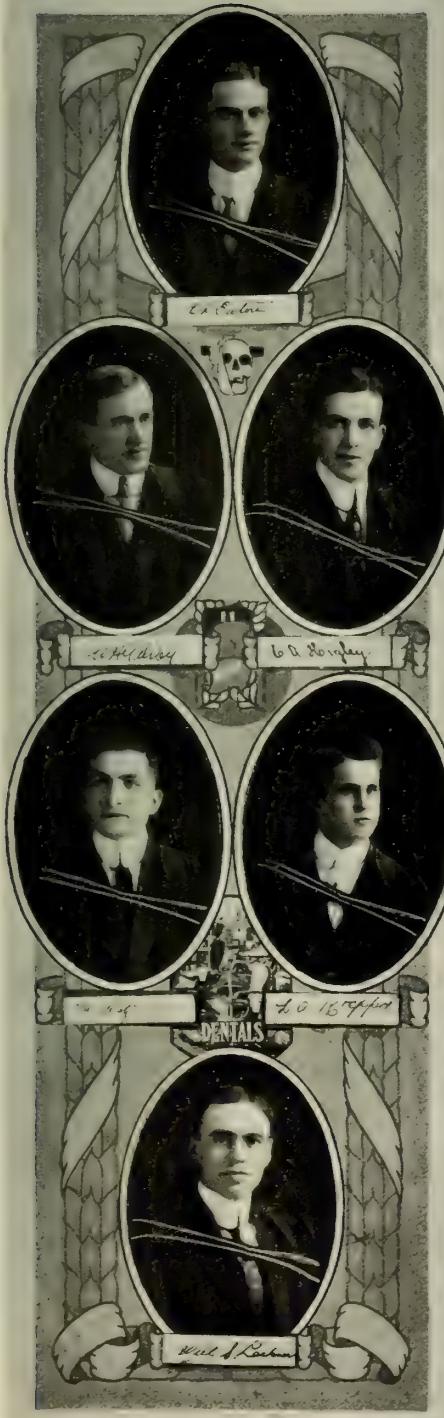

Class Rep. to At Home Committee, Senior Year.

Eaman first looked at the world and blushed in 1888. This was in Wales, Ont. He brought the blush to Toronto, where, doubtless, there is more to blush at. Though naturally quiet and reticent, he has got force and capability enough in him to win success for himself.

STUDENTS' COURT OF THE ROYAL COLLEGE OF DENTAL SURGEONS.

E. F. MacGregor	H. V. Schwalm	R. S. Robertson
A. J. Brett	L. E. Tanner, <i>Junior Judge</i>	M. Schwartz, <i>Senior Judge</i>
		J. O. Wilson

EATON, CAMERON LEROY.

"Tim" is a Toronto product, and matriculated from Harbord Collegiate. He always disclaimed any interest in the big store, except for a platonic one in one of the girls in the perfume department, whom he used to go and gaze at furtively from behind a pile of books. Talking of stores, Tim has a store of wit, wisdom and popularity that will help to clear his pathway in life.

GILROY, WILBERT HAROLD.

This lean and elongated human first graced the earth with his presence in the delightful rural environs of Holstein, Ont. Matriculating from Mount Forest High School, he extended himself over Class 1911. He has succeeded in pleasing everybody, and it only remains for him to please himself. Unless he is too fastidious, he should have no difficulty in accomplishing this.

HIGLEY, ERNEST ARTHUR.

"Ern." took Rodney, Ont., by surprise in 1885, and matriculated from Chatham Collegiate some years later. He is small, but he doesn't need to get up in a tree to find out what is doing. He sings a pleasant song, and never thinks about his troubles. There is a shady spot waiting for him somewhere down the road, for he has the capacity of enjoying all things. He is a member of the Xi Psi Phi Fraternity.

KATZ, MAX.

This man with the feline name was born in Russia, where they still have the bad habit of taking off the head along with the tooth. Convinced that there was a more scientific method than this, he came to Toronto to find out about it. He has had no easy lot in life so far, but hard work and constant application have won him all he has got so far, and they will bring him the rest. Here's hoping he gets it.

KOEPPEL, LESLIE.

Honors—Freshman Dinner Committee.

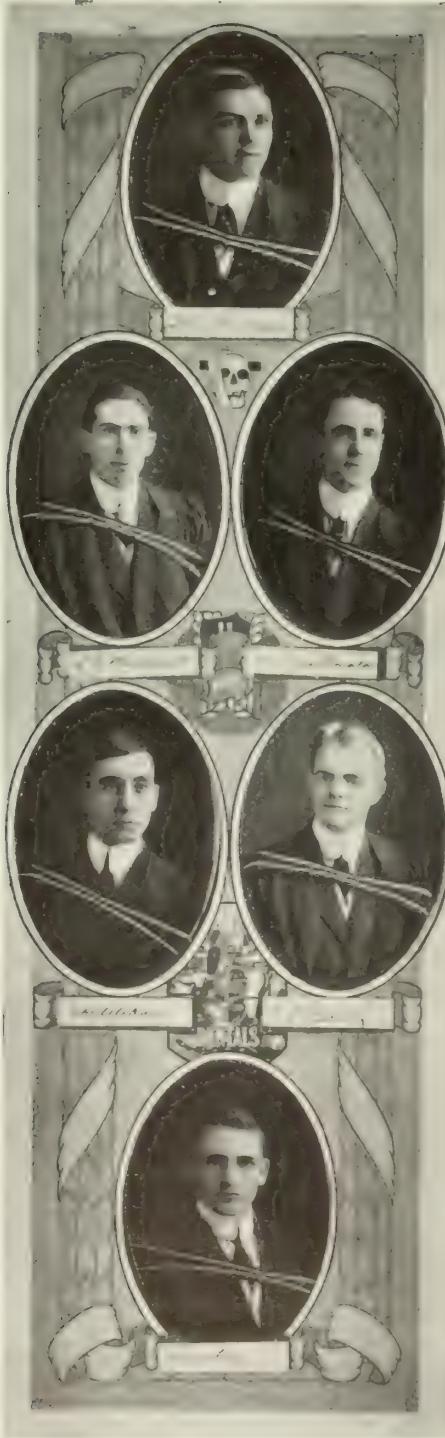

He was born at Galt in 1889, and was just near enough to both Zorra and Waterloo to get his name badly mixed. He was in every respect the gay musician, being, in fact, the gayest of gay musicians. His fondness for the weaker sex amounts to a mortgage on his bachelorhood. Shades of blondes and brunettes will hover round his waiting-room.

LACKNER, WILLIAM S.

Honors—Vice-President of Senior Year.

Bill was born at Hawkesville, Ont., in 1889, and managed to fool the masters in Berlin Collegiate. He has used the same tactics down here so successfully that apparently he does know something about dentistry. He knows far more about the ways of the eternal feminine for he has made a study of the subject at first-hand. He intends to be a specialist in both these interesting topics when he gets through.

LA FLAMME, WILLIAM JAMES.

Born at Woodstock, and a matriculant from Woodstock Collegiate. From the moment when Jerry won the pole-vault in our first year, there hasn't been a more popular man in our Class. He was full of the joy of living, and has won a host of friends, who, while they envy him his successes, are heartily glad that he has won them. Jerry believed in doing his work in bunches, but he always got there with the rest, and that is all that is necessary. His future is a rosy one for he knows how to mix work and play, and take pleasure out of both.

MACDONALD, WILLIAM HERBERT.

Honors—President of Soccer Club.

He appeared at Roseville, Ont., in 1886, about the time the other Christmas presents were due. "Old Mac." had a perfectly angelic temper, except on the occasion when he was summoned to appear before the Students' Court. The only time he moved quickly was at changing lodgings-houses, for he changed these as often as he changed his opinion of the landlady. He was popular with all of us, and his patients will scarcely be able to resist his powers of attraction even when he is robbing them of a pet tooth.

MACDOUGALL, LORNE REGINALD.

Honors—President of Hockey Club, Fourth Year.

Arnprior produced this canny Scotchman, but there is no taint of Scotch dourness in this specimen. "Mae." was one of the twins, and he possessed a humor which was as delightful to us as it was unconscious to himself. No one could be anything but a pal to him and everyone will remember his geniality and his friendly nature. It is thought that he intends to devote his winters to professional hockey.

MCKAY, HERBERT BOYD.

Honors—Secretary of Senior Class.

McKay was born at Linwood, Ont., and matriculated from Berlin High School. He taught school for three years till he came to the conclusion that it was easier to extract eye-teeth from grown-ups than ideas from small boys. He is a quiet, reticent Scotchman who was just a bit too canny about having a good time. However, here's hoping he gets it now; for he certainly deserves all that is coming to him.

MADILL, WILLIAM STANLEY.

This man just happened, and, like Topsy, he just growed, but unfortunately he did not grow quite enough. Some say that the task of keeping his hair down absorbed all his superfluous energy. However, there was enough of him to make a good worker and, as he is sure to keep it up, there is no doubt about his success.

MERKELEY, HOWARD JAMES.

Honors—President of Junior Year. President of Y.M.C.A. in 1911.

This politician first disturbed the domestic economy of a home in Chesterville in 1886, and later matriculated from Morrisburg Collegiate. He always knew what he wanted, and always wanted to know why when he did not get it. He has been a leader and has devoted much of his time to student matters, being the first to urge the necessity for our present gym. In his academic work he can claim first-class honors. If he keeps on in the direction in which he is pointed he will hit success amidships.

AT-HOME COMMITTEE, ROYAL COLLEGE OF DENTAL SURGEONS.

MOFFATT, LLOYD ALFRED.

Honors—Secretary-Treasurer of First Year, Representative of R.D.S., Senior Year.

Born at Varna, Ont., in 1887, and matriculated from London Collegiate. He has always taken a prominent part in our class, and is deservedly popular. His good voice secured him a place on the Glee Club. When exams. come round he always takes a few nights off from enjoying himself, and never fails to climb into the honor list. He is a member of the Xi Psi Phi Fraternity, and has served two years on the Editorial Board of "Hya Yaka." His constant desire to please and make himself agreeable has won him many lasting friendships. Fortune won't play many tricks on this chap, for he has a few of his own up his sleeve.

MUSTARD, HUGH ARTHUR.

Hugh was born at Wyoming, Ont., in 1888, and matriculated from Petrolia High School. He is a bit of the real hot stuff, as we all realize after four years companionship with him. In spite of his youthful appearance, the only young thing about him is his happy and cheerful frame of mind. His competitors will find that it will be a harder task to pass the Mustard than people seem to think.

NICHOLSON, CECIL.

Honors—Secretary of R.D.S., Senior Year.

Cecil was born into the metropolitan surroundings of Flanders Centre, Ont., in 1889, and matriculated from Waterdown High School. We were lucky enough to have him join our ranks in the second year. He was a good friend and a good student, who found sufficient satisfaction in having his sterling characteristics tacitly acknowledged by his classmates.

PATTERSON, RICHARD ASHNER.

Honors—Secretary of Class, Third Year; Treasurer of College Parliament, Fourth Year.

Pat descended on Burrett's Rapids, Ont., in July, 1887. With Ban and Chet he formed the stalwart trinity, and he himself was big every way you took him—in mind, in heart and in body. During his course he has added many laurel wreaths to his millinery of achievements. At times he was a silent creature, but that was because he was thinking. He had a bass voice, which he cultivated along hymn singing lines. The coming years will bring nothing but prosperity and peace to Pat.

PHILLIPS, ARTHUR M.

Arthur was born into the precincts of Bondhead in 1889 and matriculated from Bradford High School. He entered with us in our Senior Year, and has proved himself a worthy son of '11. In spite of his quiet and unassuming manner he has won our regard and esteem. His diligence is sure to secure its reward.

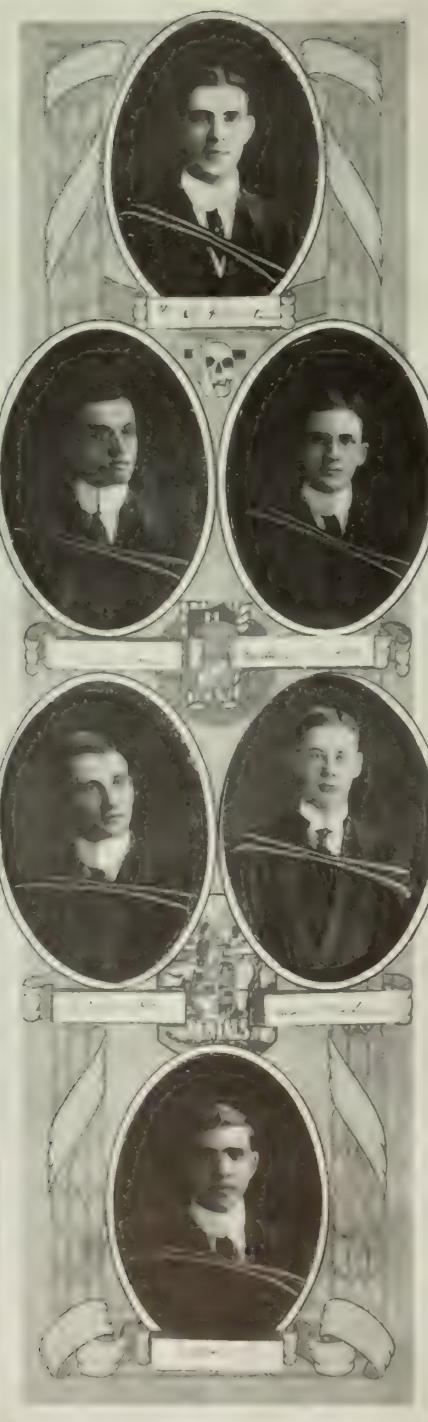

POWERS, WILLIAM PATRICK.

Honors—Class Representative to Track Club, Fourth Year; Class Representative to At-Home Committee, Fourth Year.

When Bill first grinned on Elora, away back in '87, the old town felt tickled in spite of itself, and when '10 left him to the fond care of '11, the class was overjoyed at the prize they had drawn. He has been as popular with the faculty as with the students. He has the most thorough grasp of the technique of his art of anyone in the year. Besides all this he is a well-known lacrosse player. We make no mistake in predicting success for Bill.

ROBERTSON, RALPH ERSKINE.

Honors—Class Secretary, Second Year.
Secretary R.D.S., Third Year.
President Soccer Club, Fourth Year.

Ralph is from the "blue-nose" country, having been born at Monetton, N.B., in 1885. He matriculated from Mitchell High School. Both as a student and as an athlete he was a steady, persistent worker, and as usual showed results. He played on the Varsity Soccer team for four years and was captain in his second year. His modesty prevented any display, but he is one of the kind that get there.

ROSS, GEORGE HAYCROFT.

Honors—At-Home Committee, Third Year.
Hockey Executive, Fourth Year.

In 1891, Brussels was brightened up by the arrival of George, and when he brought his cheerfulness and youthful exuberance to Toronto, our class had reason to be glad. He never needed to work hard, because he had the happy faculty of learning easily and going straight to the point. The dental profession is honored by his presence.

RUDELL, MATTHEW JOHN.

Honors—Member of the At-Home Committee, First and Second Years.

Rudell of the apostolic name was born at Hespeler in 1887, and came here from Galt Collegiate. All who knew him liked him, for at all times and in all seasons he was the same amiable good-hearted companion. Even the girls seemed to share in the general spirit of camaraderie, which pervaded him. He is a member of the Xi Psi Phi Fraternity.

SANGSTER, FRED NORVAL.

Fred was born at Stouffville in 1889, and matriculated from Markham High School. His services to the world so far have been chiefly in the realms of Hockey. In '07 and '08 he played for the Eurekas, in '09 for the T. A. A. C., and in '10 he figured as the fast left wing of the Argos. However, he did not devote all his time to sport, for he was a diligent and successful student. His capacities for work or play are combined in the right proportions to ensure him an excellent career in his chosen profession. He is a member of the Xi Psi Phi Fraternity.

SCHNUR, FRED LLEWELLYN.

Fred was born at Oshawa in 1887, and matriculated from Jarvis Street Collegiate, Toronto. He has a pretty blush that speaks well for his innocence, and his nature is agreeable enough to win him a host of friends. Real hard work has so far opened the portals of success to him, and will doubtless keep them open. His German name with the Welsh accent will grace the upper ranks of the profession. He is a member of the Xi Psi Phi Fraternity.

SCHWARTZ, MORRIS.

Schwartz was born at Braila, Roumania, in 1888, and is a graduate of the University of Roumania. He came to Canada in 1902. As an example of the persistence with which a good man will come to the top, Schwartz deserves a niche all to himself. We have all come to respect his ability, and to like him better as we know him better. He is a first-class orator and his ideas and ideals are worthy of his eloquence. He will occupy a high position in his profession and in public life.

SIMMONS, HARRY ALEXANDER.

Harry was given to the world at Fredericton, N.B. From there he toddled across the continent and matriculated from Vancouver College. He came from Greenwood, but there is not the slightest verdancy about "Sim." His chief diversion was in a certain palm room and at light operas. He has the right stuff in him, and has made a good impression here. We are sure that he will repeat it in the land of the rising sun where he intends to hang out his sign. He is in the ranks of the Xi Psi Phi Fraternity.

SPRATT, OLIVER CAMPBELL.

Honors—Member of At-Home Committee, Fourth Year.

Spratt hit Johnston's Corners in 1888, and, after he had rounded them off a bit, he left for Ottawa Collegiate, from which he matriculated. Sometimes we called him "Ollie," but it was always in fear and trembling. He was generally seen in company with Eaman, and he was not addicted to neglecting his work. However, his winning personality will overcome even so great a fault, and he was always well liked.

SMITH, CHESTER JOHN.

Honors—Vice-President of the Class, Second Year.

Local Editor of "Hya Yaka" in Third Year.
Editor-in-Chief of "Hya Yaka," Fourth Year.

This pleasant-faced, pleasant-voiced, mortal emanated from the seething void called Wyoming, Ont., and matriculated from Petrolea High School. "Chet" was one of the well known trinity, and someone once said, though nobody believed it, that he belonged to the Y. M. C. A. Always a leader, his genuine ability will have no trouble in placing him in the front rank.

STONE, RALPH EMERSON.

Honors—Vice-President of Freshman Club.

Ralph was born at Hamilton in 1881, so he has seen a good deal of the world since then. No one but his friends could find out much about him except that he was a nice man to know if he liked you. He had a good voice, and often tried the Orpheus stunt with the fair ones with excellent results. As he didn't need to worry about his work, like a sensible man, he did not. He is a member of the Xi Psi Phi Fraternity.

TAYLOR, DEAN ELLIOTT.

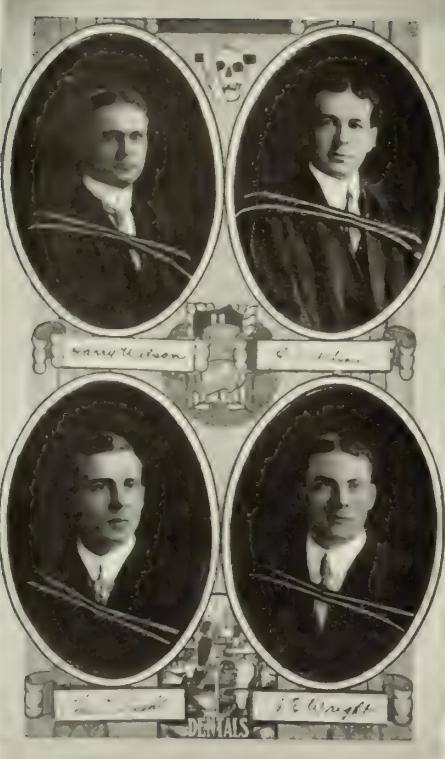

Born at Port Dover in 1889, Lake Erie answered his first gurgle. Dean never had any doubt in his mind as to what he wanted and he generally got it. Possibly it was love that somewhat chastened his spirit, but he never got so bad he couldn't smile or tell a story. He was an adept at his work and never lost a chance of showing the faculty what he knew about drug theories. He is a member of the Xi Psi Phi Fraternity.

WAGG, ARTHUR BLAKE.

Honors—Recording Secretary of R.D.S., Fourth Year.

Born at Uxbridge, in 1887, and matriculated from Markham High School. He went his own way and kept his own counsel, and always did things well. Despite his youthful appearance, he was every inch a man, even though he was more or less of a blonde. Too many of his competitors will only see the back of his fair head.

WILSON, HARRY.

All Wardsville turned out to celebrate the appearance of Harry when he first made his presence known in 1890. Since his arrival with '11 he has always been popular for his sunny, cheery nature and happy smile. Class spirit was strong in him, and his best services were always at the disposal of the Year. The result of an agreeable manner and steady, reliable work will be seen in the future career of our classmate.

WILSON, JOHN ORR.

J. O. blew into Markdale in his well-known leisurely fashion way back in 1881. He continued to expand horizontally in that burg till the town got too small to hold him, and then he came to Toronto. He is good-natured and friendly, with a joke and a smile for everyone. J. O. is a benedict and has something running round the house besides a picket fence. He will jolly Fortune into stopping her wheel at the right place.

WRIGHT, CHARLES EDWARD.

Honors—Treasurer of the U. of T. Rifle Association.
Vice-president of the College Parliament.
President of the Class, Senior Year.

Charlie was born at Tamworth, Ont., in 1887, and matriculated from Madoc High School. He was one of the rather silent ones, but he worked his way into our regard, and into the top of the exam. lists. His way of looking over his glasses was of great assistance in supporting his dignity, which, as years increased, needed more and more support. May the years to come bring their just reward to Charlie.

WRIGHT, JOSEPH ELMER.

Honors—Vice-President of Junior Year.
President of Rugby Club, Senior Year.
Secretary Athletic Association, Senior Year.

Born at Hastings, and matriculated from Campbellford High School. He worked steadily, had a good time and always triumphed at the exams. He was well liked and his value was appreciated by his classmates.

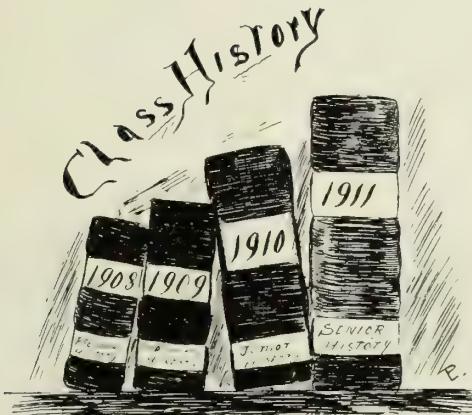

ONTARIO AGRICULTURAL COLLEGE.

PRESIDENT CREELMAN, B.S.A., LL.D.

History of Class '11—Agriculture

"Esse quam videri."

BROADER and deeper we must write our annals": the history of the individual is the history of the Class. The children of many lands, the offspring of many peoples, we have together lived and labored, together fought and prayed. We have lived in different ways; we have labored to different ends and we have prayed to different gods: but the memories and associations of the past four years are now a part of each of us.

Four years have changed us much. The daring exploits and brilliant achievements of our early college days that seemed so momentous to us then have dwindled to insignificance. Such is history. The mansion of the boy becomes the cottage of the man, the lofty abode of the gods the granite hills of science.

What have the little incidents of our life here to do with history except that we have passed that way and are what we are? When we graduate we have but begun our education and who is so bold as to say what influence our college days may have upon our future success and comfort. What traits of character we developed, what tastes we acquired, what virtues we assumed and cultivated are written down. "Nature will be reported."

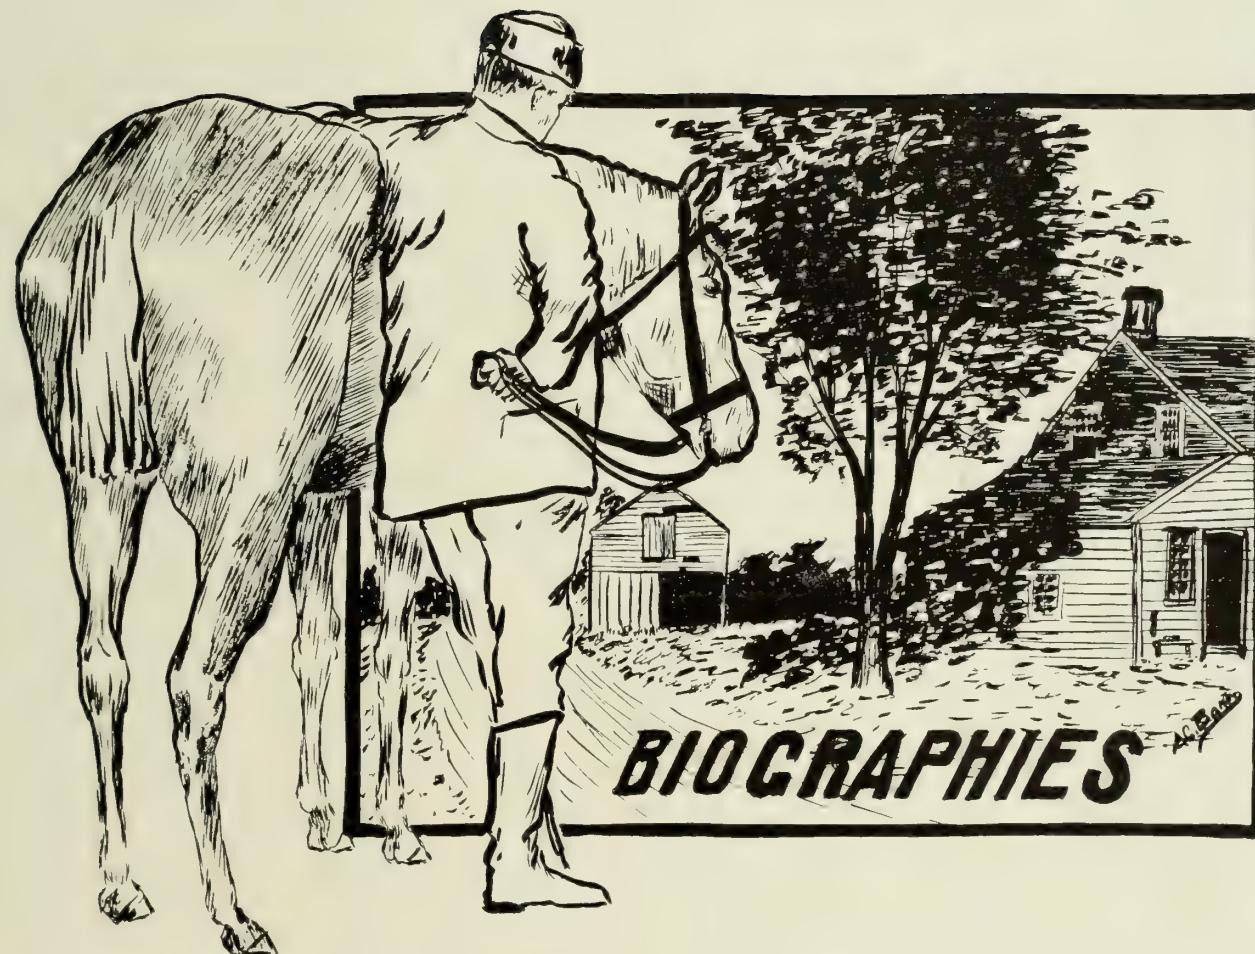

Our "At-Homes" have been like all "At-Homes," our snowshoe parties like all snowshoe parties, and our carnivals like all carnivals. History has but repeated itself. Yet in the repeating we have nothing lost. Our Literary affairs have been a success; our Philharmonic has grown and flourished; our Y. M. C. A. has broadened with the times and each has been a pleasure and a profit to us all.

Among ourselves we were a goodly crew. We lived in a world apart from that about us. We had a common aim and a common interest. Of the parts we played in college sports, this much we know: We did not always win but we played fair. What matter whether we win or lose, so long as we develop precision and manly self-reliance. We were but training for the big game and so much to-day depends upon the training.

A class enters college with large ideas and larger plans. It leaves with the conviction that the fields of green are ever receding. We can at best perhaps hope that our Alma Mater is the better for our having lived and labored within her walls: that we are each a little better for having lived together and that perhaps we merit a little less of censure than of praise.

1911 AGRICULTURE, FRESHMEN GROUP.

AUSTIN, RANDOLPH.

Randolph Austin, otherwise known as "Job," hails from Tottenham, Ont. Like his namesake, Job has lots of patience and a great deal of perseverance. In a quiet, unassuming manner he has left the impression that Class '11 would be barren without him. Football proved a strong attraction until a damaged knee sent him to the sidelines, but still with a brave heart and lots of yell for his team. The mission field claimed attention, and Job gave generously of his services, being a College representative to the Quaternary Students' Conference at Rochester, '09. Working steadfastly during College year, and loving his sisters-in-sympathy as himself. Respect we have for Austin in abundance, for less than respect one cannot have for a consistent, generous, fair-minded schoolfellow.

BAKER, ARTHUR CHALLEN.

"And custom clogs not his infinite variety." This, then, is a little sketch concerning the "Doctor," a man of endless variety, but marked concentration of purpose, a good hater and a staunch friend. Sensitive and reserved in manner, he must be understood to be appreciated. He is exceedingly fond of music, the paddle and the gun, and combines with this predilection the keen, restless spirit of an Ulysses. Biology is his bent, and success his goal. He is a born naturalist and a true philosopher. Next to his microscope, he loves his pipe, "a bowl of wine and thou." Belleville is his birthplace and Canada his heritage. After graduation here he purposed continuing his studies at Cornell.

BAKER, ALBERT WESLEY.

"Hi, Bill! Pass the spuds." "Jack's" earliest recollections date back to the late eighties at Walkerton, when "Doe," vainly endeavored to choke off the wild howlings of his baby brother with an overgrown potato. As a result, "Jack's" howlings and his fondness for "les pommes de terre" increased during his early youth at the Forest City and reached a climax in his Senior Year at Guelph. Jack has been to Class '11 what the clown was to Olivia's household. His ready perception of the ridiculous has made him the dread of the individual and a favorite with the crowd. "Jack's" interests at College have not been confined to text-books. He won his O.A.C. as a member of the College Basketball Team, and was also associated with hockey and baseball. He is now a full-fledged Biologist. He will spend his serious moments chasing bugs and his spare time enjoying life. Truly these are wise ambitions.

BALDWIN, MAURICE MATTHEW.

"If you're up against a bruiser and you're getting knocked about—Gru."'

Maurice M. Baldwin appeared at Colchester, Ont., about the end of September, 1886. His early life was spent in the usual way, and graduating from the village school he went to assist on his father's farm. In order to "give the boy a chance," Baldwin was sent to the O.A.C. with the '07 Class, but circumstances compelled his withdrawal for some years, which time was spent on the farm cultivating tobacco, and the succulent pig. Entering with Class '11 as a Sophomore, he has taken an active interest in hockey, baseball and Rugby, as well as being prominent in literary work. Not only has he been a favorite on this side of the Campus, but Friday evenings have found him a welcome visitor at Maedonald Hall. A man of many parts, he goes back to Essex county to engage in practical Agriculture, a tobacco specialist.

BODDY, ROBERT ARTHUR.

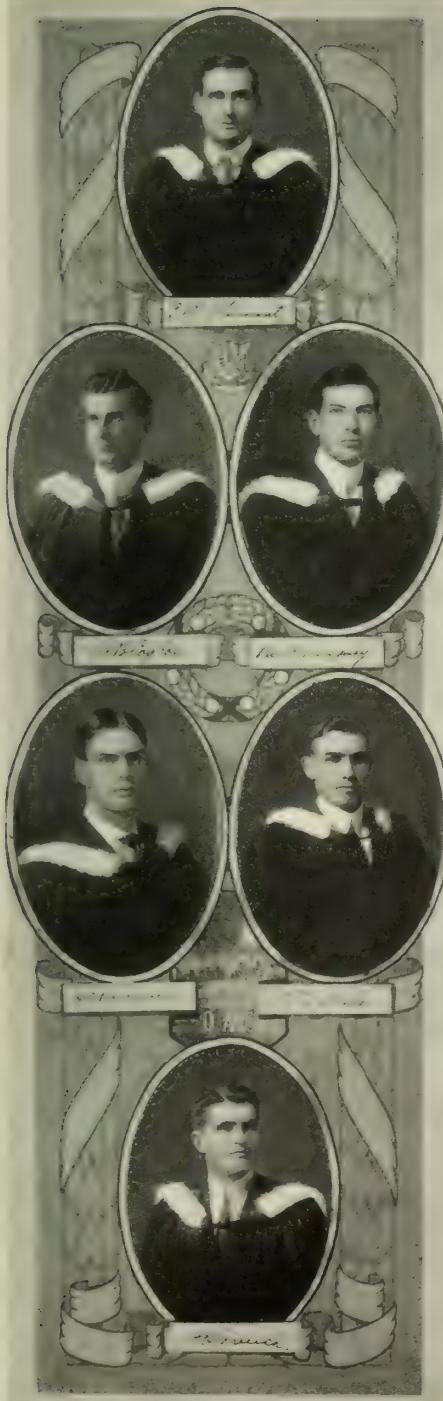

"Time and patience do more than strength or rage."

Robert Arthur Boddy dropped into Thorold, Ontario, one bright day in June, 1883. Since then he has lived in many localities within the Province. His early education was obtained in the schools of Toronto and Ottawa. After matriculating, he spent two years in the head office of the Manufacturers' Life Insurance Company. But insurance did not appeal to "Bill," for in 1905 he came to College Heights, taking the Horticultural Option in his fourth year. Believing that the fundamental principles of Agriculture are involved in Chemistry, he re-entered College with Class '11 to further pursue his studies. His many friends join in wishing him success in whatever sphere he may direct his attentions.

BUCHANAN, CHARLES WEST.

"Long may he guide his farrow still
Stout be his arm and heart."

Charlie happened with the May flowers near Florence, Kent county. Boylike, he played with a hoe among the fields of corn, where he pulled the silken tassels and scared the crows. Having finished school days he spent a few long years flailing beans. Making good at this he entered the Faculty of Agriculture with Class '11. Here, recognized as an excellent companion, a combination of blarney, Irish wit, common sense, and man, he has been a favorite. Charlie is not only an agriculturist, but is quite a sprinter, and has discovered a new place for a bridge on the Speed. He goes back to Kent to grow corn and beans.

CLEMENT, FRED. MOORE.

*"In Virgil's noisy mansion skilled to rule,
The earnest Frederick taught his little school."*

Fred. came from Virgil, and unto Virgil he will return. He is a Pippin amongst fruit growers. Peaches are his specialty and a pretty peach his joy. He is unselfish to a fault, and a pusher from the word go. As President in 1908, he certainly presided well, and in athletics he always threw a big shadow. His capacity for work is large, but he has never been seen full. He can handle the hayfork as well as the hockey stick, and the birch rod as well as either. He is an all-round man with square shoulders.

COGLON, ROGER B.

*"Firm and resolved by sterling worth
Honor and respect thou shalt not strive in vain to gain."*

Roger B. Coglon hails from Bath, Ontario. "Cog." accumulated the necessary store of knowledge for his matriculation in the local public school and in Bath Collegiate Institute. With a still unslaked thirst, he followed in his brother's footsteps and arrived at O. A. College in time to join Class '11. The training he received from the stern realities of his early life have moulded him into a man of definite and earnest purpose. Of an executive turn, he has served on many committees, but emphasized his work with the Y.M.C.A., of which he became President in his Junior Year. His ability, his unlimited energy, and his genuine worth, will undoubtedly pave the way to a most successful career in after life. Our wishes go with him.

DEMPSEY, PETER CHARLES.

"For even though vanquished he could argue still."

Peter C. made his first appearance among the orchards near Trenton in 1886. His tender years were spent among school books, trees, and fruits. After Collegiate days were over and a few years of practical fruit growing had worn off youthful "spasms," he entered the O.A.C. Here his quiet good-nature, helping hand, ready wit, and love of science won him life-long friends. He specialized in Oratory, Philosophy, and Horticulture. He has won honors in the Oratorical and Public Speaking Contests and in Horticultural work may prove a second Burbank. "Peter C." goes back to commercial life, there to prove Ontario's supremacy in the production and sale of high-class fruits.

DORRANCE, HAROLD ADAMS.

"Mark well this youth, we shall hear of him again."

Dorrance is a wonder. His easy manner and great executive ability have won for him much respect and work from student organizations. Never has he failed us in the Class or College. He won the Chapman Prize for excellence in English during his first and second years. As an Agricultural specialist he is a capable judge of live stock, hats, and feathers. He came to us a full-fledged experienced schoolmaster, and goes forth to pass along the marvellous tales of science and to preach the gospel of Agriculture in the highways and byways of the Province. Harold made his entrance at Seaford June 14th, 1886.

FISHER, PAUL ALLEN.

*"The man of life upright, whose guiltless heart is free
from all dishonest deeds."*

Paul Fisher first breathed of the breath of life on his father's farm near Burlington, Halton county. He received his public school education at Fisher's Corner and matriculated at the Waterdown High School. Then, having decided that Agriculture was his true vocation, he threw in his lot with the renowned Class of '11. During his four years at College, he has proved to be a loyal friend and an ardent student. He has taken part in athletics generally, his straight arm on the gridiron being something by which he will be remembered. We feel safe in predicting for him a successful future.

FRENCH, PERCIVAL EDWARD.

*"Such is the patriot's boast where'er we roam:
His first best country ever is his own."*—Goldsmith.

Percy is a product of our Western prairie. But early he began to drift and finally drifted over the Rockies to the Okanagan Valley. Here he received his early education, not in schools only, but also in fruit and stock raising. Early one September morning, '06, his smiling countenance and hearty laugh enlivened Room 13, "Upper Hunt," O. A. College. As a true lover of good sport, he early became interested in College athletics. He is a hockey enthusiast to such an extent that he captained the College team in his junior and senior years. He has proved himself a worthy student, an enthusiastic fusser, and an able horticulturist.

GALBRAITH, CHARLES ARTHUR.

*"What other people think of me matters little,
What I myself do and say matters much."*

The "Pastor" is a man of ideas and they are all home-made. He is a good judge of beer and a better judge of brains; is brilliant to a finish, but doesn't try to shine. He reads much and digests it without getting thin. He is the shepherd of the little flock of Biologists and President of the Bachelors' Club. He has seen all kinds of life and come out white—with the exception of his hair. The Pastor occurred at Hornby, Ont., in the early eighties.

GALBRAITH, ARNOLD JOHN.

*"Into this Universe and Why, not knowing,
Nor Whence, like water willy-nilly flowing."*

"Young Gal." is typical of the age. He has the "strenuous" idea. He works at full pressure. Enthusiasm is the keynote of his character, and early and late he keeps up the ceaseless grind and seems to enjoy it. He has a strong personality and possesses the happy faculty of making a good impression. He is distinctly materialistic, but possessed of a saving philosophic sense. Not one of the mob, but yearning for the magic circle of boon companionship where "luntin' pipe and flowing bowl mak' brithers aye and a' that." He was born at Hornby, which is in Halton county, Ontario.

GANDIER, STACE HARVEY.

"This is the song of the parson's son."

"Cap" was found on a football field in Toronto sometime during the nineteenth century. He left the Queen City, however, twelve months later—departure being due to an assault on a policeman. "Cap" headed his class in his first two years at College. He has edited The Review and captained both football teams, played baseball and hockey, and on the track he also ran. He is the only man who could storm the College fruit house, via the ventilator. He also has the honor of being the first member of '11 to fall into the hands of the Guelph police. He's a good student, a good athlete, and a—well, a preacher's son.

GORDON, DINGWALL WEBSTER.

"While we live, let us live."

"Ding," announced his arrival in Elora somewhere in the year 1886, in no unmistakable fashion. He received his early education in the public and High Schools. Possessed of an extraordinary amount of intelligence, he aspired to fields of higher mental attainments; so in the fall of 1907 he left the farm. Ding. selected a man's course and chose Bacteriology for his option. He is a thorough-going Scotchman, canny and a man of business. His fellow-classmen extend to him their sincere wish, that the future may fulfil the promise of the present.

HENDERSON, IRVINE BELL.

"True merit is like a river, the deeper it runs the less noise it makes."

Irvine B. Henderson first opened his peepers 'way back in the tall timbers of Grey county on May 29, 1886. The rod of correction was first used on him in the Hampden public school from which he finally escaped. After spending a few years on the farm he left for the O. A. College to take up the problems of scientific agriculture. Here he has, by perseverance and steady application, worked his way to the graduating year. He always took an active interest in Rugby and other athletics, besides being Experimental Editor of the O.A.C. Review. Notwithstanding his famous title, "Dr. Crippen," we predict a great future for him.

HERNER, MILTON C.

"As busy as a man with one chick."

Some years ago a cyclone struck Waterloo, Ont., and when it had passed over Milton C. Herner was found sitting on an incubator, surrounded by ten million chickens. For a few years he paid no attention to them, devoting his time to the curriculum of the Mannheim public school. Leaving school, he engaged for a few years in practical agriculture, but a thirst for knowledge led him to take the '02 Stock Judging Course, and the '07 Poultry Short Course. Coming to the O.A.C. with Class '11, he specialized in poultry, and in this connection organized a Poultry Club, being its first President. He has always taken an active interest in literary and Y.M.C.A. work, besides occupying the position of Poultry Editor of the O.A.C. Review. We expect great things from him in the future.

THE BEAUTIFUL GROUNDS OF THE O. A. C.

HEURTLEY, EUSTACE WILLIAM

Born in Sussex, England, educated at Repton School, Derbyshire, "Bill" in 1903 came out to British Columbia, where he engaged for some years in fruit growing. Realizing that practical without scientific knowledge was insufficient, he returned East to study Horticulture at the O.A.C. with the Class of 1910. At the end of his Sophomore year he again set out for the Forest Province, taking charge of a nursery for a land company in the Columbia Valley. Two years at Guelph had only whetted his appetite for knowledge, so he returned to finish his course with the Class of 1911. We regret to learn his intention to settle in the Far West; he has our sincere wishes for a happy and prosperous future.

HOPKINS, EDWARD STANLEY.

"Folks who can, do; those who can't, chin."

E. S. H. was born in Lindsay, 1890. During the adolescent period he attended the Lindsay public and High Schools, and it was here that he received the grounding for his future education. Wishing to supplement this preparatory training and to fit himself for a better future he decided to enter the 1911 Sophomore Class of the Ontario Agricultural College. His recreation took the form of baseball, in which he captained the College team in his final year.

HOWES, ERNEST ALBERT.

"A many-sided creature,
Farmer, lumber-jack, and teacher."

Ernest was born in 1872 on a farm near Vankleek Hill, Prescott county. Educated in the local public, High and Model Schools, he was two years a scribe, then two years a Michigan lumber-jack, river-driver, rancher and music purveyor. In 1895 he was an Ottawa Normalite. In 1903 he was selected by Dr. Robertson as a teacher for Rural Consolidated Schools. Three years of Bowesville school-garden demonstration, resulting in matrimonial inoculation; four years as principal of Guelph Consolidated Schools; he is now O.A.C. Senior Educationist, Thermmatalogist, and Humorist, a happy father with some grey hairs and a clearance in the bush. A lovable man, adored by his pupils, consulted by his classmates, we predict for him a great future.

HUTCHINSON, ALLEN.

"Love me and the world is mine."

"Cupid's Delight" claims White Sand, Saskatchewan, as his birthplace. From 1887 until 1901 Hutch. studied 'rithmetic in the roughest schoolhouse of his Western birthplace. In the latter year he removed his presence to Ontario, entering the O.A.C. in 1907. Hutch commenced by endeavoring to elope with his nursemaid, but changed his mind because the cook made good chow-chow. However, as years came upon him, his ideas of life changed, and until he was old enough to wear shoes, Cupid's Delight scorned the fair sex entirely. Since then, life has been one sweet, sweet dream. As football manager in 1909, a member of the champion Inter-Year Hockey team in 1910, and as Business Manager of The Review in his Senior Year, Hutch has made good.

KEEGAN, HERBERT L.

Born at Balmoral, Ireland, H. L. Keegan spent his early years in Switzerland. From there he went to Stoneyhurst College, Lancashire, England. His early life made a lasting impression on him, and on leaving school he made up his mind to go in for Scientific Agriculture. With this aim in view he entered the O.A.C. with the present graduating class, and while here has made himself many friends amongst both the men and the ladies. He has always been an enthusiastic swimmer and a most useful man on the water polo team. We have no hesitation in predicting a very bright future for Pat, and from the interest he has lately been taking in co-operation, are led to believe that he will not remain long without a partner.

KING, VERNON.

"Even the despotic power of habit may be overborne by individual adaptability."—Folsom's *Biology*.

King came from England, but that was not his fault. He was born there, at Gravesend. His first occupation was catching flies on his mother's window, but later he took after larger game in the form of Lepidoptera. After five years of torture on a Canadian farm he came to Guelph. Here he joined the Biological Club, where he lit his first cigar. He is a Tenthredinoidologist, and of the right sort, lots of ologist and not too much din. He is entered at the College post office as first-class matter and he is sure O.K.

PROFESSOR DAY.

PROF. J. B. REYNOLDS.

LANDELS, BERTRAM H.

*"He said
Or right, or wrong, what came into his head."*

Bert. first began to argue in the latter part of the 19th century, down on the shores of River Hebert. For years the ringing blows of his axe resounded through the woodland silences, until he threw aside his blunted axe and wrinkled larrigans, and bought a second-class ticket to Truro. After spending two years at the College of Agriculture, he said good-bye to that institution and appeared as a junior at the O.A.C.

LIGHT, PERCY ELTON.

*"A little nonsense now and then
Is relished by the wisest men."*

The Lord said, "Let there be light" and there was Light. In 1886, Colchester, Eng., was illuminated by the advent of Percy Elton Light. Poems, dedicated to his nurse, proclaimed Perce to be of a literary turn of mind. Hertfordshire Grammar School was responsible for his early education. Canada first saw the Light in 1903. As farmer and preacher, he proved a success. Agriculture ultimately claimed his whole attention, so he entered our precincts in 1907. As editor of "the locals" in his first year and "College Life" editor in his second year, "Parson" scored brilliantly. Parson's vow of celibacy eventually succumbed to an acute attack of Bacillus Cupidus, and he now plays with Cupid's arrows without fear or regret.

LONGLEY, WILLARD VICTOR.

"Act well your part, there all true honor lies."

Longley was born in 1887 at Paradise, Nova Scotia. His early education was obtained in the home village, where he matriculated from the High School. After spending a few years on his father's farm, he decided to pursue his studies along Agricultural lines, and so we find him at the N.S.A.C. in the fall of 1908. Not content with an Associate Diploma, he proceeded to Guelph, entering the Class of '11 in their Junior Year. Specializing in Agriculture, we expect to see him return to his native Province, to there aid in its advancement.

MCALLEER, HENRY ALOYSIUS.

A native of Pennsylvania, "Mac" received his early education at Central High School, Philadelphia. After being in business for some years, he came to the O.A.C. in 1907. Since then he has ever been in the limelight. From the very first he has taken an enthusiastic interest in all athletics, and in his second year won his place on the football XIV. He has always proved himself a sound and reliable man on the Athletic Executive, holding the various offices of Secretary, Vice-President, and President. "Mac" is fond of poultry, but he is a game bird, anyway, and we feel sure he will never be plucked.

MAIN, CLEVELAND.

*"Wondrous wise for his size
Is the kid we idolize."*

"Judas," as he is popularly known among his fellow-students, first beheld the light of day in the village of Sheffield, Wentworth county. After having received his early education at the public school and continuation class, he took a course at a business college in Buffalo, and then came direct to O. A. College. While at College he divided his attention between education and athletics, being especially an all-round athlete. He has played on all the inter-year teams; the College Rugby, basketball, baseball, and soccer teams. He devoted much time and attention to our sister students at Macdonald Hall, where he excelled as a "cosy corner specialist." May his golden qualities lead him to the zenith of success.

MACKAY, NORMAN CAIRNS.

"A man from the East."

One cold morning in January, 1888, the stork left "Mac" in a farmhouse at Scotsburn, Pictou county, Nova Scotia. After leaving public school, he attended Pictou Academy, fitted himself for a teacher, and wielded the birch for two years. Having a strong inclination along Agricultural lines, he went to the Agricultural College at Truro, took the two years in one, and dropped into Class '11 as a Junior. He has been a good student, has served as Vice-President of the Alpha Literary Society, and in athletics rooted vociferously on the side lines. "Mac" is an Agriculturist, and hopes some day to be the owner of a Guernsey Stock Farm, down by the sea.

MARCELLUS, FRANCIS NATHAN.

"His genius inclines him with delight to his profession."

"Mars" came into existence on the morning of August 25th, 1885, and his first act was to crow lustily and scamper to the poultry pens. He received his early education at Morewood public schools, and, after some years spent in practical agriculture, with poultry as a specialty, he joined Class '11 in order to gain more scientific knowledge of his chosen calling. He has been a valuable asset to Class '11, filling ably the positions of President of the Alpha Lit. and President of the Poultry Club in his Junior Year, and playing on the Year Baseball Team throughout his course. He is quiet and unassuming, and will make his presence felt in whatever phase of the Poultry industry he undertakes.

NEWHALL, HAROLD WENDELL FRASER.

"And she opened a bottle of milk, and gave him drink, and covered him."

Newall entered the Dairy Option at Toronto in 1885. After leaving the bottle department, in which he became famous, he gathered the cream from several American institutions. He then went to Europe, put England through a Babcock tester, and brought home everything but the skim milk. He was chosen President of the Literary Society because of his keen limburgerized mind, and the high percentage of cream in his language. As for all the other acts of Newhall, how he became famous in many ways, are they not written in the books of Maedonald Hall? The President tests 99.5 per cent.

PACKARD, RANSOM CLAYTON.

"He loved where'er he looked, and his looks went everywhere."

"Willie," as he is called by his fellow-students, was born in Brockton, Mass., 1886. So you see Willie is old enough to vote. He received his early education at the Brockton public and High Schools. In the fall of '04 he entered the School of Agriculture, University of Maine, and here he received his Associate Diploma. But Willie longed for a better land, so we next find him at the O.A.C. a brilliant member of Class '10. He dropped out of his year at Christmas, 1909, to accept a position with the Department of Bacteriology, which, by the way, is his specialty. Class 1911 received this prodigy into their ranks Christmas, 1910. Here's luck, Willie, fortune is sure to smile on you.

PEART, GRANT SOMERVILLE.

*"A woman is only a woman
But a good cigar is a smoke."*

"Grant" was born near Freeman, Ont., and after going through the customary process of a public school education, he attended Hamilton Collegiate for two winters. Two years later he entered the O.A.C. to study Horticulture. At College he has ever been popular with his classmates, and has even extended his influence across the Campus. While he has proved himself a true sport in whatever games he has entered, still he has never forgotten that he is really at College for an education.

PORTER, WATSON H.

*"Life is a jest, and all things show it,
I thought so once, but now I know it."*

Watson H. got off at Woodville, Nova Scotia, in the September of 1886. He received his training at Woodville and later at the historic Pictou Academy. Choosing the vocation of his fathers as a life work, he resumed his studies at the Nova Scotia College of Agriculture, where he spent two years. He became engulfed in the great migratory movement of 1909, landed in Guelph and joined the Class of 1911.

REVELL, HENRY KEITH.

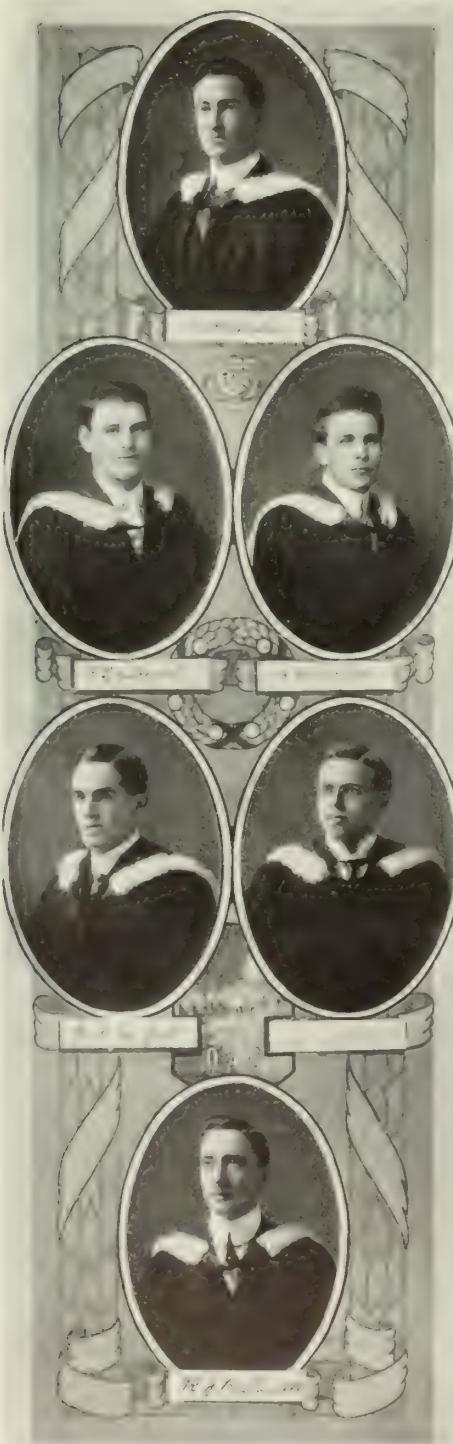

"He is of a retiring disposition."

Henry Keith Revell, one of the white-haired youths of the Class, comes to us from Ontario's tobacco county, Essex. He was born on July 17th, 1887, in the old town of Shakespeare's "Merry Wives"—Windsor. "Is it an ox?" he learned in Walkerville, where he completed his public school education. He attended the Detroit University School, 1904-1906, and in the latter year entered the O.A.C. After receiving his diploma in 1908, he dropped one year visiting the fruit districts of the Pacific Slope, and then continued with Class '11. The West afforded him many new ideas, which he intends putting into practice on his fruit farm in Old Ontario.

CLASS '11, O. A. C. INTER-YEAR HOCKEY CHAMPIONS, '08, '09, '10.

M. M. Baldwin	J. E. Smith	A. Hutchinson		
F. M. Clement	S. H. Gandier	P. A. Fisher	P. E. French	W. B. Milner

ROBERTSON, WILLIAM HOMER.

On November 20th, 1888, the roar of the sea welcomed Bobby to Halifax. But it was at Barrington Passage, N.S., that the greater part of his childhood was spent. At the age of seventeen, after one year in a banking office of his home town, he gave up his position in order to study agriculture at the O.A.C. Bobby believed in specializing, and at once began to study the details of Horticulture, especially the production of high-class fruit, which he hopes to make his life work. A lover of manly sport, fair play, full of energy, and pertinacity, enthusiastic, but quiet, we feel that wherever his lot may fall he is sure to make good and be a credit to the name of William Homer Robertson.

ROSS, WILLIAM ALEXANDER.

*"The man o' independent mind,
He looks and laughs at a' that."*

The greater part of Bill's nymph stage was passed in Auld Reekie. It was not until coming to Canada, however, that he emerged a perfect imago. He took up the study of insect galls because he was never able to develop one himself. He is a student from his cur-r-r-r-l-y head to his toes, which aren't curly. He has no use for lords, and he says so. In fact, he always says what he thinks and he thinks a lot before he says it. It is Bill's intention, after leaving Guelph, to chase a "wee bit" knowledge at Cornell.

RUTHERFORD, ROLAND LLOYD.

"See him smiling."

On November 14th, 1890, "Rollie" arrived at his parents' home, River Hebert, Cumberland County, Nova Scotia. After receiving his public and a two-year High School education at the village, he decided that farming was "The Thing," so went to the N.S. Agricultural College, Truro, and there worked faithfully in class, and in at College activities. On obtaining an Associate Diploma he joined the '11 Class at the O.A.C. as a Junior. He served as member of the Alpha Lit. Executive, and in his final year played on the second Rugby team, where his size and good-nature were always prominent. After graduation "Rollie" intends returning home, and practising scientific methods on Grand Marr Farm.

SCOTT, W. R. M.

*"And still the wonder grew
That one small head could carry all Bill knew."*

William Robert Mills Scott, born in 1885, is the only pride of his father, A. Scott, of the Canadian Customs, Toronto. But the land called "Little Bill," and he departed to take up a position as "hired man" on a farm at Burlington. 'Twas here he received the practical training so necessary for success at O.A.C. A lover of flowers, cheerful, always interested in College events, an enthusiast at College games, Bill is a classmate not easily forgotten. Later, when he takes up his life work among the "flowers" we feel certain that he will cultivate only the prettiest, and select from among these the "sweetest" for his special care.

SHIBLEY, CHARLES STANLEY.

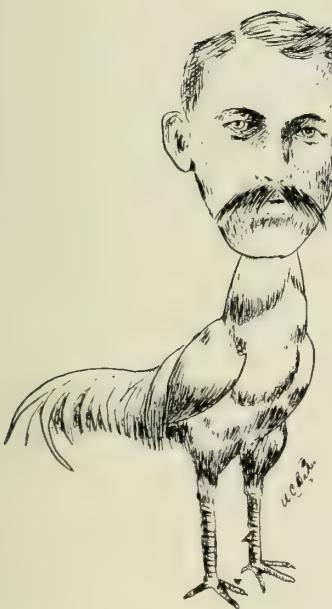

*"Tho' modest, on his unembarrass'd brow
Nature had written—Gentleman."*

The world was surely in a jolly mood when at Harrowsmith, October 2nd, 1889, Chas. Stanley Shibley was ushered smiling on its stage. Chas. received his public school training at his native town and later matriculated at Sydenham High School. All those who know him affirm that he is a man of noble qualities, but his watchful parents fearing his close proximity to Kingston, and knowing his love for Agriculture, decided to send him to the O.A.C. Here he has made good, entering with Class '11 and finally specializing in Agriculture. His hearty laugh and love for the beautiful has gained for him many fair friends, and upon his departure Charlie will be missed in the Hall and on the Campus.

SHORTILL, ROBERT JOSEPH RICHARD.

"An affable and courteous gentleman."

On a chill December day away back in the eighties, R. J. R. became supreme at "Shortill Homestead," a farm near Ballinafad, Ontario. In leaving public school he assisted his father in practical farming for a number of years. After mastering the art of agriculture he wished to learn its science, and so fell a victim to the magnetism that drew together the illustrious Class '11 of the O. A. College. His musical ability admitted him to the College choir, and to many social functions. He made his personality felt in the Y.M.C.A. and was always an enthusiastic Year man. His forte is Agriculture, and we all predict a bright and prosperous future for him.

SMITH, JOSEPH ERNEST.

*"I've scanned the actions of his daily life,
And nothing meets my eye, but deeds of honor."*

J. E. was born of British parents at Shallow Lake, Ontario. Here he received his primary education, later matriculating with a teachers' certificate at Owen Sound. In 1904 he entered the O. A. College and was elected Class President. At Christmas of his second year it became necessary to discontinue his course for a time. Returning in January as a sophomore of Class '11, he at once won the esteem of his classmates and became President of his Junior Year. His genial, unassuming manner has always added greatly to his deserving popularity. He has served on the Cabinets of our four Associations, and has been "blamed" for the success of the Conversazione in 1910. As a Senior, he was elected Chairman of the Student Executive Council, and was among the first to be selected for the stock judging team to represent the College at Chicago. In all, he has proved himself a man of rare genius and unimpeachable integrity. Our best wishes will ever follow him through life.

SPRY, JOHN REYNOLDS.

"A youth, to fortune and to fame unknown."
He cannot clear the five-bar gate,
But, trying first its timber's state,
Climbs stiffly up, takes breath, and waits
To trundle over.

Thro' gallopade he cannot swing,
The entangling blooms of beauty's spring
He cannot say the tender thing,
Be't true or false.

STICKLEY, JOHN CHARLES.

"He dared do all became a man."

With the coming of the robins in 1887, "Stick" made his first appearance in public life at Bethesda, York county. After completing his elementary education he entered the O.A.C., taking his Associate Course with Class '08. The three years following were devoted to scientific farming and a brilliant social life. Possessed of a thirst for more knowledge, he again entered College, completing his course with Class '11, specializing in Agriculture. At College, he proved himself a clever student, and a competent judge of fair ladies and farm stock. He took an active interest in literary work and was a star "wing" on the Rugby team. His ready wit and humor attracted a host of friends and made him a centre of social interest, especially at Dublin St. We predict for him a brilliant future.

THOMSON, ROBERT GRANT.

"He'll shine in all substantial honors."

The early mail of August 6th, 1884, brought a new "Boss" to the old ranch near Bohart, Sask. The young hero passed through various scraps, schools and experiences until he joined Class '11. Here his butterfly existence brought him to the front, a star Rugby player, a player of tricks and a rising humorist of note, he is a favorite. Tommy specialized in Agriculture, and not only is he a good student, but a competent judge of live stock. He intends to go back to the West, where he is building up a herd of pure bred Holsteins. You will all hear of him in the future.

TOOLE, WADE.

"One who never turned his back, but marched breast forward."

Tiber is not a Roman. He appeared among the young lambs on a sheep ranch near Whitevale in March, 1886. Since then, as the whole family, he has had his own way. After obtaining his public school education he returned to practical agriculture. Deciding that life held more for him than was possible under existing conditions, he entered College with Class '11. As a student he proved himself possessed of no mean capabilities, winning general proficiency medal in his second year. Rugby and basketball also had their attractions for him, and in these he ably assisted the First College teams. As President of his Class in his final year he showed himself equally efficient as a leader.

WEARNE, HARRY.

Harry Wearne, though born in Alsace, Germany, is a thorough Englishman, and received his education at Tonbridge School, Kent. In 1906 he came to Canada, and entered the O.A.C. with the Class of 1910. At the end of his sophomore year he dropped out, and sought pastures new in the wild mountain valleys of British Columbia. Happy as he was here amongst his furry companions, "Bunny" constrained to return to civilization and the O.A.C. in the fall of 1909. Fond of exercise, he has always enthusiastically supported his Year in running, swimming, diving, and boxing. His old love of nature is now showing itself in his keen interest in live stock. May his long legs and swinging stride carry him far on the road to success.

WEBSTER, HARVEY BRODIE.

"Whence came thy knowledge?"

He appeared on a farm in Perth county in 1888. After a good elementary education, Harvey, desiring to understand the scientific phases of agriculture, started to College, taking his course on the installment plan, two years with '09 and finishing with '11. He led his class in his second and third years, and became famous as a student. Harve. specializes in Agriculture, but has a weakness for poultry, dairying and the fairer sex. As to the future, Harve. will return to feed the "dots," milk the cows, continue his student days and become a famous Webster. For further particulars are they not chronicled in the annals of Knox Church?

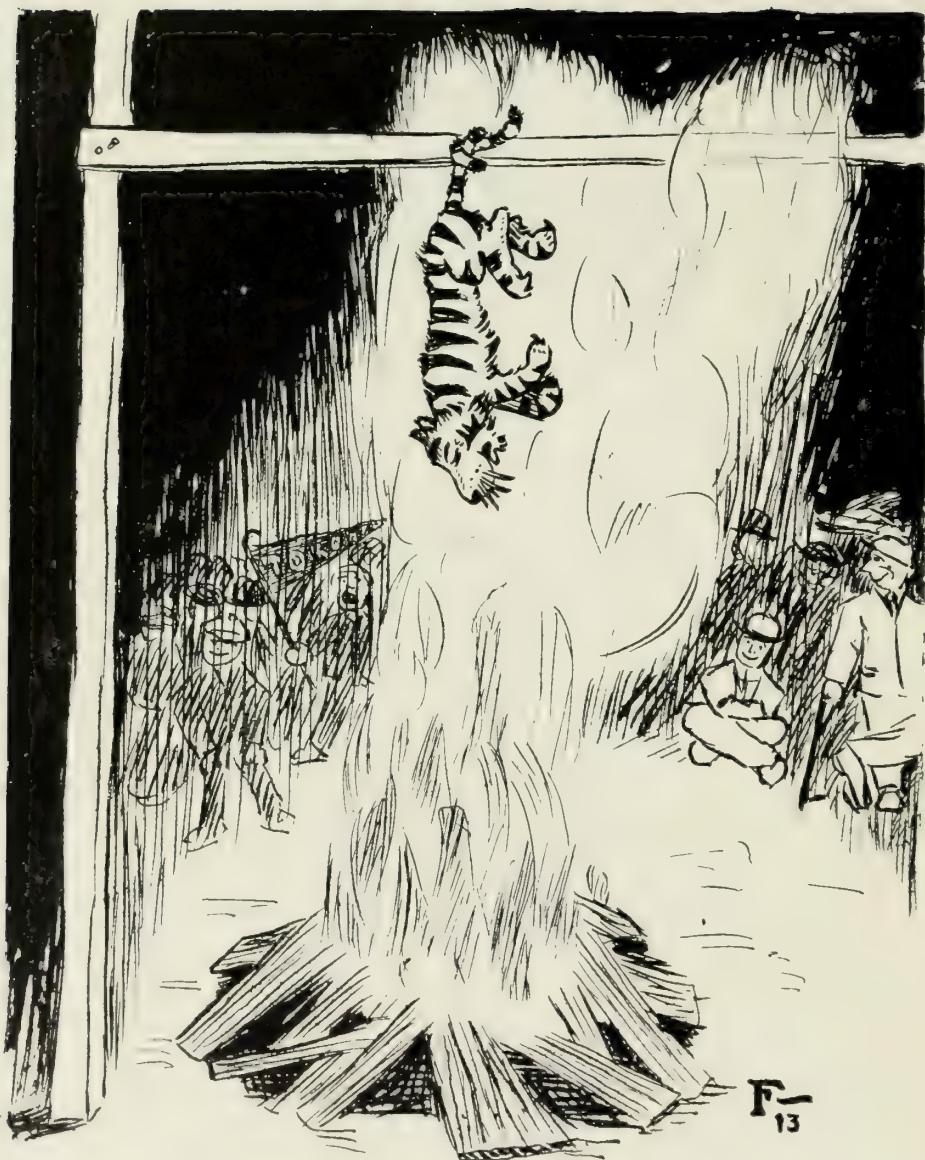

WHALE, IRVINE BROCK.

"He is a reasonable man."

In spite of his name, "Whale" is not a deep sea monster, and is not aquatic in habits. Irvine first came to Fairview farm, Goldstone, Ont., to help in the harvest of 1885. School days over, he spent his energies in farming, but, longing to hear the secrets of science, joined Class '11 to quench his thirst for knowledge. A good student and an agricultural specialist, he soon became a competent judge of live stock, grain and men. An enthusiastic admirer of Holsteins, he goes back to the farm to spread the wisdom gained, to grow two blades of grass where but one grew before and to crystallize the returns from the golden cream of the spotted herd.

"JOHN."

Members of Faculty in centre - D. C. D. Howe, A. D. H. Ross, Dean Fernow, J. H. White

History of Class 'II

HIS season's growth in our faculty has been so thrifty that we may consider her crown cover to be fully established; at least, there is no conspicuous growth of grass under our feet. Henceforth a marked increase in the severity of the annual thinnings may be looked for. Owing to preponderance of the younger age classes, the budget is still below normal, but will be double that of last year. The market conditions are quite favorable, and there is no reason to doubt that the entire output can be advantageously placed. The management is avowedly more intensive than strict financial calculations would warrant; but its praiseworthy attempts to secure intermediate returns (in the shape of original reports) redeems it from the charge of want of business acumen.

Since intermediate returns (in another form) are a matter of financial necessity with most of us, our men make shift to combine instruction with profit in summer employments, which vary from the simple duties of the fire-ranger to the intricate task of preparing

working-plans, and from the peaceful work of the nurseryman to the pioneering adventures of the reconnaissance surveyor. The summer work is not the least important part of the curriculum. In our scanty moments of leisure we can now exchange tales of Keewatin's muskegs and Pennsylvania's tie-lands; of Nova Scotia's streams and British Columbia's lakes and mountains; and most of us know two or three of our classmates to the core.

Instruction is little altered since last year. Some lectures at the beginning of the term, by Mr. Lapham, of the U. S. Bureau of Soils, foreshadow a new course in Soil Physics and Chemistry, of great importance to the forest surveyor. This Christmas holiday will be spent in a lumber camp by most of the Third Year men, who are to prepare reports on logging operations.

The summer camp at Bala, where for nearly a month we were drilled in Forest Mensuration and Forest Description, was one of the most profitable and enjoyable features of our course. A similar excursion, to the Lake Nepigon region, will probably be held this year, ere once again we scatter to the four winds of heaven "to dance before the Council of the Truths."

CAMERON, DONALD ROY.

"He knows the passes of the North."

Donald Roy Cameron is a recent recruit to our ranks, having cast in his lot with us only this year: but for some time he has made Forestry his aim, and has ordered his life accordingly. Born in London in '88, and matriculating from Ottawa Collegiate Institute in 1905, Donald graduated from McGill in a Natural Science course, in 1909. While confessing to a B.A. degree, Cameron is by no means lacking in practical experience. He has worked on Dominion Forest Surveys in the Riding Mountains, Manitoba, in British Columbia, and along the line of the new Hudson Bay Railway. The Dominion service has urgent need of just such men as he.

DE LOTBINIERE, JOLY.

"A loyal, just, and upright gentleman."

Joly de Lotbinière first beheld the light in the ancient city of Quebec in 1886. He attended Bishop's College School at Lennoxville, and in 1908 he completed a scientific Arts course at Bishop's College University. He had intended to enter the Medical profession, but in 1909, after a year of that study at McGill, he awakened to the advantages of a forester's career, and for these two years he has been a worthy member of our group. His completion of the course in that time attests his scholastic ability, his office of Secretary-Treasurer of the Foresters' Club demonstrates the esteem of his classmates, and his service on the survey of Nova Scotia exhibits his efficiency in the field.

ELLIS, LEON McINTOSH.

*"I must remove
Some thousands of these logs, and pile them up."*

Leon McIntosh Ellis hails from Meaford, but for many years has made West Toronto his headquarters. He came from its Collegiate Institute to S.P.S. in 1905, and for two years studied Civil Engineering, working in summer on railroad construction in New Ontario and the West. In 1907, when the Faculty of Forestry was opened, he became one of its first freshmen. He has been Vice-President and President of the Foresters' Club, and in the field has shown himself a successful leader and organizer. We look to him to give the Faculty a good name among the hardheaded lumbermen of Ontario.

GILMOUR, JOHN DOUGLAS.

*"His square-turned joints and strength of limb
Showed him no carpet-knight so trim."*

Gilmour, John Douglas.—The Faculty of Forestry is under a deep debt of gratitude to the Ontario Agricultural College, which, in our early lean years, has provided us with so many stalwart Sophomores and Juniors. Foremost among them stands the subject of this sketch, a native of Parry Sound District, and a B.S.A. of 1908, specializing in Biology. After a year with the Dominion Forestry Branch, he came to us, and has shown himself a capable and ambitious student, deservedly popular with his fellows. In whatever field his energies find scope, it is safe to predict that they will make deep and lasting furrows.

MCDougall, ERIC GRAHAM.

"A moralist perchance appears."

Toronto has had one more reason to be proud of herself in having such a son as "Mac," who was born here in 1887. Five years at Ridley College, St. Catharines, four years in Biology at Varsity—Capped with a B.A.—and two years in Forestry have given "Mac" great scholastic prominence. He is a veritable encyclopaedia, and the comrades who have had the good fortune to accompany him in fire ranging and surveying in New Ontario and British Columbia, have always appealed to him for the "last word." He proposes to enter the ranks of the teachers of Forestry. He couldn't do better. With his wide knowledge and practical experience he is fitted for a brilliant career.

SADLER, SAMUEL SLOCUM.

"A pleasant man who sang a pleasant song pleasantly."

From Florida by way of Pennsylvania State College, from which institution he graduated in 1909, Sam comes to Toronto to finish his education in Forestry under Dr. Farnow. The Forestry Faculty stands indebted to him as the prime instigator of its first Glee Club, and the large number of staunch friends whom he readily won to him wish him success on his return to a responsible position in the Forestry Department of the Pennsylvania Railroad.

KNOX COLLEGE.

PRINCIPAL ALFRED GANDIER, D.D.

“Foreword”

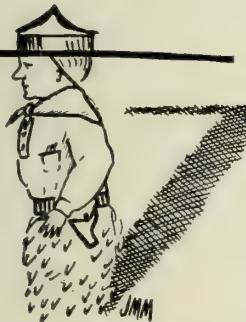

THE federation of Knox College with the University of Toronto is the expression of a close and long-standing relationship that has been honorable and helpful to both institutions. Knox students, with but few exceptions, are alumni of University College, and have been graduated from the University of Toronto. No class of men has taken a more loyal interest in all that pertains to the higher side of student life among University undergraduates—athletic, social, literary, intellectual, religious—and this continues to the end of their course in Theology.

The splendid new home of Knox, to be erected to the west of the Campus, and right beside the Main Building, will tend to bring Knox, with its Biblical and Theological studies, into still closer relationship with the whole sisterhood of advanced studies to the advantage of all concerned. Secular learning needs to be reminded of the things which are unseen and eternal, and Theological colleges need the tonic of a university atmosphere if they are not to become narrow in their outlook and low in their educational standard.

With Theological colleges entirely supported and controlled by the great Churches to which they belong, yet all grouped around and federated with the Provincial University, we in this Province have already worked out and successfully tested a system of higher education which many of the best educationalists in the United States present to themselves as an ideal to be realized in some distant future.

Long may the present relationship between the Provincial University and the federated colleges continue.

History of Class '11—Knox College

THE fair name of Knox College as a progressive School of Divinity gathered sixteen freshmen Theologues within the antique corridors of its ivy-green walls in the autumn of 1908. The group was less large than varied and full of promise. Every man had cut his wisdom teeth, and if asked to prove it, could produce a "Baccalaurei in Artibus" parchment from some "Senatum Universitatis." To wit, every man was still sound in wind and limb.

It was the most cosmopolitan class of many years, and from the professor's point of view contained an interesting amount of the unknown X.

To discover this X in each student the several professors straightway assigned us essays and set us to work in such a strenuous fashion that we scarcely had time to discover each other's eccentricities. Knox was no saint's rest. We were not saints, nor was there any rest. Much study verily became "a weariness of the flesh." The subjects pursued, however, were interesting in themselves and made increasingly so by the thorough method of the professors. The prophets and the "Men of Galilee" spoke again; we heard the echo of their voices—were with them in Palestine—and only came back to Knox when rudely recalled by the hourly gong.

But we had other attractions besides the Holy Land. From Archæology we ever and anon turned to the relaxations of athletics, debates and general student enjoyments. Association football and hockey offered us a lively attraction. By the repeated application of our "non-such" mustard plaster our soccer team drew out the 1908 intermediate championship. In the art of skilled controversy we shall always remember how once we all but wrested the coveted shield from invincible McMaster. As to our activity in sheer student deviltry, posterity will testify with what precision we directed buckets of water even on flying objects, with what artistic effect we "set up" the rooms, and with what weird noises our Hebrew-tried larynxes

made hideous the night. Some things may be forgotten—but Knox's indescribable initiation through powder's deafening roar, flame's lurid flash, and water's shivering swish in the ghastly midnight experienced once live in memory forever. In a milder sense, so also will the songs, silly, sentimental or pathetic, that have floated through the halls from groups of choristers who, bird-like, sang because they must. The echo of these songs will come again in after years as we wander homesick over wide-horizoned prairie, craggy mountainside or in lone alien field. Space fails me to tell of all the close college friendships formed, and of the momentous issues informally discussed around festive board, or as we lounged coatless and bootless upon our cots. So the years have gone.

Soon our feet will have passed for the last time as the feet of students over the old threshold stone worn deeply by the tread of thirty generations before us. What will befall us we know not. We hope to "Trust in God and do the right."

The professors will shortly have done their best for us. Our optimistic muse from Erin, in the following self-explanatory lines, leaves our future keeping in gentler hands:

"Let me dip into the future far as human eye can reach,
Catch a vision of the regions where our men shall pray and preach—
See the various mission-stations where they'll spend their little lives,
Pastorating, sermonizing—faithful kept by faithful wives!
John McEwen's faultless fashion finished off by female hand;
Fairy fingers lift the sluices of a Mustard's rhetoric grand.
See the 'Toba Boanerges—each a gentle voice inspires;
Harris now unharrass'd, Arthur's slippers warmed at winter fires.
Alec Scott and Herbert Johnstone, each have ta'en a milder mate;
McIntosh and Earl McLean no longer haste to "keep a date!"
Robert Campbell rounds his periods on a sympathising ear;
Davie Lane has ceased to waste his sweetness on the attic air!
With unerring aim has Donald McLean lassoed him a lass;
Now McRae's a Merry Andrew, Watson a paterfamilias!
Mr. Gazley mildly gazes with experienced optics, he
Long has known the bliss connubial of a ministerial she!
So professors, fellow-students, come fill up a brimming glass,
Toast together all the sweethearts of our graduating class."

The Knox College Students' Missionary Society

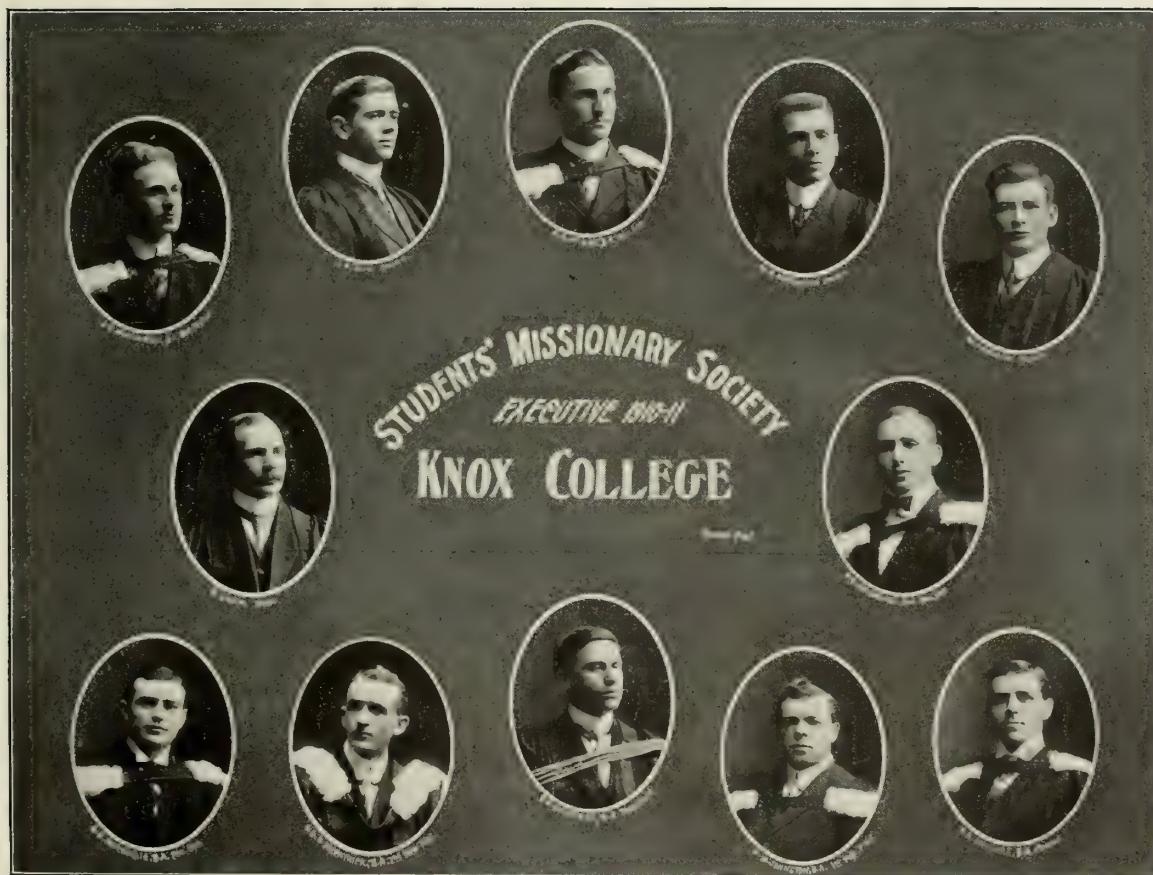

LOSELY identified with the Theological course of Knox College is the work of the Students' Missionary Society. Organized in 1844, and attended with remarkable success, the Society has expanded till to-day it is one of the great forces in the missionary life of Canada. It is said that great movements have humble beginnings, and in no small sense is this true of the students' work. The work of the Society to-day comprises the entire support of forty student missionaries, the greater part of whom labor beyond Winnipeg, and involves an annual financial outlay of \$13,000. The management of the work, and the responsibility of raising the yearly budget, rests solely with an executive elected by the student body.

A short sketch of this growth might be interesting. The first work was attempted among French-Canadians, when the support of one missionary was undertaken in establishing a mission on the Thames in Essex County. The next step was to send the first Presbyterian missionary to the Red River Settlement in 1851. This work was carried on until 1873, when it was thought wise to cease the labors among French-Canadians and direct attention to the pioneer settlements of Ontario, and for many years the Georgian Bay district was the scene of activity.

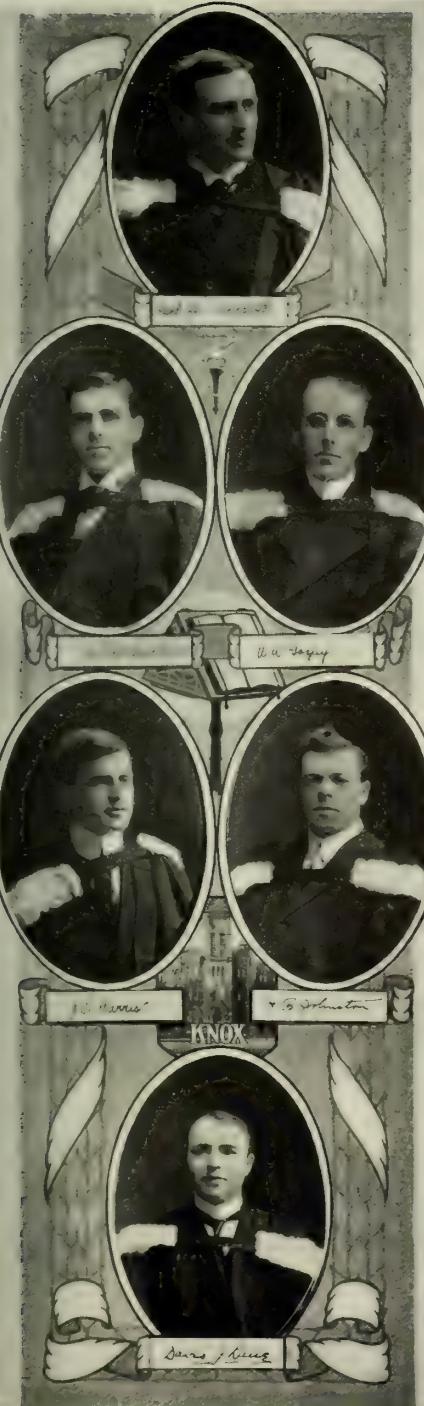

But the natural tendency of the work towards the West could not be forestalled, and the missionaries pushed farther and farther in

that direction until Port Arthur and Fort William were reached. The Western Provinces called appealingly for assistance, and in 1874 two missionaries faced the unknown wilds of Manitoba to work among the settlers of that Province. The fields of activity again changed, and in 1886 four missionaries were sent to the Northwest Territories, now the Provinces of Alberta and Saskatchewan. Until 1892 these Provinces were the most important fields, but in that same year the mountains were reached and the last Province invaded. The astonishing growth of the work here, in face of the many obstacles, marks these years as some of the brightest in the history of the Society. The present year shows that the work in the West has met with magnificent success. Three missionaries were sent to British Columbia, one of whom went to a new mining town, Stewart, two hundred miles north of Prince Rupert.

The future of the Society is bright with possibility. The work accomplished in the past is but a glimpse of what must be attempted in the future. The Knox College Society has grown from small sources to its present position, and we look forward to the future trusting that the work may be more prosperous and more useful than in the past. The work calls for all the enthusiasm of youth and energy that can be brought out a work in which men feel honored to share, for it is an opportunity of taking part in the great work of building up a strong nation, conceived in liberty and founded on deep moral worth.

CAMPBELL, ROBERT MORRISON, B.A.

*"The good stars met in your horoscope.
Made you of spirit, fire and dew."*

Bob hails from Chatham, which is soon suspected from his native tendency to portray negro characters in the original. His aspirations are singularly poetic, as well as dramatic, and he indulges in frequent and regular attacks of hero (ine) worship—"Thereby hangs a tale." With regret we notice certain Methodistical symptoms, which cannot be attributed to the influence of a popular Presbyterian divine whom Bob is known to emulate. Of an essentially democratic spirit he gives to all the warmth and charm of his personality, but having been nurtured in the classics, he is naturally at home among his books. Beyond Bob's wildest flight of imagination or keenest sallies of wit one recognizes his earnest purpose.

ARTHURS, THOMAS ANDREW, B.A.

*"A man of faith and not of fiction.
A man of lofty aim in action."*

Tom is a native of Limehouse. At school, he played, fought, was whipped, like other boys, but never swore—except under provocation. Already it would seem that he had some inkling of his future calling. While wielding the rod in a rural school the problem of suffering suggested Theology, and forthwith he came to Knox. At Varsity he took a healthy interest, not only in every department of College life, but even in Philosophy. His work in Knox, whether in classroom or executive, on the mission field and even in the dining hall, has been of the highest order. With his intellect, personality, and all-round sterling manhood he will prove a bulwark to Calvinism.

GAZLEY, ALBERT W., B.A.

"Out of nowhere, into the somewhere," came Mr. Gazley. Doubtless he will pass out into the everywhere in due course. Meanwhile he is with us, corporeally at least; we cannot vouch for his pneumatic presence. Mr. Gazley sees more than he says, we imagine. He looks out on us through eyes that "half reveal and half conceal." He speaks to us with words that are Delphic, and in an Orphic voice. Mr. Gazley is always "on time"—doubt your watch first. If his picture could speak, it would corroborate these accompanying statements—and that with a smile not cynical, nor superior, nor jocose—but simply artless. If Mr. Gazley has his prototype among the Apostles we would say it must be Nathanael. And as an apostle we augur for him all the success due to one who was under the cloud.

HARRIS, JOHN RUSSELL, B.A.

Russell graduates from Knox a year later than he expected. It is not because, being weighed in the examination balance, he was found wanting, but the University "weighed" him and "wanted" him to lecture in Philosophy for the term 1909-10. A founder of the Kirschmann Club, a member of the Speculative Club, a broad reader of political and literary reviews, he still maintains a high place as a scholar. Quiet in disposition, deliberate in speech, and mindful of others, Russell may justly look forward to a bright and useful career in the ministry. With a marked individuality, he may tread unbeaten paths in theology in his earnest quest for truth. Not merely truth in the abstract, but truth in the concrete, is of interest to him. So successful has he been, that he can now shout the great Eureka—"Herein is love."

JOHNSTON, HERBERT BAIN, B.A.

Those who have a superficial acquaintance with Herb, consider him a humorist, those who know him best look upon him as something between a pessimist and a serious-minded philosopher. Life's problems lie heavily upon him, and to each experience presented to him he applies the two tests—"Is it logical" and "Is it true to life?" Though an orthodox Presbyterian and Protestant in most respects, he takes issue with Calvin on predestination, and his chief cause of complaint against the Roman Church is the rule regarding the celibacy of the clergy. With his warm sympathetic heart, his intensely human outlook, his thoughtful nature, and his finished literary style, he is almost certain to be a highly successful fisher of men.

LANE, DAVID JAMES, B.A.

"An honest man's the noblest work of God."

David James Lane was born in the village of Kinlough, Bruce County, in October, 1882. After completing his primary education at Walkerton High School, for three years he taught the youth of his native county. But his yearning after knowledge lured him on to wider spheres of life. In 1903 he entered Queen's University, and in 1908 he numbered himself among the sons of Knox. His sunny smile, kind heart and sympathetic nature make him a true friend of all. Whether on the football field, at the head of the College rooters, as chairman of the Freshmen Refreshment Committee, or among those who enjoy his genial hospitality in his own room, he shows himself to be a born leader of men. His healthy enthusiasm and outspoken honesty mark him as being every inch a man.

McEWEN, JOHN, B.A.

At five hundred yards, John is dignity frosted; at two hundred yards he is dignity melting slightly; at the festal board, with affable companions, he is dignity transmuted by the strange alchemy of fellowship into bubbling soul-fluid. He is at his best when picking a chicken's ribs or leisurely enjoying the several ingredients of a "David Harum" with the little inner circle of kindred spirits. He also loves to look into a fire of coals and dream. If he has to argue he can, but it baffles him how some get so flustered about what they designate life's problems and enigmas. He never worries. His aim is to be happy, to keep young, and without wind or jury to lead a fevered world unto a calm, sane life. While he does this, we all wish him a pleasant fireside, a large armchair, and —another chair.

MCINTOSH, CHRISTOPHER FERGUSON, B.A.

With Dundee, Scotland, as his birth-place and a farm near Brampton, Ontario, as his home, it is little wonder that Chris. is an all-round man. A dignity which fitted him for the Presidency of the Missionary Society is combined with a tact and affability which makes him popular. A shrewd common sense which he brings to bear on all problems great and small, is touched by a fine sense of humor which even seven years of Philosophy and Theology have not been able to destroy. Thorough in work, keen in debate, in nature generous, Chris. is fitted to be a true leader of his people.

MCLEAN, DONALD REDMOND, B.A.

*"He saw in every man a brother,
And found in each a friend."*

It is this view of brotherhood, a determination to know men as they are and the desire to find the place where he can best serve men that has led Don through varied experiences. Beginning down by the sea on a farm near Pictou, N.S., he has seen life in almost every part of our Dominion. He has been a sailor, a miner, a cow-puncher and a missionary. As a student he has been at Dalhousie, Pine Hill and Westminster Hall. Now we welcome him as a member of our class in Knox. Here he has won many admirers who feel certain that Don knows his place and will fill it.

MCLEAN, EARL REGINALD, B.A.

"Candor is a great virtue."

Earl was born on a Western Ontario farm; but soon he tired of the simple life, and joined "the madding crowd" at Listowel High School. Thence the way to Varsity was paved with a special proficiency in the languages. However, at this stage, Divine Philosophy called, and soon he gained such skill in her mysteries that he was able to discern a fine constitutional point at the Lit., and even seriously argue the pros and cons of student polities. These accomplishments prepared him for the presidency of the Literary Society at Knox in his final year, and for intercollegiate debate, in which he also uncovered some gleams of eloquence. The conscientious thoroughness with which he applies himself to every task ensures his success; and he is ever a sincere and loyal friend.

MCRAE, ANDREW ROBSON, B.A.

"May many moons not succeed in filching his memory from us."

The town of Ayr, Ontario, has the honor of being the place where Andy first looked upon the world—and smiled. In the public school of his native place he started on his intellectual career, and, after completing the High School course, entered Queen's University, graduating four years later. Believing that the study of Theology was the road to a life of greatest usefulness, he came to Knox, and, during his course always stood well in the class list, and on difficult mission fields in Alberta and Vancouver Island did splendid service. Possessing a genial manner and a sincerity of purpose, he has attracted many friends who will watch his future with confidence.

MATHESON, ROBERT NICOL, B.A.

While farm life near Owen Sound engaged Bob's youthful years, it only deepened his longings for fields of larger usefulness. His response to the call for men—men of worth—for the Westland opened up for him a few fruitful years there. Steadily yet not without some hesitation he has won his way, though College staffs and church courts often made his pathway rough to tread in. Never overbearing, in nature or in stature, he has earned his success. A fondness for a good joke, a ready appreciation of another's difficulties, coupled with a steadiness and balance of judgment, have won for him many friends and also give assurance for his future. Certainly he is no athlete, but he will win in the game of life.

MUSTARD, CHARLES ALEXANDER, B.A.

As ancient chronicles have it: "Now the words and deeds of C. A. Mustard are they not written in the book of *Torontonensis* for 1908?" Would you, therefore, know of his undergraduate achievements and fame, study that volume. Since his entry into Knox College, Charlie has continued to display those unique powers of body and mind which made him a leader in his undergraduate course. Football is still the elixir of life to him, and he is a tried warrior of many championship games. Always an orator, elocution has now become his hobby and passion. In the active ministry, because he possesses a manly spirit, a singleness of purpose, and a ready sympathy (not to mention a red head), and because, above all, he has given himself heart and soul to his calling, success surely awaits him.

PRENTER, SAMUEL, B.A.

Our class would be incomplete without a native of the Green Isle. Since coming amongst us, Sam. has endeared himself to us by his native wit, his beaming countenance, and his sterling character. As a scholar he is at home in the Classics, but like many of his fellow theologians, he wishes the Hebrew spoke English. In Theology he is Pauline to the core, and woe betide the person advancing any heterodox doctrines. Naturally cheerful, Sammy sometimes gets lonely. Fair visions from across the seas haunt his dreams. Cheer up, Sammy, March is not far distant. The time for his departure from Knox is at hand, but, we hope, not from his adopted land. May we long claim him as a shining light in his chosen profession and an honored worker in the Kingdom of his Master.

SCOTT, ALEXANDER ARMSTRONG, B.A.

"Let me know all. Prate not of most or least,
Painful or easy;
Even to the crumbs I'd fain eat up the feast,
Ay, nor feel greasy!"

As a son of the manse and heir to all its culture, Alex. has always viewed with considerable pity his rustic classmates—stupid specimens in whom he finds occasional traces of intelligence which he conscientiously acknowledges. They may mistake perspiration for inspiration or emphasis for argument, but Alex.—never. In books and art he is a connoisseur and an authority. His besetting sin is accurateness in all things. He would muzzle men who snore; stop the manufacture of alarm clocks; transcend the handicaps of space and time, and forever dwell in the realm of pure spirit—and of bliss.

URIE, JAMES HUGH, B.A.

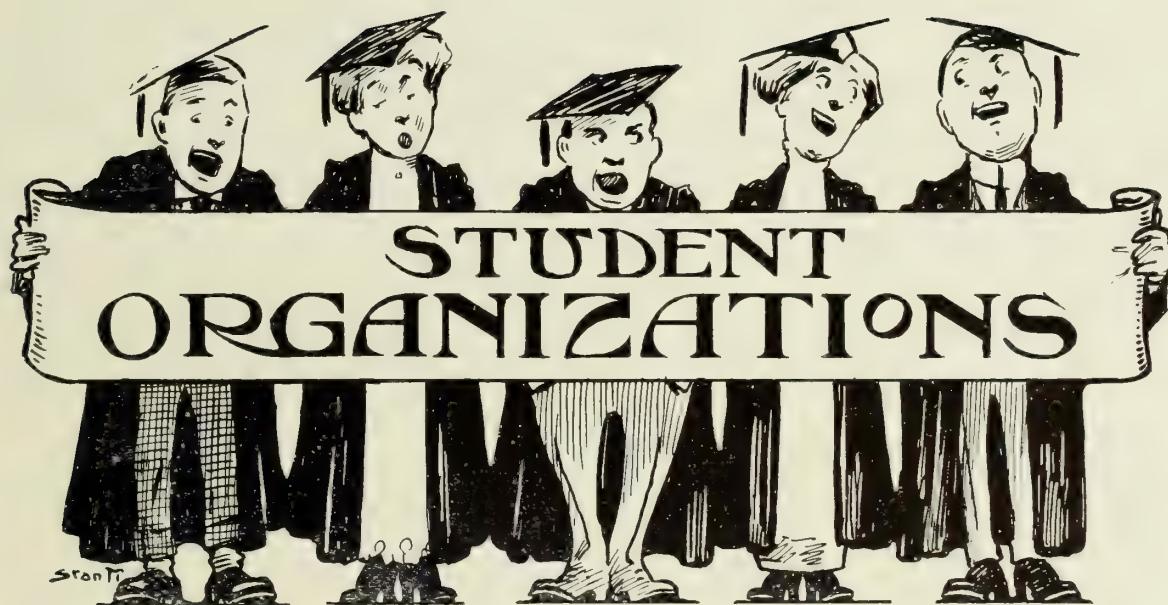

Jimmie, the western member of our Class, joined us when we first embarked upon our perilous voyage over that sea where mariners invariably run foul of Hebrew roots, or find themselves hopelessly "at sea" amid the labyrinth of theological systems. Bringing with him a breadth of vision and a conception of life nurtured beneath the western skies, he conscientiously followed Paul's injunction, "Be temperate in all things." College life meant more to him than taking lectures or plugging to catch a place in the scholarship line-up. He dearly loved the campus and the ice, while committees "ad infinitum" counted him a valued member. Wherever his lot is cast we can depend that in the world of men, our friend and classmate will play a manly part.

WATSON, ANGUS DAVID, B.A.

Angus is senior man of the class—of the celibates that is, not that that rank will claim him long, "on dit." As such he is looked up to by us all, if not physically—certainly mentally, and pneumatically. Angus could weigh you the moon, or classify the rarest flora; spend a whole evening in the "dark-room" (or an afternoon clearing the rink)—but it is in the exegesis of a text or the maintaining of a doctrine—particularly a kind of Calvino-Arminian, one of his own—that Angus finds his true pleasure. Since being "called to be an Apostle" Angus has already labored with acceptance in the ministry—and after he has got his B.D. long may he be spared and empowered for the work of "truthing it in love."

The Parliament of the Undergraduates

THE Parliament of the Undergraduates has now attained the respectable age of five years. During that time it has so far extended the sphere of its activities that it has become almost indispensable in the life of the student-body. The organizations under its control have almost without exception been prosperous.

One fatality, however, must be reported. The University Orchestra, which last year gave such fair promise, is no more. Undoubtedly the proposal to create a really good orchestra without going beyond the University for material was too ambitious. The lack of capable Undergraduate performers, and the consequent need of introducing professional talent, made the organization too expensive and robbed it of a distinctively University character. This year's Parliament has had the melancholy duty of settling the Orchestra's unpaid bills.

Considerable time and energy have been expended during the past year in framing a workable agreement between the Parliament and one of its most successful organizations—the University Glee Club. It is hoped that the new constitution of that body will be as satisfactory as it promises to be.

One of the Parliament's most fortunate ventures is the annual Theatre Night. The continued popularity of this event is attested by the demand for two Theatre Nights.

This is the first year in which the Students' Union is carried on under the auspices of the Parliament. The "Varsity" has hitherto been published by the Union. Next year the students' newspaper will come under the immediate control of the students' representative body.

"Torontonensis" is also issued by the authority of the Parliament.

Besides carrying on the Inter-University debates, the Parliament has decided to cultivate the forensic powers of the undergraduate by

inaugurating annual oratorical contests for the University, in which the College champions will compete for University honors. A committee has been formed to arrange details.

The Parliament is also considering the advisability of issuing an authoritative directory; containing the names, addresses, and telephone numbers of all Undergraduates, along with other useful information. One of the chief aims in so doing would be to have the directory in the hands of the students as early as possible after College opens.

The administrative machinery of the Parliament is constantly being improved. The lowering of the percentage of representation from five to three per cent. has made the representative body less unwieldy. Some of the debates in the House have been quite spirited; but there is still room for improvement in the attendance, and the attendance is not likely to be increased so long as the duties of the Parliament remain almost wholly executive.

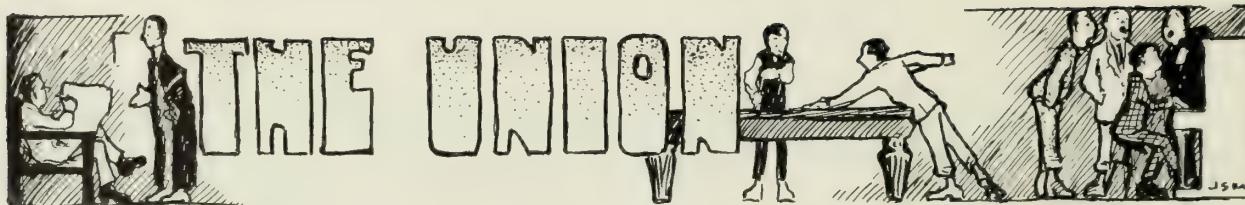

One of the most important moves of this year's Executive is the creation of an adequate system of bookkeeping for the Parliament and its dependent organizations, and the policy of having regular audits. Committees working in future years will find their duties greatly lightened by the existence of permanent books. The policy of bonding the chief financial officers has also been adopted. Sound business principles will henceforth govern the finances of all Parliamentary organizations.

In organizing and conducting the Students' parades on the occasion of the final Dominion Rugby championship, the Parliament rendered a distinct service to the University. President Falconer, in a very flattering letter, recognized the fact that the entire absence of disagreeable incidents to mar the day is due in great measure to the vigorous action of the Parliament.

THE EXECUTIVE OF THE PARLIAMENT OF THE UNDERGRADUATES, 1910-11.

R. G. Lewis	C. R. Carrie	R. A. Patterson	J. R. Rumball	A. D. Campbell
J. H. Urie	V. C. Spencer, B.A., <i>Treasurer</i>	D. E. Stanley Ryerson, <i>Vice-President</i>	W. E. Caven, <i>President</i>	C. N. Cochrane, <i>General Secretary</i>
				<i>Secretary of Committee</i>

THE Undergraduate Union, more popularly known as the "Union," was founded during the academic year of 1900-01, by some gentlemen who found the need of club rooms in the University very necessary to University life. It has been carried on successfully since then, and Undergraduates should be truly thankful for the work of these gentlemen.

As it stands at present, the "Union" occupies nine bright rooms in the west wing of the University College. The location, while not central, has one advantage, that it is situated close to the dining hall and is a good retreat for all those who desire a quiet pipe and a read after dinner. The Union is supplied with all the daily papers and the best monthly publications.

The part which this club plays in University life is one which should not be disregarded, but should receive closer attention and be given greater prominence. It serves as a common meeting place for men of all faculties and years, and its reading and games' rooms draw men together and encourage social intercourse between them, so necessary in an institution such as the University. Indeed, it is a recognized fact, that the best of friendships are formed and the best of fellows are found within its precincts.

In retiring from office the present Executive feel that the "Union" has probably not been all that it should have been, but that if it can be kept going until the new gymnasium is completed, it will be a very popular club when it enters its new quarters.

This year it has been under the Undergraduate Parliament, the members of the Union electing their own Executive as before, while the Secretary was appointed by the Parliament to look after their interests.

"THE COLONEL."

THE Literary and Scientific Society of University College, still the most august body in the University, has added another memorable year to its history.

The elections last March were fought out on the issue of "Responsible Government" vs. "The Oxford System of Public Debates." They were contested with even greater ardor than in preceding years, and the result was a very narrow majority for the Unionist party, and in favor of the latter policy. By the opening of the autumn term party animosities had largely fallen into oblivion and the two parties, desiring to advance the best interests of the Society, agreed to come together in a compromise, the Old Lits. accepting the Unionist proposals, and the Unionists consenting to have established a measure of responsible government. Under this admirable agreement the parties directed their attention to the discussion of live public questions. In connec-

tion with the debate on the subject of the Nationalist party in Quebec, the Society invited M. Lavergne to address them in order that they might have the Nationalist viewpoint presented to them at first-hand. The advent of M. Lavergne aroused great interest in this city, and the result was one of the largest meetings in the Society's history.

The annual events of the Lit., including the Open Meeting, Stag Night, Mock Parliament, the Arts Dinner and Dance, were all eminently successful and generally considered to be much above the previous standard set for these functions.

The Society has this year more than sustained the interest of the undergraduate body in its meetings, and, besides, has rendered valuable service in stimulating its interest in public affairs. This is, indeed, an admirable year's record, and we can only hope for the continuation of the good work in 1912.

UNIVERSITY COLLEGE LITERARY AND SCIENTIFIC SOCIETY, EXECUTIVE COMMITTEE, 1910-11.

The Engineering Society

THE Engineering Society of the University of Toronto was founded in the year 1885, as the Engineering Society of the School of Practical Science. The names most closely connected with its inception are those of Mr. Herbert Bowman, and Mr. T. Kennard Thomson, who, at that time were undergraduates. It is a students' society, only graduates and undergraduates in Engineering of the University being admitted as ordinary members.

The membership of the Society has been on the steady increase since its beginning; the total membership at its inception being only about thirty, until now there are about seven hundred and eighty undergraduate and over fourteen hundred graduate members.

The objects of the Society are manifold, the original object being to present to the members papers by qualified engineers and others on different engineering topics of interest to the students. These meetings were held on alternate weeks throughout the academic year until the year 1907, when the membership had grown to such proportions and so unwieldy, that it was decided, in order to facilitate good discussion of the papers, to hold sectional meetings alternately with the general meetings. The membership was divided into three sections, according to the courses of studies being pursued by the different members. At these sectional meetings papers, mostly by undergraduates, of interest to that particular section are read and discussed. All business pertaining to the Society as a whole is transacted at the general meetings, as also are read papers by graduates and men of

prominence in the engineering world, which are of interest to the Society as a whole.

About eighteen years ago the Society started a co-operative system for the purchase and sale of supplies. This supply department afforded such a reduction over former prices that the department has had phenomenal growth and now handles nearly all the supplies used in the Faculty. A permanent sales clerk is in attendance and the department is open during school hours throughout the year.

Formerly the more important papers presented before the Society, and all financial dealings of the Society, were published annually in the "Transactions" of the Society. By the year 1907 this was found to be quite inadequate to accommodate the number of excellent papers presented. A monthly journal, "Applied Science," was then started, to be published during the academic year. This journal, of which more is said in another part of this book, is now one of the Society's most important sources of revenue.

As one reviews the phenomenal growth of the Society, he looks with justifiable pride on his connection with it, and it gives him a feeling that there must be a strong and wide field of action for it in the future. While it is true that the work of the Society is mainly carried on by students, it is the hope of all its members that not all its benefits are conferred on themselves, but that the Engineering Society, with its strong and compact organization, will do much towards procuring for the engineering profession the recognition which is its due from the general public.

Knox College Theological and Literary Society

KNOX College can justly boast of two excellent organizations, "The Students' Missionary Society," and "The Theological and Literary Society," each meeting fortnightly. For over half a century the "Literary Society" has had a prominent part in the student life. Certain years have reached a very high level, and the present, under the fine leadership of E. R. McLean, B.A., assisted by an untiring Executive, has been markedly successful. Perhaps the reference to the Executive should be qualified somewhat, as a certain distinguished student thereof barely escaped having a vote of censure passed against him for continued absence, and the Recording Secretary on one occasion enjoyed the scintillating humor of the President for delaying an important meeting—(a second or two late with the minutes). Barring these offences, the work of the Executive has been splendid.

The Society was exceedingly fortunate in having Dr. Abbot, of University College, address the initial meeting. His lecture, "Browning's Theistic Method, as illustrated in his Poems, 'Caliban upon Setebos,' and 'Saul,'" was decidedly interesting, and elicited considerable discussion. On a later occasion Dr. Abbot delivered a most excellent sequel to his former lecture, concerning the "Problem of God."

The Executive, feeling that the queen of eloquence had fled from the old walls, spared no effort to have her return to the deserted throne, and with the music of her clear ringing voice, evoke from our lips a kindred note. Accordingly, debates were instituted, and the work was of such high order that the Society is confident that Knox will yet prove herself in the Inter-College series.

Both Inter-College debates in which Knox participated this year were held in our Convocation Hall, under the auspices of this Society. We won from Wycliffe, a function made singularly happy through our newly inducted professor, Dr. Davidson, presiding. In the same hall and under the same auspices we lost to McMaster, the invincible, and Mr. J. F. McKay, of "The Globe," sadly viewed the contest from the chair.

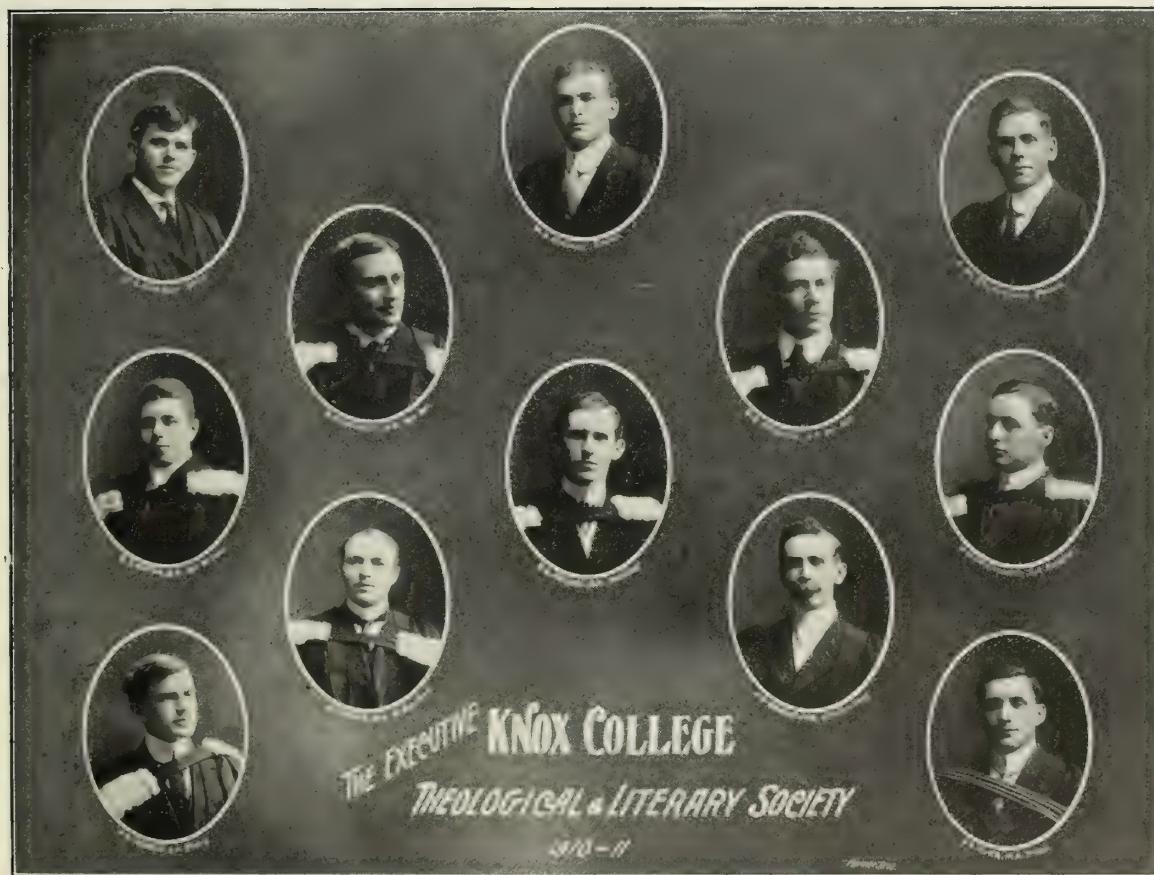

Chief Inspector Archibald, one of the busiest men in Toronto, was good enough to visit us one evening, and speak directly upon certain types of men with whom he has to deal. We were most pleased to learn that the officers are so diligent in their efforts to keep untarnished the fair name of "Toronto the Good" (?)

Knox students were not "At Home" this year, but spent considerable time in other homes. The passion for study was so deep, and the students' pockets so shallow, that they felt the supreme folly and utter impossibility of being once more the first star in the galaxy of the society season.

An entirely new item on the programme was the Model Presbytery, organized by R. N. Matheson, B.A., in which certification of students, trials for license, investigations of heresy, settlement and translation of ministers, were considered. The meeting proved to be one of special interest to the students.

Prof. V. E. Henderson, of Toronto University, favored the Society with a very fine illustrated lecture on "Architectural Development in Europe."

The officers of next year will find it no small task to present a series of meetings in keeping with those of the session just concluded.

O. A. C. Literary Society

THE Literary Executive of the autumn of 1910 had a peculiar position to fill, since most of the members were quite new to the tasks which immediately confronted them as soon as the term began. But, animated by a high and stern sense of duty, they plunged into the preparation of "At Homes," "Union Lits." and Shakespeare Recitals with an ardor as great as it was commendable. Not only as a group, but individually, did the Executive members distinguish themselves: while it may not be quite in place to mention names here, yet it seems impossible to avoid noting with what zeal Vining escorted the fair Guelphites who aided our literary programmes to and from our meetings, or the hearty zest with which Henry and Murray assisted in decorating Macdonald Hall previous to an "At Home." It is a matter of record, too, that Lund took his work so seriously that he insisted on personally seeing to it that his feminine acquaintances should not attend our meetings unaccompanied. Of Whale and Newhall, only, can it be said that they pursued the even tenor of their way, but this, perhaps, was all that could be expected of study-loving seniors. To Tisdale and Ratcliffe came stern honors as unwelcome as unexpected—

a sick-bed martyrdom being the rewards of their devoted work for the Society.

The chronicle of the literary events of the term is short and sweet. The usual Union debates, with the usual audience and the usual programme, occurred in the usual way, but, in addition, an extra meeting under VanSickle's guidance was given over to the "Girls' Debate"—a novelty and a considerable success. That girls can debate was thoroughly proved, less to the satisfaction of their male colleagues, perhaps, than to their hearers. The Shakespeare Recital was only pleasing from a monetary standpoint; the Ontario Agricultural College seems to have an evil destiny with regard to its dramatic reciters, and poor Shakespeare tossed in his final sleep that night. And, finally, when the last great event of the season was about to take place, when the notebook harried freshmen and the 60%-or-die sophomores had actually decided to quit for once their nightly wrestlings with the angel of agricultural knowledge to listen to the visitor from Ottawa,—then, at that final hour, a mild yet quite disconcerting illness entitled mumps laid its hand upon us and we yielded. A fifteen-minute election was held forthwith and the Executive of 1910 was no more.

History of the Foresters' Club, 1909-10

FROM the time of its formation, in the fall of 1908, the Foresters' Club has rendered yeoman service in establishing a feeling of good fellowship among the variously assorted undergraduates of the Faculty of Forestry, and in laying the foundation for a wholesome and necessary professional spirit. Professors and students have been enthusiastic in their support, and the attendance at the meetings has been uniformly excellent. We have been favored by practical and highly instructive addresses from several of the leaders in Canadian forestry. At other meetings the programme has been furnished by the undergraduate members of the Club, who give concise statements of their experiences, and thus gain some useful practice in public speaking.

Owing to the absence in the Maine woods of the President and Secretary-Treasurer, there were no meetings of the Club in the fall of

1909, but in the second term of the session, its activities were many and varied. The chief items of business were the adoption of a yell and a pin (a suggestive combination), the exchange of courtesies with other Forestry schools, a petition for fire ranging employment which was sent to the Ontario Government and the regular election of officers at the close of the year. The speakers who addressed the Club included Dean Fernow and Dr. Howe, of the Faculty; Mr. Aubrey White and Mr. Wilson, of the Ontario Department of Lands, Forests and Mines; Mr. R. H. Campbell, of the Dominion Forestry and Irrigation Branch; Mr. James Lawler, Secretary of the Canadian Forestry Association, and Mr. Kelly Evans, of the Forest, Fish and Game Protective Association.

Three meetings were held in the fall of 1910, at the first of which the programme consisted of descriptions by the undergraduates of their summer experiences. The second heard Dean Fernow tell of the forest conditions of Europe as he saw them on his recent trip, and the third listened to an interesting talk by Professor Faull on "Mutations."

Royal Dental Society

THE Royal Dental Society of the Royal College of Dental Surgeons is an organization conducted by the student body.

At its meetings, which are held at stated intervals during the session, prominent men of the Medical and Dental professions are secured to read papers and give demonstrations in the different branches of Dentistry. The interest taken by these men is shown by their willingness to give papers at the meetings.

That the students appreciate the efforts of the committee to present something of sufficient interest and profit to repay them for the evening so spent has always been evinced by the large numbers who have regularly attended, taking part in the discussions and eagerly looking forward to the future meetings.

The members of the different classes are brought together in this way, and professional development is provided as a preliminary to the Ontario Dental Society.

THE ROYAL DENTAL SOCIETY EXECUTIVE, 1910-11.

The University College Women's Literary Society, 1910-11

THE Women's Literary Society has met with unparalleled success during the past year. The unabated enthusiasm and good attendance has shown that the optimism concerning the welfare of the Society felt in the beginning of the year has been in every way justified. The first meeting of the Society, which took the form of an Autumn Tea, was held on the 8th of October. Over three hundred and fifty were present—undergraduates, graduates, and wives of the Faculty. Mrs. Falconer was the guest of honor, and Mrs. Addison and Miss Charlotte Ross responded to the toasts of the Faculty and the Alumnae.

The regular meetings have been exceptionally good and well-attended. The usual interest in Evangelia Settlement has by no means lessened, and the stirring address given in the Christmas term by Miss E. I. Elwood, M.A., on the activities at the Settlement for the year was much appreciated. Miss Millmas, B.A., '07, gave a vivid description of the various phases of life at Bryn Mawr, one of the leading universities of the United States. The Society felt particularly privileged in hearing a very interesting address by Professor Alexander

on the "History of the University of Toronto," which aroused great interest. One meeting was devoted, as usual, to the annual Inter-Collegiate Debate between St. Hilda's and University College, in which St. Hilda's were successful.

The opening meeting of the Easter term was devoted to readings on the social status of the women of other nations and their contributions to literature and art. At one of the following meetings, which was held in the Physics Building, Professor McLennan gave a most interesting address on the "Determination of Pitch." The unusual feature of the year has been the innovation of an Inter-Year Oratorical Contest, held at the opening meeting of the Society, instead of the usual play given by the Society.

The Society has just concluded one of the most successful years in its history. Great interest has been taken by the graduates whose frequent attendance has been much appreciated. We who look back on such a bright year in the past, trust that it may prove a happy augury for the future.

Victoria College Women's Literary Society

A N organization holding an important place in the lives of Victoria women students is the Women's Literary Society, which meets twice a month at the College. Besides the Inter-Year and Inter-College debates, held under its auspices, the Society holds a yearly Oration Contest, open to all its members.

What is becoming an established custom, and a very enjoyable one, too, is Alumnæ Day. Once a year the members of the Victoria College Alumnæ Association take charge of the meeting of the Literary Society, and thus give the students, past and present, an opportunity of becoming acquainted with each other.

The first meeting of the year is an informal reception to the girls of the freshman class. A few weeks later a formal reception, in conjunction with the Union Literary Society, is given. Near the end of the year Senior Day is held, when the seniors give utterance to most sage advice as to what the students ought and ought not to do. These Senior Days are a mixture of happiness and sorrow, but they always end gaily with songs and yells.

The Society has just closed a successful year, and turns its face, bright with anticipation, towards the future.

“THE Varsity” has run its course for three years as an undergraduate newspaper, and each year has served to justify more clearly its existence as a publication devoted principally to news. However pressing the need for purely literary periodicals, a newspaper—with all that the name implies—we must have. It is only thus that the extremely dissimilar branches of our many-sided institution, having their different aims and purposes, yet owning allegiance to a common Alma Mater, can be brought into touch and sympathy. It seems not too much to say, that since “The Varsity” began to appeal as a newspaper the various faculties and colleges of the University have come to know each other as never before.

From the first the watchword of “The Varsity” in the rôle of newspaper has been Progress. Each year an effort has been made toward improvements which the work of the previous year, and the accumulation of experience, rendered possible. This year the paper has been enlarged somewhat in size, and an attempt made to secure, as far as space would permit, a proper admixture of news having a general interest with that which chiefly concerned individual faculties. The editors have tried to be fair to all faculties in the allotment of space, taking into account the inevitable ebb and flow of events and the proportion of subscribers in the faculty concerned. A greater

emphasis on general news has led, perhaps, to a curtailment of many interesting items which were purely local. The existence of such problems only makes more plain the limitation of space and the need for expansion. The growing confidence of the student body has been shown by a considerable increase in the number of subscribers and in a more marked disposition to use the columns of the paper as a medium of opinion.

That “The Varsity” will continue to grow is inevitable. It has passed the experimental stage, but it has not yet attained to its full possibilities. An increase in size and in frequency of publication are both to be desired. Even under the present conditions, some change in the organization of the editorial staff is imperative. These are matters which will require the attention of those who have the direction of “The Varsity’s” destiny in the immediate future. By an agreement reached last spring with the Undergraduates’ Union, the former proprietors of “The Varsity,” the paper passed under the control of the Parliament of the Undergraduates, to remain so till the Union enters its new quarters in the new Massey Buildings. The problems of expansion and a proper organization of the editorial staff of “The Varsity” are worthy of the Parliament’s most careful attention, and will, doubtless, receive due consideration in its hands.

PROGRESS is only revealed by results, and year by year "Acta," the Victoria College publication, has steadily fulfilled its function in the

life of the College—so that to-day its cover page reveals to us that over one-third of the distance has been traversed by us toward the century mile-post. Thirty-four years for an individual—there are exceptions—seems no great age to attain, but for a college magazine in Canada it appears almost like hoary antiquity. However, our descendants—bless them—who sit in the editorial chair while the number of the 100th volume goes to press will probably correct such foolish ideas of ours as the above.

In looking back over the past, it is gratifying to note a growth in other things besides years. The magazine, as beffited its youth, was quiet, unassuming and small in its earlier years, but time has made changes. Ambition soon asserted itself, each staff of editors and managers endeavoring to outdo its predecessors until the board of to-day finds an increasingly high and therefore an increasingly difficult standard before them. What our descendants—above mentioned—will be producing, it is hard to imagine.

This year has, in some respects, marked the climax of achievement so far. In point of literary quality—if not in size—the magazine this

"Acta Victoriana"

year has reached a higher standard than heretofore. The paid-up subscription list has never in the history of the magazine been so large and has never stood on so excellent a financial basis. When judging the contents of the publication this year the best criterion, perhaps, is the comments of those not immediately concerned—and if the reviews of our exchanges can be taken as a standard, our "Christmas Number" was a rare production.

The policy this year has been to retain everything of value in former years, but not to hold too slavishly to tradition or custom, and, consequently, we have changed the water-tight compartment system of "departments" and thrown the contents into one continuous whole—making a more up-to-date magazine.

The difficulties of former years, of course, we have inherited, but we want to be honest and say that each time the departments were asked for their manuscript for the press it was on hand exactly when called for—without exception: and the printers have been most prompt in every case in having the magazine off the press and delivered at the College on schedule time.

And now that the year closes on another regime of "Acta," we find it is associated with the student life of the College closer than ever before. It is still the outlet of the literary ambitions of the wise—still a source of education and recreation to many. It is still the channel for expression of public opinion and still the moulding influence to a certain extent of the same. The old standards have been maintained, and, we hope, new ones of some small value have been established.

“Applied Science”

“APPLIED SCIENCE” has developed, during the past three years, from an experiment into a periodical that ranks high in the spreading of technical engineering literature in Canada. Previous to its inception, the papers and discussions of the Engineering Society were published in the form of a single pamphlet at the end of the academic year. In many ways this annual publication had long been unfavorable. In several ways, at least, a more frequent appearance of the Society proceedings pointed towards improvement, and the result of much deliberation was the appearance, in November, 1907, of Vol. 1., No. 1, of “Applied Science,”—“a monthly journal devoted to engineering and architecture, and incorporated with the annual transactions of the University of Toronto Engineering Society.”

The new publication was financed by the Society and carried at a loss for several years. Its subscription list comprised the names of all graduates and undergraduates in Engineering of the University, and of the old School of Practical Science.

At the present time, the Society is beginning to realize financial returns for its previous expenditure, as well as other benefits that have accrued from the founding of the monthly.

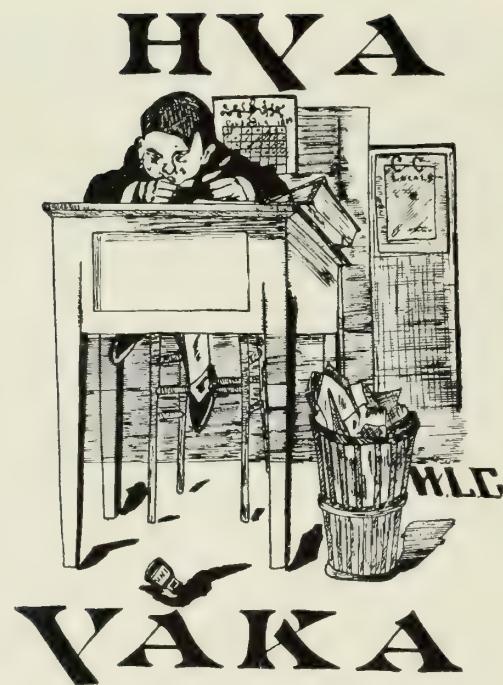

“Applied Science” has succeeded in maintaining a live connection between graduate and undergraduate, between the practising engineer and the engineer-to-be; also in supplying its readers with literature of interest and instruction to no small degree.

"HYA YAKA" continues to grow and prosper. The present year sees the completion of the eighth volume since "Hya Yaka" made its initial bow to the world of college journalism. With trepidation, forsooth, the little craft was launched, but it breasted the waves so successfully that it has steadily grown in popularity and utility. "Hya Yaka" is published, financed, and controlled by the students of R.C.D.S. The Editor, Business Manager, Secretary and Treasurer are

elected yearly by their fellows, and constitute, with their assistants, whom they choose, the "Hya Haka" Executive.

All the various aspects of college life, literary, athletic and scientific are found between its covers. The "locals" exist to bring to light the idiosyncracies of the seniors, the popularity of the juniors, the wisdom of the sophomores, and the crudities of the freshmen, while the editorial pages are concerned with the interests of the College as a whole.

"HYA YAKA" STAFF, R. C. D. S., 1910-11.

The "O. A. C. Review"

"The Dignity of a calling is its Utility."

USTLY it may be said that this journal stands in a class alone. It differs from the ordinary college paper in that it has a policy as well as a "local habitation and a name," and differs from the ordinary agricultural journal in that it deals exclusively with the scientific side of agriculture.

Its aims are: First, to portray college life. Second, to act as a connecting link between the college and the ex-student on the farm, and, third, to extend modern thought pertaining to farm and country life.

The first number appeared on November 29th, 1889. Professor H. H. Dean was the first managing editor, and to him belongs the

honor of launching the "little craft upon the sea of criticism." Since its first voyage it has encountered many a storm but has never experienced real danger.

At present it is a recognized force in agricultural journalism in this country; has a minimum circulation of 2,000 copies per month, and is read in nearly every country in the world.

Its future is assured as well as anything in human affairs can be. The indications are that after 1912 it will be published every month in the year; in 1915 it will own and operate a modern press and printing outfit, and by 1920 will employ a permanent staff of students the whole year round.

The last word in scientific agriculture belongs to the "O. A. C. Review."

ST. HILDA'S "CHRONICLE" STAFF.

The St. Hilda's "Chronicle"

THE St. Hilda's "Chronicle" was first published in the year '01-'02, and has ever since ranked as one of the leading interests in College life. Yet, in spite of much faithful work on the part of the successive staffs, its existence has been somewhat precarious. For a long time financial difficulties beset its path, and made it necessary for the editors to proceed with great caution. Then came a proposal to amalgamate with the "Trinity Review," and to hand over all business anxieties to the capable staff of that publication. This rest-cure, however, would have been similar in its effects to an overdose of morphine, giving ease, no doubt, but also putting an end to existence. The St. Hildians felt capable of freeing their paper from its hand-to-

mouth existence by their own efforts, and were, moreover, too loyal to it to wish to give it up under any circumstances. Their confidence has been justified. The "Chronicle" completed last year with a substantial balance on hand, so that this year the staff has felt justified in enlarging it to a considerable extent.

The staff is composed entirely of undergraduates, those in charge for the year '10-11 being: Editor-in-Chief, Miss Newton, '11; Sub-editors, Miss Waddington, '11, and Miss Crane, '12; Literary Notes, Miss Plummer, '12; Athletics, Miss Johnston, '12; St. Hilda's Notes, Miss Hoig, '13; Business Manager, Miss Harvey, '11; Advertising Manager, Miss Thomson, '12; Exchange, Miss Botsford, '12.

The Trinity University "Review"

1880-1911

HIRTY-ONE years of journalism at Trinity have resulted in the development of a private enterprise which spent eight years under the title "Rouge et Noir" into a college magazine which now, in its twenty-third volume, occupies a recognized place among our various organizations. At present the "Review" is in a very satisfactory condition. The efforts of Mr. Morley, the last Business Manager, established its finances on a secure basis, and in Mr. Harrington, his successor, there is no likelihood of any retrogression. Many changes have occurred on the editorial staff, owing to the withdrawal of Messrs. Wiseman, Andrews, Beasley, Abercrombie and Sweet and the appointment of Messrs. Kelley and Priest. Miss G. E. Crane supplies the St. Hilda's Notes.

In policy and general appearance the "Review" is much the same as last year, though an attempt has been made to represent student ability to a greater extent than in the past. Matters of local interest also have been given more space, and those desirous of reviews and other more learned articles have been referred to more appropriate journals.

Such a policy may have resulted in a slight lowering of the literary standard, but the object of a college paper has been more closely followed. The history of the "Review" has been told before in these pages and nothing more need be added.

The Board of Management for the present academic year consists of: J. H. Dixon, B.A., Editor-in-Chief; S. E. Harrington, Business Manager; Prof. Young, Chairman and Editor for Convocation. Associate Editors: J. G. Althouse, T. L. Bruce, S. M. Adams, J. D. Kelley, A. H. Priest.

The "Arbor"

THIS is the latest arrival in the field. Last year a few daring spirits decided to attempt the hazardous task of guiding the perilous infancy of a college magazine. They were convinced that the undergraduate already had more opportunities to tell what he does rather than what he thinks, and the "Arbor" was founded to combat this evil. The result has been quite satisfactory. The magazine has appeared monthly and each issue has been interesting and of a high

order of merit. The undergraduate contributions have been numerous both in prose and poetry and the publication has kept an individuality of which the editors may well be proud.

The severest storms which the "Arbor" has to weather are the financial ones, which are the continual dread of all college ventures. The "Arbor" deserves a support in all the faculties which it does not always get. It is to be hoped that succeeding years will remedy this.

The University of Toronto Chess Club

THE University of Toronto Chess Club has done more than any other body in Canada to widen and strengthen public interest in Chess. The graduates that have left the University, after acquiring there a strong and sound knowledge of the game, positively cannot be numbered. This Club has furnished about one-third of the strong players of the Toronto Chess Club, and these all remain members of the University Chess Club.

This season the Club played two matches with the Toronto Chess

Club, both of which were won by the latter. The last Faculty vs. Students match was won by the former. At the monster meeting with the Toronto Chess Club in January, 1910, when the University Club won by 19 games to 15, the Graduates presented the University Championship Cup to Mr. H. G. Jewell, a freshman in University College. It is too early to say where the cup will go next; but the field has already been narrowed down to four students, two in Arts, one in Medicine, and one in Applied Science.

The Classical Association of University College

THE Classical Association, one of the oldest of University College institutions, has found the year of 1910-11 one of the most successful in its long and varied history. For many years the Association dragged along, practically a mere name, the interest in it being confined to one or two of the faculty and a scant half-dozen undergraduates. Two years ago the Association reverted to the custom of holding evening meetings, which proved so successful that its permanence seems certain. This year the Classical Association has held its meetings alternately in the afternoon and evening, and a good attendance is the result. During the year the members of the Association were the guests of Principal Hutton, Prof. Milner, and Prof. Fletcher. Addresses were given by Principal Hutton, Prof. Kirkwood, Prof. Robertson and Mr. R. C. Reade, and papers read by Miss N. Belcher, '11, on "Thucydides Mythistoricus;" Mr. C. W. Stanley, '11, "Greek Oratory;" Mr. D. E. Hamilton, '11, "Extent of the Realization of the Ideals of Pericles' Funeral Oration;" Mr.

C. E. Luce, '11, "Herodotus' Conception of History;" Mr. V. E. Way, '12, "Aristophanes and Athenian Politics;" Mr. W. D. T. Atkinson, '12, "Aristophanes and Euripides;" Mr. H. E. A. Rose, '13, "Present State of the Homeric Question;" Mr. J. H. Pedley, '13, "Political Ideals of the Funeral Oration;" and Mr. R. G. Beattie, '14, "Review of Andrew Lang's 'Homer and his Age.'"

OFFICERS, 1910-11.

Honorary President, Principal Hutton.

2nd Year Councillor, Miss J. Reade, '13.
1st Year Councillor, R. G. Beattie, '14.

Inter-University Debating Union

Students at the University of Toronto are usually so fully occupied and so rapt in watching the trophies which their brawny warriors continually bring home, that they are liable to overlook the victory which has been won this year in the higher realm of debate. That Toronto should worst Queen's in this department has probably excited little comment, yet it is in all respects a notable achievement. The way was paved by the defeat which Mr. J. A. Shirley and Mr. D. Mackenzie-Naughton administered to Ottawa College in the preliminaries. This brought Toronto and Queen's into the finals.

The debate was held in Convocation Hall on January 24th, on the subject, "Resolved, that the evils incident to the party system

are greater than its benefits." Mr. Andrew Sibbald (U.C.) and Mr. C. W. Stanley (Vic.), both of the Class of 1911, upheld the affirmative. That they should be able to do so successfully speaks volumes for their oratory and the general excellence of their material.

The judges, in giving their decision, complimented all the speakers on the ability which they had shown. It is to be regretted that the attendance at such debates as these should be so small. This was, indeed, the only lamentable feature of the evening's proceedings. Possibly interest will awaken, and, in the meanwhile, too much praise cannot be given to Messrs. Sibbald and Stanley for the honor which they have brought to the University.

The Western Club of the University of Toronto

In November, 1907, a few wide-awake, enthusiastic Westerners broached the project of forming a Club for students from the West. The outcome was the organization of the Western Club of the University of Toronto. Those eligible for membership were all students having their homes west of the eastern boundary of Manitoba in Canada and west of the Mississippi in the United States. The object of the Club was to encourage a spirit of fraternity among Western students in Toronto University and to advance the interests of the College in the West. Like most young institutions, the Club had to assert its rights to existence, and the struggle has been hard at times; but virility and optimism, which are marked characteristics of the country which the Club

represents, placed it in good standing; and now it bids fair to become one of the great factors in University life. So far the Club has been honored by President Falconer and Dr. Goggin as successive heads of the organization, which can also boast of such men as Turner, Brett and Buchanan in the President's chair, and Fraser, the Rhodes' Scholar, in the office of Secretary. The frequent social functions given by the Club have been fruitful of much good-fellowship, not only among the Western students of Toronto University, but among those of other universities where Western Clubs are in existence. As yet, in Toronto, there are no permanent club rooms, and this is a considerable drawback to the full success of the Club. However, the success so far attained has justified all efforts of members and sympathizers, and the outlook for the future of the Club is bright indeed.

The University of Toronto Electrical Club

THE Club completes its sixth year a healthy and flourishing organization. The continued interest it has enlisted among the students shows that it has justified its existence, and that it is an important factor in the activities of student life.

The membership is limited to the Third and Fourth Year classes in Electrical and Mechanical Engineering. Its objects are to give the members an idea of modern practice in the branches of Mechanical and Electrical Engineering by means of the presentation of papers, either by members who have had practical experience during the vacations, or by engineers of experience; and also to develop facility in public speaking among engineering students by discussion of the papers presented.

The Club has been favored with papers of a high order of excellence, and these were so selected as to include, as far as possible, all the latest important developments in mechanical or electrical branches. The discussions have in all cases been very complete and interesting.

During the spring term excursions were arranged to various points of engineering interest throughout the city. These enabled the students to get a glimpse of the methods and organization of manufacturing companies.

The Club is collecting a reference library for the convenience of the members. It consists chiefly of the publications of the leading engineering companies, both in America and Europe, and now contains several hundred volumes and pamphlets. It has proved of special value to Fourth Year men in connection with thesis work.

With a view to widening its sphere of usefulness, it has been suggested that an effort be made to incorporate the Club as the University of Toronto branch of the American Institute of Electrical Engineers. Nothing definite has been arrived at yet, but next year may see the accomplishment of this very desirable end.

This brief description will, it is hoped, be sufficient to explain how the Club is trying to do its share in meeting the needs of the students, a purpose which is in itself sufficient apology for its existence.

The Industrial Chemical Club

THE Industrial Chemical Club of the Faculty of Applied Science of the University of Toronto was organized in 1909, mainly through the efforts of its first president, J. A. MacKenzie Williams, B.A.Sc., '09. Its membership consists of graduates and undergraduates of Departments 5 and 6, *i.e.*, the courses of "Applied Chemistry" and "Chemical Engineering." Young as it is, it has, however, fully justified its existence and is now one of the leading student organizations connected with the Faculty of Applied Science.

The object of the Club is to promote the study of Industrial Chemistry and Chemical Engineering and, for this purpose, every member is required to take part in the reading of papers which deal wholly or in part with the problems connected with the chief chemical industries. For this purpose, illustrated lectures, preceded by an informal dinner and short musical programme, are held fortnightly, and several of the undergraduates each deliver an original paper, which covers a particular phase of the topic of discussion. Graduate members, many of them filling important positions, address the meeting, thus emphasizing the practical side and pointing out the problems and difficulties to be met with and overcome. In this way the history, evolution and modern practice of every important industry are fully described, and likewise the chemical and engineering features of the process, together with the business management and organization of

the company and its position in the industrial world. Thus each member takes a personal interest in the welfare of the Club, and is given an incentive to industry and research. Moreover, the art of public speaking is developed and this fills a long-felt want, for it is everywhere acknowledged that engineers in their technical training do not have sufficient practice in this line. On the day following the lecture, an excursion is held to one of the numerous industrial chemical concerns located in the city or vicinity. Thus, with the theory of the process fresh in his mind from the lecture of the night before, one derives the maximum amount of benefit from the practical knowledge gained by actually seeing the working process in full operation.

The Industrial Chemical Club is a live and progressive club. Its members have access to the meetings of the Canadian section of the "Society of Chemical Industry," acknowledged to be one of the leading societies of the world, and in this way the student is brought into personal contact with the men of affairs, the men who "do things," and who are building up the great chemical industries which play such an important part in shaping the destiny of the Dominion of Canada. Such advantages cannot be overestimated and, though our graduates of Departments 5 and 6 have certainly "made good" in the past and are doing so now, it is safe to say that the I.C.C. will do its full share in turning out even better men.

Applied Science Debating Club

SOME years ago it was decided, after considerable discussion regarding the necessity of the Engineer's oratorical qualification, that an opportunity should be granted to the students in Applied Science to develop their powers for Public Speaking. An impromptu Debating Society was therefore formed, under the auspices of the Y.M.C.A., to which every "School" man was invited weekly to take part in the short impromptu speeches. This was the origin of the Debating Club, now so well-known in University circles, and in connection therewith much credit is due to Mr. J. C. Stiles who was instrumental in its development.

Year after year the Club showed marked progress; the number of students who took advantage of its benefits continually increased, and the quality of debates improved to such a degree, that the great and lasting work of the Club is no longer in doubt. Each debate is conducted according to Parliamentary principles, a Speaker and Leaders being appointed for each succeeding meeting. At the close of every discussion the Critic is given an opportunity to enjoy himself.

A new and very interesting feature of the meetings during this

season is the Inter-Year debating contest, most enthusiastically indulged in by every available member.

The popularity of such a College function is shown by the Faculty of Medicine, who have, for some time, watched the growth of the Science Club and its good work, and who have finally taken steps to enjoy the pleasures of the "School" orators. At the close of the Autumn term an Inter-Faculty Debate was arranged between the two Clubs, on the subject: "Resolved, that it would be better for Canada at the present time to develop her resources than to spend her money in maintaining an Army and Navy."

A good deal of satisfaction was demonstrated by the "School" supporters when the judges announced that their representatives (in the accompanying photo) who argued for the affirmative, had "vanquished the Meds." A short address by Dr. Fotheringham, who presided, and a few selections by the Science Musicians added greatly to the enjoyment of the friendly contest.

It is the sincere desire of the Club that larger numbers from the Faculty of Applied Science will find it possible to be enrolled as members of the "Science" Debating Club.

APPLIED SCIENCE CHAMPION DEBATING TEAM.

O.A.C. Poultry Judging Team

FOR many years the Ontario Agricultural College has been represented in the Students' Live Stock Judging Competition at the International Live Stock Exposition, Chicago, and has on every occasion made an enviable record. This year a new departure was made, new fields being invaded, a team being entered in the Poultry Judging Contest at the great Boston Poultry Show. This first team to be

sent was very successful, winning first in judging utility stock, second in judging fancy stock, and capturing second place in the plucking contest, as well as making the highest total score. The team which has thus won such high honors for themselves and for the College, was composed of M. C. Herner, '11, and F. N. Marcellus, '11, the two ex-presidents of the O. A. C. Poultry Club.

F. N. MARCELLUS.

M. C. HERNER.

The O.A.C. Poultry Club

THIS, the youngest organization in connection with the Ontario Agricultural College, is, for its age, probably the strongest association at the institution. During some years past the poultry industry has been coming rapidly to the fore, and has been becoming more popular with all classes, and, as a result, many students at the College are deeply interested in poultry work. At various times those most interested got together and discussed problems that to them were very important. Plans for organization were discussed with the Professor of Poultry Husbandry, who promised every assistance in the work. Although there was much debating on the point, the plans for this organization did not mature until the fall term of 1908. At that time the Ontario Agricultural College Poultry Club was formed, the first Executive Board consisting of those men who were actively engaged in the formation of the Club. These officers were: Honorary President, Prof. W. R. Graham, B.S.A.; President, M. C. Herner, '11; 1st Vice-President, J. M. Lewis, '10; 2nd Vice-President, H. A. McAleer, '11; Secretary-Treasurer, H. A. Dorrance, '11.

With this very energetic Board, much was accomplished. Meetings were held at stated intervals during the College year, at which live topics were discussed, and at alternate meetings practical work

in connection with judging the various breeds of poultry was given. An excellent Club-room was fitted up, where the nucleus of a museum and library was started, and a liberal supply of up-to-date reading matter was placed at the disposal of those interested. Another very important feature of the work was the handling of the various texts in poultry husbandry, and at present the Club is in a position to fill orders for almost any work on poultry.

The following season F. N. Marcellus, '11, filled the position of Executive head of the Club, with J. H. Fay, '12, as Secretary. The work begun by the preceding Board was followed out and improved upon. At the request of the members of the Poultry Club, a new department—that of "Poultry"—was started in the "O. A. C. Review," and, among other things, judging competitions were begun.

The present Executive, shown on the opposite page, is carrying out very effectively the work so well begun. The Club is growing rapidly. From a membership of forty-five in its first term, it has grown until its list of members now numbers over one hundred. New lines of work are being suggested and are being put into practice from time to time. The present aim is to make the Club as practical and as far-reaching in its benefits as possible.

VICTORIA COLLEGE, CHAMPIONS OF I.C. D. U., 1910-11.

RELIGIOUS ORGANIZATIONS

University of Toronto Y.M.C.A.

THE University of Toronto Young Men's Christian Association is a federation of seven associations, which carry on local work in the Faculty of Medicine, Applied Science, Dentistry, Victoria College, University College, Faculty of Education, and the Ontario Agricultural College at Guelph.

President Falconer, in a "foreword" to the students, wrote: "In the Association you will find men who know the University and who will be of assistance to newcomers. No one Faculty is in control nor will you be confined to a narrow clique. The aim of the Association is, I believe, to serve each student to the utmost by affording him wholesome companionship, by providing opportunities for making friends of those whose ideals in life are inspired by the Christian spirit and by co-operating through each Faculty in maintaining a sane, vigorous

interest in all the worthy activities of the student and in the life of the University on the student side."

Five important departments indicate the prominent place of the Association in student life: New Student, Bible Study, Mission Study, Social and Settlement Work. These distinct phases illustrate the policy of attempting not only to guide and to train, but also to utilize the student life of the University for the promulgation of those principles which make for nobility of character and for a life of effective service to mankind.

The Association, with a volunteer staff of two hundred young men, carries on its work at the very heart of University life, offers to young men of character and leadership an opportunity to be of assistance to their fellows and presents the Christian life in its manly and practical aspects.

The Anglican Women's Club

THE Anglican Women's Club has taken a more prominent part in College life than ever before. The first meeting, which was held at the Church of England Deaconess' House early in the term, took the form of a tea. The freshies were enabled to become familiar with the aims and objects of the Club, and to meet the old girls. Meetings have been held monthly, and the girls have attended well and showed

much enthusiasm. Many prominent speakers have addressed us, among them being Dr. Griffith Thomas, of Wycliffe College. We have assisted in the social and philanthropic work of the Deaconess' Home, and it is to be hoped that the year 1911 will be as splendid a year for the Club as the past has been—in fact, that it will be a banner year.

EXECUTIVE OF THE FEDERAL BOARD OF INTERCOLLEGiate Y. W. C. A.

Miss Denton Miss McLachlan Miss Turner Miss Russell
Treasurer

Miss Richardson Miss Crawford Miss Craig, Miss Robinson Miss Farley
President
Absent Miss Steinhoff, Miss Fotheringham.

University College Y.W.C.A.

THE year 1910-11 will be ranked among the memorable years of the Y.W.C.A. The life of the Association has openly prospered. The attendance at the weekly meetings has increased to an average of eighty. There have been one hundred and sixty enrolled in the Bible Study and Mission Study Classes, conducted by the girls themselves. We have had a normal class, based on the "Decisive Hour of Christian Missions," most efficiently led by Mrs. Tackaberry, and with an enrollment of thirty. There have been also, in conjunction with Victoria and McMaster, two splendid courses in Bible Study, led by Prof. McLaughlin and Dr. Farmer, respectively. We have, as usual, contributed our share to the maintenance of our two noble representatives in Japan and India, and it is our intention to send an adequate delegation to the Summer Conference at Elgin House. Our truest success, however, does not lie in these outward signs of the times. We glory rather in the fresh enthusiasm that has manifested itself most vividly in our College this year—in the renewed interest in missions, exhibited particularly by the numbers that attended the Guelph Conference in December, and by all those who have willingly given time and money to the furtherance of missionary enterprise. We rejoice in the vitality shown in the extension work of the term. About twenty girls have throughout the year done systematic visiting of the sick. We should

like to emphasize this department even more next year. The Sunday School work at the Hayter Street Mission also demands our coöperation more and more urgently.

The special interest this year has been due, we feel, to three distinct causes. In the first place, the Elgin House Conference of last summer gave us a firm foundation. The enthusiasm of the dozen delegates proved distinctly infectious. Secondly, the weekly meetings have been particularly attractive. Such speakers as Miss Michi Kawai and Miss McDonald, from Japan; Miss Cook, from India; Mr. J. Lovell Murray, one of the secretaries of the Student Volunteer Movement, and Mr. Rohold, missionary to the Jews in the city, could not fail to hold the attention of their audiences. In the third place, we record with pride that our success is due in great measure to the energy, enthusiasm, and spirituality of our President and her Executive. We are exceedingly grateful, also, to those ladies of the Faculty who have given active proof of their interest in us.

We have aimed this year that every girl in College might live more consistently than ever before the only life worth living, that she might practise more diligently the "art of pleasing" and of sympathizing, and that she might find out anew the joy of closest friendship with "the lowly Jesus," and the blessed privilege of service rendered willingly to the Kingly King.

The Student Volunteer Union of Toronto

THIS organization, which has been a factor in the College life of Toronto for the last 15 years, is a Union of all Student Volunteers in the University of Toronto, the Theological Colleges, McMaster University and the Training Schools. Its members are those who have signed the declaration, "It is my purpose, if God permit, to become a foreign missionary," and who are preparing for missionary service in foreign lands. Its members are to be found in all the non-Christian nations of the world. The Union is affiliated with the University of Toronto Y.M.C.A. Its main objects are:

- (1) To bring all the Student Volunteers of the city into a harmonious unit of prayer and service.
- (2) To secure recruits for the foreign mission field.
- (3) To train lay leaders for the church at home.
- (4) To undertake such work within and without the College as will hasten "the evangelization of the world in this generation."

The Y.W.C.A. of Victoria College

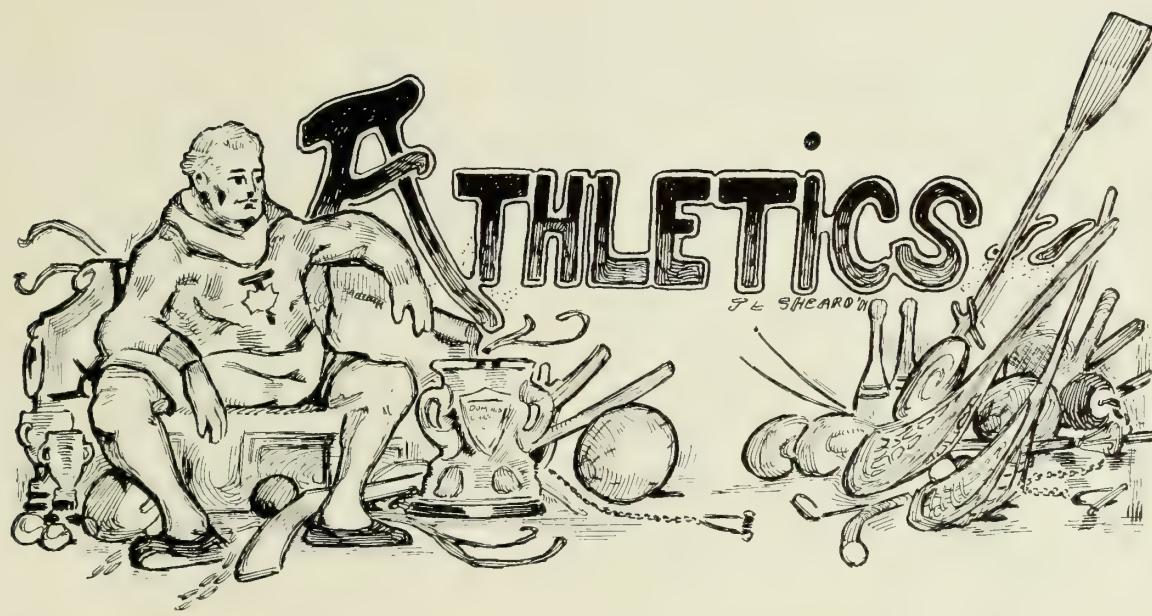

THE Young Women's Christian Association is an organization of vital importance among the young women undergraduates of Victoria College. Since its inception, in 1865, there has been a continual increase in attendance at the meetings which are held every Tuesday afternoon.

In connection with the Association a daily system of Bible Study is followed. Students are arranged in group classes which meet every week for conference and mutual help. This year, over three-fourths of the students are enrolled in these classes.

Another important branch of work done, is the extension work.

Each week a few girls go to Evangelia House and Fred Victor Mission to assist the teachers.

The students are taking a deeper interest in missions. Classes were formed which study the missionary problem in India, South America and our own country. Twenty of our members attended the Summer Conference at Elgin House; three representatives were sent to the Triennial Conference of the Dominion Council of Young Women Christian Associations at Ottawa. The Missionary Conference at Guelph, which thirteen of our members attended, did much to deepen the missionary spirit in our College.

A General Survey of Athletics

THE aim of the Athletic Department is the encouragement of all branches of athletics, so as to interest the greatest possible number of students.

A few years ago three or four branches of sport were indulged in by the students. To-day we have some fifteen or more branches in outdoor and indoor athletics, with a consequent increase in the number of students engaged therein.

Our work is very far from perfect because we have not compulsory physical training. Our present equipment would be inadequate if compulsory physical training were to be enforced.

With the new buildings will come compulsory physical examination and compulsory physical training.

The aim will be to allow a student to select the form of exercise in which he wishes to engage so many hours each week. However, where such form of athletics or exercise is insufficient or inadvisable, the student must follow the directions of the physical director.

The strength of our University athletics to-day does not lie in the fact that we are the winners in the majority of our Intercollegiate sports. The real strength is indicated by the number of Faculty teams engaged in the University leagues, viz.: The Mulock Cup Rugby series, Jennings Cup hockey series, Sifton Cup in basketball, the Soccer League, Harrier League, Track Club yearly games, Inter-Faculty gymnastic and swimming competitions. Since a physical examina-

tion was made compulsory before a student was allowed to engage in athletics, the work has been on a safe basis.

When every student about the University is taking some form of exercise, then, and only then, will the work be satisfactory to the physical director.

To attain this, every freshman, at least, should go through the full physical examination, including measurements, and the students of the other years should be inspected annually. Those of robust constitution could elect the form or forms of exercise in which they wished to indulge, and those less robust would have to take the form or forms of exercise prescribed for them.

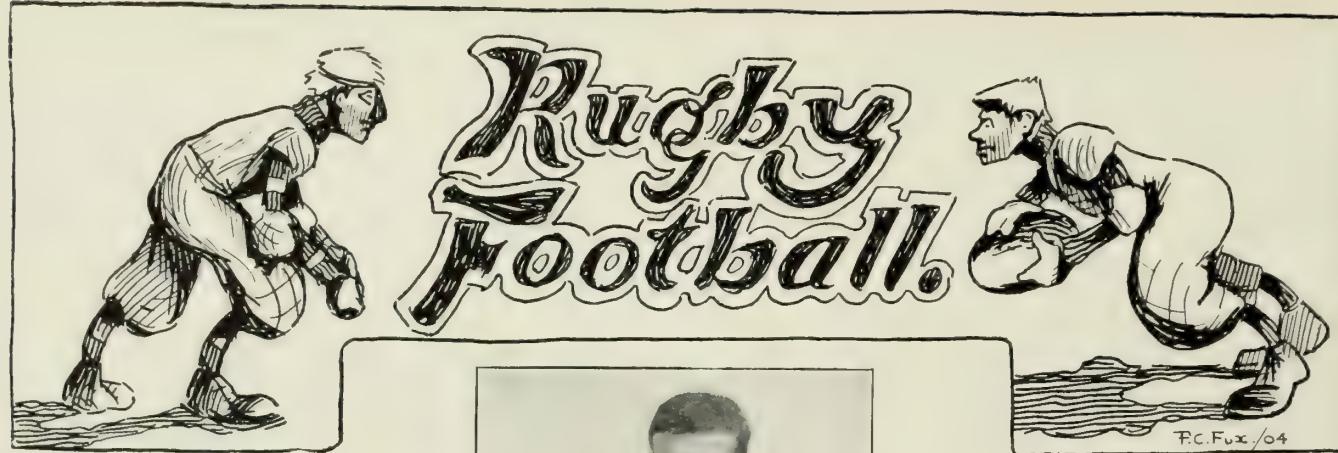

With the new buildings will come accommodation for all the students. Our athletic fields will be crowded as heretofore, but those wishing to indulge in indoor games, such as handball, basketball and indoor baseball, will find ample accommodation.

We are all naturally proud of the fact that our Rugby, Soccer, and Track Teams won the Intercollegiate honors, being the third time in succession for all of them. However, we are more proud of the fact that we have hundreds of our students engaged in the Inter-Faculty contests. But we will be prouder still when we can say that every student in the University of Toronto is indulging in some form of directed or supervised athletics.

JAS. W. BARTON, M.D.,
Physical Director.

THE GYMNASIUM, UNIVERSITY OF TORONTO.

"Mens sana in corpore sano."

THE last three years may well be considered the most illustrious period in the history of rugby football at this University; and the season of 1910, just concluded, a fitting climax to the two seasons that preceded it. The Intercollegiate championship has been won for the third time in succession, giving the club the privilege of retaining the challenge trophy. The Earl Grey Cup, emblematic of the Dominion championship, which has been held only by this club since its presentation to the C. R. U., has been retained for another year. These three seasons have clearly demonstrated, if there ever were a doubt, that the rugby football played in the Intercollegiate Union is at least equal to and in many ways superior to that played in the other leagues.

The prospects at the beginning of last October were hardly as bright as had been hoped for the making of a championship team, but, with good coaching and diligent practice, the team soon began to show signs of development. The first senior game took place in Rosedale on October 8th against McGill and the latter went down to defeat by the close score of 10 to 9. In this match, as in most of the first games of each season, Varsity did not play as well as later on, and were unfortunate in having one member of the team disabled for practically the rest of the season. The second match was played

at Rosedale on the following Saturday against Ottawa College. This game was a better exhibition of football and showed a great improvement in the Varsity team, who won by a score of 36 to 1. The next two matches were played away from home, the first against McGill, in Montreal, resulted in a win for Varsity by 8 to 1, the game being played on a very muddy field. The following Saturday, October 29th, Ottawa College were again defeated in Ottawa by the score of 26 to 5. On November 5th the most important of the Intercollegiate games took place in Rosedale against Queen's. The result of this match meant the winning of the championship for Varsity, and with this end in view the Blue and White went into the game determined to win. The contest was not as close as was expected, the final result being a score of 25 to 9. This game gave the championship to Varsity for the third time, but there still remained one more game to be played in Kingston. The match on the following Saturday did not affect the unbroken line of victories and ended the Intercollegiate season. The next two weeks demanded all the energy of the coach, the captain and the team to attain the goal which they had set out to reach. On November 19th the semi-finals were played at Rosedale against T. A. A. C., and brought the Blue and White one step nearer to the Dominion championship with a score of 22 to 3. The match was a good exhibition of clean football, and was attended by all the leading critics

A STUDY IN COMPARATIVE VALUES. VARSITY 16; TIGERS 7.

Rugby Football—Continued

of the game, including the members of the Hamilton Tiger team, who had come down to learn the fine points of the Varsity play. The final contest for the Dominion honors took place in Hamilton on November 26th, when the greatest crowd that has ever been gathered together to see a Canadian football game witnessed the famous Hamilton Tigers go down to defeat by the score of 16—7. This game ended the season of 1910 and gave the Canadian championship to the University for the fourth time in its history.

A great deal of credit should be given to the second team, who contributed to the strength of the seniors and gave them the practices that are needful to win the matches. The team had little trouble in winning their section this year and played off with R. M. C. for the intermediate championship. The first game of the finals took place in Toronto on November 5th, and resulted in a victory for the Blue and White, giving them a lead of 8 points. On the following Saturday, however, the Cadets defeated Varsity II. in Kingston by the same margin, thus tying the round. This necessitated a third game, which took place in Peterborough on November 19th, and was won after a hard struggle by R. M. C.

The third team have for several years won their junior championship and a great deal of praise is due them. This year they have gone through the season without a defeat, the final games being with the Kingston Collegiate Institute.

Ten teams were entered in the Mulock Cup series, showing the increasing interest that is being taken in the Inter-Faculty games. The matches were all well contested and the finals took place on November 25th, between Victoria College and Junior School, the game and championship going to the latter only after a hard struggle by the score of 15 to 11.

The honors obtained in the past season would be of little value if the main object had not been the development of clean, manly

sport. Great credit should be given those who led the senior team to victory and to the team as a whole for the perfect harmony that prevailed at all times. The true sportsmanship that has been shown in all the games has gained for the University as well as the club a valuable asset in the strong support of the outside public.

To the secretary-treasurer and the managers of each team, especially the senior team, falls a great deal of hard work for which very little credit is often given. In the past year this part of the executive have had more to do than usual, and has contributed a considerable share towards the success of the season.

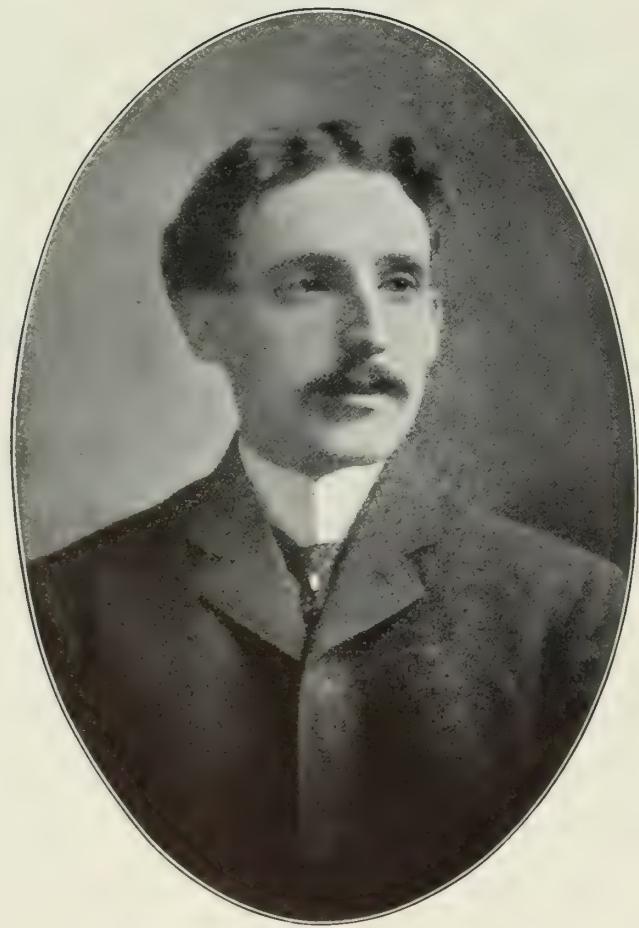

In concluding, it might be well to add that all the senior games this year have been played on the Rosedale grounds and that the increased accommodation has afforded a great stimulus to the interest of Intercollegiate rugby football. It is, however, to be hoped that we will soon not have to leave the University grounds to obtain proper accommodation, but will have an athletic field and stand that is not only a source of pride to the Club but to the institution to which we belong.

III. RUGBY TEAM, JUNIOR INTERCOLLEGiate CHAMPIONS.

THE hockey season of 1909-10 was on the whole a very successful one. With five of the previous year's senior team back and a number of recruits available from the second team prospects looked very bright for a good year in hockey. A number of good players also appeared among the freshmen, but these were not available for the senior team owing to the University rule barring freshmen from senior Intercollegiate games.

The Hockey Club made a new departure in entering the second team in the senior series of the O.H.A. as well as in the Intermediate Intercollegiate series, where they had played in previous years. Varsity III. played in the Junior Intercollegiate.

In each of their groups the Varsity teams did well. The seniors tied with McGill and Queen's. A misunderstanding, however, arose as to the play-off of this tie, and Varsity, considering that they were being unfairly treated by the other clubs, withdrew from Intercollegiate hockey. Queen's won the play-off from McGill.

In the Senior O.H.A. Varsity II. tied their group with Parkdale and T.A.A.C., but were beaten by a narrow margin by Parkdale, who later lost in a close game to St. Michael's College, winners of the O.H.A. Varsity II. won the Intermediate Intercollegiate Championship, winning from R.M.C. in the finals.

Varsity III. won their group, but lost in the finals to Kingston Collegiate.

In the Inter-Faculty Championship for the Jennings Cup fifteen teams competed, playing a total of about fifty games. Victoria College were the winners of the Cup.

The Varsity seniors were undoubtedly an excellent team, and but for the misunderstanding *re* the play-off would very likely have won the championship and the Allan Cup, which was for the season held by the Intercollegiate League.

Captain Tony Evans was the same brilliant forward who had two seasons previously helped to win the championship. McSloy at left wing, although handicapped by accidents throughout the season, played an excellent game, his shooting being a feature. Hanley at right while on the ice played a very useful, hard-checking game, while Frith's stick-handling and shooting from centre were responsible for many goals.

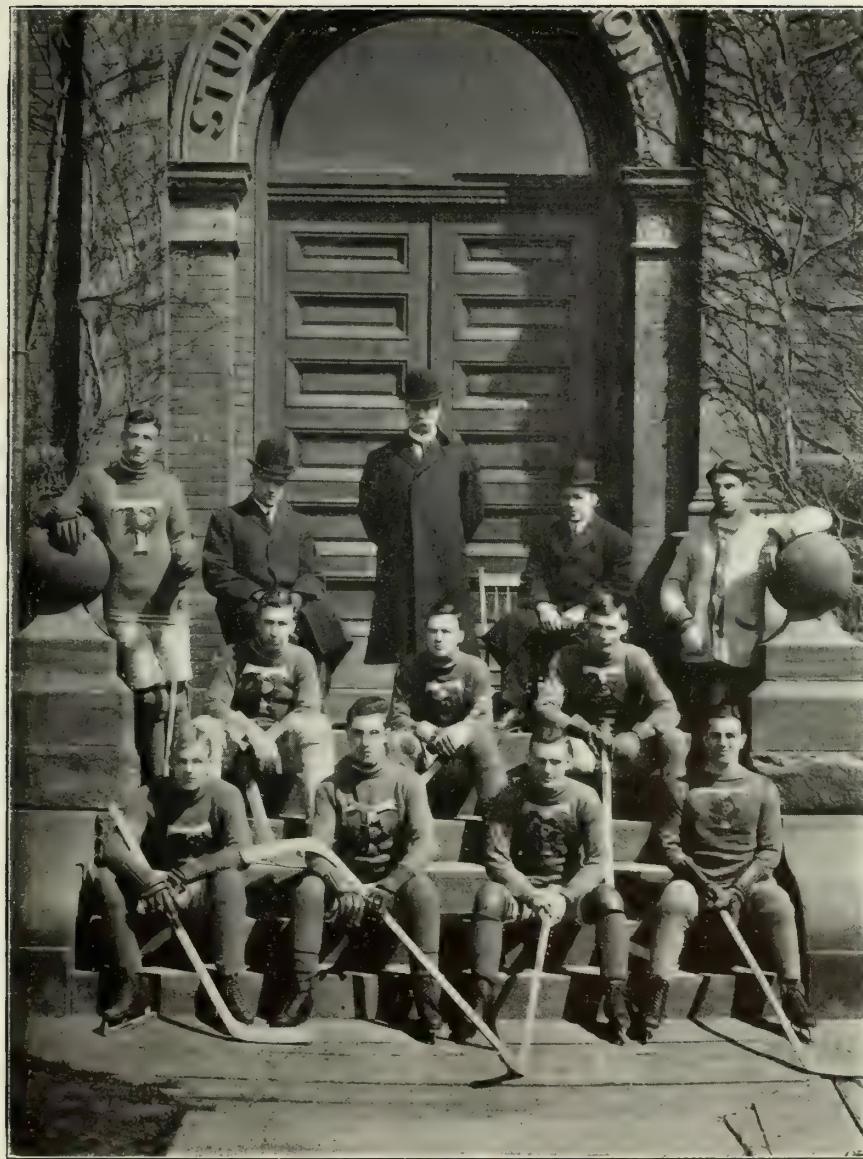

On the defence Gordon Gallie and Code were a very hard pair to pass and were excellently backed up by Richardson in goal. Armstrong, captain of the O.H.A. seniors, was spare man, and played in a number of the senior games. Chad Toms made a very capable manager.

The "T" colors were granted to Gallie, Code, Armstrong and Richardson, the other members of the team already having won their colors.

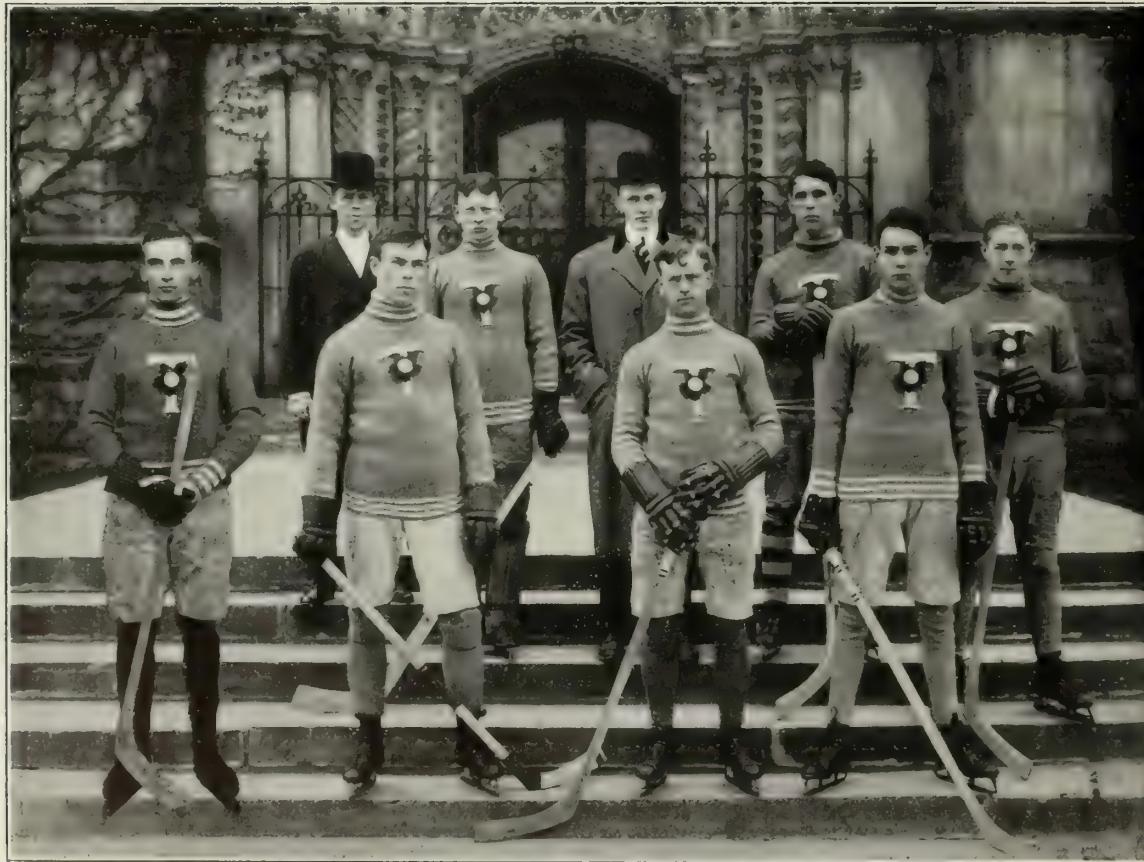

The second team was composed almost entirely of freshmen. The second "T" was granted to Parker, German, Caudwell, Tilt, Strome and Cotton.

Much of the success of the teams was undoubtedly due to the enthusiastic and capable coaching of Dr. E. Gallie.

With most of the senior team returning, and such a number of good men on the second team, hockey prospects look bright for the winning of all three championships for 1911.

THE year 1910 will be one long to be remembered in Association Football circles in the University. Not only because of the honors won by the Senior Varsity Team but also as a season of close and hard-fought games in both Senior and Intermediate Inter-Faculty contests. This branch of athletics is gaining more devotees every year, since it does not place a premium on the heavyweight but rather encourages the lighter and more agile man, while at the same time calling for quickness of thought and promptitude of action, an excellent training ground indeed for the development in the undergraduate of these two qualities.

In the Intercollegiate Series the great contest was between Queen's and Varsity, McGill being rather weak and Queen's having an exceptionally strong team. At the beginning of the season the outlook was none too bright for Varsity, but by vigorous training and the turning out of grand material totally unexpected by the management, Queen's were finally downed. Not content with the Intercollegiate Championship, Varsity next turned their attention to the Ontario Championship. After a weary wait, a sudden-death game was arranged with the Broadviews for the title. Although out of training for three weeks, spurred on by the glorious success of the Rugby Champions, and not to be outdone by them, the team met their opponents resolved to do or die. The game itself was played under great difficulties, on a snow-covered field, the thermometer hovering around zero and a small blizzard blowing. However, the result was never in doubt, Varsity winning all the way.

Turning to the Inter-Faculty Series, we find the City Teachers returned as winners in the senior division. This is a team made up of one-time Varsity students and they certainly proved a hard nut to crack for their younger brothers.

The final contest, City Teachers vs. Dentals, was bitterly contested, the former winning only in the last minute of play by the narrow margin of one goal. Five teams were entered in this series: S.P.S., Dental, Meds, Arts and City Teachers.

The Intermediate Series also provided keenly contested games, nine teams being entered. In the beginning of the season Pharmacy seemed to have the championship tucked safely away, only to have their rosy dreams rudely disturbed through the agency of Faculty of Education in the semi-finals. This left the play-off between the Faculty team and Junior Meds. Much to the surprise of everyone, the Meds proved by far the better team and won handily, score 3—1.

The only thing to be regretted in a year of splendid success athletically, especially in the Senior Intercollegiate Series, was the lack of financial success. The quality of ball played amply warrants much better support, and it should be accorded by the student body in succeeding seasons.

LACROSSE

IT is only quite recently that Lacrosse, our great national game, has been received with any mark of favor in the United States. However, in the last few years it has gradually won for itself a considerable popularity in many of the larger universities, which assures the game a prominent position in their university athletics in the very near future. Each year the University of Toronto sends a team to visit these universities, as much for the purpose of helping to maintain their enthusiasm as for defending the proud title of "Intercollegiate Champions of America," which has grown hoary with age in our possession. This year was one of the most successful yet experienced. The interest taken during the spring, the number of candidates for the team, and the calibre of the players chosen assures those interested that the popularity of Lacrosse as a University sport is certain.

On the morning of May 24, the members of the team succeeded in eluding the U. S. immigration officials at Niagara Falls, and in the afternoon of the same day won the first game of their schedule from Hobart College, Geneva, N.Y., by the score of 9—0. The next day witnessed the defeat of the Harvard stalwarts on the scene of many a tough contest, the Harvard Stadium; score 5—0. The members of the team, after being royally entertained at dinner in the Harvard Union, spent the evening sight-seeing in various parts of Boston. The next opponents were the Crescent A. C. Lacrosse Team of Brooklyn. Of the two games played there Varsity won the first handsomely by

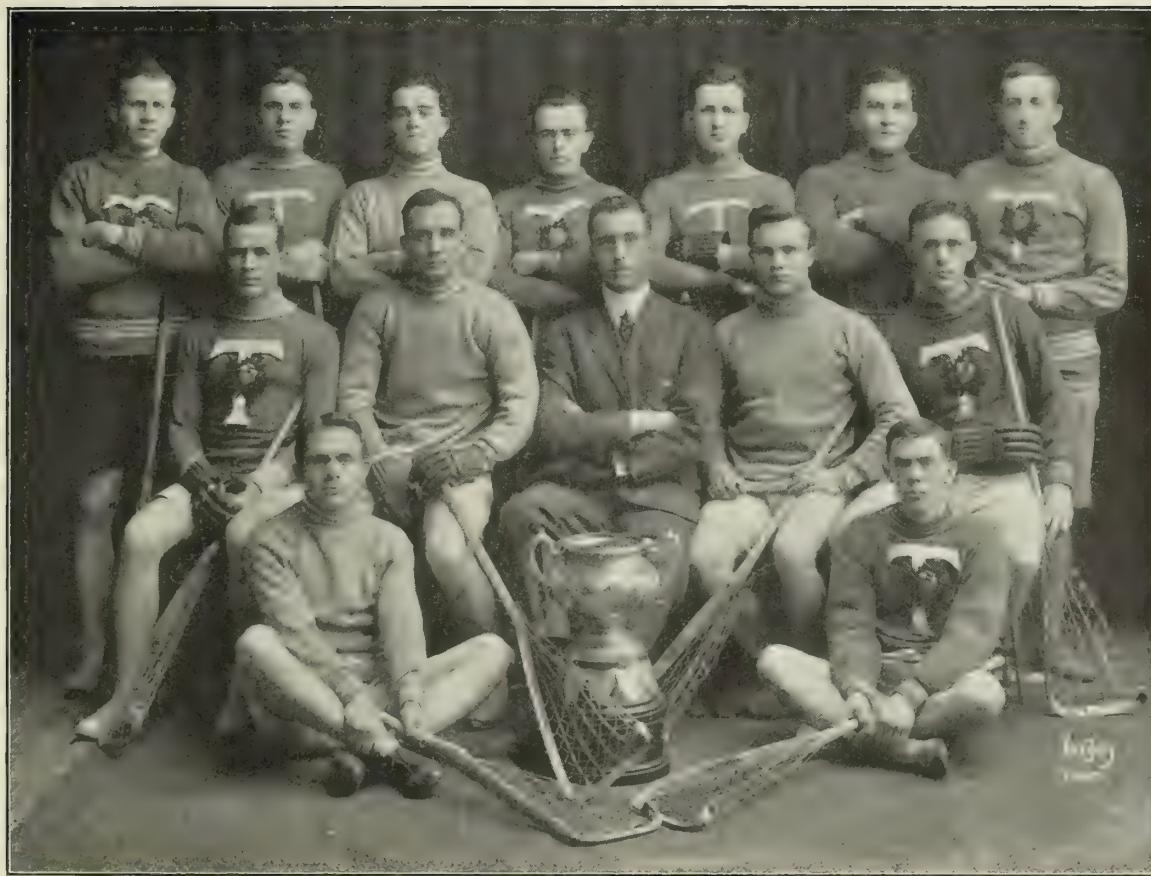

the score of 6—3, while the second, on May 30, resulted in a draw, 1—1. The members of the Crescent Club maintained their reputation as good hosts, and the boys spent a most enjoyable week in Brooklyn and New York.

The next week was spent by the team in Philadelphia in preparation for the match against Swarthmore, which was to decide the Intercollegiate Lacrosse Championship of America. On June 7 the Quaker College again vainly attempted to wrest the title from the Canadians. The result was never in doubt from the moment the ball was faced, and the final of 5—2 well indicates the respective merits of the teams.

The schedule was completed by a series of two games against the Alumni Association of Johns Hopkins University. The first game played on June 8th was the occasion of Varsity's sole defeat, by the close score of 2—1.

The strenuous game of the previous day had considerable effect on the form of play of the visitors. They redeemed their honor, however, three days later when, by 5 goals to 2, they defeated their opponents in a game that was a splendid exhibition of fast, clean lacrosse.

On the next day the members of the Varsity team returned to their native heath, with many pleasant recollections of a successful and enjoyable tour.

Absent—E. Irwin, A. Hinds, J. B. Hanley.

THE year 1910 has been a very successful year in track athletics around the University.

The team this year was small, well supported in the track but somewhat weak in the field events. At the Intercollegiate meet, held at Queen's, the "Blue and White" were represented by twelve men against the ever-confident McGill team. Some of the members of this year's team, as freshmen, helped to win the Intercollegiate trophy from McGill four years ago. The team looked weak without F. Halbhaus, but owing to the splendid team work of Sebert and Dent, the sprints were won for Toronto in a very decisive manner.

In the field events our team was weak, owing to the loss of Kay. Phillip and Brown, new men at the weights, show some sterling qualities, and will be a strong support to the team in coming years.

The "freshman rule" was a great drawback to track athletics this year when H. Duke was unable to compete at Queen's. He made a new record in the pole vault at our University games, clearing it at 10 feet 10 $\frac{1}{2}$ inches. Brieker, Zimmerman and Sifton, three likely looking freshmen, will be a strong support to keep Varsity in the lead in track athletics.

The splendid work of Mel. Brock was shown at the University games when he made two new records in the short distances. He won the half-mile in 2 min. and 2/5 secs., and the mile in 4.40 4/5. Mel's performance at Queen's was very gratifying also.

The Inter-Faculty Championship was won by the Arts Faculty, being won by Medicine for the previous four years.

We predict an exceedingly strong track team for the coming year, and do not overstep the mark in prophesying victory in 1911.

The Gymnasium Team

SINCE its beginning, several years ago, the Gymnasium Team has made steady progress, in spite of the obstacles in its way. The greatest of these is lack of enthusiasm, arising, no doubt, from the long season which this branch of athletics covers. Dr. Barton, the physical director, gives the team his support, and has contributed in no small measure to its past successes. We are fortunate in having, as instructor, Prof. Williams, a man who received his training in the British Army, and who thoroughly knows his work.

In 1908, two members of the team, G. A. Keith (last year's captain), and O. A. Elliot, were sent to London with the Canadian Olympic Team, to represent Canada in gymnastics. The other members of the team are: G. Kilpatrick, G. R. Workman, A. Mackenzie, F. T. Nichol, C. F. Elliot, T. R. Andrews, and those who became members last year, viz.: H. D. Davison, D. Blain, D. Sutherland, A. C. Roswell, F. Bowman, and G. D. Tillson.

Although four of our last year's team have left Varsity, there is a good turnout of freshmen in the gymnasium this year, and we look forward to a successful season.

Victoria College Athletic Union

ONE of the features that distinguishes the athletics of Victoria College is the great variety of forms in which they appear. At no season of the academic year is there a dearth of activity in the outdoor life of the College.

This development of an all-round athletic programme results in bringing almost every student into touch with the sportsmanship of the College in some phase or other, and not only creates a well-regulated *esprit de corps* in the undergraduate body as a whole, but favors the growth of a friendly rivalry and competition among the various departments. In addition to this, the individual student is made to take a personal interest in the athletics of the College by the representative character of the Athletic Union Executive. This body, when once elected, however, has complete control of the organization of the athletics for the ensuing year.

As a natural result, Victoria has an excellent record in athletics. In the fall of '09 she captured the Mulock Cup in the Inter-College

Rugby series, and, in addition, annexed the Soccer championship. In the Sifton Cup basketball series her team made the finals. Later in the same college year, she carried off the Jennings Cup as Inter-College hockey champions. In '10, Victoria again reached the finals as defender of the Mulock Cup, but lost out in a deciding game of a final tie score. In hockey, also, she made another record, and in tennis brought home the University championship.

In achieving such results the men of the College teams have at their disposal an ample campus and a well appointed athletic building together with tennis and alley courts. The College rink also counts materially as an asset in the athletic life of the institution, and affords a financial basis upon which the Executive may work, less hampered by fiscal considerations than would otherwise be possible.

As a logical outcome of the foregoing it is but natural that the representation of Victoria men on University teams continues to bear a good ratio to that of other Colleges.

O. A. C. Athletic Association

THE history of athletics at the College is as old as the College itself. Track and field meets were held every year from the first, but it was not until 1892 that the Association was organized. The first meet of the Association was held on June 4th, 1892, and it is worthy of note that one of the records, that of S. Curzon, of 19 feet 4 inches, in the running broad jump, still stands.

Rugby has been the most popular game, and it is also worthy of note that the first teams were among the best. The team of 1888 was, perhaps, the strongest that ever represented the College, defeating that year Upper Canada College, Trinity College, Toronto Second Fifteen, and the Guelph Rugby Team. They were, however, defeated by Toronto First Fifteen. Between 1891 and 1897, Rugby gave way to Association football, but the following year it again became the leading game. It was played with varying degrees of success until 1906, which year witnessed the winning of the Western College Association Trophy. Since that time the teams have been less successful, not because they were weaker, but because they were playing in much stronger company.

Though Rugby calls forth the greatest enthusiasm, the other games are not neglected. Hockey has always had a prominent place in winter, but owing to the fact that no covered rink is easily available, has never developed as Rugby has.

Indoor baseball and basketball have been played the last eight years with varying degrees of success, and though we have been unable to play in any recognized league, a large number of exhibition games have been arranged in which the teams did well.

Cricket and tennis have received a place also, but most of the boys being away during the summer season, these games have not been prominent.

Swimming and water polo are now coming quickly to the front and will occupy a prominent place in the future.

Some of the annual events are the Field Meet and Supper in early fall, the Freshmen Meet in the late fall, and the Indoor Meet in early spring, with the Athletic Concert directly following.

The fall of 1909 saw the greatest forward stride in athletics. The Association recognized that if it was to keep pace with the growth of the College it must be stronger financially. The annual subscription was raised from \$2.00 to \$4.00, and instead of a falling off in membership, as was predicted by some, it was largely increased. Everybody belongs now, and every team receives substantial support.

The gymnasium is the Association's most valuable asset. It is now well equipped with apparatus, showers and swimming tank, and a boxing and wrestling room. This year saw a general cleaning up and improvement of the walls and lights, with a reconstruction of the stage. Besides being used for general athletics, it is the scene of the Athletic Concert, Public Speaking and Oratorical Contests, and other College functions, where a large room is required. The arrangement of the stage is one of the best of its kind in America.

In the prominence of College athletics inter-year contests are not by any means neglected. Almost every evening during February and March sees a keen contest. Each year is represented by a team in each of the sports, hockey, baseball, basketball, and water polo, and in the fall term by a Rugby team. As much interest is manifested in these teams as in the College teams, though the Year spirit always gives way to the big games.

The Executive is composed of a President, Vice-President, Treasurer, Secretary, the Athletic Instructor, and two representatives from each of the Years, except the Third, whose representatives are the Vice-President and the Treasurer. Besides, a manager for each branch of sport is elected by the Association, and he is directly responsible to the Executive.

The Faculty recognize the value of the Association and give substantial support, and it is doubtful if anything else could be introduced at the College that would receive the backing that the Athletic does.

Among the different Associations and Organizations it stands first.

EXECUTIVE OF THE O.A.C. ATHLETIC ASSOCIATION.

The University College Athletic Association

ALTHOUGH the oldest of the Colleges on the Campus, University College, until the spring of 1910, never had an Athletic Association of her own. The reason for this seemingly lamentable state of affairs, no doubt, lay in the fact that University College, having been so long accustomed to think of herself as the whole University, could not get rid of the idea, even in these upstart days of S.P.S.'s and Medical Colleges, Wycliffes and "Vets.," and such things.

At any rate, last spring the Ancient and Honorable Literary Society got wind of the deficiency, and considerable dust was then and there raised. A committee, consisting mainly of Mr. "Duff" Wood, was appointed to draw up a constitution for the proposed new Association. Drawing up to a pair of aces was more in this committee's line, but he did his best to oblige. The result of his labors was submitted to a meeting of the Literary Society facetiously disguised as a "Mass-meeting of the Students of University College." The constitution as read was adopted, and the U.C.A.A. was born. A week or so after this "interesting event" the election of officers for the year 1910-11

took place. The bright and smiling faces of the Executive Committee then chosen may be seen opposite.

Speaking seriously, the objects of the Association are to encourage and promote a healthy interest in athletics on the part of the men of the College, and to support the prestige of the College in Inter-Faculty athletics by good organization, and efficient management of the various teams. To do its work effectively, the Association needs the active coöperation of all the men in the College. This, no doubt, it will get in greater measure as the years go on.

As far as this year's athletic record goes, "Arts" carried away premier honors at the Inter-Faculty track meet, but were defeated in the Mulock Cup Rugby series after a creditable season. The Sifton Cup for basketball, and the Jennings Cup are, at the time of writing, still undecided.

The Inter-Year "Baseball League," inaugurated last spring, was a great success in providing needed relaxation during the strenuous months of April and May. It will be repeated this year.

EXECUTIVE COMMITTEE UNIVERSITY COLLEGE ATHLETIC ASSOCIATION, 1910-11.

University College Women's Athletic Association

THE aim of the Athletic Association is to induce every student to engage in some form of athletics. This goal comes nearer every year, until now practically one-half of the women take part in some way or other.

By the addition of a tennis court in the quadrangle, more enthusiasm than ever was displayed in the tournament. Physical culture and fencing classes are held throughout the year under able instructors, but are probably not as successful as they would be if better

accommodation were afforded. On this account, also, the Men's Gymnasium has to be obtained once a week for basketball. The cup, presented by the Basketball League, has not yet been awarded, but is being keenly contested for. Swimming classes, conducted by Mr. Corsan, are held at the Young Women's Christian Guild, where an excellent exhibition was held by the Varsity Girls.

It is hoped that the curriculum will soon demand physical culture in every course. This, however, cannot be expected until proper accommodation is provided and will, of itself, invite membership.

President *Secretary-Treasurer*

Victoria College Women's Athletic Club

THE Victoria College Athletic Club, in its various departments, is enjoying unprecedented popularity this year. Although the tennis was handicapped by the destruction of three cinder courts, there seemed to be no lack of enthusiasm for the game, and the new grass court in the Annesley Hall grounds was appreciated greatly.

Basketball is becoming yearly more popular with the Victoria girls; the new Intercollegiate Cup promising to increase the interest in it. Inter-year teams are being formed, thus arousing great local enthusiasm.

The hockey called forth more sportive spirits than ever this year, and those who indulged, benefited by the excellent exercise that health-

ful games afford. The first hockey team suffered from the loss of several of its former stars, but some of the freshettes promise to equal, if not surpass, some of their predecessors. Year teams were also formed in hockey, and created great excitement. The Juniors were unquestionable victors, winning the unique record of having no goal scored against them.

Although Victoria can exhibit no Intercollegiate Cup, or flaunt no emblem of victory this year, the interest in sport around the College has been great, and of a good, wholesome nature. If V.C.A.C. has won no flying honors, it has at least afforded pleasure for many, and gained great local success.

St. Hilda's College Athletic Association

THE St. Hilda's College Athletic Association includes in its membership practically all the undergraduates and several graduates of St. Hilda's. The four sports to which attention is mainly directed—paper-chasing, tennis, basketball, and hockey—are vigorously pursued. Often have the residents in the vicinity of St. Hilda's stopped in their early morning employment of sweeping the front steps to watch a line of aspiring athletes pant past intent upon getting into condition for the long runs. Tennis is made extremely interesting by the keen competition for the Frances Endacott Trophy for the championship of St. Hilda's, and also by the Inter-College Tournament, in which the St. Hilda's team was this year successful, winning thirteen points out of a possible fifteen.

Basketball has taken a prominent position in College life on

account of the interest aroused by the possession of an Inter-Year cup, presented by some of the undergraduates, and of an Inter-College championship cup. This sport fills in the gap between tennis and hockey most acceptably and brings out many girls who are unable to take an active part in the other athletic diversions. The practices are held in the evenings in the Trinity gymnasium.

The prospects for hockey look brighter than usual. The team is working well together, and if enthusiasm counts for anything great success should be attained.

St. Hilda's is also represented in the University Women's Swimming Club. Last year a St. Hildian gained the championship of Toronto in the open contest.

ST. HILDA'S COLLEGE TENNIS TEAM.

U. of T. Swimming Club

THE Swimming Club, now in its third year, is progressing very favorably, perhaps a more appropriate adjective would be "swimmingly." Last winter the team travelled to Montreal, by rail, the water route, though more in their line, was then too uncomfortable. There they contested with the McGill team, but, as they were not used to the (strange) water, lost, but by only one point. This winter McGill comes here, and it is confidently expected that they will leave the cup for our men to drink from till next season, at least.

During the winter, contests are held with Central Y.M.C.A.,

O.A.C., and between the Faculties. The meet in December with Central Y. resulted in a tie, the others are yet to be held. The water polo team is practising faithfully and expects to "wipe the earth," as it were, with all opponents.

Officers 1910-1911:

President—M. McPhedran.

Vice-President— —. Parker.

Secretary—E. N. Macallum.

Manager—G. E. Darby.

O. A. C. Water Polo Team

THE year 1909 saw the formation of the Ontario League for Water Polo, a comparatively unknown branch of athletics, but one which deserves the consideration of sport-lovers, both from the athlete's and the spectator's standpoint. Whether this game will ever become popular in Canada remains to be seen. It seems that enthusiasm is on the increase, and, indeed, in Montreal the game has secured quite a strong foothold. The absence of covered baths, however, and the extremely short summer season militate against the general adoption of water polo as a definite branch of College athletics.

To those, however, who witnessed some of the games in this the first season of the Ontario League, it would seem that polo, once introduced, could not fail to gain popularity, especially among College men. Calling as it does for strength, wind, quickness, and an imperceptible good nature, it appeals as a training to all athletes. From a spectacular point of view it is admirable, the movement being continuous, the ball now at one end, now at the other, now lost to view under the surface, the interest never relaxing from the start to the final whistle.

The League of 1909 was composed of four teams—University of Toronto, Toronto Swimming Club, Ontario Agricultural College, and Central Y.M.C.A. The winning team was presented with a fine cup, the "Wanless Trophy," for water polo. This trophy was originally given to the Toronto S. C., which club in turn presented it to the League, for annual competition among the teams entered.

The first two games resulted, in each case, in a somewhat easy defeat of Central Y.M.C.A. by Varsity and Toronto S. C., respectively, the scores being 12-0 for Varsity and 13-0 for Toronto.

The third game, played in Guelph between Toronto and O. A. C. furnished a victory for the latter by the score of 6-4. The game was fast and even, and furnished good sport for about 150 students. The Guelph team won by quicker handling of the ball, and demonstrated the superiority of the shot from the surface as opposed to the style where the ball is first lifted clear and then delivered.

The game between O. A. C. and Y. M. C. A., being won on default by O. A. C., the next game brought together Varsity and Toronto S. C. The latter team won by one goal after a hard battle.

The final game of the series, O. A. C. and Varsity, met in Guelph water. This was undoubtedly the hardest game of the season, close tackling and hard ducking being the order of the day. O. A. C. opened the score, but Varsity soon evened up and from that point on it was O. A. C. in the lead till the third quarter, when Varsity drew even and secured the lead by one goal. In the fourth quarter, however, the Guelph team came back strong and scored three goals, and at the final whistle the score was 9-7 in favor of O. A. C.

Thus the result of the six games scheduled was as follows: O. A. C. won three; T. S. C. won two, lost one; Varsity won one, lost two; Central Y. M. C. A. lost three. This gave the trophy to the O. A. C., who were undefeated in the series.

It is worthy of note that this is the first occasion on which water polo has been played systematically at the O. A. C. and the success of the College team is the more gratifying on that account. With this auspicious beginning it is reasonable to look forward to the time when polo will have a place of honor among College athletics.

Manager—W. H. Wright.

Captain—H. L. Keegan.

THE year 1910 marked a great advance in tennis at the University. The average of playing was the highest for years, and the interest shown in the game was unprecedented.

The dearth of courts was a great drawback. In the fall tournament it was found necessary to use the Knox courts, as well as our own two. In spite of the endless trouble to the players which this entailed, they turned up for their games and the events were keenly contested. The undergraduate singles championship was won by W. B. Wiegand, the novice by P. L. Armstrong; while McEachren and Carlyle won the open doubles. The most brilliant player of the men was F. Y. McEachren. In the Intercollegiate meet at Kingston,

McEachren reached the final round, where Rhodes of R. M. C. defeated him in an interesting match. Varsity was tied with R. M. C. for second place, while McGill took the championship.

With the lady players, Miss Murphy won the Undergraduate event from Miss Hately. Some surprises were unearthed later: Miss Fairbairn and Miss Andras defeated Miss Moyes and Miss Summerhayes for the doubles, and Miss Fairbairn and McEachren won from Miss Moyes and Glassco in an exciting finish in the mixed event. The crowds for these matches were very large, and, altogether, the interest taken in the playing was greater than ever before.

Have you tried the new way of Tailoring, as produced by Fit-Reform?

Fit-Reform is more than the name of the finest hand-tailored Suits and Overcoats in the Dominion.

Fit-Reform is the title given to the basic idea of producing these well-nigh faultless garments at moderate prices.

The Fit-Reform System allows of alterations being made without affecting the style or service of a garment ; but alterations are seldom necessary.

Fit-Reform was the originator in Canada of this system of designing, measuring and tailoring, that has produced the most superior clothing sold in the Dominion or elsewhere. That is a big claim, but the clothing warrants it.

The Royal Military

College of Canada

HERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving instruction in all branches of military science to cadets and officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the

most valuable features of the course, and, in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years, in three terms of 9 1/2 months each.

The total cost of the course, including board, uniform, instructional material, and all extras, is about \$800.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the Secretary of the Militia Council, Ottawa, Ont.; or to the Commandant, Royal Military College, Kingston, Ont.

THE ONTARIO AGRICULTURAL COLLEGE, GUELPH, CANADA,

Is affiliated with the University of Toronto for advanced examinations and degrees. The course for the degree of Bachelor of the Science of Agriculture (B.S.A.) extends over a period of four years. The work of the first two years is embraced in the course prescribed for the Associate Diploma.

A graduate or undergraduate in Arts or Science of any reputable University, having had the necessary training in farm work, may proceed to the degree, upon presenting certificates of standing satisfactory to the head of the department to which the certificate relates, and approved by the President and passing examinations not covered by his certificates.

The work done previously by such a candidate will be accepted pro tanto for any part of the work prescribed for the degree, provided he submits to the President all credentials and records of standing from other institutions.

Detailed information will be gladly furnished.

VALEDICTORY

HE tremendous moment has come at last. Each year since our freshman days we have stood by and have watched a little company of our fellows pass out into the great world. Now it is our turn to go. Alma Mater stands with outstretched arm, her steady finger pointing to the fields of work and warfare that lie, mist-enshrouded, at her feet. Her eyes are filled with a mother's tenderness, a mother's hope, as solemnly she gives us her benediction and sends us on our way.

For four years she has sheltered and nurtured us. Gifts rich and various she has held before our eyes; our gain has been conditioned by our capacity and our willingness to receive. To some may have come disappointments, the discovery of limitations, vexing problems still unsolved. Others have grown strong in the strength of new-found powers, and stand ready to attempt deeds of valour and high emprise. But for one and all has come now the close of these days of probation. The great world lies before us, beckoning, menacing, loud with the din of battle. Alma Mater calls upon us to take our places in the fray, some of us destined for high promotion, others for humbler duties in the ranks. But whether our sphere be high or lowly, she expects us to acquit ourselves well, to keep before us the ideals of progress which she has sought to hold up, to be tireless in the quest of improvement, through success or failure, fair weather or foul.

Few may be the pebbles we have gathered on the wide-stretching shore of human knowledge; but if we have lifted our eyes to the horizon and caught the glory of a spiritual dawn, felt the impulse to high endeavor, and heard the voice that bids us "Follow the Gleam!" our days here have not been wasted. For we have learned that it is the perfecting of character that alone counts; that this is a process which does not end with our college days, but which goes on unceasingly, whatever the circumstance.

And so we bid thee farewell, Alma Mater! Pleasant have been our days together beneath thy fostering care. Now we, too, like the rest, go forth, bound by the ties which drew us to thee, into new fields of work and duty.

W. C. McNAUGHT.
